MONTGOMERY PARK, MEMPHIS, TENN.

10---Ten Stakes to Close January 2, 1904---10

For Spring Meeting, 1904, and Tennessee Derby and Oaks for 1905.

STAKES FOR 1905.

THE TENNESSEE DERBY FOR 1905—Estimated value \$10,000. SUBSCRIBED TO BY G. C. BENNETT & CO. For foals of 1902 (two-year-olds of 1904). \$5000 added. (Entrance free). For 1905. A sweepstakes for three-year-olds (foals of 1902). \$1500 each, \$75 forfeit, or \$15 if declared on or before May 2, 1904; \$30 if declared on or before January 2, 1905. All declarations void unless accompanied by the money. \$5000 added, of which \$1000 to second, \$500 to third, and fourth to save stake. Weights—Colts, 125 lbs.; geldings, 119 lbs.; fillies, 117 lbs. One mile and one-eighth.

THE TENNESSEE OAKS FOR 1905—For fillies (foals of 1902). Estimated value \$5000. \$2000 added. (Entrance free). For 1905. A sweepstakes for fillies, three-year-olds (foals of 1902). \$1000 each, \$40 forfeit, or \$10 if declared on or before May 2, 1904; \$20 if declared on or before January 2, 1905. All declarations void unless accompanied by the money. \$3000 added, of which \$400 to second, \$200 to third, and fourth to save stake. Weights, 117 lbs. One mile.

STAKES FOR 1904.

THE GASTON HOTEL STAKES—Estimated value \$2200. SUBSCRIBED TO BY GASTON'S HOTEL. For colts and geldings (foals of 1902). \$1000 added. (Entrance free). For 1904. A sweepstakes for two-year-olds, colts and geldings. \$10 to accompany nomination, and \$50 additional to start. \$1000 added, of which \$200 to second, and \$100 to third, fourth to save starting money. Four furlongs.

THE ARDELE STAKES—For fillies (foals of 1902). Estimated value \$2200. \$1000 added. (Entrance free). For 1904. A sweepstakes for two-year-old fillies. \$10 to accompany nomination, and \$50 additional to start. \$1000 added, of which \$200 to second and \$100 to third, fourth to save starting money. Four furlongs.

THE MEMPHIS STAKES—For two-year-olds (foals of 1902). Estimated value \$4000. \$2000 added. (Entrance free). For 1904. A sweepstakes for two-year-olds. \$10 to accompany nomination, and \$50 additional to start. \$3000 added, of which \$350 to second and \$150 to third, fourth to save starting money. 3 lbs. below the scale. PENALTY—A winner of a race of the value of \$1000 to the winner, 3 lbs. (selling excepted). ALLOWANCES—Non-winners of two races of the value of \$300 each, or one of the value of \$1000.

SPECIAL NOTICE—No entry will be received for any of these stakes except upon this condition: That all disputes, claims and objections arising out of the racing, or with respect to the interpretations of the conditions of any race, shall be decided by a majority of the Executive Committee present, or those whom they may appoint, and their decisions upon all points shall be final.

The Club also reserves the right to refuse the entries of any person, or the transfer of any entry, and without notice.

THIS RACE COURSE (MONTGOMERY PARK) is, without a doubt, one of the best in America to winter and train the thoroughbred, furnishing first-class and most comfortable quarters for both man and horse. On this track the majority of the good two-year-olds of the West each season are developed.

Entry Blanks or any information on application will be promptly furnished by the Secretary.

\$500 (selling race, purse and stake excepted) allowed 5 lbs.; maidens 10 lbs. Five furlongs.

THE HOTEL GAYOSO STAKES—Estimated value \$2000. SUBSCRIBED TO BY HOTEL GAYOSO. For foals of 1901 (three-year-olds of 1904). \$1000 added. (Entrance free). For 1904. A sweepstakes for three-year-olds (foals of 1901). \$10 to accompany nomination, \$50 additional to start. The Club to add \$1000, of which \$300 to second, and \$100 to third, the fourth to save starting money. A winner of a three-year-old stake race, when carrying their weight (colts 122, geldings 119, fillies 117). 3 lbs. penalty: of two or more, 5 lbs. ALLOWANCES—Beaten non-winners in 1904 allowed 5 lbs.; if unplaced, 8 lbs.; others never having won a two or three-year-old stake race (selling stakes excepted), allowed 7 lbs.; if such have never won a race of the value of \$400 in the winner (selling stakes and purse races excepted), allowed 12 lbs.; beaten maidens, 20 lbs. Allowances not cumulative. One mile.

SCALE OF THIS RACE.

	Colts	Geldings	Fillies
Those entitled to an allowance	122	119	117
Winner with weight up of one 3-year-old stake	123	120	118
Winner with weight up of two 3-year-old stakes	127	124	122
Beaten non-winners placed in 1904	117	114	112
Beaten non-winners unplaced in 1904	114	111	109
Non-winners of a 2 or 3-year-old stake (selling excepted)	115	112	110
Non-winner of a race of the value of \$400	110	107	105
Beaten maidens	102	99	97

FOR THREE-YEAR-OLDS AND UPWARD

THE MONTGOMERY HANDICAP—Estimated value \$5500. Silver cup or plate to winner. Handicap. \$3000 added. (Entrance free). For 1904. A handicap sweepstakes for three-year-olds and upward. \$50 each, half forfeit, or \$10 if declared. \$3000 added, of which \$400 to second, and \$250 to third, the fourth to save stake. In addition to the stake the winner will receive a valuable silver cup or plate, donated by the Club. Weights to be announced before 9 a. m. February 6th, and declarations to be made on or before February 20, 1904. All declarations void unless accompanied by the money. The winner of a race, after the weights are announced, of the value of \$500 to the winner, or two

times of any value (selling purse race excepted), 5 lbs. penalty; but penalty not to exceed scale weight if handicapped at less; those weighted at scale or more than scale weight by the handicapper will not be subject to a penalty. The scale to be Western Jockey Club Scale. This race to be run the opening day. One mile and one-sixteenth.

THE PEABODY HOTEL HANDICAP—Estimated value \$3000. SUBSCRIBED TO BY PEABODY HOTEL. Handicap. \$1500 added and \$500 silver cup or plate. (Entrance free). For 1904. A handicap sweepstakes for three-year-olds and upward. \$50 each, half forfeit, or \$10 if declared on or before April 5th. All declarations void unless accompanied by the money. \$1500 added, of which \$250 to second, and \$150 to third, fourth to save stake. In addition COL. R. B. SNOWDEN will add a silver cup or plate, the value of \$500, to go to the winner. Weights to be announced 7 days before the race. Winners of a race after the announcement of weights (selling race excepted), to carry 5 lbs. penalty. One mile and one-eighth.

THE TENNESSEE BREWING CO STAKES—Estimated value \$2500. SUBSCRIBED TO BY TENNESSEE BREWING CO. Selling stakes. \$1000 added. (Entrance free). For 1904. A selling sweepstakes for three-year-olds and upward. \$10 to accompany nomination and \$50 additional to start. \$1000 added, of which \$300 to second, and \$100 to third, fourth to save starting money. The winner to be sold at auction for \$3000 if for less; 3 lbs. allowed for each \$500 to \$2000; then 1 lb. for each \$100 less to \$500. Starters and selling price to be named through the entry-box by the usual time of closing for this day's racing, and those so named are liable for starting fee. Seven furlongs.

THE COTTON STEEPLECHASE STAKES—Steeplechase. Estimated value \$2500. \$1500 added. (Entrance free). For 1904. A steeplechase handicap sweepstakes for three-year-olds and upward. \$50 each, half forfeit, or \$10 if declared on or before April 30. All declarations void unless accompanied by the money. \$1500 added, of which \$250 to second and \$150 to third, the fourth to save stake. Weights to be announced two days before the race. PENALTY—Winner of steeplechase (selling excepted), after weights are announced, 5 lbs. Four or more horses of entirely different interest to start, or the race may be declared off. Starters to be named through the entry-box at usual time of closing the day before the race, and those named are liable for starting fee. About two miles.

the following consignment from the celebrated Palo Alto Stock Farm, absolutely the last of the horses on this great farm, all by great sires and from great mares:

COLOR AND SEX.	FOALING.	SIRE.	DAM.
Bay filly	May 20, 1903.	Nutwood Wilkes 2:16½.	Cressida 2:16½ by Palo Alto
Black colt	May 17, 1903.	McKinney 2:11¼.	Avena 2:19¼ by Palo Alto
Bay colt	April 23, 1904.	Monbells 2:23¼.	Maiden 2:25 by Electioneer
Black filly	April 22, 1903.	McKinney 2:11¼.	Elden 2:19¼ by Nephew
Chestnut colt	April 18, 1904.	Nutwood Wilkes 2:16½.	Paleta 2:16 by Palo Alto
Bay filly	April 15, 1903.	Nutwood Wilkes 2:16½.	Novelist 2:27 by Nerval
Bay filly	April 13, 1903.	Nutwood Wilkes 2:16½.	Liska 2:16½ by Electioneer
Bay filly	Mar. 31, 1903.	McKinney 2:11¼.	Lucyner 2:27 by Electioneer
Black filly	Mar. 24, 1903.	McKinney 2:11¼.	Aerolite by Palo Alto
Bay filly	Mar. 20, 1903.	Nutwood Wilkes 2:16½.	Adbuta by Advertiser
Black colt	Mar. 20, 1903.	McKinney 2:11¼.	Sweet Rose (1) 2:26¼ by Electioneer
Brown colt	Mar. 13, 1903.	Nazote 2:23¼.	Gertrude Russell 2:23¼ by Electioneer
Bay colt	Mar. 9, 1903.	Mendocino 2:19¼.	Mary Osborne (3) 2:28½ by Azmoor
Bay filly	Mar. 3, 1903.	Monbells 2:23¼.	Wildflower (3) 2:21 by Electioneer
Bay filly	Feby. 15, 1903.	Nutwood Wilkes 2:16½.	Expressive (3) 2:12¼ by Electioneer
Bay colt	Feby. 14, 1903.	Monbells 2:23¼.	Manzanita (4) 2:16 by Electioneer
Brown filly	Jan. 26, 1903.	Mendocino 2:19¼.	Lulu Wilkes by Geo. Wilkes
Bay colt	May 2, 1902.	Iran Alto 2:12¼.	Aria (3) 2:16¼ by Bernal
Brown colt	April 11, 1900.	McKinney 2:11¼.	Helena 2:11¼ by Electioneer
Bay mare	April 30, 1900.	Dexter Prince	Lady Agnes by Electioneer
Martion 2:26¼, b. m.	April 17, 1883.	Piedmont 2:17¼.	Lady Morgan by Hambletonian 10
Sonoma 2:28.	Mar. 19, 1883.	Electioneer	Sontag Mohawk by Mobaw Chief

Horses will be at yard January 11th for inspection. Send for Catalogues

FRED H. CHASE & CO., 1732 Market St., S. F.

At the same time and at the same place there will also be sold the stallion Daedalion 2:11 by Diablo 2:19¼, dam Grace, dam of two in 2:15, three in 2:30 by Buccaneer. Daedalion is one of the most promising young sires in California, and is able to race and reduce his record. Consigned by Geo. H. Fox, Clements, Cal.

To close a copartnership, Mr. C. A. Dorfee sends the following four by McKinney 2:11¼: Johnny McKenzie, two year old gelding, dam Baha by Ferdinand 1815, son of Strathmore, second dam Firewood by Fayette Wilkes, son of Geo. Wilkes, third dam by Blackwood 74 and fourth dam by Washington Denmark. This colt is a great prospect and is entered and paid up on in all the leading three year old stakes in California. Twilight and Daisy B., full sisters five and four years old by McKinney out of Stenwinder, dam of the great Directum 2:04. Those should be the greatest bloodmares ever bred in California. Bessie D., a filly by McKinney out of a mare by a son of Venture. She is bred much like the other two and a great prospect.

Geo. A. Davis of Pleasanton consigns the following: Directory, blk. g. 1901, by Rey Direct, dam Mamie H. by Alexander's Bay Allen; Rey Vera, blk. f. 1901, by Rey Direct—Antea by Antea; Anona, blk. f. 1903, by Charles Derby—May (dam of Bay Ram 2:35¼) by Antea; Charlotte, blk. f. 1902, by Charles Derby, Miss Direct by Direct; Mamie Rey, blk. f. 1902, by Rey Direct, dam Mamie H. by Alexander's Bay Allen.

Consigned by A. Berner, Redwood City: Yearling colt by Mendocino, dam Carmine by Electricity. Consigned by C. Harting, Nevada: Bay pacer by Falrose, dam Mischief, dam of Primrose 2:09¼. One of the grandest and best roadsters in California.

Consigned by I. L. Borden, San Francisco: Ch. g. N. L. B (2) 2:14 by Diablo, dam by Washington 2:27. This pacer worked a mile last year in 2:12¼. He is one of the best road horses in California and can be driven by a lady.

FRED H. CHASE & CO., 1732 Market St.

PALACE HOTEL, SAN FRANCISCO, CALIFORNIA.

TOURISTS and TRAVELERS will, now, with difficulty recognize the famous COURT into which for twenty-five years carriages have driven. This space of over a quarter of an acre has recently, by the addition of very handsome furniture, rugs, chandeliers and tropical plants, been converted into a lounging room—the FINEST IN THE WORLD.

The EMPIRE PARLOR—the PALM ROOM, furnished in Cerise, with Billiard and Pool tables for the ladies—the LOUIS XV PARLOR—the LADIES WRITING ROOM and numerous other modern improvements, together with the unexcelled Cuisine and the Most Convenient Location in the City—all add much to the ever increasing popularity of this most famous HOTEL.

San Francisco, Saturday, January 2, 1904.

THE FINAL SALE of Palo Alto Stock Farm horses will be held in this city on Thursday evening, January 14th. How many realize what this means? The final sale—the last of the Palo Alto Farm horses. The great farm, once the pride of every Californian, will breed trotters no more. The great industry founded by Governor Stanford is to pass absolutely and the pastures and paddocks and stables devoted to other uses. The farm that was the principal agent in making California one of the greatest trotting horse breeding localities in the world is to send its final consignment to the salesring. There are but twenty-two head, of these eighteen are yearlings, foals of 1903. They are the last crop; their sires and dams have been sold and are scattered all over the United States and some even are in Europe. These yearlings represent the very acme of Palo Alto breeding on the plan established by the lamented founder of the farm. With one or two exceptions the dams of these yearlings were bred at Palo Alto, and in 1902, when the last matings were made, Superintendent Covey selected as stallions to mate them with two of the greatest sires California has ever seen—McKinney and Nutwood Wilkes. Avena 2:19½ by Palo Alto, Elden 2:19½ by Nephew, Lucyneer by Electioneer, Aerolite by Palo Alto, Sweet Rose 2:26½ as a yearling by Electioneer, and the great race mare Helena 2:11½ by Electioneer were all bred to McKinney and their foals are in this sale. The McKinneys are deservedly popular. They have proven themselves race horses. McKinney is the only stallion in the world that has sired five 2:10 trotters, and yet every one of the five got his or her record in an actual race. Why should not these foals by this great horse out of as good mares as Palo Alto ever owned be worth something more than an average auction price? They will double in value for the next two years to a certainty. Cressida 2:18½ by Palo Alto, Palita 2:16 by the same horse, Novelist 2:27 by Norval, Liska 2:16½ by Electioneer, Adhuta by Advertiser, and the great three-year-old race mare Expressive 2:12½ were bred to Nutwood Wilkes 2:16½, the sire of the second fastest trotting stallion in the world, John A. McKerron 2:04½, and their foals will be sold at the sale of January 14th. Is not this the breeding that should be sought after? Will they not be worth more than they will bring? We answer an emphatic yes to both questions. Then there is a bay colt by Monhells out of Maiden 2:23 by Electioneer. This is royal breeding—two crosses of Electioneer and one of Beautiful Bells. A brown colt by Nazote (brother to Azote 2:04½) out of Gertrude Russell, own sister to Palo Alto 2:03½ represents the very highest point of trotting horse breeding up to date. A bay colt by Monhells out of Manzanita 2:16 by Electioneer is another royally bred one, the brown filly by the great sire Mendocino out of Lulu Wilkes, dam of Advertiser is like him, and a bay two-year-old by Iran Alto 2:12½, Palo Alto's greatest son, is out of Aria that took a three-year-old record of 2:16½ and is by Bernal 2:17. He should be a race horse and a sire. There are a couple of three-year-olds in the sale—one a brown colt by McKinney out of Helena 2:11½, and the other a filly by Dexter Prince out of Lady Agnes by Electioneer. Two broodmares with records, one by Piedmont, the other by Electioneer, complete the list. The list of those to be sold will be found in our advertising columns, giving age, sex and pedigree, but we advise every reader to send to Fred H. Chase & Co., 1732 Market street, San Francisco, for a catalogue. This well known firm will conduct the sale, and the horses will be at the yard Monday January 11th, for inspection.

OF THE STATE FAIRS held this side the Mississippi river during the year just passed none was so successful financially or caused more favorable comment than the Oregon State Fair held at Salem,

that State. The secretary's report for the year ending December 1, 1903, has recently been published in the *North Pacific Rural Spirit*, and shows that the net profits on the fair was \$4128.45. Among the receipts were \$10,000 appropriation from the State, \$10,134 gate receipts and \$7558 from entrance money. The sum of \$10,384.45, or just \$384.45 more than the State appropriation was paid out in premiums for live stock and other exhibits, and \$12,490 for purses. In the report of the secretary this statement is made: "The two large early closing stakes of \$2000 each were a great success, one bringing in \$2100 in entrance fees, the other \$2065. Besides this they brought together the best class of horses on the Pacific Coast, which attracted a large number of people, swelling our gate receipts, on the two days on which they were raced, to considerable more than one-half of the entire receipts." It is very evident from the report of Secretary Wisdom that the Oregon State Fair has been conducted in a business-like manner under the management of 1903. It was run as a fair and race meeting and not as a hookmaker's carnival, with the result that the public turned out to see the racing and made the fair a profitable one financially and otherwise. It might be well for the managers of California fairs that have failed to pay a profit in recent years to take a few pointers from this successful Oregon fair. Its racing program only lasted six days, and no book-making was permitted. There were never less than two and sometimes three good harness races each day and "the fair had the cordial support of the farmer and the business men alike," to use the secretary's language. There is no reason why California fairs cannot do as well as the Oregon ones, if the managers will get rid of the idea that they cannot afford to refuse the big bids made by the hookmakers. If they will but carefully look over their accounts they will see that every dollar of money received from the hookies is paid back for free purses for the running horses. There is much food for study and reflection in the report of the Oregon State Fair of 1903.

RACING ON THE ICE is one of the enjoyments of the winter season that Californians can never enjoy unless they should send their horses to the top of the Sierra Nevada mountains and arrange for racing on some of the lakes that lie at an altitude of from 7000 to 9000 feet above sea level, and are frozen over for a few weeks during December and January. Canada is the home of ice racing. An Eastern exchange says that on January 6, at Peterborough, the campaigners on the circuit of Canadian ice tracks will open the winter season. From Peterborough the trotters go to Port Perry, Kingston, Belleville and Napanee, finally rounding up at the real centre of the sport, Ottawa. At the capital the season of ice racing is one of great brilliancy. The races are patronized by Lord and Lady Minto and the society people who may be wintering in the picturesque city. A royal good time is always the result. A track for use this year is already being staked out on the Ottawa river in view of the Parliament buildings. It is ten minutes' drive from the centre of Ottawa. The most important meet of the season is that of the Central Canada Racing Association, which occurs from January 23 to 30, inclusive. There are two \$1000 purses for stake events, for trotters in the 2:40 class, and also for pacers of the same speed. The races are conducted in accordance with the rules of the National Trotting Association, and paid judges are employed.

ALEXANDER MCCORD'S DEATH, which occurred in this city two weeks ago, removed from our midst one of the most popular pioneer liverymen of California. At the time of his death he was proprietor of the Fashion Stables on Ellis street, which he had conducted for the past twenty-five years, and which is one of the leading stables of San Francisco. The cause of Mr. McCord's death was heart disease, he having suffered with that ailment for some time, and had been confined to his home for six weeks before death ended his suffering. Alex McCord was one of those genial, whole souled men who made friends and kept them. He had been in business here in San Francisco for forty years, was a regular road driver and owned and drove many good horses. He was a man of splendid physique and tremendous strength and conspicuous in any gathering of horse men.

THE DIRECTORS of the Pacific Coast Trotting Horse Breeders Association will meet at the Secretary's office, 36 Geary street, in this city, Thursday, January 7th, to arrange and announce stakes and purses for the big meeting the association will give this year. The Directors extend an invitation to the managers of all California tracks where harness racing is held, and the representatives of any or all the Agricultural Districts to meet with them and arrange for a harness racing circuit for 1904.

TOM SMITH, one of the veterans of California trotting horse breeders and trainers, intends retiring from the horse breeding business and offers all his horses for sale. Mr. Smith has never been an extensive breeder, compared to some of the owners of stock farms in California, but he has certainly been a successful one, as the records made by horses of his breeding will prove. He bred Tom Smith 2:13½, Columbus S. 2:17, Stella 2:15½, Little Mac 2:17½, Dollican 2:15½, George Washington 2:16½ and several other trotters with records, and the writer does not recall one pacer bred by him, although he may have bred a few. Mr. Smith used the stallions Mambrino Chief, Jr., McDonald Chief and George Washington and all their get with scarcely an exception were large, handsome square trotters and elegant roadsters. Among those he now offers for sale is the great broodmare Daisy S. that is the dam of Tom Smith 2:13½, Little Mac 2:27½, Sweet Rosie 2:28½, etc. Mr. Smith's horses are at Vallejo and can be seen at any time. Read his advertisement in this issue.

SPORTING BALLADS, a neatly bound volume containing the poems from the pen of R. L. Cary, Jr. (Hyder Ali) has been received at this office, for which the author has our thanks. The volume is handsomely illustrated and there is a neat introduction by Hugh Edmund Keough, the well known turf writer. R. L. Cary has many friends on this Coast who have read with pleasure his racing ballads published in the Eastern papers during the past few years and which have now been collected in book form, which should be in every sportsman's library.

Horse Sale at Portland.

On another page of this issue will be found the ad of J. L. McCarthy & Son, announcing their Second Spring Comhination Horse Sale (at auction), to take place at the Irvington race track, Portland, Ore., March 1, 2 and 3, 1904. Their sale of last spring demonstrated that they do not depend upon Portland alone for buyers, as there were horsemen present from every section of the Pacific Northwest, Montana, Idaho and British Columbia. The North Pacific Fair Association Circuit has grown rapidly within the past few years and the money now hung up by racing associations in that section compares favorably with any other circuit. Horses from California won over 75 per cent of the money given away on that circuit last fall and Northwestern horsemen are beginning to realize that they must have the best in order to hold their own. As a consequence Messrs. McCarthy & Son are daily receiving anxious inquiries as to whether there will be any California horses entered in their sale, which would make it seem as though it were a good opportunity to sell some well bred horses for the high dollar. Times in the Northwest are good and the demand for good horses of all classes will be very strong next spring. Many California horses won fame and money in the Northwest last fall and if taken back to the land of their triumph would undoubtedly bring every dollar they are worth. The sale last spring was a great success and McCarthy & Son are going to spare no pains to make their coming sale even more successful. If you have a good horse to sell write them for full particulars and entry blanks.

Hay is high at the present time. Ninety-two and a half cents is the average price per hundred pounds that the San Francisco houses bid for the Government shipments to the Philippine Islands. The price a ton will be from \$17.80 to \$19. Seattle's offer was from \$1.27½ to \$1.40 per hundred pounds. The 5000 tons will probably be accepted from San Francisco. Government hay has not been purchased here for some time, the reason being that the San Francisco hale has been too large to find favor with the men who have to convey it about the islands. If this city is awarded the contracts, the firms here say they will have to recompress the hay to the Government regulation bale of four feet. This fact is offered in explanation of the excess upon the current market price of \$16. Fifty cents is for hauling, \$2.50 for compressing, and 50 cents for waste.

They make automobiles handsomer and faster and cheaper and less odiferous and bigger, yet the horse turns up at his annual show in greater numbers and finer shape than ever. And more and more people go to see him, too. The doctors of evolution do not put the horse very close to the human creature in the matter of descent, but, compared to any possible motor car combination of metal and gasoline, man will ever look upon the horse as a brother. It is all well enough to say that sentiment counts for nothing in the days of dollars and cents, but it does, and you'll never take from the horse the lore and admiration man has given him from the beginning by anything whose sole cause for its existence is its speed, its expensiveness and its novelty.—*Rider and Driver.*

New Surrey, first class, with pole and shafts, canopy top, 1½ inch rubber tire, turn under, elegantly trimmed. Original price \$420, can be bought at Kenney Manufacturing Company, 531 Market street, San Francisco, for \$225. New lot of McMurray carts just arrived—1904 models.

Christmas Matinee at Los Angeles.

(Los Angeles Times.)

Thousands of people attended the matinee of the Los Angeles Driving Club on Christmas Day.

The afternoon's racing opened with a four-horse trot billed for the 2:50 class, youngsters competing, and J. H. Snowden's bay gelding Rondow, driven by himself, won in straight heats without difficulty. Godfrey Fritz appeared behind a brown gelding, Gen. Boodle by name, which did himself proud by finishing second in his first appearance on a matinee track. William Garland and M. B. Mosher had young animals entered, and the time was good for the class—2:34½ and 2:31 for both heats.

A 2:25 pace, second on the bill, went to W. L. Heller's brown mare Electra, a performer of much promise, who succeeded in doing the two miles around 2:20 and the last one faster than the first. E. J. Delorey and P. L. Budinger made bids, but were not there with the steady ones.

The third event, a free-for-all, was quite a "hoss race." The best "hoss" in it was Briney K, Owner Berry driving, and Briney won in straight heats with clockwork regularity of stride, beating his former driver, Bob Smith, with Harry Hurst, and C. A. Canfield, driving Athalo. Outfooting a pacer with a trotter did Berry more good than winning the race, though the time was first class, 2:17½ and 2:16½.

Another race of high interest was the fourth, for pacers, 2:20 class. E. J. Delorey with a very promising bay gelding in Victor Platte; Claude Black, plus Berry's variegated cap, with a brass screen for a dashboard which was familiarly dubbed the "wind shield," and sitting behind J. W. Spooner's Wood B.; M. B. Mosher with Scappoose, her head propped out at right angles to her neck to stop pulling, and Billy K., owner R. V. Cocke driving, were the contestants. Delorey and Mosher looked so much alike the crowd could not tell them apart, but it made no difference because in the first heat they were running a little race to themselves several hundred yards to the rear of Black and Cocke, who made a very handsome heat of it. Black had the rail and a length lead; it proved to be more than Cocke could make up, though he gelding responded gamely to the demand in the stretch. The initial heat was the fastest of the day, time being 2:15½. The two first were almost within whip reach all around, and the deciding trip around the oval was practically the same, though a little slower.

To wind up the day a 2:30 class mixed event was put on, and two starters came out in it. Dr. C. W. Bryson appeared behind George B., and Dr. Ralph Hagan sat behind Zombretta, a very handy, brown filly belonging to L. J. Christopher, which showed yesterday that she will be heard from in the future at all the matinee events. The first heat was a nip-and-tuck session all the way around, Hagan having the pole. He won in a drive through the stretch, but not until Bryson had epoken for the heat in forceful fashion. The time was 2:30½.

The final and deciding heat attracted much attention on account of the close finish in the first and it was freely predicted that there would be a three-heat race. The prophets were within a hair's breadth of being right. Coming around within a short toe of each other, Bryson kept George B. back until well into the stretch and then went out around Hagan for the honors, and had the wire been ten yards farther he would have taken the heat. Dr. Hagan did not make his move until the dragwage was passed and George was going five feet to Zombretta's four at the finish only a short head behind. The first heat was done in 2:31½; the second was for blood and 2:22 was hung out, Zombretta making the last half in 1:09—fast enough for a youngster. The summary:

First race, 2:50 trot:			
Rondow, b. g.	(J. H. Snowden)	1	1
General Boodle, hr. g.	(Godfrey Fritz)	2	2
Black Arrow, blk. g.	(William Garland)	3	3
Dan, ch. g.	(M. B. Mosher)	4	4
Time—2:34½, 2:31.			
Second race, 2:25 pace:			
Electra, hr. m.	(W. L. Heller)	1	1
Gen. B, g.	(P. L. Budinger)	2	2
El Mont, b. g.	(E. J. Delorey)	3	3
San Gabriel Prince, b. g.	(M. B. Michel)	4	4
Time—2:22½, 2:19½.			
Third race, free-for-all:			
Briney K, b. g.	(W. F. Berry)	1	1
Athalo hr. g.	(C. A. Canfield)	2	2
Harry Hurst, s. g.	(Robert Smith)	3	2
Time—2:17½, 2:16½.			
Fourth race, 2:30 pace:			
Wood B., ch. g., J. W. Spooner	(C. D. Black)	1	1
Billy K., b. g.	(R. V. Cocke)	1	2
Victor Platte, b. g.	(E. J. Delorey)	3	3
Scappoose, h. m.	(M. B. Mosher)	4	4
Time—2:15½, 2:17.			
Fifth race, 2:30 mixed:			
Zombretta, hr. m.	(Dr. Hagan)	1	1
George B., b. g.	(C. W. Bryson)	2	2
Time—2:30½, 2:32.			

Cured Spavin with One-Half Bottle.

Gas City, Ind., Oct. 20, 1902.

The Lawrence Williams Co., Cleveland, O.: About four years ago I bought a bottle of your Gombault's Caustic Balsam, and used it on a spavin with great success. I still have more than half of it, and it appears to be all right.

JAS. HOLBROOK.

How the Army Horses Are Cared For.

The problem of getting a maximum amount of work on a minimum amount of feed from horses and mules used in military service has been satisfactorily solved in the United States Army, the kind, quality and amount of forage being the same for every horse, that for mules being slightly less in quantity than for horses.

The daily ration of forage for a horse is 12 pounds of oats, barley or corn, that of hay 14 pounds; for mules the grain ration is 8 and the hay ration 12 pounds, the allowance of straw for bedding being 100 pounds per month per animal, or in lieu of straw an equal amount of hay is allowed for the purpose. Many years of experimental feeding were necessary before the authorities were satisfied that the amount was sufficient, but a casual glance at the mounts of an organization will bear out the statement that the results attained have been all that can be desired, as the horses and mules are usually fat, smooth, and have an appearance of being satisfied.

Captains of troops and batteries as a rule work on the theory: "If I look out for my horses my men are intelligent enough to look out for themselves," and it is a well-known fact, in the service at least, that organizations so governed are the best. This does not by any means imply that the captain does not entertain a fatherly regard for his men, for he usually does; but his interest in his mounts, from a military point of view, begins at reveille and never ends.

Unlike the feeding of most horses, army horses are fed but twice a day, the morning feeding taking place at reveille, under the immediate supervision of the stable sergeant; the evening forage being given after the horses are groomed and watered at afternoon stables, and under the supervision of the troop or battery commander; the morning feed of grain being lightly in excess of that fed at night, because hay is generally fed at night only. Of course, when troops are on the march the evening is the only time when the feeding of hay is possible.

The statement as to the daily ration must not be accepted too literally, as some animals require more than others, and all are under scrutiny at all times, both by commanders and stable sergeants, it soon determines how much each individual animal requires, and after this has been determined, due regard is paid to such requirements.

The specifications of contracts for furnishing forage for the army are most exact in their nature, and unless the grain and hay fully meet the requirements called for in the contracts it is not accepted, as the contractor of experience knows that to try to hoodwink the army in the matter of quality called for is a proposition not to be demonstrated, because of the vigilance of all through whose hands it is required to pass, and that they do not hesitate to express themselves when there is just cause (from the trooper who does the feeding to the quartermaster-general of the army); thus the forage furnished it, as a rule, is the very best obtainable.

Oats furnish the bulk of the grain used, corn being rarely if ever used, except in latitudes exceeding forty-two degrees north, as it is a known fact to every horseman that corn burns out, and destroys a horse's digestive apparatus more quickly than any other kind of grain. Bran mash, well salted, is fed once or twice weekly, and serves as a relish to the horse's bill of fare.

In the garrison horses are always watered thrice daily—morning, noon and evening—and most modern military stables have in connection a commodious corral, in which water is placed, so that it is at all times accessible to horses turned loose therein.

On the march horses are watered wherever possible, large quantities never being given while actually on the march, but after making camp, and the horses are thoroughly cooled and rubbed. They are allowed to have their fill morning and night.

Overland marches in the western arid lands are conducted as to bring the line of march through such territory as is well known to have an abundance of water, and no more grievous thing can befall an organization than to find itself in a country where there is not an abundance, and amongst military men such a place is avoided as is a pestilence.

Horses are grazed whenever possible. In the spring, after the grass has become abundant, horses are not worked very hard, and are allowed to graze daily, great care being taken not to allow them to get too much at the start, so as to cause any deleterious effects, the grazing period being increased daily until they can be safely kept out four hours, this being generally the maximum time for grazing; and this usually takes place in the afternoon, as the forenoon is usually occupied by drills and so forth. When on the march reveille usually takes place at a very early hour, and in-country where grazing is possible, horses are allowed to graze for an hour or

so before starting on the march for the day, as the dew is still on the grass, and it is much more palatable to the animal than after the sun has dried and withered it.

Feed boxes are washed once a week with a vinegar solution to keep them sweet, clean and wholesome, it having been found that vinegar is a good deodorant and one for which our particular friend, the horse, has no repugnance.

Hay is always well shaken before feeding, and oats are usually received in an almost dustless condition, so that the cases of had-winded horses in the army are comparatively few, partly, of course, owing to this attention being paid to the forage before feeding.

It is remarkable to note the amount of work to be got from horses and mules on this comparatively small amount of forage. Of course, in the garrison the working hours for the horse are comparatively few, but during the time he is being used there are constantly occurring trials that test his metal to the limit. The mule on the other hand, does his eight hours daily at the real work at the post—and some of it is very hard work, too; still the amount of forage for actual field service is identical with that for the garrison, and when the full amount is obtainable no lack of quantity is ever reported, no matter how arduous the campaign.

The use of alfalfa for army mounts is as yet in its infancy, but where it has been used reports as to its use and benefit have been generally favorable.

A Very Successful Breeder.

Mr. M. A. Murphy, of the Tesla Coal Company, is one of the most successful breeders in California considering the number of mares he has used. Four years ago he bred five mares to Zombro 2:11, and got five colts. One of the colts with six weeks' work trotted a mile in 2:23; another with two months' work paced a mile in 2:25, and the other three colts have each trotted miles in 2:20 or better. One of them is Zombretta, a filly that won a matinee race at Los Angeles on Christmas Day, trotting her heat in 2:30½ and 2:22. Zombretta has only been up a month, but she acted like a veteran and in the last heat of her race, after going to the half in 1:13½, came home in 1:08½, the last quarter in 33 seconds. She was trained last spring and worked a mile in 2:20 before being turned out, the last half of which was in 1:09. Probably no breeder on the Coast or elsewhere ever bred five mares to one horse the same season and got five such colts. Three of them are confidently expected to trot in 2:15 this year. Geo. Beckere will make a short season at Los Angeles as usual with Zombro and about May 1st will ship the great horse to Cleveland and place him in the stud there until September 1st. Any person having a good Zombro colt which they desire to sell can ship the same in Mr. Beckere's car to Cleveland and sell at either the Blue Ribbon sale or at private sale. Zombro is not for sale, but will doubtless be kept in Ohio or Kentucky by Mr. Beckere, who is firm in the faith that he owns the greatest coming sire in the world, and he wants him to have the very choicest mares from now on.

Rey McGregor Sold for \$1200.

A notable sale was made at Pleasanton last week. Al McDonald, who purchased at the Senders sale in this city a few weeks ago the yearling colt Rey McGregor for Mr. W. J. Simpson of San Francisco for \$445, sold him again to Mr. F. Gomet for \$1200, and that is a low price for him, as he is one of the most promising young trotters in the country. As says he is the best one he ever handled and he broke and trained who is it 2:10½, What is it 2:16½, Zambra 2:16½ and marked Forest W. 2:14½ and Iloilo 2:15. He says it makes a fellow feel good to buy and sell a colt at a good profit. By the way, McDonald is getting to be quite a horse trader. Last year he bought Forest W. for \$250 and sold him for \$1500 after winning \$1900 for him. This year he bought Iloilo for \$500 and sold him for \$1500 after winning a thousand with him. The breeding of the colt Rey McGregor is as follows: Sire Rey Direct 2:10, son of Direct 2:05½ and Vera 2:22½, dam of three in the list by Kentucky Volunteer. The dam of Rey McGregor is Lurline, sister to W. W. Foote 2:15½ and Algregor 2:11, by Steinway, second dam Maggie McGregor, dam of two in the list by Robert McGregor, third dam Maggie Davis, dam of one in 2:30.

Calistoga, Cal., Sept. 11, 1902.

Dr. S. A. Tuttle—Dear Sir: By mere accident I came in possession of a bottle of your Family Elixir, and tried it on a sprained ankle of a horse in my charge with the very best results, so much so that I am anxious to adopt it in my veterinary practice, which is quite extensive and of forty years' duration. Will you please make me your best terms? Would take an agency for the sale of the remedy in Napa county. I thought I was in possession of some finer remedies than any one in the business, but when I gave your Elixir a trial found I was mistaken, and believe in giving honor to whom honor is due. Please let me hear from you at your earliest convenience, and oblige. Yours truly, DR. I. WIXOM.

Notes and News.

January 14th, the final Palo Alto sale.

Sidney Dillon's fee will be \$100 for the season of 1904.

McKinney 2:11½ has twenty-seven performers with records from 2:15 to 2:02.

About 175 horses are now being worked at Agricultural Park, Los Angeles.

Ed Geers now has twenty head of horses in his stable at Memphis, Tenn.

There is a rumor in the east that the pacer Agitato 2:09 was out on a ringing tour in 1903.

Seattle will most likely claim the dates of June 15th to August 15th for the running meeting this year.

Alta McDonald thinks he can lower the ice record with Daniel 2:00½, and will have a tilt with Father Time in February.

A full brother to Primrose 2:09½ is to be sold at the Chase sale January 14th. He is a grand looking roadster and fast.

Colt stakes are getting popular all over the country, and this is the best evidence that harness horses are thought more of than ever.

Alcantara has thirty-one representatives in the 2:15 list, while his daughters have produced seventeen with records of 2:15 or better.

Vermont, the home of the Morgans, got its first world's champion harness horse this year in Daniel 2:00½, the fastest pacing mare.

Mr. Bernard of Colorado Springs has sent his mare Dora Delpha 2:09 to the Village farm near Buffalo, New York, to be bred to Direct Hel 2:04½.

Archie Galbraith of Spokane is shipping out from the East two carloads of draft stallions for the spring trade, consisting of Clydes, Percherons and Suffolks.

Pilot Medium now has one hundred and twenty-one representatives in the standard list. Nearly a hundred more than any other son of Happy Medium.

Don't fail to attend the final sale of the Palo Alto horses. Those yearlings will be worth twice the money next year that will be paid for them at this sale.

Four thousand people attended the matinee of the Los Angeles Driving Club on Christmas Day, although there was a special program of splendid running races at the new Ascot Park.

Three young Ray Directs and two Chas. Derbys are to be sold by Geo. A. Davis of Pleasanton at Fred H. Chase & Co.'s salesyard, Thursday evening, January 14th. These are choice goods.

William G. Layng will sell Tuesday, Jan. 5th, seventy head of well broken horses weighing from 1900 to 1800 pounds. A few of the heavy mares are in foal to an imported Shire horse.

One of the melancholy failures of the year was the attempt to turn Anaconda 2:01½ into a traveling advertisement for a gelatine factory. His owner is in all probability a sadder and a wiser man today.

Daughters of Electioneer have produced 103 trotters and 16 pacers that have made records in standard time. Five new trotters and three pacers that were from his daughters entered the list the past season.

George H. Ketcham stated before the Board of Review of the American Trotting Association at its late meeting that his sale of trotting horses to foreign countries for the past six years have averaged \$150,000 annually.

In his stables at Los Angeles W. G. Durfee has eleven McKinneys, many of them very promising. About the best prospects among the many youngsters he is beginning on are two by Coronado 2:18½, son of McKinney. Coronado is certain to be a great sire.

Eleata 2:08½ by Dexter Prince had an accident lately that it was thought would prevent her racing in the future. The injury is in the hip, but it is now reported that she will recover and be able to start in the races of 1904, where she will doubtless be up among the money winners.

The racing meeting at the Overland Park, Denver, next summer will be held between the dates of June 18th and July 4th inclusive. This will give a fourteen-day meeting instead of the usual thirteen days of racing, the addition of a day being for the purpose of having a program on July 4th.

The chestnut gelding N. L. B., that took a two-year-old pacing record of 2:21½ and won the Breeders stake in 1899 at Santa Rosa, will be sold at Fred H. Chase & Co.'s salesyard January 14, 1904. N. L. B. is one of the best roadsters in the country, and can be driven by a lady. He has worked a trial in 2:12½. He is by Diablo 2:09½, dam by Washington 2:20, second dam by Skenandoah.

Sam Fullen, winner of four stakes and a high class thoroughbred stallion, is advertised for sale in the BREEDER AND SPORTSMAN. He is by imported Cavalier, dam Lena Oliver by King Lear. Address, the owner A. Forbes, 5615 San Pablo Avenue, Oakland, for full particulars.

The final sale of Palo Alto horses will be held Thursday evening, January 14th, at the salesyard of Fred H. Chase & Co., 1732 Market street, this city. Don't miss this opportunity. The last are nearly all foals of 1903, but they are the most promising yearlings the great farm has yet produced.

Red Wilkes is maintaining his reputation well as a broodmare sire. His daughters produced twelve of last season's newcomers to the standard list, which makes the total number of standard performers produced by his daughters so far as heard from one hundred and forty-seven, of which one hundred and five are trotters.

Six yearlings by McKinney 2:11½ and six by Nutwood Wilkes 2:16½, out of the very choicest mares of Palo Alto farm, should be worth bidding on when they are offered at Fred H. Chase & Co.'s salesyard, Thursday evening, January 14th. There are also yearlings by Monbells, Mendocino, Iran Alto and Nazote to be sold.

A decision handed down by the Supreme Court of the United States on December 7th, affirmed the verdict rendered by the Philadelphia courts (Judge Sulzberger), awarding Hughes & Fleming, of Bryn Mawr, Pa., \$9,900 against the Pennsylvania Railroad, for injuries to the pacer Montauk 2:16½ in the West Philadelphia freight yard in 1900.

Nutwood 2:18½ is the leading sire of dams of the new standard performers of 1903, so far as heard from to date. The number produced by his daughters that entered the list the past season is thirteen, and eleven of them are trotters. This makes a total of two hundred and fourteen standard performers that are already credited to his daughters.

Elmo Montgomery, of Davisville, owner of the good colt Seymour 2:23, winner of the two-year-old pacing division of the Breeders Futurity in 1903, was in the city this week and states that the colt is doing well. Seymour is by Diawood 2:11, dam Nancy H. by Upstart, second dam by a son of Gen. Taylor, and third dam a thoroughbred mare by Leinster.

Belle Irvington's weanling foal by Wayland W. 2:12½, owned by B. L. Elliott of Mendocino, is one of the best lookers of the crop of trotting-bred foals of 1903. Mr. Elliott claims the name Irving W. for him, and says he knows he will be a good one as he never saw a Wayland W. colt that did not trot or pace fast, whenever it was taken to a race track. Irving W. is a square trotter.

T. C. Cabney of Eureka writes us that he expects to ship his string to Pleasanton this week. He has the pacer Fredericksburg 2:12 by Nephew Jr.; Lady Petrina by Directum, dam Petrina by Piedmont; Morosco, a green horse by Wayland W., dam Lady Moor by Grand Moor; and a couple of colts by Waldstein. Mr. Cabney states that several other trainers expect to move from Eureka to Pleasanton soon.

In Japan the grooms take no chances of getting kicked by going behind horses when in their stalls. The stalls in that country are so arranged that the horses are backed into them. The stalls are long and there is a door at the head to which is attached a grain box and a hay rack. The horse stands facing the door, and is tied to the hay rack. This door is swung open and the horse is led out when the stall is cleaned.

Chas. A. Durfee will sell four McKinneys at Fred H. Chase & Co.'s salesyard, Thursday evening, January 14th. Two are young mares by McKinney and out of the famous mare Stemwinder, the dam of Directum 2:05½. There is also a filly by McKinney out of a mare by a son of Venture and a colt called Johnny McKenzie that is one of the best prospects in California for the three year old trotting stakes of 1904. He is a royally bred one and a good square trotter. These are all to be sold to dissolve a co-partnership.

The bay filly by Nutwood Wilkes 2:16½ out of the great race mare Expressive 2:12½ by Electioneer, should be worth a lot of money simply as a prospect. Expressive was one of the greatest three-year-olds ever foaled in America. At the Palo Alto sale in New York last month she brought \$1700, the top price of the sale. She is now twelve years old and this bay filly is her foal of 1903. It should be one of the greatest prospects in California, and will go to the highest bidder: at Fred H. Chase & Co.'s salesyard, 1732 Market street, on the evening of January 14th.

In his interesting letter from Memphis printed in the Horse Review, Secretary Murray Howe says that Ed Geers has stepped Stanley Dillon by Sidney Dillon several heats better than 2:12. Three California trainers are domiciled at the Memphis track this winter, Millard Sanders, J. M. Nelson and W. M. Hendrickson. Nelson still keeps his fast green mare China Maid in active training and while he gives her repeats, seldom asks her to beat 2:20. This is not very stiff work as she has been one mile as fast as 2:05½. She is by McKinney out of Blanch Ward, second dam of Guy McKinney, and was bred by T. J. Drals, of Farmington, who sold her to the ex-Chinese Consul Ho Yow. Millard Sanders is living in the cottage on the grounds, recently vacated by Scott McCoy. He is giving his large bunch of Axworthy 2:15½ colts easy work to date, as they are all soft. Anzella 2:06½ has been fired and looks like a new mare. Lou Dillon has her shoes off and is turned out in a large paddock every day.

A yearling colt by Mendocino 2:19½ (sire of Monte Carlo 2:07½, etc.), dam Carmine by Electricity (son of Electioneer and Midnight, dam of Jay Eye See 2:06½), second dam Consolation (dam of two in the list by Dictator, third dam Belle by Norman 25, fourth dam Vic by Mambrino Chief 11, will be sold at Fred H. Chase & Co.'s salesyard Thursday evening, January 14th. This colt is one of the best bred ones ever sired by Mendocino.

Col. J. C. Kirkpatrick is driving his three year-old colt Elden Bells on the Park roads and finds him a very speedy youngster. The colt is a very handsome fellow and his breeding could hardly be surpassed, as he is by Monbells 2:23½ out of Elden (dam of Eleata 2:08½) by Nephew, second dam Eleanor by Electioneer, third dam the famous old thoroughbred mare Sallie Gardner by Vandal. As his breeding would indicate, Elden Bells was bred at Palo Alto Stock Farm.

M. W. Savage has recently purchased a number of broodmares, and now has at the International Stock Food Farm seven mares that have produced 2:10 performers. No other farm in the world has as many. The mares are Belle, dam of Indiana 2:04½; Clara B., dam of Joe Pilot 2:09½; Maude, dam of Martha Marshall 2:06½; Argosa, dam of Argetta 2:08½; Columbine, dam of Capt. Brino 2:07½; Dolly Swift, dam of The Swift 2:09½ and Lalla, dam of Kentucky Star 2:08.

Nearly every man, woman and child in Fresno that admires a horse were at the track there Christmas Day to see a match race between Louis Bachant's good pacer George and Charley Clark's pacer Newport. The match was for \$500 aside and the result of a year's joshing and bantering back and forth. The race was won by Mr. Bachant in three straight heats in 2:16½, 2:19½ and 2:20½. The first heat George won easily, but in the next two he had to stretch his neck and won by a half length each time. George is probably the last new 2:20 performer of the year 1903. He is by Loeber, a son of Whippleton.

The Paris mutual system was established in France in 1891. Since that time the public has bet \$490,582,800 through this official betting system. During 1899 the largest amount of money was placed and amounted to \$51,000,000. The government receives 7½ per cent from the amount bet on Parisian tracks and 10 per cent from all other race courses in France. Official figures show that the French Government derived \$32,700,000 from this revenue in twelve years from the Paris tracks alone. During the same period Paris horse racing clubs received \$13,200,000 for expenses in connection with the operation of the Paris mutuels.

Pat O'Brien is working quite a number of horses at Lodi. One is a son of Oro Wilkes, dam Flora Belle, and is very promising. He also has a colt that he has named Cortelyou that is by Hero (son of Director) out of a Dexter Prince mare. O'Brien has two two-year-olds by Daedalion that he says are crackerjacks. An association has been formed at Lodi and is now at work building a new track. Lodi is one of the best places in California to winter horses, and the soil thereabouts is much like that at Pleasanton, the hardest rains only making it better. The old track was cut up last year and planted to orchards and vineyards.

W. G. Durfee brought back with him from his Eastern trip a stud colt by Peter the Great 2:07½, sire of this year's sensational three-year-old Sadie Mac 2:11½. The dam of this colt is Juanita 2:29, dam of Sinaloa 2:25½ by Sultan; second dam the great broodmare Beulah, dam of Seuzetta 2:06½, Early Bird 2:10 and four others in the list; third dam Sally B., dam of Maurine 2:13½ and two others, by Lever, son of Lexington. This colt showed a mile in 2:21, last half in 1:07½, after a few months work. He is a good headed colt, quite handsome and perfect manners. He was foaled in 1900 and bred by J. Malcolm Forbes. A son of Peter the Great that is as well bred as this fellow should be an acquisition to this Coast.

The average colt at birth will weigh one hundred and ten pounds; at the end of the first year five hundred and twenty pounds; at the completion of its second year, it will have gained two hundred and twenty-eight pounds, thus making its weight at that period seven hundred and eight pounds; it will have gained one hundred and eighteen pounds more during its third year and at its completion will tip the scales at nine hundred and twenty-six pounds, while at the fourth year it will have gained seventy pounds more, thus making its weight nine hundred and ninety-six as a four-year-old. These estimates are based on a class of horses known as drivers and of course the figures do not apply to drafters, chunks or brinks.

Mr. Alex Brown, proprietor of the Walnut Grove Farm, met with a severe loss on the 23d of December. Chas. Spencer, the farm's trainer, was driving to the blacksmith shop with Aristina, full sister to the Occident Stake winner Aristo 2:17½ by Nushagak. The filly got frightened at some people standing on the top of the levee and shied very suddenly to one side, throwing Spencer out of the cart, and then jumped off the bank of the levee, which is twenty feet high at that place, into the river. The filly was drowned before assistance could be had. Mr. Brown considers his loss a most severe one, not for the money value but owing to the fact that Aristina was a filly whose breeding and individuality he prized very highly and was just what he wanted and may not be able to replace. She was very promising, having already shown 2:40 speed although only broken in October. Mr. Brown looked on her as being even better than Aristo, and all horsemen know that he is considered one of the greatest trotters in California. We sympathize with Mr. Brown in the loss of this filly and sincerely hope that no such bad luck will visit him in the future.

Excellent Opportunity.

Any good live horseman that knows anything at all about business can make money this year by purchasing the Sidney stallion William Harold 2:13½ and placing him in the stud at some good locality in California. Mr. H. W. Meek, owner of the horse, intends to retire from horse breeding, and has already sold at auction all his broodmares. He has a few weanlings, yearlings and two year olds that will be sold later, and now offers William Harold at private sale. This stallion is by Sidney, grandsire of Lou Dillon 1:58½, and is out of the great race and broodmare Cricket 2:10 dam of four in the list by Steinway. William Harold has but very few foals old enough to be trained, and the only two ever sent to a race track are the trotting mare Janice 2:08½ that died a year ago, and the pacer Dan Burns 2:15. The William Harold colts and fillies are all naturally fast and have size and good looks. He is a well built, sound horse and will be well patronized in any community where good roadsters are bred.

A Grandly Bred Two-Year-Old.

Walter Mastin, formerly of Woodland but now of Sacramento, has sold to Mr. William Hashagan, a dark bay colt by McKinney, dam Goldenrose by Falrose, second dam Lady Harper by Alaska, son of Electioneer, third dam Lady Gray by Algonia, sire of Flying Jib 2:04, fourth dam by Odd Fellow. Mr. Mastin received \$525 for the colt before he was ever booked up. When the colt was foaled Mr. Mastin called him Rosekin, but Mr. Hashagan has changed the name to Kinney Rose, which is certainly a very euphonic as well as an apt cognomen. Kinney Rose is entered and paid up on in the Breeders \$6000 Futurity for foals of mares bred in 1901. He will be two-years-old this spring and will very likely be started in the two-year-old division.

Two Show Horses.

About two years ago, Mr. P. W. Bellingall, the well known customs broker of this city, sold two horses to parties who took them east. One was by Secretary, the other by Knight, and they are now said to be one of the greatest pair of show horses in America, having won the blue ribbon as a team at Des Moines, Milwaukee, St. Louis and Hamline. The gelding by Knight, which was named Knight of Bellingall by his purchaser, won the blue ribbon shown single at Hamline, Milwaukee, Griggsville, St. Louis, and at the Kentucky State Fair, Owensboro; he beat twenty cracks, including Mode Nicoll's crack gelding that afterward won from Rhea W., Commander Baker, and all the crack roadsters.

Daedalion 2:11 to be Sold.

One of the coming great sires of speed in California as sure as he is given any chance in the stud, is Daedalion 2:11 by Diablo 2:09½, out of the great broodmare Grace by Buccaneer. His oldest foals are two-year-olds and the owners are so enthusiastic over them that all want to breed to him again. Geo. Fox has determined to sell Daedalion, however, and he will go to the highest bidder. If the buyer wishes to train him we believe Daedalion can lower his record to 2:05 and win well in his class. He will be sold at Fred H. Chase & Co.'s salesyard, Thursday evening January 14th.

The Lick House.

The most popular hotel with Californians is The Lick, which has always catered to the best people and which has lately been newly furnished and remodeled to make it still more attractive and popular. The new Grill room is perfect in every detail and one of the most beautiful dining rooms in the world. Since Mr. Geo. W. Kingsbury assumed the management of this great hostelry it has acquired the name of being the headquarters for the leading business men of the Pacific Coast.

W. R. Murphy of Los Angeles has recently purchased a thoroughbred colt by Nels Morris out of a mare by Hubbard. He is called Copper Lion and is entered in two \$1000 stakes to be decided at Ascot Park. He is working fast and will make the others run some to beat him. Mr. Murphy has commenced work on Golden Boy, the McKinney colt that was pictured on the front page of the BREEDER AND SPORTSMAN recently and states that he is showing up like a sure trotter.

A Perfect Preparation.

Tals is what Mr. Dodge of Springfield, Ill., says of Absorbine. It is cheerful and positive testimony:

Springfield, Ill., Feb. 3, 1903.

W. F. Young, Springfield, Mass.

Dear Sir:—Absorbine is a perfect preparation. I have seen the good effects from its use, and cheerfully recommend it in all cases requiring an absorbent. Yours truly,

FRANK S. DODGE.

Absorbine, \$3 per bottle, express prepaid.
Address W. F. YOUNG, P. O. F., Springfield, Mass.

Horses for the Market.

Mature and well broken horses are always the best sellers. A year or two spent in waiting for a horse to develop and educate means an expenditure of time and money on the part of the purchaser which is undesirable as a rule unless the horse is bought specifically for the purpose of fitting it for the finished market. The ideal age is five years, buyers usually purchasing animals ranging from five to eight. The classes vary somewhat in this respect. A horse intended for draft purposes may be marketed somewhat sooner than a harness horse or saddler. The breed to which a horse belongs has very little influence on the selling price. All that is required is a good individual of its class. A good horse always sells. Geldings are preferred somewhat generally to mares. Color does not figure so strongly as many would lead us to believe. Almost any color with excellence to back it will sell well except white, flea-bitten gray, mealy bay or any other color that might be termed washed out. Among drafters, no special color seems to have a preference. With harness horses and saddlers, bays, browns and chestnuts have first preference, but grays and blacks sell readily if good. Well matched teams, both in harness and draft classes, usually bring higher prices than if sold singly.

Condition is very often overlooked. It is absolutely essential that a horse be in good condition to bring what it is really worth. This is particularly true of animals of the draft type. Whether it increases the animal's real value is not necessary to consider. The market demands high condition and pays those men well who cater to it. The great lack of condition is shown by the fact that many horses are sent for sale only to be reshipped to the country for further feeding. Condition is almost as essential as fat on a steer and its absence cuts from twenty-five to fifty per cent from the selling price of a horse. The requirements of the market in this line are well worthy of notice. Every class calls for an animal of intelligence and good disposition, willing to pull at a good rate or set a fast pace on the driveway and capable and cool-headed in an emergency. The use of horses on city streets, often among large numbers of pedestrians, makes the latter particularly essential. The need of these qualifications is more important in some classes than in others.

The most important requirement of a market horse is serviceable soundness—that is, having no chronic disease that will unfit it for work of a general nature. It must be sound in wind and in limb, able to do a reasonable amount of work without undue fatigue or premature breakdowns. The majority of horses sold to the city trade are compelled to do their work on hard, unyielding pavements, pulling heavy loads or developing speed that is an even greater strain on the feet and legs. The average period of usefulness on city streets of a horse sound at the start is not more than five years and it is manifestly decreased if it begins work in an unsound condition. Broken wind, sidehones, unsound hocks and all the various other ills to which a horse is heir should be strenuously guarded against, as they greatly diminish its value.

The next requirement is a conformation that will enable an animal to do hard work with a minimum of wear and give the longest possible period of soundness. Special emphasis should be placed on the foot, which should be of medium size with hard and dense horn, plenty of height to the heels and plenty of room between them, a large elastic frog and a nicely hollowed sole—in short, a sound, durable foot. The pastern slopes should correspond to that of the shoulder. These conditions—with flat, fully developed muscles, strong, well-developed joints, strongly supported knees and hocks, clear clean-cut tendons standing well out from the leg and dense bone of a quantity sufficient to sustain the weight of the horse—will give a limb well calculated to withstand the wear and tear of a city pavement. Joining the fore and hind quarters we must look for a deep, fairly wide and compact middle piece with ample room for chest organs and no pinching at the wrist. Too much width should be avoided as the action of the forelegs is almost sure to be had with such a conformation.

A short hack is generally sought, especially one which shows the least possible amount of space between the last ribs and the hips, giving a close coupled horse. This is almost as essential as a sound foot. A long, loose-ribbed, open-jointed, wasp-waisted animal is especially to be avoided. Such conformation indicates lack of strength and forecasts an early breakdown. The shoulders should be deep and smooth and hind quarters deeply muscled, wide and well rounded. A sloping rump is always unsightly and detracts both from the use and value of the horse for it stands to reason that such a conformation can not furnish the same amount of muscle that a nicely rounded one can. The tail should be set high and

smartly carried. Prominent shoulder points, hips and buttocks are objectionable. The neck should be clearly outlined, of moderate length and well muscled with a good chest. The head should be clean cut and of moderate length, with a rather small ear, much breadth and fullness of forehead, with a large, clear full, intelligent eye and a wide open nostril.

Some Statistical Siftings.

[Horse Review.]

McKinley 2:07½ is the fastest trotter on record whose dam is of untraced breeding.

Stranger O. 2:09½, pacing, is the fastest harness pacer formerly produced whose breeding is entirely unknown.

The only sire whose daughters have produced four trotters with records below 2:09 is Robert McGregor. The four produced by them are Grattan Boy 2:08, Jay McGregor 2:08, Ellmore 2:08½ and York Boy (to wagon) 2:08½; all four are by Wilkes stallions.

Caspian 2:07½ and Caracalla 2:10, both by Patron 2:14½, out of Cascarilla 2:25½ by Shelby Chief, are the only own brother and sister with trotting records of 2:10 or better.

Lucy Homer, dam of Authoress 2:09½ and Lecog 2:09½, is the only mare who has produced two trotters with records below 2:10. She is by Homer, son of Mambrino Patchen, dam Dinnie 2:25 by Rochester, son of Aberdeen.

Wentworth 2:08 by Superior, son of Wood's Hambletonian, is the only 2:10 trotter yet bred in Canada.

Patron 2:14½, Prodigal 2:16 and Patronage, all by Pancoast 2:21½, out of Beatrice by Cuyler, are the only three own brothers who have all sired 2:10 trotters. Patron is sire of Caspian 2:07½ and Caracalla 2:10; Prodigal of John Nolan, 4, 2:08; Patronage of Alix 2:03½.

Nancy Hanks 2:04 by Happy Medium, dam of Admiral Dewey, 3, 2:14½ is the fastest trotting mare that has yet produced a standard performer.

Rachel, 4, 2:08½ by Baron Wilkes 2:18, dam of Great Spirit 2:11½ trotting, 2:20 pacing, and Peaco Commissioner 2:25½, trotting, is the fastest pacing mare who has yet produced a standard performer. Miss Logan 2:06½, Sally Toler 2:06½, and Vera Capel 2:07½ are all producers, but all took their best records after producing their foals.

The fastest sire and son, pacing, are Joe Patchen 2:01½ and Dan Patch 1:56½, average record 1:58½.

The fastest trotter out of a record dam is The Abbot 2:03½ by Chimes 2:30½, dam Nettie King 2:20½ by Mambrino King. Nettie King took her record in 1891 and produced The Abbot in 1893.

The fastest pacer out of a record dam is Free Bond 2:04½, to wagon, by Simon, dam Princess Alice 2:23 pacing, by Evan Lewis. Princess Alice took this record in 1893 while carrying Free Bond, and reduced it the next season to 2:21½ after foaling him.

Primrose by Alexander's Abdallah is the only mare who has produced ten producing sons. Beautiful Bells 2:29½ by the Moor ranks second with eight.

Peter the Great, 4, 2:07½ is the only winner of the three year old Kentucky Futurity (1898) who has sired a winner of the same event—Sadie Mac, 3, 2:11½ in 1903.

Boralma 2:07 by Boreal (3) 2:15½ is the only trotter to win both the three-year-old Kentucky Futurity and the Transylvania. He won the former in 1899 and the latter in 1900.

Rilma 2:08½ by King Wilkes 2:22½ is the only trotter who has ever won both the M. & M. at Detroit, and the Transylvania, at Lexington, a feat he performed in 1897.

Cresceus 2:08 is the only trotter that has ever beaten 2:10 over a half-mile track.

Four pacers have beaten 2:05 over half-mile tracks: Dan Patch 2:03½, Prince Alert 2:03½, Joe Patchen 2:04½ and John R. Gentry 2:04½.

McKinney 2:11½ by Alcione 2:27, dam Rosa Sprague by Gov. Sprague 2:20½, is the only sire of five 2:10 trotters, the latter being Charley Mac 2:07½, Kinney Lou 2:07½, Hazel Kinney 2:09½, The Roman 2:09½ and Dr. Book 2:10. All have race records.

No sire has as yet sired a 2:05 trotter, and the dam of one. Director 2:17, sire of Directum 2:05½ and of the dam of John A. McKerron 2:04½, misses it by a quarter second only.

F. J. Yandel of Santa Rosa now has the mare Laurel by Nephew, second dam Laura C. 2:29½ by Electioneer, third dam the thoroughbred mare Fanny Lewis by imp. Buckden. Laurel has a filly by Stam B. 2:11½ that will be four years old in May next and is a great prospect. It is Mr. Yandel's intention to breed Laurel to Sidney Dillon this year if she is not sold. She is now with foal to Stam B.

For all kinds of weather there is no drink like Jackson's Napa Soda—plain or in a lemonade.

Alexander's Belmont 64.

Belmont was a light bay horse with one white ankle behind, and stood about 16 hands high. He was bred by R. A. Alexander, and foaled at Woodburn Farm in 1864. He was by Alexander's Abdallah, and was, undoubtedly, the handsomest, best finished and most elegant animal ever got by that renowned son of Rysdyk's Hambletonian.

The dam of Belmont was Belle by Mambrino Chief 11, and his second dam was Belle Lupe by Brown's Bellfounder. Belle, the dam of Belmont, also produced the trotting stallion McCurdy's Hambletonian 2:24, quite a successful sire of speed. Brown's Bellfounder, sire of the second dam of Belmont, was by imp. Bellfounder. The latter, as our readers well know, was from a family of horses called in England Norfolk trotters.

The most famous trotters in England at the time Bellfounder was imported (1822) were members of this family. Bellfounder, the sire of imp. Bellfounder, originated from the same source as imp. Messenger. The latter was by Mambrino, he by Engineer, he by Sampson, he by Blaze, and he by the renowned Flying Childers, son of the famous Darley Arabian. Bellfounder was by Pretender, he by Fireaway, he by Driver, and he by Shales, a son of Blaze, the remote progenitor of imp. Messenger.

The dam of Bellfounder, sire of imp. Bellfounder, was by Smuggler, he by Hue-and-Cry, he by Scott Shales, and he by Shales, the son of Blaze, mentioned above. It will be seen from this, that both the sire and dam of imp. Bellfounder's sire, were direct descendants of Flying Childers, through his son Blaze.

It is needless to state that Flying Childers was the fastest horse in all England in his day, for that fact is well known to the readers of this paper. Brown's Bellfounder was considered the best bred son of imp. Bellfounder. His dam was quite closely inbred to imp. Messenger, and Messenger blood was then as now considered the most valuable in the world for transmitting the best of trotting action, as well as a strong inclination to stick to the trotting gait. The dam of Brown's Bellfounder was Lady Allport. Her sire was Mambrino, the thoroughbred son of imp. Messenger, that got Abdallah, sire of Rysdyk's Hambletonian. The dam of Lady Allport was by Tippoo Saib, another thoroughbred son of imp. Messenger, and her second dam was a daughter of imp. Messenger. As Mambrino Chief, sire of the dam of Belmont, was by Mambrino Paymaster, a son of Mambrino, by imp. Messenger, it will be seen that Belmont had a very strong inheritance from Messenger on both sides.

Belmont was never raced. It is stated upon good authority that he was worked some for speed on the Woodburn Farm track, and trotted a mile in 2:29½ as a five year old. When seven years old he trotted a mile in 2:28½ on Woodburn track. He was used exclusively for stock purposes, and was allowed to perform but a limited amount of service each season, not exceeding fifty, if memory serves us right.

The broodmares at Woodburn Farm were a choice lot. Belmont was the most popular trotting stallion that had ever stood at Woodburn, and the best of the trotting broodmares there were mated with him. The proprietor of Woodburn did not campaign trotters. He bred to sell, and the reputation of his stock was such that he got good prices. Had he trained the get of Belmont for tin cup records that horse's list of standard performers would doubtless have been much larger than at present. When their owners began to race the get of Belmont, however, they soon found that they were capable of getting the money.

One of the mares mated with him in his five year old form was the now famous Miss Russell. The produce was the renowned Nutwood 2:18½, foaled in 1870. Among Belmont's crop of foals for 1871 were Wedgewood 2:19, Dick Moore 2:22½ and Nil Desperandum 2:24, three as game trotters as were ever got by one sire in a single season.

The dam of Wedgewood was the famous Woodhine, by Woodford, a thoroughbred son of Kosciusko. Dick Moore's dam was Mary, a thoroughbred daughter of Monmouth Eclipse, and Nil Desperandum was from a mare of unknown breeding. It was not long before horsemen who wished to compliment a horse highly for his racing qualities would say "he is as game as a Belmont."

Belmont's get were also noted for beauty as well as speed and gameness. The stallion King Rene, by Belmont, was one of the most noted blue ribbon winners of his day. He was a formidable rival of Mambrino King in the show ring, and sometimes got the decision over that beautiful son of Mambrino Patchen, that had been pronounced by some "the handsomest horse in the world."

Belmont was always kept at Woodburn Farm from the day he was foaled in 1864, to that of his death,

Nov 15, 1889. He is now credited with 49 trotters and 10 pacers, that have made records in standard time. Seventy-four of his sons have sired a total of 493 trotters and 157 pacers, that have made standard records.

The most successful of his sons as sires of standard performers are Nutwood 2:18½, now credited with 134 trotters and 35 pacers; King Rene 41 trotters and two pacers; Egmont 32 trotters and nine pacers; Wedgewood 20 trotters and 15 pacers; and Vatican 16 trotters and five pacers. Nutwood 2:18½, has shown much greater speed perpetuating ability than any other of Belmont's sons, and his progeny in the standard list bids fair to eventually outnumber that of all the other sons and daughters of Belmont.—*American Horse Breeder*.

The Sulky Maud S. Pulled.

The news from Chicago is to the effect that the sons of the late Robert Bonner, who was noted as an admirer of fast trotters and who owned Maud S. when she beat all of the then existing trotting records by compassing a mile at Cleveland in 2:08½, have protested the high sulky record of 2:05 made over the same course last summer by Lou Dillon, the present champion trotter.

The protest has been lodged with the American Trotting Register Association, whose office is in Chicago, and will be considered by the officers of that organization at a meeting soon to be held. It is this association that publishes the Year Book, which is accepted as the final authority on all pacing and trotting records. It is understood the Bonners will make a stiff fight. The points on which they base their claim that the record should be thrown out are that the sulky pulled by Lou Dillon, while of the regulation wheel type, was provided with ball bearing hubs, thereby making the vehicle much less difficult to drag at a high rate of speed than a sulky not thus equipped. Also that a wind shield was used on the sulky of the running horse which preceded Lou Dillon during the 2:05 mile.

Regarding the application of the heirs of the late Robert Bonner for the setting aside, by the proper authorities, of the high-wheel sulky record of Lou Dillon there has arisen a spirited discussion. It is the claim of the applicants that the record of 2:05 set by the California mare should not be recognized because it was made to a high-wheel sulky fitted with ball-bearings, while the sulky pulled by Maud S. was not so equipped, also that the record should be rejected for the further reason that it was made behind a wind shield. With the latter contention this paper has nothing to do beyond what it has already said on the subject. But the first claim has been the means of bringing into discussion just what kind of sulky Maud S. was hooked to in her famous record mile July 25, 1885. Not a few horsemen have stubbornly adhered to the assertion that it was fitted with ball-bearings. In order to get at the truth of the matter the *Stock Farm* wired to S. Toomey & Co., the well-known sulky builders, who have been in the business for a half century, asking what style sulky was pulled by Maud S., and when the ball-bearing attachment was first used on the high-wheel sulky. The answer settles the question most conclusively, and is as follows:

Canal Dover, Ohio, Dec. 19, 1903.

Kentucky Stock Farm, Lexington, Ky.:

The record of Maud S. was made to friction axle. Ball bearings in high-wheels first used about 1887.

S. TOOMEY & CO.

Now all that remains to be settled is whether the Lou Dillon sulky was equipped with ball-bearings. On that point Mr. George Dietrich, secretary of the Cleveland Driving Club, over whose track both records were made, is reported as having stated that it was a friction axle sulky, the same as was the one used for Maud S. If Mr. Dietrich is correct the controversy is at an end. He may, however, be mistaken. If he is, then the record of Maud S. has not been lowered. That Lou Dillon can do it, though, there is no doubt in the mind of any one who is not biased.—*Ky. Stock Farm*.

Silver Bow to Be Sold.

At the Splan sale to be held at Chicago January 18th to 23d we notice that among the other horses consigned is Geo. H. Fox's stallion Silver Bow 2:16 by Robert McGregor 2:17½, out of Sadie by Hambletonian 10. Silver Bow has left stock in this State that is very valuable, and his daughters are certain to be great broodmares. During the past two years Silver Bow has been at Toledo, Ohio, under lease to George H. Ketcham, owner of Cresceus. Silver Bow should be a very valuable horse on any stock farm that is breeding for speed, size, good looks and style.

Strike!—if they don't give you Jackson's Napa Soda when you ask for it.

Look to the Teeth.

When a horse is particular about what he eats and does not seem to thrive on his rations, he requires attention. In such cases look first to the teeth or better still, have a veterinary surgeon do so. Teeth that are sharp prove a constant source of irritation, not only when the animal is eating, but when driving, and it is little to be wondered at if an animal constantly suffering pain should take on an untidy appearance. Where horses are fed wild hay there is always more or less danger of their getting headed heads lodged between the teeth and cheek, or, in some instances, these may lodge under the tongue and cause great discomfort. Frequently a head of wild rye lodged under the tongue or beside the cheek has caused death, this finally being induced by the head burrowing into the flesh. The outlay of a dollar or such a matter for an examination of this kind should not be considered for a moment, because this amount may be saved in the course of a week or two by the use to which an animal, after being treated, will eat his feed. Where there are many horses on the farm it will certainly pay to purchase a tooth rasp, and this should be used at least twice a year on all horses whose teeth present sharp edges.

New Stake in Kentucky.

The Kentucky Trotting Horse Breeders Association has announced a new race, the Stoll Stakes, a sweepstakes for foals of 1902, which closed January 1, 1904, with a forfeit of \$100. The race is of two heats of one mile each, and each heat a race. A horse distanced in the first heat will not be permitted to start in the second. Positions will be drawn for in each heat. More than one entry may be named by the same nominator provided the \$100 forfeit is paid on each. No further payment will be required till six o'clock the evening before the race, when \$150 must be paid on each entry expected to start. The \$100 forfeit must be paid on or before January 1, 1904, and must accompany the nomination—no credit to anybody. The money will be divided 30 per cent to first, 12½ per cent to second, seven and one-half per cent to third horse in each heat. The race will be trotted when nominations are three years old (in 1905), the week following the race for the Kentucky Futurity for foals of 1902, but money winners in the Kentucky Futurity will not be allowed to start in the Stoll Stakes. If entered in the Futurity, entrance money will be returned.

Oldest Son of Hambletonian 10.

It might be interesting to know that Orange Blossom 2:26½ by Hambletonian is still living in his thirty-sixth year at the home of his owner, H. B. Holton, Powhattan, Md. He made his record at the spring meeting of June 2, 1875, at Charter Oak Park, and would doubtless have won the race, but old Batchelder ran into him, cut him down, in which the tendons of the near hind leg were cut off. The writer, Cyrus Lukens, in *Sports of the Times*, saw him again at Charter Oak Park, Sept. 1, 1875, with his leg in a horrid condition. It was six months before Mr. Holton could take him home. That he should recover and live to his thirty-sixth year is remarkable.

Sober up on Jackson's Napa Soda.

Warranted to Give Satisfaction.

**Gombault's
Caustic Balsam**

Has Imitators But No Competitors.

A Safe, Speedy and Positive Cure for Curb, Splint, Sweeney, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lamenesses from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a Human Remedy for Rheumatism, Sprains, Sore Throat, etc., it is invaluable. Every bottle of Caustic Balsam sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address The Lawrence-Williams Co., Cleveland, O.

ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

The Gadwall or Gray Duck.

This duck is usually known locally as the "gray duck," the latter name being the one it is almost always called by practical hunters. Essentially a fresh-water marsh duck, like his slightly larger cousin, the mallard; greedy in his table habits, yet particular, and favored to an even greater extent than most of his luxurious tribe in the dual excellencies of fat and attendant delicacy of flavor, the gadwall every year about this time forces his way into the favor of those sportsmen who happily combine the pleasures of the epicure with those of the shot-gun. The bird is just now to be found in unusual numbers in the San Joaquin and Sacramento basins, as well as further south on the shooting grounds clear to the border line. Wherever the marksman's well-directed shot may bring his body bounding to the

and the like, though a vegetable diet is more to their liking.

Gadwall demand fresh water, and dislike exceedingly to leave it, resorting to the ocean rather less than most varieties of ducks on this coast. While well represented everywhere they are seldom the object of special pursuit; being killed in fair numbers among other ducks, haunting shallow sloughs, which can be waded easily with a pair of hip boots. They flock rather more than the mallards do, but are hardly what would be called gregarious fowl, never appearing in the vast clouds that characterize the sprigs and widgeon, but being usually noticed in pairs, or in small family parties of less than a dozen.

The recognition of gadwall on the wing is possible at a great distance, as there is only one bird for which they are likely to be mistaken—the mallard. The dark head, broad wings and comparatively slow speed of the greenhead distinguish him from every other duck, even when his mellow voice is inaudible, and the strident squawk of Mrs. Mallard requires no vision. The gadwall flies faster, looks a

little smaller, and has a different quack, less strident in tone, and more difficult to imitate properly. At times the male bird utters a peculiar whistling note. The drake gadwall may be picked out at a great distance in the air by their superior size and seemingly black breasts. The under surface of the wing is darker than that of a mallard. There is no need of distinguishing them from the other duck, however, as the gadwall is, if anything, the best bird of the two for table uses.

Gadwall decoy better than mallards; in fact, they come in to stool splendidly, and if one can imitate their peculiar, resonant call properly, and does not abuse his ability, he will often kill a limit string, and they will be the best birds in the bunch. At times, especially when much persecuted they become very wary, and exceedingly difficult to secure; but even under such circumstances will circle down from a great height to inspect a well placed stand of decoys. Although a big, strong duck they die easily and when crippled are not hard to capture. In Minnesota and the Dakotas, where, in the fall of the year, extensive shallow sloughs form on the prairies, after the October rains, gadwall are the chief duck, and number five shot is generally advocated for their pursuit. On the Coast, where all kinds of ducks are met with in a day's shooting, sixes are a general favorite, and it may be truly said for them that a well-directed lead will stop anything within

reason from a canvasback to a teal, though the individuality of guns often makes one size of shot superior to another for all around work.

In Mississippi and Missouri valleys the gadwall fully live up to all the sportsmen's traditions regarding their unfailing good condition, being frequenters of the rice marshes and adjacent grain fields from September until the icy bonds of winter close up all but the swiftest running water. They resort in great numbers to the drowned oak and beech woods in the spring of the year when food is rather scarce and the freshets run high, often affording very pretty sport to a pair of skilled hunters, one of whom does the shooting and the other carefully pilots the boat through the openings, taking turn about. The birds are jumped mostly, though sometimes an observant hunter notes a flight or "pass" into a favorite overflown resort where a stand is selected from which the shooter has no trouble to knock over the big birds as they come in. The mallards and red-heads often resort to such places at the same time as the gadwall. All three manifest the same love of seclusion amid different surroundings on the Coast.

Wild pigeons have been very numerous in the vicinity of Paso Robles. These birds stool well to decoys—the dead ones set out are excellent for that purpose.

C. W. Minor of Victoria, B. C., was last week awarded \$200 damages for the loss of his well-known Setter dog Roy Mantez. He brought suit for \$1000 and the case was tried in the Victoria County Court before a jury. Evidence given went to show that the dog had attempted to cross the track on the Birdcage Walk incline, in front of an advancing car, then descending the slope toward the bridge, and that being unable to clear the track was knocked over and sustained fatal injuries. The defense contended that the rush of the dog was so sudden and swift that no human power could have intervened to stop the car in time; that the car was not going at more than the statutory rate of speed, and that all reasonable effort was exerted to avert the accident. The complainant charged culpable negligence on the part of the motorman, and claimed that due diligence was not shown in attempting to prevent the accident.

The Grand American Handicap.

The Indianapolis Gun Club is to be congratulated on securing the Grand American Handicap for 1904. The Interstate Shooting Association, which controls the American tournament, has decided that the big tourney is to be held in Indianapolis next spring. The Grand American Handicap is the greatest trap shooting event in the world and it is proposed to make the next tournament the greatest ever held. The Indianapolis Gun Club is less than nine months old, but it has the largest membership, with possibly the exception of one or two clubs, of any organization in the country, its membership is composed of the best professional and amateur shooters in that city, State and country and prominent business men as well. Before the club house was finished the club secured the Indiana State tournament for 1904, which is the most important tourney in the State and ranks, it is claimed, second to the national shoot. The State tournament is set for June 8, 9, 1904, but it may be held earlier if the Interstate Association decides to hold the grand American Handicap in June of next year. The Indianapolis Gun Club did not secure the coveted Grand American Handicap without opposition. The St. Louis Gun Club and the Denver Gun Club bid strongly for the event. The St. Louis Club claimed that the tourney should go to that city in view of the World's Fair there next year. The club offered \$5000 to be added to the most important events if the handicap should be awarded to St. Louis. The Denver Club also made tempting offers, but they were not considered. The Indianapolis Club offered no added purses, but it had the co-operation of about one hundred of the most prominent shooters of the country, and the Interstate Association considered the application. "If St. Louis business men were willing to donate a handsome sum to be added to the purses, it seems as if the business men and the hotels of this city," says the *Journal*, "should contribute a suitable purse to be added to one of the events. If the Indianapolis Gun Club makes the tournament a big success it has every assurance that the Grand American Handicap will be given to this city for several years to come."

It is quite probable that the big shoot will be made an international tournament, so as to induce the foreign shooters coming to this country next year to participate. This could be done by giving such an event in connection with the Grand American Handicap, the latter being open to American shooters only. With nearly 500 shooters, it is estimated who will be present in the city during the tournament, there promises to be lively times on the firing line. Success to the Indianapolis Gun Club and the Grand American Handicap.

Chicago Show.

The Chicago Kennel Club has decided to hold its annual show on March 17th, 18th and 19th, at the First Regiment armory. The kennel club states, explicitly, that the coming dog show is intended wholly to advance the class of dogs, and that revenue cuts a secondary figure.

To judge from the advance order for entry blanks, the March show will be the largest ever held in Chicago. Over 1000 individual entries, it is estimated, will be received—that is to say, 1000 dogs will be henchened, to say nothing of classes in which one dog will be entered perhaps three or four times, so it is claimed by a Chicago exchange.

The officers of the club are: H. J. Cassady, President; P. Henriel, Jr., Treasurer; S. Summerfield, Secretary.

United States Fish Commissioner Bowers of Washington has made an offer to the State of Oregon to take over and operate the great salmon hatchery at Ontario, Or., to its full capacity provided the State will agree to enlarge it, as may be required.

The Ontario plant has just been completed by the State and this season turned out 20,000,000 eggs. The Government at present operates three plants in Oregon. Clackamas, Big White Salmon and Little White Salmon, the output of these three latter hatcheries this season being 34,500,000 eggs.

On the Marsh near Burdell's

Weidner photo

earth, there may be found a broad-breasted, cleanly-feathered bird with a solid, leady "feel" about it that betokens many a sweet, tasty morsel when the quick oven has done its work. A lean gadwall is as much of a rarity as a thin teal; perhaps even more scarce, for the bird is not to be found except in places where abundant food is to be had.

Measuring slightly less than the adult mallard, the gadwall often weighs as much, and the female is marked slightly like the greenhead's mate, being not infrequently mistaken for her by inexperienced shooters, though the distinctive marks are many and well defined. The drake gadwall in the full glory of his midwinter plumage is one of the handsomest of birds, not so much because of any brilliant dazzle as from sober, but warm hues of his feathers, and the surpassing elegance of his form. With a broad, black bill, a grayish mottled head and a breast of the same, striped and scaled with lines of the most lustrous black; white underneath with a glossy black tail, and chestnut wing coverts, the gadwall differs from the mallard and most shallow water ducks in having no bright spot on the wing, a plain white bar edged with black being the only ornament. The long feathers which overlap the wing when folded are beautifully mottled with shades of brown and black, while the brilliant orange of the bird's feet serves to set off the rest and make him a truly aristocratic-looking creature—an appearance which is in no wise belied by his habits.

The female is much more sober in her markings, and has a black-and-yellow bill, being much smaller than her handsome spouse. In fact, the excessive difference in size between the male and female gadwall has caused many hunters to think they were not the same variety.

Being a close relative to the mallard, and in some sections of the country called "gray mallards," the gadwall are naturally sought for upon much the same class of marsh as that favored by the greenheads. They are often knocked down out of small bunches of mallards, and mallards on the other hand, often travel with their smaller relatives, one being seldom found in great numbers without the other being close at hand. Their food is practically identical. Both ducks like grain and will fly far to get it. That failing, they eat certain marsh mosses, the seeds of various plants, hemp in particular when available, and in some parts of the country heech mast or other acorns. Like all ducks they catch many insects, and occasionally indulge in angleworms, slugs, little frogs

A Stand of Decoys on the Cordelia Marsh

The Bloodhound.

Not since the S. F. K. C. show here in '98 have we seen anything at all approaching a typical Bloodhound. At that show four good ones were henchd by the Mount Shasta kennels. Two kennels of ten or twelve alleged Bloodhounds came under our inspection at the Los Angeles show two years ago. Several of the dogs were kept out of the ring at our request, for they were not Bloodhounds and for those brought in, although they showed to a little extent some Bloodhound crossing, the best we could do was to award a ribbon in a kennel contest, not because they were Bloodhounds.

These very dogs had a great reputation in the Southern county as man and varmint trailers. So have other mongrel packs in different parts of the Coast. Their man-hunting qualities, notwithstanding sensational stories in the columns of the dailies, have invariably turned out to be a mythical quantity. We do not at present know of a breeder on the Coast who has a strain of dogs at all approaching the typical standard of the breed. What has become of the dogs and their progeny shown by the Mt. Shasta Kennels we do not know, at all events they were very good dogs and should have been appreciated. Possibly, the fact, that long-eared yellow mongrels, commonly and erroneously called Missouri hounds, could be purchased as Bloodhounds for a few dollars had something to do with the passing of a well established Bloodhound kennel.

We are of the impression that Bloodhounds can be trained to trail and find a human being—the perpetrator of a crime, fugitive from justice or a person lost in the woods or mountains. Bloodhound trials having proven the practicability of the breed for that purpose. The numerous failures on the Coast recently and in the past where dogs have been used resulted from improperly trained mongrels more than anything else. The breed to a great extent out here is unknown and much misunderstood. The following article by Mr. Edwin Brough in the *Illustrated Kennel News* is interesting and we take the liberty of quoting it in full:

"O'er all, the bloodhound boasts superior skill;
To scent, to view, to hunt, and boldly kill—
His fellows' vain alarms rejects with scorn,
True to the master's voice and learned horn;
His nostrils oft, if ancient fame sings true,
Traced the sly felon thro' the tainted dew;
Once snuff'd, he follows with unaltered aim,
Nor odours lure him from the chosen game;
Deep-moond, he tumbles, and infuriated he views,
Springs on relentless, and to death pursues." —Tickell.

"And though the villain 'scape a while, he feels
Slow vengeance like a bloodhound at his heels." —Swift.

"Count Le Couteux de Canteleu (without doubt the greatest living authority on the subject) is quite positive that the Bloodhound, or Sleuthhound (and his predecessor, the Talbot), were derived from the St. Hubert, from St. Hubert's Abbey in the Ardennes. This breed dates from the earliest ages, and certainly existed in the time of the Gauls. In the eighth century it was known as the Flemish hound, and was divided into two sub-divisions—the black and the white. The most highly esteemed were the black (really Black-and-Tan), and the Abbots of St. Hubert's Abbey maintained the breed very carefully, in memory of their founder. These hounds possessed great hunting qualities, particularly that of keeping true to the scent.

"They were deep-throated, fine nosed hounds, showing great powers of endurance, but not great swiftness, and were very courageous and daring. They were chiefly prized as limiers for unharboring the wild boar. They were generally of a slightly reddish-black, with tan marks over the eyes, and on the legs and feet, long pendulous ears, well-shaped, but rather long loins, not so high on the leg as the Normandy hound."

The Abbots of St. Hubert presented three couples of hounds yearly to the King of France as a token of allegiance, and they were used as limiers for wolf and boar.

The Count says: "The characteristic features and qualifications of this famous breed seem to have been much better preserved in England in the Bloodhound."

The Count took the greater part of Lord Wolverton's pack in 1831, but he had been hunting Bloodhounds for some years previous to this, and his kennel list for season 1876 and 1877 tells of

Names remembered,
Because they, living not, can ne'er be dead."

—such names as Holford's Regent and Matchless, Becker's Brenda and Duchess, Cowen's Druid and Dewlap, Pease's Druid, Jennings's Tiger, Fury, and Druid, the latter sold to Prince Napoleon. The best of the best of our hounds to-day are full of this blood.

The Count never tires of singing the praises of these hounds "I have never seen more beautiful hounds, nor keener ones. The way they killed deer and wild boar was admirable, but unfortunately the boars killed too many for me."

In 1900 the count had in his pack a three-year-old dog descended from the Bloodhounds, but with a slight cross, which he bought back on account of his superb qualities. He was very fast, had a grand voice, and was extraordinarily courageous and powerful. He could throw down a very large boar, but has probably been killed by this time.

In France it is the custom on St. Hubert's Day (November 3d) for the priest to bless the pack collectively after mass, and to bless the oldest member of the hunt, the oldest horse, and the oldest hound, and the priest attaches a red rosette to the button-

hole of the man and to the neck of the horse, and of the hound.

In one of the pedigrees in the kennel list mentioned above appears a St. Hubert hound, and this must have been one of the last of the breed, as it became extinct about that time.

St. Huberts were brought over to England at the time of the Conquest, and also when Henry IV. sent some over as presents to James I.

The old writers seem all agreed that the speciality of the Bloodhound is that he has a more delicate nose and can hunt a lighter scent than any other hound, and that he is especially "free from change," as the French say—I, e, that he will never change from the hunted animal to a fresh one.

In Barbour's Bruce, a poem written in the fourteenth century, we are told:

"A sleuth hund had he thar alsua,
Sa gud that wald chang for na thing."

And again:

"The kingis sent, he wryst rycht weil,
That he wald chaung it for na thing."

The *Sporting Dictionary*, published 1803, says:

"The hounds destined to one particular kind of business or pursuit, as Bloodhounds, were never brought into the chase for a constancy with the pack for the promotion of sport, but were preserved and supported (as a constable or Bow-street runner of the present day) for the purpose of pursuit and detection, wherever they could, with certainty, be laid on in good time upon the scent or footsteps of the object it was thought expedient to pursue. Deer-stealing, for instance, was so very common a century since to what is at present, that the game and park keepers in most parts of the kingdom were in a kind of eternal watching and nocturnal warfare; the hounds we are now describing were then constantly trained to the practice, and so closely adhered to the scent they were once laid upon, that (even after a very long and tedious pursuit) detection was certain and inevitable; from this persevering instinct and infallibility, they acquire the appellation they have so long retained; and an offending criminal not a century since, was absolutely conceived to be positively taken, and half-convicted, the very moment a Bloodhound could be obtained."

In *Horse and the Hound*, by Nimrod (Chas. Apperley) published 1842, we read the Bloodhound

"possessed the property of unerringly tracing the scent he was laid upon, amongst a hundred others; which evinces a superiority, at all events a peculiarity, of nose entirely unknown to our lighter hounds of any breed. The want of being able to distinguish the hunted fox from a fresh-found one is the bane of English fox hunting, and here are not wanting those who think that, in the breeding of the modern Foxhound, the minor points of high form and blood are more frequently considered than they should be in preference of a regard to nose."

In border warfare the Sleuth-hound played a most important part. When the beacon-fire blazed, the country rose; all men, on horse or foot, were bound to "follow the fray with Hue and Cry" upon the pain of death: the Slogan was sounded, and the pursuit by Hot Trodd rapidly made. The laws of Elizabeth in 1563 still permitted the custom of the Marches of pursuit by the aggrieved parties by "Lawful Trodd with Hound and Horn, with Hue and Cry, and all other accustomed manner of freeh pursuit, for the recovery of their goods spoiled." The offender could be lawfully pursued in Hot Trodd by the warden of either kingdom into the opposite realm, and, if overtaken and apprehended, brought back. The pursuit was often followed with a lighted turf carried on a spear.

The Sleuth-hound of that time was so heavy and slow, that he was taken up and carried on the saddle bow for a time when the pursuers came to soft ground, where the trail was visible. If the horse of that period was faster than the Bloodhound, the latter must indeed have been slow.

During the first half of the last century the Bloodhound seems to have fallen out of use either for man hunting or for the hunting of animals. He became very scarce, but the institution of dog shows fortunately saved him from total extinction. His majestic appearance and docile disposition gained him many friends, though amongst the uninformed he is still sometimes regarded as a ferocious monster endowed with miraculous attributes, and capable of pursuing his victim successfully under any conditions till caught, when he would certainly tear him limb from limb. This may probably be accounted for partly by his name, which is calculated to inspire awe, and partly by slave hunting tales in *Uncle Tom's Cabin* and similar books. As a matter of fact, the hounds used for slave hunting in the Southern States of America, although called Bloodhounds, were not Bloodhounds at all, but merely the Foxhound of the country, sometimes crossed with the Cuban Mastiff or, as it was sometimes called the Cuban Bloodhound. The latter animal had no pretension to be called a Bloodhound, or in fact a hound at all, and was more like an inferior Great Dane than anything else, though it is not believed that it ever attained to any really fixed type.

As regards the name of Bloodhound the Count Le Couteux believes that when fox hunting in something like its present form was instituted, it was found that the Sleuth-hound was not fast enough for the purpose and the present Foxhound was evolved from various material, and that about this time it became usual, in speaking of the old hound of the country, to call him the Bloodhound, meaning the hound of pure blood (as we should speak of a blood horse), to distinguish him from the new hound or Foxhound.

The slave hunting hounds were trained to pull down their man, but it would not be possible to do this with the Bloodhound, and it is a daily occurrence to hunt an entire stranger with pure Bloodhounds. When they have overtaken him, and ascertained that he was the object of pursuit, they manifest no further interest in him.

Of late years the Bloodhound has been bred on more galloping lines, and is a very much faster hound than he was in moss-trooping days, and his feet are rounder and more knuckled up. His characteristic head formation has been well maintained, and the general average of excellence is greater than it was fifty years ago. Unfortunately it has remained a rare breed, and is in comparatively few hands, and is consequently much inbred, with the natural result that distemper is a more dangerous disease than in some other breeds of hounds. Out-crosses have been made from time to time, and have been valuable in at once restoring hardiness of constitution. In 1882 the writer introduced a cross with the Southern hound. About 1835 Mr. Mark Beaufoy crossed with a hound of French breeding, and Lieutenant-Colonel Joynson is experimenting with a Griffon Vendee, and is now about to make his third cross. In America Mr. Lewis Strong is introducing a cross of American Foxhound with great success, and he is also about to make his third cross.

The most successful infusion of new blood, however, was that introduced by Mr. E. Nichols about 1876. Until a comparatively short time since, each keeper in the New Forest was required to keep a couple of hounds on his walk. They called them Talhots, and they were evidently degenerate Bloodhounds. One keeper named Maynard on the Beaulieu walk used to boast that the breed had been banded down in his family from father to son for more than 300 years. Some fifty or sixty years ago Mr. Thomas Nevill Chilland, near Winchester, procured one or two couples of these hounds from Primer, the keeper on the Boldrewood walk, and from them originated a small pack. Mr. Nevill had a fancy to get his hounds as black as possible—marked like Black and Tan Terriers, in fact—and so they were at his death. Mr. Nevill hunted, deer, fox, hare, a tame jackal, which used to be hunted and then return to the hearthrug when the hunt was over—anything, in fact, for in the off season he hunted water rat!

About the time of Mr. Nevill's death Nichols bought a bitch named Countess from this kennel, and from her bred a bitch called Restless, by Mr. E. Reynold's Ray's Victor. Restless was sent to that grand dog Luath XI., and produced the grandest litter of Bloodhounds ever bred up to that time. Mr. Nichols reared ten or eleven of this litter to about twelve months old, and then sold most of them for long prices. Unfortunately some of the best of these died without having been exhibited; but amongst the remaining ones were Bravo, Lawyer, Champion, Napier and the three hitches of the litter—Belladonna, Hebe and Diana, all champions. The success of this out-cross was so evident that it is impossible to find a pure bred Bloodhound to-day without much of this blood in his veins.

The antiquity of the breed and its consequent prepotency makes a cross out a far less perilous experiment than the young breeder is apt to imagine. Constitution is recovered at once, and retained for some generations, although the new blood soon becomes a negligible quantity, and whatever the breed may be it must necessarily be so much newer than the Bloodhound that its influence on type is very trifling, and is soon stamped out.

In the seventies Lord Wolverton hunted turned out red deer in Dorsetshire with a pack of Bloodhounds, and Whyte-Melville, in his *Riding Recollections*, thus describes them:

"Full, sonorous and musical, it is not extravagant to compare these deep-mouthed notes with the peal of an organ in a cathedral. Yet they run a tremendous pace. Stride, courage and condition (the last essential requiring constant care), enable them to sustain such speed over the open as to make a good horse look foolish; whilst among enclosures they charge the fences in line like a squadron of heavy dregoons. Yet, for all this fire and mettle in chase, they are sad cowards under pressure from a crowd. A whip cracked hurriedly, a horse galloping in their track, even at an injudicious rate, will make the best of them shy and sulky for half the day."

When Lord Wolverton gave them up, Lord Carrington hunted them in Buckinghamshire for one season, and then the greater part of the pack was taken over by Count Le Couteux de Canteleu.

The Bloodhound was originally chiefly used as a limier and for man-hunting, and for these purposes he is far superior to any other breed of hound, as he is a natural man-hunter, is able to hunt a far colder scent than any other breed, and is of all breeds the least liable to change.

The late Mr. J. Nevill Fitt (one of our most reliable authorities) says:

"Whether the Bloodhound can really hunt a lower scent than ordinary hounds will, I fancy, always be a moot point, there is no doubt but he has an exceedingly fine nose, and nature has endowed him with the patience to make the most of it. My own idea is that a Bloodhound simply hunts a colder scent than a Foxhound because he takes more pains. He stoops for a scent when the other is driving ahead. It is like the quick school boy and the plodding one; they are each very well in their place—that of the Foxhound being to chase his victim to death as quickly as possible, the Bloodhound to hunt it down by patience and perseverance.

"I do not consider these good hounds for a pack, because each hunts for himself, and they do not look to and depend on each other. Moreover, to form an efficient pack, hounds must at times be taken hold of by the huntsman, and turned by the whip. This Bloodhounds do not like. I heard Lord Wolverton say the same, and my own experience bears it out. They are too independent, or clever, if the term is more agreeable to their admirers; and I fear I must add that cleverness is at times so great as to hinder very closely on contrariness. It is not so much inferiority of nose, as want of patience and method in using it, that debars most dogs, more particularly hounds, from hunting as cold a scent as a Bloodhound. Let him work and drive like the Foxhound, and he will

no longer hunt a man or deer hours after he had been gone.

"My opinion of a Bloodhound is that he is out of place in a pack; but that, used as the Hon. Grantley Berkeley used Druid, either to drive game to the rifle or retrieve it when wounded, they are invaluable. Here, using only one, or a couple, as the case may be, their cleverness and independence has full scope; they can use their intellect without interference from a sportsman, take time to puzzle out a scent when at fault, and hunt after their own manner; but this is not what we want in a pack."

The late Colonel Cowen introduced a Bloodhound cross into the Braes of Derwent Foxhounds with great success, and Mr. Charles Wilson has done this with the Oxenholme Stagounds with gratifying results.

In the Galtee mountains, County Tipperary, the Bloodhound is found to be of great service in driving fallow deer to the guns. These mountains are very thickly wooded, and deer-stalking, as in Scotland, is quite impracticable. Eight or ten beaters are used, and the rifles are posted at likely crossing places, and the woods beaten backward and forward, the deer generally breaking back. The keeper who has charge of the Bloodhound walks on a ride in line with the beat, leading the hound. Directly a good buck is seen the hound is put on the line, still on the lead. The keeper carries a signal horn, with which to intimate to the guns the finding of a likely deer, and then the interesting hound work begins, though it is no sinecure for the keeper. With this method the guns are pretty certain of a shot before long. The hounds do not give tongue, except on viewing deer."

DOINGS IN DOGDOM.

The Nevada Field Trial Club's trials are off for good. All all events, the meeting will not be run after the Bakersfield trial as was contemplated when it was found that the dry season would prevent the original running in Paradise valley, Humboldt county, Nevada.

Rumor has it that Mr. W. J. Pegg will judge Bulldogs and Bull Terriers at the W. K. C. show in February. Mr. Pegg it will be remembered is the proprietor of the Woodcote Kennels and was the breeder of Ch. Woodcote Wonder. He will no doubt draw a large entry of the two breeds mentioned.

Jos. E. Terry's sterling English Setter Orion, the sire of some good dogs, served Iona S. (Lady's Count Gladstone-Jessie Rodfield) on the 3d and 4th insts.

Mr. Terry also bred Lou (Orion-Mary Lou) to Henry Oxenari's Merry Monarch (Mercury-Johanna) November 24, 1903.

The breedings above referred to should be productive of something good, the sires are proved producers.

Lady, we will mention, will probably be bred to Kilgariff. The nick will be watched with interest.

Al Betz's English Setter bitch Merry Heart (Merry Monarch-Sweetheart's Last) was served by W. W. Van Arsdale's McCloud's Boy (Tony Boy-Sadie Hopkins) November 25, 1903.

Henry E. Skinner's Count's Mark Jr., a handsome son of Mr. W. W. Van Arsdale's Count's Mark served November —, 1903 Mr. H. Steele's Thyra, a bitch out of Lady Florence by Llewellyn Drake and bred by T. P. McConnell, of Victoria, B. C.

Thos. S. Griffiths writes us from Spokane that his Collie bitch Topsey (full sister to R. Miss Tuffei) has recently whelped a nice litter of puppies to Imp. Braehead Commander, a big winner here and in Scotland. Litters are expected from Imp. Moreton Vesta, Imp. Craigmore Caroline and Spokane Lassie, bred to Imp. Rippowam Archer and Imp. Lenzie Prince.

If all is well, Glen Tana Kennels should have a lot of good young Collies.

The list of judges for the Westminster Kennel Club's twenty-eighth annual dog show, to be held at Madison Square Garden, New York, February 10, 11, 12 and 13, 1904, is the following:

Dudley E. Waters, Grand Rapids, Mich.—St. Bernards.

I. Blackburn Miller, New York, N. Y.—Great Danes.

John Brett, Fisher's Island, N. Y.—Greyhounds, Foxhounds (Amer.), Chesapeake Bay Dogs, Pointers and Setters.

Dr. S. J. Bradbury, Lynbrook, L. I.—Sporting Spaniels.

W. J. Pegg, London, Eng.—Bulldogs and Bull Terriers.

Alex. L. Goode, Boston, Mass.—Boston Terriers.

Chas. D. Bernheimer, New York, N. Y.—Poodles.

E. Powell Jr., Shrewsbury, Eng.—Fox Terriers and Welsh Terriers.

E. Lester Jones, Madison, N. J.—Beagles.

O. W. Donner, Rye, N. Y.—Iris Terriers.

Dr. C. Ewing, St. Louis, Mo.—Scottish Terriers.

George Raper, Gomersal, England—Bloodhounds, Mastiffs, Newfoundlands, Deerhounds, Russian Wolfhounds, Foxhounds (Eng.), Griffons, Retrievers, Collies, Old English Sheepdogs, Dalmatians, Chows, Alredales, Basset Hounds, Dachshunds, Whippets, Black and Tan Terriers, Skyes, Beagles, Dandies, Dinmonts, Schipperkes, Pugs, all Toys, miscellaneous classes and unclassified specials.

James Mortimer will act as Superintendent, which means much for the successful banding of the show. The premium lists were ready for mailing on the 1st.

Duck and Quail Outfits.

The demand at Skinner's keeps up for sportsmen's outfits ammunition and guns. A large and new stock of goods has been added to all the demand for hunting suits, rubber boots and hunters' footgear, canvas and folding wooden decoys, gun cases and a new design of leather-covered shell boxes. Peters' Factory loaded shells are unequaled. Skinner's place is 801 Market street. You can get anything there you need for duck or quail shooting. Send for a catalogue, if you haven't the time to come, and try a mail order.

Hunting Jack Rabbits.

The hunting of jack rabbits as a profession, the jacks so obtained being sent to the common market, is probably as singular an occupation as exists in California. It is a fact not generally known that this business employs about 200 men, the site of their operations being chiefly in the two great valleys of the State, the Sacramento and San Joaquin, writes James Marquene.

It is in the latter county, however, that the larger number of these hunters pursue their calling, no less than sixteen of them living in and around the town of Modesto alone. The market for the output of these professionalists is San Francisco. The rabbits are shipped thence by express. This fact limits the territorial extent of the operations of these hunters within the State, as they cannot work at such a distance from San Francisco that the express charges on the rabbits shipped will exceed a definite rate per pound. The rabbits bring from \$1.25 to \$1.75 per dozen, from which the express charges and 10 per cent commission must be deducted. They are shipped in sacks, each sack containing thirty. It may be said, therefore, that a rabbit will bring to the hunter an average of 10 cents, and to earn a minimum of \$3 a day he must shoot an average of thirty each day. This number, however, is greatly exceeded. A hunter regards himself in poor luck if he does not kill fifty in a day. M. B. Carter, one of the hunters of Modesto, together with an associate, started shooting on September 1st last; up to the present time they estimate they have killed and shipped 7000 rabbits. Larger aggregates than this are made, as in the recited instance the men have not been shooting regularly during the period named.

The rabbit hunter is provided with a light wagon, on which there is built a box for the reception of his game; a pair of good, strong, lively horses; two dogs, a double-barreled fowling piece and a quantity of shells. Thus equipped he moves along roads and over fields in quest of the jacks. His animals are all trained to the business. As soon as his horses see a rabbit they stop; the hunter then shoots from the wagon, the horses paying absolutely no regard to the report of his gun. His dogs do not attempt to run down the rabbits that escape, unless it be such as are wounded; these latter they chase until the jacks are overcome, when they kill them and bring them to the wagon. Jacks are generally numerous over the areas traversed by the hunters; their common habitat is among the stubble of the old wheat or barley fields, or sheltered by the bunches of tumble weed. Under such cover they will remain perfectly still until the hunter's team is close upon them; then they will give a jump and a bound and be off—unless they are stopped by the quick and unerring aim of the hunter. The dogs which accompany the hunter are Setters. They follow the scent of the rabbit and approach him where he is squatting until they are within good shooting distance, when they stretch in a springing attitude upon the ground and remain perfectly still until the hunter comes up, and, advancing a step or two in direction of the jack, jumps him from his cover.

Frequently surprising shots are made. Mr. Carter states that he has upon several occasions killed as many as five jacks with a discharge of both barrels of his gun. Does are commonly accompanied by the bucks; of the latter there may be half a dozen in company of a single doe. This bunch of rabbits will move along the tracks in the wheat fields made by the wheels of the combined harvesters, and in these paths will approach a team to within shooting distance. The experienced hunter, when he sees a band of rabbits approaching in this manner, quietly awaits until they have approached such a distance that they are aroused to his presence then he lifts his piece and fires; generally he will get the bunch.

Rabbits have the trait of congregating in numbers of from ten to twenty under cover of a patch of weeds; one shooting at an exposed rabbit while they are so bunched, may unconsciously kill several, he will at least be greatly astonished to see spring out of the cover a large number of frightened and active creatures, who show him their backs at many different angles, and who bound and scamper off and in a moment disappear. At this juncture the hunter does some rapid shooting. Half a dozen or more shots fired in quick succession will bring the rabbits to the huddling position; then they will become terrorized and court safety in hiding. Then the hunter dismounts, leaving his horses to stand, and begins to shoot the rabbits as rapidly as his dog jumps them up. Bringing his bag to the wagon, he disembowels each rabbit, hanging its hind legs apart on hooks at the back of the box on his vehicle in order to get them in shape for this operation; all of the game being so treated, he tosses them into the box, remounts and drives on.

Every night in the camp the hunter loads his shells in preparation for the work of next day. He uses brass shells, which may be reloaded ad infinitum, and the ammunition cost is reduced to a minimum. It is the work of several hours to do this, so it is often late at night before he gets to bed. He sacks his rabbits, bringing sacks with him for the purpose, and ships them to San Francisco from any station on the railroad which he may pass.

Rabbits have been, and are to-day, an awful scourge to the farmers of the State, and especially to those of these great wheat growing valleys. It is in the San Joaquin that the great rabbit drives occurred, about which so much used to be written a few years ago. Whole communities, driven to desperation by the ravages of these pests, would turn out in a grand countryside assemblage, and on horseback, on foot,

in carts, buggies and wagons, they would march along, moving the rabbits toward a wire corral some miles distant, into which the pests would ultimately be driven and killed. The presence of the hunters has of late years rendered rabbit drives unnecessary, as the animals have been kept down to a considerable extent. Farmers suffer loss of grain at the present time, but the loss is not so great as formerly.

It is unlikely, however, that the rabbits will ever be hunted out, even within the small radius of profitable shipping to San Francisco. This is owing to the tremendous reproductive powers of the animal. They begin breeding in March and continue bringing forth unrelentingly every three weeks until September. Their first litters are small, being but one or two; but these rapidly increase in numbers, until along to the summer they are multiplying the rabbit population of the valleys by from twelve to fifteen young at a time. The mothers nest in old badger holes several feet under the ground, so they are secure from attack, except from gopher snakes and ground owls, which kill their annual quotas of these creatures, whose only defense is flight. A number are destroyed by coyotes, which, since the repeal of the bounty law, are again becoming numerous; but these natural enemies are wholly unable to cope with the prodigious increase of the jacks, and were it not for the human hunters few kinds of vegetation could be raised in some sections of the State unprotected by rabbit-proof fences.

The rabbits sent to San Francisco are nearly all handled by one firm; it is a large commission house, dealing in game of all kinds; they probably handle a million or more rabbits in a year.

The State Game Officials are Vigilant.

We had occasion two weeks ago to praise the Fish Commissioners and their corps of deputies for an unprecedented vigilance in the pursuit of game law violators, and at the same time we deprecated the source of many rumors to the effect that, locally at least, the law was fractured with an impunity that created much comment.

We were correct in one assertion—that the deputy commissioners were (and are) keen after the very (?) few delinquents, foreigners generally. But to our utter surprise our doubts as to the sale and holding of illegal quantities of game and the capture of ducks with nets, etc., were apparently not well founded. Within the past two weeks two arrests were made of dealers who had a larger number of ducks in possession than the legal quota as well as a number of dozen of quail for sale.

The first convictions for the taking of ducks with nets in violation of the statute was made this week. Two men, Vincent Geri and Salvatore Olivieri, were arrested by Deputies Cross and Lee under suspicious circumstances. They were known to be net fishermen and were taken with 152 ducks in their possession. Their nets, (and a few fish) were in the boat but they had no firearms and there was nothing in their boat to indicate that the game had been shot and everything pointed to the fact that the birds had been captured by drowning.

From the published statements, the fellows had a good case and possibly might have won out had they fought the charges. They were caught red-handed however and the practice has been so universal among that class that they plead guilty and were fined \$25 each. Now that the crusade has been tardily started, it will not be much of an effort to stamp out this particular system of game law violation.

Two more delinquents were taken into the toils of the official net for catching crabs under the legal size, the men were fined \$20 each.

The crab supply of this city has now become so limited, as against the plentiful supply of large crabs in years past, that a crab eight inches in length is almost a rarity. The rapacity of the dealers and persistent fishing all the year round has decreased our local supply to almost nothing.

Shipments daily by the thousand to Chicago and other points East is really the cause of the almost total decimation of the crab crop.

Coming Events.

Rod.

April 1-Sept. 10. Oct. 16-Feb. 1.—Open season for taking steelhead in tidewater.

Nov. 1-April 1.—Trout season closed.

July 1-Jan. 1.—Open season for black bass.

Aug. 15-April 1.—Open season for lobsters and crawfish.

Nov. 1-Sept. 1.—Open season for crabs.

Sept. 1-May 1.—Open season for shrimp.

Sept. 10-Oct. 16.—Close season in tidewater for steelhead.

Nov. 15-Sept. 10.—Season open for taking salmon above tide water.

Gun.

July 1-Feb. 15.—Dove season open.

Nov. 1-July 15.—Deer season closed.

Sept. 1-Feb. 15.—Open season for mountain quail, grouse and sage hen.

Oct. 15-Feb. 15.—Open season for quail, ducks, etc.

Bench Shows.

Jan. 20, 23.—Toledo Fanciers' Association. Toledo, O. A. W. Lee, Secretary, Toledo, O.

Jan. 27, 30.—National Fanciers' and Breeders' Association. Chicago.

Feb. 2, 7.—Ohio State Poultry Association. Columbus, O. W. A. Lott, Secretary, Wooster, O.

Feb. 10, 13.—Westminster Kennel Club, Madison Square Garden, New York. James Mortimer, Superintendent.

April 7, 9.—Victoria Kennel Club. Victoria, B. C. T. P. McConnell, Secretary, Victoria, B. C.

April.—San Jose Kennel Club. San Jose, Cal. N. J. Stewart, Secretary, San Jose, Cal.

Field Trials.

Jan. 6.—Mississippi Field Trial and Gun Club. Inaugural trials. Holly Springs, Miss. Membership Stake, January 6; Derby and All-Age Stake, January 13. W. De Arnold, Tupelo, Miss.

If You Have One or More Good Horses to Sell Consign Them to the

SECOND SPRING COMBINATION HORSE SALE OF

J. L. McCARTHY & SON

IRVINGTON PARK, PORTLAND, ORE, MARCH 1, 2 and 3, 1904

Several Consignments and Fast Record Animals Already Pledged.

We want 200 High-Class Trotters and Pacers, with and without records, Coach, Carriage and Driving Horses. Choice Breeding Stock, consisting of Stallions, Brood Mares, Colts and Fillies, will also bring more money at this Sale than can be obtained at any other time or place, because there is a great demand in the Pacific Northwest for these classes, especially if they are California-bred. If you doubt these statements read the account of our last sale in the Breeder and Sportsman, April 18, 1903. If you have a Good Horse to sell, write for Entry Blanks and full particulars at once.

**Consign Now and We will Thoroughly Advertise
Your Horses for the Next Two Months.**

**J. L. McCARTHY & SON,
Room 8, Hamilton Bldg, Portland, Ore.**

THE FARM.

Improve Your Turkeys.

Never before in the history of this country has there been such a scarcity of turkeys for Thanksgiving and Christmas as has been the case this season. Never before has such an effort been put forth to secure a full supply, nor was there ever known before to be such a failure in raising them. By far the greatest danger we confront in growing turkeys is the weakness that comes from too much inbreeding. People throughout the country have neglected introducing new blood into their flocks. This must be speedily done in all the flocks, or turkey breeding as an industry will be ruined. It is useless to hope to obtain new blood of a proper quality in one's own neighborhood. Send off miles and miles away across the country to secure new and vigorous blood. Many of the diseases that come to turkeys, young and old, such as blackhead, leg weakness and delicate constitutions, may all be blamed to careless inbreeding. There never has been any reasonable excuse for this, and with the present opportunities for enlightenment and information it has become more than inexcusable.

The practice of selecting and selling to market the largest and quickest maturing young turkeys is the second evil in turkey growing that needs correction. Two year old hens, or rather hens in their second laying season, are by far the best for producing poults. Never keep the small or under-sized turkey hens. Nor is it best to depend too much on very large oversized ones if you have them. The strong, vigorous, medium-sized hens in their second season of laying are the best that one can possibly have for laying the eggs from which to produce the young turkeys. One-year-old toms of good size, heavy bones and vigorous constitutions are the best to select. Do not be induced to believe that your neighbor can give you any relief through an interchange of toms—unless by chance he has lately introduced into his flock a cross of a wild turkey tom, as many have done. There were at Madison Square Garden last winter a dozen or more young toms that had come from a direct cross of a wild turkey tom with Bronze turkey hens. These young toms were stamped with the vigor and strength of the wild ancestor, and we know of some who purchased them that have been quite successful with turkeys the past season.

Do not imagine that wild turkeys are less vigorous or harder to raise to maturity than others. It is possible to have just as much strength, vigor and constitution in the white turkeys as in any other breed or variety. More attention should be given to growing the black turkey, as well as to

the Narragansett turkey. We have seen some flocks of buff turkeys, or rather of a cinnamon or reddish brown, that were almost as large as the bronze or Narragansett. These are said by Rhode Islanders to be a very steady, vigorous turkey for market purposes. We encourage greater attention being paid to the Narragansett, the black, the buff and the white, because we should like to have all the different breeds tried in as many localities as possible throughout the country where turkeys are grown; so that the merit of each in each section may be thoroughly tested. No doubt some turkeys will do better in some localities than others will.

The black turkey is said to be best suited to a climate like Texas. The Narragansett has been most successfully grown in the bleak climate of New England. The Bronze turkey seems to thrive better in some localities than others. All this should be taken up and studied by the turkey growers throughout the United States and Canada. Above all things, do not neglect to hunt up and find new, strong, healthy and vigorous blood to renew your flocks. In the future never breed close, and always select the best females for your own breeding stock, and sell the rest to market.—*Country Gentleman.*

The Thermometer in the Dairy.

Of all external influences, temperature is the most important factor to be considered in handling milk and milk products, says *Inland Farmer*. It works the most notable changes and influences more than any other factor the final quality and value of the product.

The creamery worker and butter-maker are fully aware of this fact. All their operations in handling milk or cream are gauged with the utmost accuracy by means of the thermometer, doing nothing by guess, leaving nothing to chance.

On the farm, however, changes of temperature or condition of weather, are in most cases regarded with the greatest unconcern. And yet, the milk as produced on the farm is the first and most important link in the chain of manufacturing processes.

The finished product, whether that be cream or butter, cheese or bottled milk, can be no better than the milk from which it is made.

Milk is without exception, the most perishable product of the farm and the dairyman who handles it with that fact constantly in mind will obtain the best results. While the dairyman who disregards it, will meet with failures and heap troubles upon his head.

Sour milk is the bane of the milk shipper in summer, and often the moment spent in taking the temperature of the milk before it leaves the farm, may be well spent. If the day is warm or sultry, a little study will quickly tell whether it is safe to ship or whether it is better to run the milk over the cooler a second time, in order to reduce the temperature

to the point of safety. There is no possible excuse for milk souring in transit during the months of December, January and February. Yet this happens, as we know, and the dairyman is never willing to assume the blame.

A thermometer placed at a location with favorable light either in the dairy-room or on the porch of the residence or in the barn, may be consulted in passing by, without even stopping.

It is a good habit, that of reading the thermometer. One to be cultivated by a man who makes the production of milk his business, and handles it every day in the year. He should at all times consult the thermometer as a guide to his operations. The condition of the weather and temperature of the air exert a combined influence on the condition of the milk. The man who habitually looks into the little things, the details of his business, observes these influences and adjusts his operations accordingly. He asks and answers these questions from day to day.

At what temperature, varying, of course, with the seasons, is it safe to ship my milk? How effective is my cooler in reducing the temperature of the milk from blood heat to that temperature? What is the difference of temperature between the air and the shipped milk? How long is my milk in transit? And must I not take greater precautions against souring on a long than on a short haul?

Farm Notes.

The exports of cattle, hogs and sheep for the first eleven months of 1903 were \$33,922,000 against \$22,000,000 for the corresponding months of last year.

The exports of breadstuffs for the eleven months of this year ending with November were \$11,760,000, an increase of \$8,000,000 over the corresponding months of last year.

A farmer who plans to grow several crops each season is more apt to succeed than the one who devotes his whole time to one crop. If he knows how to grow only one crop, he had better learn to plant others.

One reason tools do not give good satisfaction and wear out soon, is that they are not good to begin with. Buy only the best, and take the best of care of them, and keep them sharp and under shelter.

California raised crop last year was 110,000,000 pounds. The State practically supplies the country with raisins. We imported last year about 6,000,000 pounds of raisins, but exported almost an equal quantity.

A man who has been active and industrious all of his life will find it more difficult to stop than to keep on with his work. The time never comes when he wants to sit around and do nothing. When he stops work he falls off in weight and his appetite fails.

The general principles in farming are the same as in selling dry goods, gro-

ceries, or anything else. These are, a knowledge of what the market needs, when it wants it, and furnishing it at that time, in such quantities and at such prices that the consumer will buy it.

During the last fiscal year 1,729,100 doses of blackleg vaccine were distributed among cattle growers. The Bureau of Animal Industry is publishing a table which shows that of the animals vaccinated, which were not already in a practically dying condition, only about half of one per cent died.

When ground is so uneven that it washes badly it should be terraced. The Agricultural Department has a bulletin on ditches and ditching which may be had upon application. The sheet-water system is practiced by some. Where fields are very hilly, something needs to be done, or they will run down the bill and into the creek.

The seed investigation of the Department of Agriculture have shown that large quantities of trefoil and other practically worthless seed are being imported for the adulteration of alfalfa and other seeds. About 450,000 pounds of Canadian blue grass seed are imported, the chief use of which is to adulterate the higher priced Kentucky blue grass seed.

A report is now in course of preparation by the Department of Agriculture on various tobacco diseases. Tobacco experts have been studying the subject for upwards of a year, and besides laboratory work, an expert of the Department, Dr. McKenney, has visited the principle tobacco growing areas and studied the distribution and behavior of the diseases in the field.

COMMENCING DECEMBER 14.

SIX OR MORE RACES DAILY

RACES START AT 2 P. M. SHARP.

Reached by street cars from any part of the city.

Train leaves Third and Townsend at 1:15 p. m., and leaves the track immediately after the last race.

THOMAS H. WILLIAMS, President.
PERCY W. TREAT, Secretary.

The Joy of Knowing.

[Breeder's Gazette]

There was a day when the farm was a little world. The farmer did it all, knew it all. He sold little, he bought little. His men were paid in kind. A day's work was exchanged for a bushel of wheat. If the farmer owned his soil he could hardly fail to live well. He could even make money if he had the advantage of living close to cities. There were no railways. The prairies and the deserts were untamed. The farmer then did not know how badly he did things. He had not found out how costly many of his practices were. His cattle were fed and fattened when four to six years old. His wethers must be four years old. There was even a "four-year-old" club in England, the purpose of which was to maintain the practice of eating only four-year-old mutton. Rotation of crops was little practiced. Fertility was maintained, if at all, by careful saving of manures. In that point our fathers were often better than their sons.

While the old-fashioned farmer sold little he also bought little. He did not go into the markets for feeding cattle or sheep. He did not go on the market for foodstuffs and fertilizers. He kept cows, the maids milked and made butter, the calves were grown on the place; they were finally fattened and sold. The farmer did not dream of shipping them to market himself. He did not much watch markets. He knew little about sources of supply in feeding cattle or sheep or as to ages more profitable to buy. There was then much less need that the farmer should be an educated business man. There was need that he should be economical, saving, skilled in all manner of trades and arts, for he made his own tools, soap, shingles, candles, clothes, houses. He was a carpenter, builder, skilled axeman, swung the scythe and cradle, half-soled his own boots.

The schools were ruder then. The farmer's son worked morning and evening, going generally late to school, learned to read, spell, cypher, a little of geography. What he learned did not wean him away from the soil, he read steady-going papers by the fire of winter's evenings and good old-fashioned books. To-day the whole system of schooling is changed. Boys are pushed faster. They know as much at ten as we did at fifteen. There is no longer any time for them to do work on the farm before or after school hours. They bring their books home from school. They get little thus far in their books to lead them to think of the farm or of agriculture. We will not say that modern school systems are inferior to the old but we do believe there is too much divorcing of brain work, study and hand work. Boys are best off when they have plenty of actual contact with the soil and the real work of the farm in connection with all the schooling you care to give. We are not giving too much education to our boys so much as we are neglecting to give them the right kind. Mathematics will not hurt, but will help. Languages will help if they do not take too much time. Chemistry is the foundation of all science; the boy cannot do without that. Geology helps. Botany helps. All these and other things but lay broad the foundation for a profitable agricultural education and make a man able to understand and appreciate this world of which he is a part. The life is more than the meat.

The tendency of modern agriculture, with its machinery and horse power, enabling men to reap wide fields, is essentially destructive. There is great need of scientific and practical teachings of soils and maintaining and restoring fertility to them. You cannot learn that of the farmer practicing his art on the prairies to-day. He is a soil-rober, and wisely enough; for all pioneers must be soil robbers. The young generation of farmers must cease to be soil robbers. The farmer is a business man. He must know with definiteness and skill many things. He

must know how wisely to choose cattle for feeding, to buy feedstuffs wisely for them, to feed them economically. Thanks to modern methods practical men, skilled in these arts, are now to be found in our agricultural colleges.

Agricultural education pays well in the joy that it brings the young farmer. The common processes of the art take on a new meaning. As he plows, instead of turning up a dead soil he is turning up the history of the world since the very rocks cooled. He is thinking of the chemistry of that soil and of the problems concerning it and its productiveness; problems that neither he nor his sons will find all settled. It is nowhere a dead world to him but a source of thought and pleasure everywhere. He will do things better, he will make more money for his training, but what is as important he will take a new interest and pleasure in doing things.

If the boy has no land even then the agricultural education is most useful to him. Thousands of wealthy men are wise enough to be acquiring landed estates. Most of them desire to live upon them at least a part of the time. They are searching for men who know how to manage these estates. They are willing to pay generously for trained young men who can grow crops and care for cows and feed cattle and do these things well. They want the young men who know how. There are not nearly enough trained young men to do this work. Very often we receive letters from rich men who are seeking for these young men who know how to do things. To the young man, therefore, who has time and strength we would say take the regular course in agriculture. To the man who can not spare the time we would say take the short course and keep up your reading and study at home. A half-loaf may not satisfy your hunger, but it may cause you to hunt up the other half of the loaf and devour it at your leisure.

Why Some Breeders Fail.

Many breeders go into improved live stock and fail simply because they "hide their light under a bushel." They buy the best, they care for it well, they use judgment in breeding and the produce good stock, but they lose sight of the most important part of the business, profitable prices, says *National Stockman*. A farm loaded with the best live stock in the world would be an expensive luxury to the owner if he were not able to get better prices than the man who produced common stock. For the butcher grade stock is sometimes as good as if not better than pure-bred stock and the producer of pedigreed animals should always cater to the breeder instead of the consumer.

There is but one way to create a trade among the class of buyers that are willing to pay high enough prices to justify the careful breeder. It can only be done by advertising. This may be done by exhibiting at fairs or shows, by a liberal use of catalogues and circulars, or by placing an advertisement in a good, reliable live stock and farm paper. The experience of the most successful breeders proves beyond a doubt that the latter is the most successful method. Papers that are always advocating improved live stock have done more to distribute good breeds throughout the country than all other mediums combined. They enthrall the man who has been contented with scrubs to try something better. They encourage the man who has taken a step higher. They disseminate knowledge along the line of improvement among ordinary farmers until they are convinced that it pays to get out of the old ruts, thus creating a demand.

Lack of enthusiasm and interest in good stock is often due to the breeders themselves. Liberal prices are paid for good blood and good animals. Neighbors watch the outcome. They figure the investment and the result. If the prices received are

not proportionately higher than common stock as the prices paid they figure that another good man has gone wrong. And their conclusions are about right. The man who pays good prices for good live stock for breeding purposes should get much better prices for what he produces than the man who is satisfied with scrubs. This can be done by creating a market in the way of letting others know what you have by thoroughly and persistently advertising.

The Yearling.

Feeders of baby beef, who keep their animals up to their work, are known to make a gain of over two pounds daily for twelve months. This gain depends upon the age of the animal and the manner in which it is fed. A matter that should not be overlooked by the farmer is the appropriate food for each animal; he should aim to increase the weight by making the animal as fat as possible, as fat is more easily produced on an animal than either lean meat or bone, says *The Epitomist*. It has been shown that to increase the excess of either fat or lean on an animal depends upon the age. The natural inclination of a yearling animal is growth, and the system demands materials containing but a small portion of fat producing qualities; but as growth adds to weight, the more rapid the growth the greater the increase in weight, which, of course, accounts for the quick gains made by young animals as compared with those approaching maturity, and which fact gives rise to the claim that baby beef is the cheaper form of the two.

To know the breeds and how to use them; to be aware of the fact that some breeds assimilate more food and give off less waste than others, end to learn how to convert food into a salable product quickly and economically is what each one must study out for himself. Have a pair of scales, weigh frequently and note the ratio of increase in weight. By so doing one can cover the causes of failure and correct mistakes. The time is coming when the farmer will not be satisfied with less than a pound a day from birth for his two year old steers, nor less than a pound a day for his farrows and wethers up to one year old. In approaching maturity, gains are not so great, but previous to that animals for the block should be pushed. Finally, breeds that gain weight in the high-priced portions of the carcass must be given preference, and feeders must know that they are breeding for definite results. Baby beef must have the fat in the right place.

The Cost of Pork at Different Ages.

Still harping on the same thing, hammering away on the same nail, we give our readers some of the conclusions drawn by the Wisconsin Station as a result of a series of careful experiments as to the average net gains of pigs at different ages and the average cost per 100 pounds of grain, says *Wallace's Farmer*. The gain for the first four weeks on the litters of twelve brood sows of different breeds was 8.8 pounds and the cost \$1.7 per 100 pounds; the second four weeks the gain increased to 12.6 pounds and the cost to \$1.71; the third four weeks the gain increased to 21.4 pounds and the cost to \$2.06; the next four weeks for some reason the gain dropped a little to 20 pounds, but the cost of the gain was \$2.74 per 100 pounds; the fifth four weeks the gain was 23.3 pounds and the cost \$3.34; the sixth four weeks the gain was 29.1 pounds and the cost \$3.19; the seventh four weeks the gain was 23.3 pounds and the cost \$3.95; and the eighth four weeks the gain was 32.4 pounds and the cost \$4.29.

This illustrates in a very striking way the correctness of our teachings on this subject for some weeks past. The older and larger the hogs the greater the cost per pound of gain. The younger and smaller the hog, the greater the increase on a given amount of feed for the reason

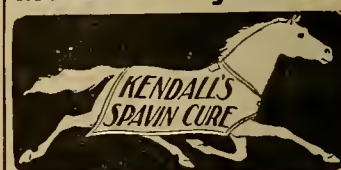

that it costs less to run the machine and the further reason that the capacity for digestion and assimilation is greater in the young animal than in the one more mature.

Bear in mind now if you are feeding your pigs with a scoop shovel, feeding them on grain that has a value, that the younger you can fit them for a profitable market without impairing their health by over-feeding the more money you are going to make out of them. This applies to hogs to be fitted for the market. It does not apply to animals intended for breeding purposes. These should never be pushed or forced but grown with the idea not of making the greatest number of pounds per day at the least cost, but of developing an animal with the most perfect health and most abounding vitality.

Nor does this rule apply to animals, as we have before pointed out, that are kept for scavenger purposes in other words, not fed with a scoop shovel out of the oats bin or corn crib, but hogs that are used for consuming the offal of the dairy and of the feed yard or for turning clover, rape or alfalfa pastures into cash. We can afford to waste feed on them because the food in itself is largely waste, and it is better to get something out of it than nothing, and the hog can be used very generally for that kind of work. When this hog is to be fattened, then he should be pushed as rapidly as possible, for the fewer days it requires to add 50 or 100 pounds to his weight the less food is wasted in running the machine.

We think now we have made this perfectly clear to any man who will take the pains to read carefully and think over what we have said in this and three or four preceding articles.

Measured By Years

KENDALL'S SPAVIN CURE has been found to be the best for Spavins, Ringbones, Curbs, Splints and all forms of Lameness.

Parkersburg, W. Va., Dec. 2, 1902.

Cor. 3rd and Juliana Sts.

DR. B. J. KENDALL CO.

Gentlemen:—Please send me one of your books. I have used Kendall's Spavin Cure for years and I consider it the best I ever used. I had one of your books "A Treatise on the Horse and His Diseases," but lost it and I am lost without it.

Very truly yours, ARTHUR JOHNSTON.

Price, \$1.50; ask for \$5. Ask your druggist for KENDALL'S SPAVIN CURE, also "A Treatise on the Horse," the book free, or address

DR. B. J. KENDALL CO., ENOSBURG FALLS, VT.

FOR SALE.

MY ENTIRE STOCK OF STANDARD-BRED Trotting and Pacing Horses. Single drivers and double teams. Some excellent prospects for stake winners entered in the Occident, Stanford and Breeders Futurity stakes. The great brood mare Daisy S. (dam of Tom Smith 2:13 1/4, General Vallejo 2:20 1/4, Sweet Rose 2:25, Crial 2:21) and Little Mac (3:27). The driving horses and colts can be seen at my stable in Vallejo, and the broodmares, etc., at the race track. Apply to or address THOMAS SMITH, Vallejo, Cal.

The Value of Cows According to Capacity.

Prof. A. M. Wheaton furnishes some very interesting figures based upon present prices of dairy products, which may be of interest to many in determining just where they stand in cow wealth. It will be noticeable that while the cow that makes 900 pounds of butter is valued at a little over \$2 for every pound the one that makes 325 is put down at less than ten cents a pound for what she produces, showing that the extra pounds are what count.

Cows that make 300 lbs. of butter or less, beef value—	
Cows that make 325 lbs. of butter..	\$ 30
Cows that make 350 lbs. of butter..	35
Cows that make 375 lbs. of butter..	40
Cows that make 400 lbs. of butter..	50
Cows that make 425 lbs. of butter..	65
Cows that make 450 lbs. of butter..	85
Cows that make 475 lbs. of butter..	110
Cows that make 500 lbs. of butter..	130
Cows that make 550 lbs. of butter..	200
Cows that make 600 lbs. of butter..	275
Cows that make 650 lbs. of butter..	375
Cows that make 700 lbs. of butter..	500
Cows that make 750 lbs. of butter..	650
Cows that make 800 lbs. of butter..	825
Cows that make 850 lbs. of butter..	1,400
Cows that make 900 lbs. of butter..	2,000

The experts have figured out that twenty per cent of the total product of butter is lost by the old gravity process. The loss on one good cow during a year would be 22½ pounds of butter and on ten cows 125 pounds which at twenty cents a pound would be \$45 a year. It will be seen by this that the loss to the farmers who cream their own milk by a gravity process is enormous in the aggregate. How can any business man succeed and suffer such a percentage of loss? What would he thought of a man who would go on from year to year with a hole in his pocket through which twenty cents would drop out and he lost every time he put a dollar into his pocket? Some men try to console themselves by saying that it is not all lost—the calves and pigs get the butter. But this is poor consolation, for butter is dear feed, even when the price is the lowest. One cent's worth of oil-meal will do the calves and pigs as much good as a pound of butter fat.

\$100 Reward

For long years we have offered to pay this amount for any case of Lameness, Curb, Splint, Contracted Cord, Colic, Distemper, etc., which cannot be cured by

Tuttle's Elixir

Used and Endorsed by Adams Express Co.

We have never been obliged to pay the reward for obvious reasons. It's infallible in all cases of Thrush, Cracked and Grease Keel and all forms of Lameness.

Tuttle's American Condition Powders—a specific for impure blood and all diseases arising therefrom. Tones up and invigorates the entire system.

Tuttle's Family Elixir is unequalled as a remedy in the home. We send a sample free for 6c in stamps, merely to pay postage. Send at once for our 100-page book "Veterinary Experience," which we mail free.

Tuttle's Elixir Co., 437 O'Farrell St., San Francisco, Cal.

Beware of so-called Elixirs—none genuine but Tuttle's. Avoid all blisters; they offer only temporary relief, if any.

FOR SALE.

THOROUGHbred YEARLING COLTS

By DUCAT, out of Strongbred Mares.

...ALSO...

TROTting BRED YOUNG STALLIONS AND FILLIES

TROTTERS AND PACERS.

THE SIRES OF THESE COLTS ARE DIABLO, Natwood Wilkes, Monbells, Cupid and Sidney Dillon. The sires of their first, second and third dams are Guy Wilkes, Hook Wilkes, Director, Harold, Electioneer, Cornelius, Paul's Abdallah, Venture, Lodi and St. Clair. All of these sires trace in the male line to Hambletonian 10th, though his best producing male descendants, excepting the thoroughbreds Venture and Lodi and the pacer St. Clair.

C. E. FARNUM, M. D.
305 Parrott Building.

FOR SALE.

THE BEST UNMARKED PACER IN CALIFORNIA. Handsome as a picture; can be driven by a woman, and is sound, kind and gentle. He is a bay gelding, coming six years old, with small star and near front foot and ankle and both hind ankles white. Stands 16 hands high and weighs about 1100 pounds. Is the best bargain in California for the price asked. Has worked miles in 2:12 and 2:13. For price and other particulars address OWNER, care BREEDER AND SPORTSMAN, 36 Geary Street, San Francisco.

Dillon Stock For Sale

DAISY DILLON, brown filly, foaled May 10, 1903, at Santa Rosa Stock Farm, sired by Sidney Dillon, sire of Lou Dillon, 1:58½. First dam Paceta 2:28 by Lone Pine 2:28 (son of Electioneer); second dam Ceta by Piedmont 2:17½; third dam Cecil by Gen. Benton 2:34½; fourth dam Cuba by Imp. Australian, etc. DAISY DILLON is a beautiful filly and a grand prospect for some one. Fine disposition, well developed, and shows she is bred to win. I will sell her dam PACETA also. She is the Acme of Palo Breeding. Both dam and filly must be seen to be appreciated. I am offering them for sale as I will not have the time to devote to them that they should have. Paceta was stunted to Sidney Dillon again May 20th. Address, T. H. S., care of BREEDER AND SPORTSMAN, 36 Geary St., San Francisco, Cal.

FOR SALE.

Three Standard-Bred Trotting Stallions

WILKES STOCK.

One Seal Brown, 16 hands, foaled May 2, 1898; first dam Fearless by Fallis 4781 (record 2:23); second dam Jean Perault by Signal 3327.

One Golden Bay, 16.1 hands, foaled March 5, 1898; first dam Signal by Del Sur 1098 (record 2:24); dam of Guy Line 2:29½; second dam Lady Signal by Signal 3327.

One Brown, white points, 15.1 hands, foaled April, 1899; full brother to the bay.

These colts are all sired by Prince Airlee 28045, son of Guy Wilkes 2807 (record 2:15½), and bred by Wm. Corbett, San Mateo, Cal. They are pure gaited and show wonderful speed for the little work they have done.

For further particulars apply to
P. H. McEVoy, Menlo Park, Cal.

Dictatus Medium 32499

Will make the coming season at

Race Track, Hollister, Cal.

Jos Sanchez in charge

\$40 FOR THE SEASON.

Payable at time of service, with usual return privilege. Every care taken to prevent accidents, but no responsibility should any occur. Prompt and careful attention in all cases. Pastureage furnished to mares sent from a distance at \$2.50 a month.

A DICTATUS MEDIUM PURSE OF \$100.

I will give a purse of \$100, with entrance money added for a race, best two in three, open to any and all colts from Dictatus Medium, one of the best bred and fastest horses ever brought to California. The dam of Dictatus Medium is Belle Medium (dam of Stam B. 2:11 1/4), by Happy Medium, grandsire of the dam of Lou Dillon 1:58 1/2. His second dam is Argenta by Almont Lightning, sire of the dam of Zombro 2:11. There is no doubt but Dictatus Medium will prove to be a sire of speed as well as good size, style and disposition.

DESCRIPTION.

DICTATUS MEDIUM is 6 years old, weighs 1200 pounds. A beautiful turned bay horse with heavy mane and tail, kind and gentle, with a perfect disposition. Good flat heavy bone. He has great power and speed. Has a record of 2:24, but has worked out in 2:12. He is a horse that will go out any day and do his best. His colts are models of grace and beauty. Only one so far has been worked. This one, Al Willson's yearling LITTLE MEDIUM, paced an exhibition 1/4 mile on the Hollister Race Track in 38 1/2 seconds, a 2:33 gait. This colt has great promise.

DICTATUS MEDIUM is by Dictatus 2:17, one of the best bred and fastest horses ever brought to California. The dam of Dictatus Medium is Belle Medium (dam of Stam B. 2:11 1/4), by Happy Medium, grandsire of the dam of Lou Dillon 1:58 1/2. His second dam is Argenta by Almont Lightning, sire of the dam of Zombro 2:11. There is no doubt but Dictatus Medium will prove to be a sire of speed as well as good size, style and disposition.

Speed, Breeding and Individuality FOR SALE.

RITA H. 2:11 1-4

Pacing Mare by McKinney 2:11 1-4

ELECTRO MCKINNEY

Brown Colt, Three-Year-Old Trotter by McKinney 2:11 1-4

RITA H. is a dark brown mare who stands nearly 16 hands high, and will weigh in racing trim about 1050 lbs. This mare has had this year a very remarkable record. She started in the North-western Circuit in the States of Oregon and Washington, and won her first seven races and only lost four heats during the entire circuit, and has a pacing record of 2:11 1/4. The mare is five years old and is excellent on the road. She does not pull or lug, and a lady can drive her anywhere. Last spring she trotted a workout mile in 2:18 1/2 and repeated in 2:16 1/2, after only seven weeks' work. Her owner has driven her in 2:12 1/2 in the Los Angeles Driving Club races, she having won all of them in which she started. This mare can step two heats below 2:10.

ELECTRO MCKINNEY is a brown stallion foaled in 1900, and stands 15 hands 1 inch in height. He trotted a full mile as a two-year-old in 2:31 1/4, last quarter in 35 seconds, and when a three-year-old a full mile in 2:14, last quarter in 32 seconds. He is perfectly gaited and a grand individual in every respect. Weighs about 950 lbs. ELECTRO MCKINNEY is bred in the purple, and is one of the best sons of McKinney alive to-day. McKinney is undoubtedly the greatest sire for his age, living or dead. ELECTRO MCKINNEY was not raced this year, being only a three-year-old and not entered in any stakes it was decided to hold him over.

These horses are all right and there is not a thing the matter with them, but my business demands are such that I cannot afford to devote any time to racing them. For prices and further particulars address

BYRON ERKENBRECHER,

301 CURRIER BUILDING, LOS ANGELES, CAL.

Or inquire at Office of BREEDER AND SPORTSMAN.

A Sidney Stallion With Earning Capacity FOR SALE.

In pursuance of my intention to retire from the business of breeding horses, and having disposed of all my broodmares at auction, I now offer at private sale the stallion

WILLIAM HAROLD 2:13 1-4.

His sire is the great Sidney 2:19 1/2, grandsire of the champion trotter of the world, Lou Dillon 1:58 1/2, and his dam the great race and broodmare Cricket 2:10 (dam of four in the list) by Steinway, the greatest son of Strathmore.

WILLIAM HAROLD is a producer. The only two of his get to start are that wonderfully fast trotter Janice 2:08 1/2 and the pacer Dan Burns 2:15. WILLIAM HAROLD'S services in the stud were very limited up to three years ago, as he was raced. His weanlings, yearlings and two-year-olds are very promising and have size, good looks and great natural speed, besides being uniform in color, nearly all bays. He is a sure foal getter, is in the very best condition, sound and healthy, and with ordinary good business management can earn in the stud in 1904 the price asked for him.

For tabulated pedigree and full particulars, address

H. W. MEEK, San Lorenzo, Cal.

CAMPBELL'S HORSE FOOT REMEDY IS THE BEST REMEDY

EVER USED ON HORSES' FEET.

IT PENETRATES and DRIES in quickly and DOES NOT GUM and FILL UP THE PORES like tar and oil compounds. It is the GREATEST REMEDY ever used to remove SORENESS and FEVER from the foot, and makes it possible to get good services out of a horse working on hard and hot pavements.

It gives natural nourishment to the foot and incites a rapid, healthy growth—ALL DRYNESS and BRITTLENESS quickly disappears.

QUARTER CRACKS and SAND CRACKS are rapidly grown out when directions given in our booklet are followed.

It is a SURE CURE FOR CORNS, CONTRACTED FEET and NAIL WOUNDS if directions are followed.

IT PREVENTS SOUND FEET FROM BECOMING UNSOUND and GROWS a TOUGH STRONG ELASTIC WALL and HEALTHY FROG—A FOOT WHICH WILL STAND WORK on race courses.

Many of the best owners and trainers state that for track work nothing equals it. In many cases horses have reduced their records several seconds due to its use.

It is a CERTAIN CURE FOR THRUSH and SCRATCHES

We Guarantee That It Will Do What We Claim and Will Refund Money if It Fails.

PRICES:—Quarts, \$1.00; Half-Gallon, \$1.75; Gallon, \$3.00; 2 1/2-Gallon, \$5.50; Five-Gallon, \$10.00.

Books giving full directions for its use and much valuable information as to shoeing are supplied free. Don't fail to read "ad." giving information concerning Campbell's Iodoform Gall Cure in next issue of this paper. It is the best and because of its merits is rapidly displacing all others.

WINCHESTER

REPEATING SHOT GUNS

A CHANCE FOR A DOUBLE

A QUESTION often asked about Repeating Shotguns is, "How quick can a second shot be fired with them?" Shooters that have used Repeaters answer with one accord: "Doubles" are just as easy to make with a WINCHESTER REPEATING SHOTGUN as they are with a double barreled gun. The third shot that a Winchester Repeater gives often bags a badly crippled bird which otherwise would get away. Winchester Repeating Shotguns are made in "Take Down" styles in 12 and 16 gauge.

Bay mare	April 20, 1900	Dexter Prince	Lady Agnes by Electioneer
Marion 2:26 1/4, h.m.	April 17, 1883	Piedmont 2:17 1/4	Lady Morgan by Hambletonian 10
Sonoma 2:28	Mar. 19, 1883	Electioneer	Soutag Mobawik by Mohawk Chief
Brown filly	April 13, 1903	McKinney 2:11 1/4	Sweet Rose (1) 2:23 1/4 by Electioneer
Bay filly	Mar. 30, 1902	Nutwood Wilkes 2:16 1/4	Liska 2:16 1/2 by Electioneer

Horses will be at yard January 11th for inspection. Send for Catalogues.

FRED H. CHASE & CO., 1732 Market St., S. F.

At the same time and at the same place there will also be sold the stallion Daedalion 2:11 by Diablo 2:19 1/4, dam Grace, dam of two in 2:15, three in 2:20 by Buccaneer. Daedalion is one of the most promising young sires in California, and is able to race and reduce his record. Consigned by Geo. H. Fox, Clements, Cal.

To close a copartnership, Mr. C. A. Darfee sends the following four by McKinney 2:11 1/4: Johnny McKenzie, two year old gelding, dam Babe by Ferdinand 1:15, son of Strathmore, second dam Flinwood by Fayette Wilkes, son of Geo. Wilkes, third dam by Blackwood 74 and fourth dam by Washington in Denmark. This colt is a great prospect and is entered and paid up on in all the leading three year old stakes in California. Twilight and Daisy B., full sisters five and four years old by McKinney out of Stenwinder, dam of the great Directum 2:05 1/4. These should be the greatest broodmares ever bred in California. Bessie D., a filly by McKinney out of a mare by a son of Venture. She is bred much like the other two and a great prospect.

Geo. A. Davis of Pleasanton consigns the following: Directory, blk. g. 1901, by Rey Direct, dam Mamie H. by Alexander's Bay Allen; Rey Vera, blk. f. 1901, by Rey Direct, dam Vera by Antecio; Aconc, blk. f. 1902, by Charles Derby-May (dam of Bay Rum 2:25 1/4) by Antecio; Charlottine, blk. f. 1901, by Charles Derby, dam Miss Direct by Direct; Mamie Rey, blk. f. 1902, by Rey Direct, dam Mamie H. by Alexander's Bay Allen.

Consigned by A. Berner, Redwood City: Yearling colt by Mendocino, dam Carmine by Electricity. Consigned by C. Harling, Nevada: Bay pacer by Falrose, dam Mischief, dam of Primrose 2:09 1/4. One of the grandest and best roadsters in California.

Consigned by I. L. Borden, San Francisco: G. z. N. L. B. (3) 2:21 1/4 by Diablo, dam by Washington 2:53 1/2. This pacer worked a mile last year in 2:12 1/4. He is one of the best road horses in California and can be driven by a lady.

Consigned by James LeBaron Smith, San Francisco: By Mack, brown stallion by McKinney 2:11 1/4, dam By By, full sister to Lockheart 2:08 1/4 by Nutwood.

Speed, Breeding and Individuality FOR SALE.

RITA H. 2:11 1-4

Pacing Mare by McKinney 2:11 1-4

ELECTRO McKINNEY

Brown Colt, Four-Year-Old Trotter by McKinney 2:11 1-4

RITA H. is a dark brown mare who stands nearly 16 hands high, and will weigh in racing trim about 1050 lbs. This mare has had this year a very remarkable record. She started in the Northwestern Circuit in the States of Oregon and Washington, and out of eight starts won her first seven races and only lost four heats during the entire circuit, and has a pacing record of 2:11 1/4. The mare is five years old and is excellent on the road. She does not pull or lug, and a lady can drive her anywhere. Last spring she trotted a workout mile in 2:18 1/4 and repeated in 2:16 1/4, after only seven weeks' work. Her owner has driven her in 2:12 1/4 in the Los Angeles Driving Club races, she having won all of them in which she started. This mare can step two beats below 2:10.

ELECTRO McKINNEY is a brown stallion foaled in 1900, and stands 15 hands 1 inch in height. He trotted a full mile as a two-year-old in 2:31 1/4, last quarter in 35 seconds, and when a three-year-old a full mile in 2:21 1/4, last quarter in 32 seconds. He is perfectly gaited and a grand individual in every respect. Weighs about 950 lbs. ELECTRO McKINNEY is bred in the purple, and is one of the best sons of McKinney alive to-day. McKinney is undoubtedly the greatest sire for his age, living or dead. ELECTRO McKINNEY was not raced last year, being only a three-year-old and not entered in any stakes it was decided to hold him over.

These horses are all right and there is not a thing the matter with them, but my business demands are such that I cannot afford to devote any time to racing them. For prices and further particulars address

BYRON ERKENBRECHER,

301 CURRIER BUILDING, LOS ANGELES, CAL.

Or inquire at Office of BREEDER AND SPORTSMAN.

A Sidney Stallion With Earning Capacity

FOR SALE.

In pursuance of my intention to retire from the business of breeding horses, and having disposed of all my broodmares at auction, I now offer at private sale the stallion

WILLIAM HAROLD 2:13 1-4.

His sire is the great Sidney 2:19 1/4, grandsire of the champion trotter of the world, Lou Dillon 1:58 1/4, and his dam the great race and broodmare Cricket 2:10 (dam of four in the list) by Steinway, the greatest son of Strathmore.

WILLIAM HAROLD is a producer. The only two of his get to start are that wonderfully fast trotter Janice 2:08 1/4 and the pacer Dan Burns 2:15. WILLIAM HAROLD'S services in the stud were very limited up to three years ago, as he was raced. His weanlings, yearlings and two-year-olds are very promising and have size, good looks and great natural speed, besides being uniform in color, nearly all bays. He is a sure foal getter, is in the very best condition, sound and healthy, and with ordinary good business management can earn in the stud in 1904 the price asked for him.

For titulated pedigree and full particulars, address

H. W. MEEK, San Lorenzo, Cal.

PALACE HOTEL, SAN FRANCISCO, CALIFORNIA.

TOURISTS and TRAVELERS will, now, with difficulty recognize the famous COURT into which for twenty-five years carriages have driven. This space of over a quarter of an acre has recently, by the addition of very handsome furniture, rugs, chandeliers and tropical plants, been converted into a lounging room—the **FINEST IN THE WORLD.**

The **EMPIRE PARLOR**—the **PALM ROOM**, furnished in Cerise, with Billiard and Pool tables for the ladies—the **LOUIS XV PARLOR** the **LADIES WRITING ROOM** and numerous other modern improvements, together with the unexcelled Cuisine and the Most Convenient Location in the City—all add much to the ever increasing popularity of this most famous HOTEL.

San Francisco, Saturday, January 9, 1904

THE LAST OPPORTUNITY to secure colts and fillies consigned to a sale by Palo Alto Stock Farm will be given buyers at Fred H. Chase & Co.'s salesyard, 1732 Market street, this city, next Thursday evening, January 14th. Those who appreciate what this means will be there and it will be a great sale. Every horseman in America knows that the late Senator Stanford was a progressive breeder. He was not satisfied with anything but progress in all his undertakings. The idea of standing still in any line of business was abhorrent to him, and he always aimed to improve and build up toward perfection. He founded at Palo Alto a great stock farm for the breeding of trotting horses. He met with success, but to the day of his death he had no idea of stopping or being content with that success, but aimed for an improvement each succeeding year. Had he lived Palo Alto Stock Farm would have been continued and been one of the great object lessons in the world in light harness horse breeding. His ideas were carried out after his death as near as possible by Superintendent Frank Covey, but the managers of the estate willed it that the farm must be discontinued and all the horses sold. During the past two years the auction rings in California and at Cleveland and New York have seen the stallions and broodmares of the farm sold to the high bidder, until there is now left only the seventeen foals of 1903, and a few mares and older colts, twenty-four head in all, to be sold at auction as above stated on Thursday evening next. These yearlings are undoubtedly the best bred lot ever sent to a salesring from the great farm. They are by McKinney the leading sire of 2:10 trotters in the world; Nutwood Wilkes, sire of the fastest trotter of the entire Wilkes tribe of horses; Monhells, Beautiful Bells' last son and certainly destined to be one of her greatest; Mendocino, that bears the strongest resemblance to the great Electioneer of any of his get, and sire of two great 2:10 trotters; Iran Alto, the greatest bred and the fastest son of the great race horse Palo Alto; and Nazote, own brother to that wonderful race horse Azote 2:04½. By such sires as these and out of some of the greatest mares the farm ever owned, why should not these yearlings be considered the best ever bred on the farm. If you have not yet received a catalogue containing the full breeding of all these horses, send to Fred H. Chase & Co. for one, and make up your mind to attend the sale. The opportunity will never be offered again, and it is one that horsemen who want the best cannot afford to lose.

PLEASANTON will open the California circuit this year with a four days' program of harness racing for which good big purses will be offered. This was decided at a meeting of horsemen in that thriving town this week, and Messrs. A. S. Olney and Geo. A. Kelly were present at the meeting of the P. C. T. H. B. A. Directors, held at the office of the BREEDER AND SPORTSMAN on Thursday of this week, where they made this announcement. The Pleasanton people desire to open the circuit. There are 200 horses in training there now and with the exception of those in the string of Monroe Salisbury and one or two others, all will be raced in California provided a circuit is announced. The Directors of the Breeders association have about agreed upon a program of stakes and purses, and will be ready to announce the same in next week's issue of the BREEDER AND SPORTSMAN. Their meeting will probably be held at Santa Rosa, where one of the very best tracks in the State is situated and where the association has always held very successful meetings. Petaluma and Vallejo will give meetings also, and the first four meetings will probably be in the following order: Pleasanton, Santa Rosa, Petaluma, Vallejo. If Woodland gives a meeting, which it probably will, it could follow

Vallejo and take its usual week just prior to the State Fair. This plan would give Pleasanton the last week in July for its opening of the circuit, which would be very agreeable to the horsemen. Look out for the announcements next week. They will interest everybody.

THE BREEDERS FUTURITY for foals of 1901, to be contested for by three-year-olds this year, promises to furnish two highly interesting contests. Payment was made January 2d on more than fifty three-year-olds entered in this \$6000 stake, which is evidence that that number of colts are being put in training. As owners do not designate whether their colts are trotters or pacers until making starting payments ten days before the first day of the meeting, it will not be possible to tell until that time in what proportion the trotters and pacers will be divided, but the probability is that the trotting division will have the largest number of starters. At any rate, it looks now as if there will be two great contests, and we hope to see the three-year-old race record of the State beaten in both events.

IF WAR ENSUES between Russia and Japan, the price of hay in this market will go soaring. As will be seen by the quotations of this week, good hay is a luxury here now. The prices quoted are as follows: Wheat, \$14@17.50; wheat and oat, \$14@16.50; oat, \$14@16; wild oat, \$13@14.50; barley, \$12@14; alfalfa, \$12@13.50 per ton. A telegram from Washington received this week states that the United States Government has ordered over six thousand tons of hay to be bought in this port and shipped to Manila. It will cost the government \$19.50 per ton. It is also said that there are several big orders for hay to be shipped to Japan for the Japanese Government in case hostilities are declared. Should the rains hold off much longer in California bay will jump much higher and there is no telling at what price it will stop.

WHAT'S THE ODDS? is the title of a book just issued by the well known hookmaker Joe Ullman, known as one of the raconteurs of the running turf. The book is full of good yarns collected by Mr. Ullman during his many years experience, and are funny, true and clean. The book is handsomely bound and profusely illustrated.

GEORGE J. FULLER, aged 69, one of the greatest drivers of trotting horses in the country, who at one time had charge of the stables of the Czar of Russia, is dead. His death occurred at Nashville, Tennessee, on the 7th inst.

Still Room for Many More.

The coming of the two minute trotter may have scared a few of the more timid horsemen out of business as it was predicted would be the case, but to date none has been reported as missing. Nor has any trainer lost heart, so far as can be learned. As a matter of fact, the two minute trotter did not do any more damage than was done by the first two minute pacer, so far as actual racing is concerned. There is still plenty of room for the trotter that is not quite good enough to get to the top of the record ladder. And the more you look into it the more you will be convinced that the standing space is by no means crowded. For instance, a floating item in the turf papers calls attention to the fact that but four trotting stallions have race records better than 2:07, and the four, with their race records, are Crescenzo 2:03½, Directum 2:05½, Bingen 2:06½, Rbytbmic 2:06½. Which means that the 2:07 trotter is still some pumpkins at the races and ought to continue to win his share of the money for some time.

The faster classes have never yet been overcrowded. Right now men who campaign at the more important meetings are looking for trotters that they think can make a good showing in the 2:07 class in 1904. And if a glance is taken over the list of eligibles it will be enough to show that the fields can not be large. Yet the trotting record is 1:58½. When it gets to 1:55 there will be no decrease in the demand for trotters that can race in 2:05 to 2:08, and the 2:05 class will be considered a very fast one, for trotters, when the great majority of the present generation of horsemen has answered the final summons.—Kentucky Stock Farm.

Ten Years' Experience.

Mr. A. R. Jones, veterinary surgeon at Lamont, Iowa, writes as follows: "I desire to inform you that I have been using Quinn's Ointment for the last ten years with the greatest success. For removing curbs, splints, spavins and other humors are more than pleased with its work." This is the general verdict of the leading horsemen everywhere. For curbs, splints, spavins, windpuffs and all enlargements try Quinn's Ointment. Price one dollar per bottle delivered. Satisfaction guaranteed. Address W. B. Eddy & Co., Whitehall, N. Y., if you cannot obtain it from your druggist.

New Year's Racing at Phoenix, Arizona.

Two days' racing were held at the Phoenix, Arizona, track on Thursday and Friday, the last and first days of the old and new year.

On Thursday the first event was a stake for three-minute trotters. All three heats were won by Delnette, owned by A. H. Davidson and driven by J. K. Wheat. The time was 2:55½, 2:46½ and 2:28½. The last heat was the only one in which Delnette showed her real speed. Lady Allen, owned and driven by W. A. Priestly, was second in the first and third heats and third in the second heat. Hartwood, owned by Wolf Sachs and driven by Taylor, was third in the first and third heats and second in the second heat.

The two-year-old match race, best two heats in three, half mile dash, between Tommy Lawson, owned by William Barkley, and Governor Brodie, owned by William Lossing, was won by Tommy Lawson, who took two of the three heats. Governor Brodie took the first heat in 1:41, Lawson getting the second and third in 1:34 and 1:31.

In the amateur road race to cart there were two heats, four starters. Kate, owned by Dr. Ramsey, took both heats in 2:55 and 2:51; Prince, owned by Mr. Harmon, was second in both heats and Urmelia, owned by Ed Worcester, was third in both heats. The race was for a trophy.

In the half-mile dash running race Bella Donna, owned by Jack Gibson, won in 52 seconds, with Al, owned by G. A. Wilson, second.

A much larger crowd attended the second day's racing, as it was a holiday. The event of the day was the 2:24 trot for a purse of \$100, divided into four moneys, \$50, \$25, \$15 and \$10. The race was held three in five but only three heats were trotted as Rex Mambrino took all three in 2:33, 2:31 and 2:30½. Rex is owned by Dan Steele and was driven by Johnson. A remarkable thing about the race is that all four horses occupied the same positions at the finish of each of the three heats, those positions being as follows: Delnette, owned by A. H. Davidson and driven by Wheat, second; Miss Boydello, owned by W. C. Greene and driven by Klotzbach, third; Oakwood, owned by J. A. Plattner and driven by Taylor, fourth. There was some little trouble in scoring, one of the horses having to change sulkys a time or two by reason of breakage. Each heat was a good one and closely contested, though the second and third heats were the best. In the second Delnette was at the neck of Rex Mambrino all through the stretch. It is noticeable that none of the horses were up to their records as all have made better than 2:30 and the winner, Rex Mambrino, has a record of 2:24. Delnette only the day before entered the 2:30 class, having made a record of 2:28½.

In connection with this race and these horses it is proper to remark that both Oakwood and Delnette enjoy a national distinction in that the former was the first horse in the United States to make a record in 1903 and the latter was the last horse in the United States to make a record in the same year. Oakwood broke into the 2:30 class on January 1st, a year ago, with a record of 2:28½, and Delnette entered the same class on Thursday, the last day of the year, with a record of 2:28½.

The second event was the amateur road race between Tom, driven by his owner, Walter Bennett, and Sally Pointer, driven by her owner, J. C. Adams. The race was for a trophy, a handsome plush laprobe being the prize.

The third race of the day was a quarter mile run between Flirt, owned by Mr. McCallister and ridden by Graham, and Chic-Chic, owned by Jack Gibson and ridden by Commodore Passey. Brickmaker was entered by James Graham but was withdrawn. Chic-Chic won the cash in 2:31.

A three-quarter mile run followed between Little Joe, owned by John P. Gibson and ridden by Passey, and Romar, owned by A. N. Porter and ridden by Wilson. Little Joe took the money.

Has a New Stock Farm.

Mr. A. G. F. Stice, who campaigned a string of horses in California a few years ago, is now a resident of Monmouth, Illinois, where he has recently purchased a farm and stocked it with horses. It will be called the Stice Stock Farm, and his many California friends will wish him every success in his undertaking. His premier sire will be Manager 2:06½ by Nutwood. This great horse is from the justly famous mare Carrie 2:29½ [dam of Manager 2:06½, Woodboy 2:19½ and Darwin 2:13½] by George Wilkes 2:22, truly the very cream of breeding. Manager is already the sire of nine performers with standard records, and without doubt will prove a great race horse sire.

The Mendocinos are race horses, as for instance Monte Carlo 2:07½. A yearling by Mendocino out of Carmine by Electricity, second dam a double producer by Dictator, is to be sold at Fred H. Chase & Co.'s salesyard next Thursday evening. This yearling is a dark bay colt and a good one. He is bred well enough to head a stock farm.

JOTTINGS.

MILLARD SANDERS is indignant and righteously so, over the protest that the sons of Robert Bonner have made against the record of 2:05 which Lou Dillon made at Cleveland last year hitched to a high wheel sulky. When he heard of the protest he said:

"I could not, to save my life, say whether the sulky Lou Dillon pulled in 2:05 over the Cleveland track to beat Maud S.'s record had ball-bearing hubs or not. I do know no wind shield was used, and I am willing to bet \$5000 that Lou Dillon can pull that same sulky, which, by the way, weighed fifty-five pounds—twelve more than Maud S.'s sulky—in less than 2:05. Members of the Bonner estate have for years offered \$5000 for any driver that would break Maud S.'s record. I broke it, and broke it fairly, with Lou Dillon, but I have never seen the color of their money. Now if they mean business about that \$5000 offer, I can take that same sulky Maud S. used—if it is still in good condition—and drive Lou Dillon in less than 2:05 over the Cleveland track. I knew Lou would make them holler. They can't accept the result like true sportsmen and give Lou Dillon credit for her record."

There will be very few horsemen who will blame Millard from getting a little "hot in the collar" over this protest and speaking as he has. The point that the sulky he used with Lou Dillon had ball bearings is simply a technical one. If Lou Dillon had drawn a friction axle sulky, (and she may have done so) some other technicality would doubtless have been raised. When Lou Dillon trotted her mile in 1:58½ Millard Sanders did not carry a whip, and it would be just as consistent for him to now claim that any faster record made by a trotter in the future will be invalid if the driver carries the customary whalebone, as it is for Messrs. Bonner to insist that the record of Maud S. to high wheels is not yet beaten. Every horseman in America knows that Maud S., great mare as she was, is not in the same class with Lou Dillon, who simply outclasses every trotter thus far produced.

Wm. Hendrickson, the veteran horseman, who owned and campaigned Geo. M. Patchen Jr., has recently returned from the East, where he went last May with Clay S. 2:13½ and two or three others, one a full brother to Clay S. Mr. Hendrickson sold Clay S. while there and left the other horses at Memphis, which he says is an ideal place to winter trotters. While absent from California he saw Lou Dillon and afterwards saw her beat all the records. Since reaching home he has talked with Frank Malone and several others and thinks there is a strong probability that the granddam of Lou Dillon was old Jenny Butterfield by Geo. M. Patchen Jr. 31. He says that Mr. Kimball once owned Jenny Butterfield, that she was purchased for William Ralston, and as she was a very bad puller Ralston did not want her and gave her to Kimball, who afterwards sold her. Her dam was by John Nelson. Mr. Hendrickson states that he remembers the mare and that she was a sorrel with one or possibly two white ankles behind.

With due difference to the opinions of all those who think they know the breeding of Lou Dillon's granddam, I cannot help but believe that it will never be traced. The very fact that Mr. McFadyen, who owned her and bred several standard performers from her in her young days, made an extended investigation many years ago and was unable to ascertain anything definite in regard to the matter, leads me to believe that it is impossible to get at the facts now when all parties who actually knew anything of the mare are dead. Lou Milton's dam will, in my humble opinion, always be among those famous mares whose pedigrees are often guessed at but absolutely unknown.

It is amusing to read in the daily press that a big row has been kicked up in the Board of Supervisors of San Francisco over the price paid recently for horses for the Fire Department. It seems that a dealer was paid \$275 each for the horses, and thereupon an investigation was begun on the grounds that the price was excessive. Any horseman in California who knows anything of horse values, and the qualifications which a horse must have, to be of practical every way use in the fire department of this city, will know that at present market values, \$275 is not a high price for one that is able to pass the examination. At the meeting of the Board where the subject was up for discussion, Fire Commissioner Watt produced a letter from a man in Petaluma who offered to sell good horses at from \$200 to \$250. The fact that the Commissioner offered this letter in the best of faith and evidently believed that the Petaluma man could deliver the goods, does not remove the ludicrous feature from the situation. There is seldom a horse, a cow or a dog sold at a good price, but the buyer (if the sale and price are reported in the papers) receives

numerous letters from owners who offer superior animals for less money, and yet the market for good ones at good prices is never fully supplied. At the present time \$275 is a very fair price for a horse that is young, sound and of the proper weight and style to make him an engine or hook-and-ladder horse. The fire department horse must have size and weight enough to pull heavy weight over cobble stones and action enough to move those heavy weights at a fair rate of speed. He is not bred on every farm and is more of a "chancy" horse than anything else. The prices which the San Francisco authorities have been paying for fire department horses are none too high for animals that come up to the requirements.

Bayswater Wilkes Goes to Woodland.

Much of the patronage that has been extended during the past three years to S. H. Hoy's good stallion Bayswater Wilkes 2:25½, has come from residents of Yolo county who reside near Woodland, and so pleased are they with the weanlings, yearlings and two-year-olds they have by this horse, that Mr. Hoy has received many requests to stand the son of Sable Wilkes at that place during the season of 1904, which he has concluded to do. Bayswater Wilkes has had very little opportunity in the stud, but his colts are showing such speed that it will be only a matter of a little time before the attention of breeders will be attracted to him from all sections.

His sire Sable Wilkes that held the three-year-old record of 2:18 is making a name for himself in the East and through his sons and daughters establishing a family that is destined to be one of the greatest of the branches of the Wilkes tribe. Oro Wilkes 2:11 put eight new ones in the list this year, the good three-year-old mare Mary Gage 2:16½ being one of the number.

The dam of Bayswater Wilkes is one of the few thoroughbred mares that has produced two standard trotting performers and earned a place in the list of Great Brood Mares. She is the dam of Senator L. 2:23½ that holds the world's four-mile record of 10:12. The second dam Bessie Sedgwick by the great four-mile horse Jo Daniels, was also a producer of trotters and the dam of that good trotting mare Bessie Thorn 2:22½. Those who believe in the "thoroughbred close up" theory (and their names are legion) will find in Bayswater Wilkes a stallion that the most radical opponents to that theory can not find fault with, as his thoroughbred dam and grandam were both producers of standard trotters. The produce of Bayswater Wilkes have size, excellent dispositions, the very best feet and legs and are the sort that never find the distance between points too long. Whether in a race of mile heats, or driven for 75 miles a day on the road, the get of Bayswater Wilkes are always "up in the collar" and never look for openings in the fence. They have the gameness and the other attributes that make race horses.

Daedalion 2:11 by Diablo.

Sam Gamble saw Daedalion 2:11 for the first time while on a visit to the Mokelumne Stock Farm a few weeks ago and writes as follows of him:

"Daedalion 2:11, pacing, is by Diablo 2:09½, that twice held the world's record for his sex and age, and is the sire of the pacers Sir Albert S. 2:03½, Clipper 2:06, Diodine 2:10, Diawood 2:11, El Diablo 2:11½, Tags 2:11½ and many others better than 2:15. Daedalion's first dam is Grace (in the great broodmare list, three better than 2:20), second dam in the great broodmare list. Daedalion 2:11 is not only a very fast horse, but he is bred for a sire, through his sire and dams being producers. He represents eight producing dams in his veins. Take his general make-up, conformation, head, muscle development and gait, and there is nothing but death or lack of opportunity can prevent him from being one of our foremost sires of great all-round horses. If he should be taken now and placed in a competent trainer's hands he has a chance to equal or beat all records that are represented in his veins through his great producing ancestors. He is assured, as far as my eye can judge, as the day he was foaled. It was my first opportunity to look him over closely, and I was amazed to find such a grand looking and prospective speed-producing sire hidden away from the public. Judging by his first few foals he is surely a coming sire of great speed, and as to his taking a record of 2:05 or better I believe it is in his hide."

Daedalion is to be sold at Fred H. Chase & Co.'s salesyard on Thursday evening next.

New Surrey, first class, with pole and shafts, canopy top, 1½ inch rubber tire, turn under, elegantly trimmed. Original price \$420, can be bought at Kenney Manufacturing Company, 531 Market street, San Francisco, for \$225. New lot of McMurray carts just arrived—1904 models.

Polo and Pony Racing Association.

Announcement is made from the headquarters of the Burlingame Country Club of the organization of the California Polo and Pony Racing Association, with the following well known men as officers: Charles W. Clark, president; Francis J. Carolan, first vice-president, Rudolph Spreckels, second vice-president; Thomas A. Driscoll, secretary; R. M. Tobin, treasurer; directors—the foregoing and R. L. Bettner, E. W. Boeseke, T. H. Dudley, C. S. Maud, Joseph S. Tobin and J. L. Colby.

The object of the association is to encourage and promote the game of polo and pony racing in California. It is believed by the promoters that the movement will result in unusual interest in these sports, and that polo teams from England, Hawaiian islands and possibly from the East will participate in some of the big events scheduled for the season.

The first of these is a five day polo and pony racing tournament, to be held at Del Monte, beginning on February 12th. Alternate days will be given to the two sports, and about \$1000 in purses and several valuable cups will be awarded. At the conclusion of these matches ponies and players will repair to Burlingame, where a like series of sports will be held under similar conditions. These will begin on February 17th and be concluded on the 22d, Washington's birthday.

What promises to be the most elaborate and pretentious event of the season, however, will be the polo tournament for the championship of the Pacific Coast, to be played at Burlingame. It will begin on March 18th and continue daily until finals are played off. By that time all available polo players will have arrived, and it promises to eclipse in magnitude any similar event ever held in California.

Litigation Over a Stake.

A decision rendered by the Board of Appeals of the American Trotting Association at its recent meeting in Chicago has resulted in litigation in the Federal Courts, the outcome of which will be watched with interest by horse owners everywhere. Noah T. Wood is the plaintiff and the defendant is the Terre Haute Trotting Association. Mr. Woods made an entry in a futurity stake of \$10,000, opened by the Indiana organization in 1900, for foals of that year to trot in 1903. Before the time came to trot the race the Terre Haute Trotting Association tendered to Mr. Wood the amount he had paid in as entrance money and notified him that the race had been declared off. He refused to accept this settlement, and shipped his trotter to Terre Haute, appearing on the track at the time originally set for the contest, and claiming first money in the stake. Failing to obtain it, he appealed to the turf court, and when that tribunal sustained the association he brought an action in the United States District Court in Michigan. It is said the association offering the stake refunded to all nominators, making the final payment on June 1, 1903, the full amount paid in by them, but retained the forfeits received from other nominators who failed to make the last payment. Horsemen generally take the view that the association has no right to retain this forfeit money, the entrance fees in a stake being regarded as a trust fund to which the stakeholder acquires no title. The right to declare off a stake race is also denied, though it has been done on more than one occasion.

A Good Horse at Auction.

On the front page of this issue of the BREEDER AND SPORTSMAN is a photo-engraving of Mr. I. L. Borden's good gelding N. L. B. by Diablo. N. L. B. is a pacer with good gait and good manners, and in any competent trainer's hands can get a very low mark. He was trained and raced as a two-year-old, defeating the best of his age that were out that year, among them Volita 2:15½, Rey del Diablo 2:14½, Daken D. 2:16½ and others. He took a two-year-old record of 2:21½. During the years he has been raced N. L. B. has been compelled to meet aged horses and compete in races where the heats were usually below 2:15. He has won many second and third moneys during that time and been separately timed several miles in better than 2:15. As a road horse N. L. B. is rated among the good ones, as he is perfectly mannered and can be driven by anyone. He has the best of dispositions, is a good prompt driver and can speed at a 2:10 gait. He will make some one a high class road or matinee horse and should be able to win money racing. His breeding is excellent as his dam was by the well known pacing stallion Washington, that had a record of 2:20, and his second dam by the horse Skenandoah, formerly called Kentucky Hunter. N. L. B. will go to the high bidder at the Chase sale in this city next Thursday evening and the buyer will get a high class horse.

Notes and News.

Palo Alto colt sale next Thursday evening.

Myron McHenry will have Dan Patch again next season.

Of the eleven now performers to the credit of Direct 2:05½ six are trotters.

It will pay to breed good trotting stock as long as rich stakes are offered.

Broodmares should have regular exercise all winter, either in a lot or in the harness.

The Roman 2:09½ by McKinney, is at Memphis, in charge of his former trainer, Dick Benson.

Quite a number of mares have already been booked to Searchlight 2:03½ for the season of 1904.

The Board of Stewards of the Grand Circuit will meet at Cleveland, January 20th, to fix dates for the meeting of 1903.

Secretary C. A. McCully talks of giving dash racing a thorough trial at Brighton Beach's Grand Circuit meeting next August.

Baron Wilkes' fee will be \$150 for next year, and as there are no broodmares at Maplehurst Farm, the public will have all his services.

The latest news about the green trotter by Sidney D'illon, owned by J. H. Brown of Detroit, Mich., is that his owner has refused an offer of \$7,000 for him.

The *American Horse Breeder* has renewed its \$10,000 Futurity. The renewal is for mares bred in 1903, to be raced when their produce are two and three years old.

Budd Doble contracted a severe cold and was confined to his bed at his home in Alameda several days last week, but is now able to be up and around as usual.

O. J. Salisbury, capitalist of Salt Lake, and brother of Monroe Salisbury, is at the Rose Hotel, Pleasanton, with his daughter, on a short visit to look at the horses.

The Fasig-Tipton Company will open a branch office in Lexington, Ky., to be in charge of W. S. Hunter, at present acting as treasurer of the company.

Doug Thomas, the Kentucky breeder and trainer, wants to match Katherine A. 2:14 against any other trotting four-year-old out in 1904, Sadie Mc 2:11½ preferred.

They are three Ray Directs to be sold by Fred H. Chase & Co. January 14th. Two are coming three-year-olds and the other a two-year-old. They are all very promising youngsters.

If you want a well bred colt or filly that will increase in value attend the Palo Alto sale on the 14th inst. at Fred H. Chase & Co.'s salesyard. These are the last of the famous Palo Alto bred horses.

Chas. A. Durfee has consigned two mares by McKinney 2:11½ out of Stemwinder, dam of Directum 2:05½, to the Chase sale next Thursday evening. They should make great broodmares, and are sold to close a partnership.

Manos, a bay gelding, three-years-old by Altivo, dam Mano, the dam of Mendocino 2:19½, is to be sold next Thursday evening at the salesyard of Fred H. Chase & Co. He is broken single and double and a good prospect.

Secretary John J. Kelly of the Monterey Agricultural Association writes that the association will give a fair and race meeting at Salinas this year. The date has not yet been selected but it will probably be some time during the early fall.

Tom Bonner has consigned a handsome bay gelding by Seymour Wilkes to the Chase sale next Thursday evening. This is a nice large horse, 15.3, broke single and double, and not afraid of anything. He can show a 2:40 gait and is an excellent roadster.

Acting Secretary Miller of the State Agricultural Society writes that the Sacramento track is in excellent condition at the present time and the lessees state that they will keep it so. Quite a number of horses are in training there and within a few weeks the number will be doubled.

When E. E. Smathers starts on his automobile trip around the world next month all his trotters and pacers will be sent to Louisville, Ky., in charge of George W. Spear, to be wintered and trained for the campaign of 1904. Mr. Smathers does not expect to return in time for the spring driving season, and his horses may not be seen on the speedway again until the close of the Grand Circuit. Lord Derby 2:05½ and Billy Buch 2:07½ are now turned out at a stock farm in New Jersey. Mr. Smathers says Lord Derby is as sound as a bell, and still believes the son of Mambrino King to be as fast as any horse he owns, not excepting Major Delmar.

It is reported that the managers of the Western Horse Show Association are planning to offer unusually rich prizes for next year's exhibitions. St. Louis, it is said, will hang up \$50,000 for the harness and saddle horses; Chicago and Kansas City will give \$40,000 each, and Louisville's prize list will foot up \$36,000.

A Vermont horseman writes that Agitato 2:09 raced in his proper class—the free for all—at Sandy Hill, N. Y., and Cambridge, N. Y., last summer. It has been hinted that Agitato might have been started in slow classes some time last summer, but our Vermont correspondent's information seems to indicate that those hints had no basis in fact.

The San Francisco Driving Club will hold matinee racing on the speedway in Golden Gate Park on Sunday January 24th. There are already nineteen horses entered, and it is expected a half dozen more will be named to start. They will be classified according to the speed they can show at the present time and several lively contests will result.

Charlie Spencer and F. J. Fallman of Walnut Grove have recently purchased from R. F. Thisby the two-year-old bay colt Sir Robert, entered in the Pacific Breeders Futurity \$6000 stake for foals of mares bred in 1901. This colt is by Nushagak, sire of Aristo 2:17½, winner of both the Occident and Stanford Stakes of 1902, and his dam is Hilda Rose by Dawn.

The last of the Palo Alto Stock Farm horses will go under the hammer at Fred H. Chase & Co's salesyard 1732 Market street, this city, on Thursday evening next, January 14th. Don't miss this sale. Eighteen of as high class yearlings as were ever bred on the farm will go to the highest bidder. They are mostly by McKinney and Nutwood Wilkes.

Ed Appel, of Rochester, N. Y., has purchased three likely prospects for next season's campaign. One is by Sable Wilkes 2:18, out of the former trotting champion Alix 2:03½; another was sired by Hand-spring 2:18 out of Atlanta, the dam of Alix, and the other was sired by Sable Wilkes out of the great trotting mare Martha Wilkes 2:08 by Alcyone.

Pulling trotters to avoid fast records became so common in Russian harness racing a year or two ago that the driving clubs at St. Petersburg and Moscow discarded the system of classifying horses according to their records and substituted a new plan of classifying them according to their winnings. The scheme is said to work well and it will probably remain in force.

One of the best prospects in California is the brown colt Johnny McKenzie by McKinney 2:11½, dam Bahe by Ferdinand, that C. A. Durfee has consigned to the sale at Chase's salesyard on the 14th of this month. Johnny McKenzie is a brown gelding foaled 1901, and is eligible to all the leading stakes in California this year. He is a square trotter and a good prospect. He is to be sold to close a partnership.

Mr. Geo. O. Zillgitt, who recently removed to Inglewood, California, from North Dakota, is the owner of a mare whose mane is so long that it drags on the ground several feet when it is permitted to hang loose. The mare is used as a buggy animal and her mane kept braided and "done up" carefully. She is the mother of a colt foaled last spring that has inherited the heavy hirsute adornment of its dam and its mane and tail already nearly touch the ground.

Mr. A. T. Baker of San Jose, recently purchased in the East and has had shipped to this State a two-year-old colt by Belward 18321, son of St. Bel 5336. The dam of the colt is by Mediator, a son of Happy Medium. He is a royally bred fellow and said by those who have seen him to be a very fine individual. Mr. Baker owns the stallion Red Nuttle and has a five-year-old mare by him out of Maudsford by Abbotsford that is one of the best prospects in Santa Clara county.

James W. Rea of San Jose, proprietor of the Vendome Stock Farm and owner of a prize winning herd of Holstein cattle, was recently appointed a delegate to the National Live Stock Association's annual convention to be held at Portland, Oregon, from the 11th to the 15th of this month, but owing to his time being so occupied with business he was compelled to decline the honor. Mr. Rea highly appreciated the compliment but expects to open his new railroad line between San Jose and Los Gatos on January 15th, so his time will be fully occupied.

Dan Leiginger has added three new ones to his string. One is a brown pacing stallion that is a full brother to the double gaited horse that the late Tom Keating won many good races with—Ottinger 2:09½, trotting and 2:16 pacing. This stallion is owned by Mr. Eichoff of Ripon, this State, and Dan says he has every indication of being a genuine race horse as he is naturally very fast, and a better headed one is seldom seen. The other two new ones are both McKinneys—one being a five years old trotting gelding, the other a yearling.

At the breeding farm of C. A. Arvedson, three miles north of College City, Ed Donnelly, the well known and successful trainer, has in his stable the stallion Sutter 2:18½ by Noonday and two two year olds by him, Rettus and Lady Sutter, that are showing up well. The boys that are training for the two year old divisions of the Breeders Futurity for this year must take the College City contingent into their calculations as Ed says they will have to trot better than 2:20 if they beat him, if Rettus don't go wrong. Mr. Arvedson has several other colts by Sutter that look like the real goods he says.

Last week Dan McCarty, of this city, purchased from Father Cooper, of San Mateo, a five year old chestnut pacing mare by K. O'Grady's stallion Hart Boswell, that is considered one of the best prospects in California for the slow pacing class of 1904. Mr. O'Grady broke this mare and gave her a few months work last year at the track on the Haywards place at San Mateo, and drove her a mile in 2:15½ very handily. Mr. McCarty has sent the mare to Josh Albertson at Pleasanton who will put her in training for the races of 1904.

That good son of Director, Delphi 2:12½, sire of Topsy 2:10, owned by Chas. Whitehead, will make the season of 1904 at the Salinas track. The Director family is the great race winning family and as the years go by its representatives grow more numerous among the big money winners. Mr. Whitehead, who has leased the Salinas track, tells us that the Directors of the association there are putting up a new windmill and a 10,000 gallon tank on the grounds. This makes three windmills and tanks that will provide water for the track and Mr. Whitehead sees no reason why it should not be one of the very best tracks in California for training purposes.

There will be plenty of ice racing in Chicago this winter as two matinees will be held each week at Washington Park and a loving cup has been given by the Chicago Riding and Driving Club. There will be a cup or trophy contested for on every Wednesday and Saturday afternoon during the ice racing season. An organization has been formed which is known as the West Chicago Ice Speedway Association and this club will promote racing on the ice speedway just west of Garfield Park. Thomas M. Hunter has been elected president, and the racing will be conducted on same principles as a race track and with the same respect for rules. The harness horse lovers should have enough racing this winter to satisfy their desires.

John E. Madden says: "You ask me if Lou Dillon's record will ever be broken? I would say 'sure,' as I believe like our race horses, trotters are being bred speedier every year. Tracks are faster, sulky appliances and equipments are hourly being improved upon and with continued improvements in the breed of trotters, twenty years from now 1:50 may be the champion mark and two minute horses by no means of unusual appearance. I look also for an expansion in trotting horse racing in the near future. The brilliant performances of stars like Lou Dillon, Major Delmar and Creceus in one season, with Dan Patch and Prince Alert among the pacers as side issues, has given the game a great boost, and the next few years will see much new capital invested in light harness horses."

There is in the hands of Treasurer N. T. Smith of the Pacific Coast Trotting Horse Breeders Association at the present time the sum of \$15,452. Of this sum over \$13,000 is stake money belonging to the different futurity stakes established by the association. The figures show that the Breeders Association is in a very healthy state and the condition of things should be very gratifying to the members. This association has kept the interest in harness racing alive in California when, through adverse legislation and other causes there was danger of its being entirely discontinued. The prospects for a good racing season for 1904 are very bright, and the futurity stakes to be decided at the Breeders meeting will be big features of the season's racing.

Horsemen who were on the Northern circuit in 1903 state that one of the greatest prospects among the green trotters seen there during the racing season was H. H. Helman's Roy Benton. He is a sixteen hand horse, a good looker and one of the best gaited ones ever seen on a track. Roy Benton was bred in California and is by Benton Boy 2:16½, sire of Uncle Johnny (3) 2:19½, and his dam is Antera by Anteeo, second dam Debonair, dam of Rayanetta 2:27 by Sultan, third dam Ferguson mare by Belmont 64. Roy Benton is now six years old, and has had some work during his four and five-year-old form. He worked a full mile in 2:18 last year over the slow track at Irvington, with a half in 1:06, and is expected to trot very close to 2:10 this year. Mr. Helman will race him in the slow classes this year.

Among the horses consigned to the Blue Ribbon sale at Cleveland last May was Marengo King, bred and owned by the Santa Rosa Stock Farm. He had a record of 2:29½, which was no where near the measure of his speed, and probably was not considered by the purchaser, J. H. Brown, of Detroit, Michigan, who paid \$3100 for him, as the splendid individuality of the stallion, with his royal breeding, were worth the money. A full brother to Marengo King will be sold at the salesyard of Fred H. Chase & Co., 1732 Market street, in this city on Thursday evening next. This is by Mack, consigned by Mr. James LeBaron Smith of this city. By Mack was named by the late Henry Pierce, of the Santa Rosa Stock Farm, who bred him, and who considered him one of the best horses ever bred on that celebrated farm. He is by the great McKinney 2:11½, sire of twenty-seven 2:15 performers all with race records, and his dam is the \$10,000 mare By By, own sister to Lockheart 2:08½ and dam of Marengo King 2:29½ by Nutwood 600, sire of the dams of 214 in the list; second dam Rapidan, dam of Lockheart 2:08½, Rapid 2:22½ and Capt. Mac 2:29, by the great Dictator, sire of Director 2:17, etc.; third dam Madam Heady, dam of Export Prince 2:13½, by Edwin Forrest; fourth dam by Mambrino Chief 11, etc. By Mack is a very handsome young horse, and should be a very valuable horse to breed to, as his individuality and breeding are superb. In the hands of any live man he should earn a large sum in the stud every year.

The Horse's Coat.

The general appearance and comfort of a horse is greatly influenced by his coat, says a writer in a Canadian agricultural journal. A well groomed horse, like a well dressed man or woman, is pleasant to look upon. The coat of a horse, to a great extent, gives evidence of care or neglect. While a nice, fine, silky, glossy coat adds much to the general appearance of a horse, it requires a great deal of attention to keep it thus, especially during the late fall and winter months. Some horses have, naturally, much shorter and finer coats than others, and while good breeding has some influence in this respect, we frequently notice a vast difference in animals of the same breeding. Why this is we cannot determine, and simply are compelled to accept it as a fact. The age of the animal has an influence; we notice that it is not usually possible to keep the coat of young or very old animals in as fine a condition as those of animals between adulthood and old age. Horses under five years or over twenty do not usually give the same returns for care and attention, as regards coat, as do those between these ages. In the former case it may be that the more or less general fevered state of the system consequent upon dentition has an influence upon the coat, and in the latter case we are probably justified in assuming that the general vitality of the animal is more or less impaired, and the coat, as well as other parts of the anatomy, evidences the decrease of vitality.

We frequently hear people say that they do not like grey or white horses because they are so hard to keep clean. A grey horse is no harder to keep clean than a dark colored one, but stains or dirt show much more plainly and it requires more attention to make him look clean. We often notice when a team consists of a grey and a dark colored horse and when care is taken to have them look well, that on close examination the grey has a finer, shorter and cleaner coat than his mate, from the fact that stains, etc., show so plainly on him that he receives more grooming. During the summer months there's little trouble experienced in keeping a horse's coat nice, but as the weather becomes cold in the fall, nature demands that the horse be clothed accordingly, and there is a stronger tendency to growth of hair, and we may say that the coat loses its gloss in proportion to the length of hair. In order, then, that we may retain the required gloss, we must take what measures we can to prevent the growth. In order to do this, we must, in addition to thorough and regular grooming, avoid unnecessary exposure, and when exposure is necessary, provide artificial protection when the animal is not in motion. As regards grooming, a horse should be thoroughly groomed twice daily; not merely the external surface of the coat brushed and rubbed, but the hair agitated thoroughly to the roots by working the comb or brush both with and against the grain of the hair, in order to remove dust, dandruff, etc., and thereby prevent any occlusion of the openings of the sweat glands, and keep the coat free from dust.

Whenever a horse has been driven, ridden or worked hard enough to produce perspiration, it would be better to rub him until dry. This is the way in which race horses are used, and a well cared for race horse certainly presents a perfect coat. This, however, is not practicable in the ordinary stable. It would require more help than the average horseowner can afford or is willing to keep. The next best

thing to do is to clothe him warmly, place him in a comfortable stall, excluded from drafts, and when his blanket has become moist from the perspiration, remove it and supply a dry one. When he is thoroughly dry, a good grooming will remove the dried perspiration, free the matted hair and remove all dust and dirt. Of course, horses must not be left out in the fields or paddocks all night when the weather is liable to be cold, if you wish to preserve short coats. The advisability of wearing clothing in the stable is open to discussion, but if the stable be not very comfortable, we think blankets should be worn, and even in warm stables we think light clothing should be worn, as it prevents dust from entering the coat. In all cases in cold weather, when the animal is not in action, whether standing in the stable or standing outside in harness, his body should be clothed sufficiently to protect him from the wind and cold, and when it is necessary to drive or work a horse in a rain or snow storm, it is better he should be covered with a waterproof covering, in order to keep the skin dry and warm.

Cold and dampness stimulate the growth of hair, in order to protect the skin; hence, when we are particular about the coat we must, as far as possible, avoid this stimulation. When horses are being used for slow work not demanding sufficient exercise to tend to perspiration, in very cold, though dry, weather it is wise to wear blankets under the harness to protect the skin. In most cases, when reasonable care is exercised on the lines above mentioned, we will succeed in maintaining a short, sleek coat on our horses, but there are exceptions. As stated, age has an influence, and there are certain individuals that from some unaccountable reason or predisposition, will grow a long coat, notwithstanding the most careful attention. I know a horse that during the summer season has an ordinary coat, that in the fall, despite all possible attention and care, will grow long and curl, until it very strongly resembles the coat of a well cared for water spaniel, the most peculiar coat I ever saw on a horse. This occurs every fall with this horse. There are a few individuals with this or somewhat similar characteristics, and, of course, all that can be done in such cases, if we insist upon having a short coat, is to clip.

Fun on the Road in New York.

Mr. F. F. Moulton, of Menlo Park, who is at present in New York, writes the BREEDER AND SPORTSMAN that there is lots of fun on the roads in the snow there at the present time. In a ride through Seventh Avenue, and on the Riverside Drive and in Central Park Mr. Moulton saw many of the crack speedway horses. Homeward 2:13, bred by R. O. Newman, of Visalia, was driven on the Harlem road by his owner, Isaac Fleming, and looks like a king of the snow horses for this winter. Stepping down the hill from Highbridge at a clip which sent the snow flying higher than the heads of his rivals, Homeward beat Claus Bohling's Indian Jim 2:15, and George A. Coleman's Kingwood 2:17 in clever style.

Nathan Straus was out behind the famous Cobwebs 2:12 jogging along in company with A. B. Gwathmey, who drove Senator Mills 2:12, the horse that out-trotted Queen Wilkes in the hushes last fall.

Among the others seen on Seventh avenue and in Central Park were Colonel Alexander Newburger, who drove Smilax 2:21, a chestnut pacing mare by Sidney; Arthur Lape with a black trotting mare by Guy Wilkes; Dr. W. C. Gilday with the chestnut mare Pet; Andrew Freedman driving a handsome black colt; F. G. Schmidt with the lightning pacer Mercury Wilkes 2:14; W. G. Leland with Diablo and mate, a pair of stately black trotters; J. L. Dodge with the pacing mare Precious 2:15; Michael Reid driving his bay trotter Farmer.

Hallie Hinges and Harry Marvin.

Entries are evidently coming in very satisfactorily for J. L. McCarthy & Son's sale at Portland, if we may judge by their ad. this week. The Mayview Stock Farm, of Garfield county, Washington, has consigned thirty head, including the fast pacing mare Hallie Hinges 2:18, who good judges say can pace a mile in 2:12. Among other consignments is Harry Marvin 2:22, a fast trotter and an ideal road horse.

This sale will be a grand opportunity for California breeders and horsemen to sell some well-bred brood mares and young racing prospects for the high-dollar, as this sale is the "blue ribbon" event of the north in the spring, and horsemen and breeders from all over the northwest gather at this sale and if a horse will not bring his value at Portland in March there is no use looking further for a buyer in the northwest. The catalogue is filling up rapidly and those contemplating making a consignment to this sale should do so at once. For entry blanks and all particulars write J. L. McCarthy & Son, Room 3, Hamilton Bldg., Portland, Ore. The entries close February 1, 1904.

Producing Male and Female Lines.

In an extended pedigree of a horse, the pedigree of the sire and of the sires of the first, second, third, fourth and fifth dams and so on down for a few generations, constitute the major blood lines as well as the proximal and most recent in the individual traced. This being true, one may reasonably infer that such are the blood lines most worthy of consideration in estimating the value of a pedigree, especially when a good prospect is sought for breeding purposes. This inference, however, brings us to the antithesis of the Bruce Lowe theory of breeding. Instead of placing a high estimate upon a female line of descent that traces to a particular dam remotely distant, it considers of greatest value the producing qualities of sires of each and all of the dams as far down as we care to trace the pedigree in the female line. Since the pedigree of the sires of the dams make up the pedigree of nearly the whole, the qualities of these sires must also make up the qualities of nearly the whole, if the qualities of a sire and of his male and female ancestors can be transmitted to his offspring.

Making deductions from the foregoing premises prompted the writer several years ago to attempt to formulate for his own use a theory of breeding runners and trotters, which perhaps even at this late date may be worthy of some consideration in studying a pedigree. The plan or theory involved the tracing out of what may be termed potent producing sire lines or chains, each individual that serves as a link in any producing male ancestral chain to possess the following qualifications: His sire, himself and a son (or daughter) must have produced a high class performer who won one or more of the most important events. Suppose, for illustration, that the Derby, Oaks and St. Ledger are adopted as the standard stake events of England. Then to form a link in an ancestral producing chain or sire line a horse must possess the following qualifications: His sire, himself, and his son (or daughter) must have each produced a winner of the Derby, Oaks or St. Ledger. The greater the number of generations through which these qualifications in a sire can be met, the greater the number of links will there be in the sire chain, the longer will be the chain and the greater or more valuable will be its potency or momentum of superior producing qualities to be carried through succeeding generations. To numerically state and calculate this producing or "breeding on" quality, each individual in an ancestral producing chain or sire line could be given a number or index which would indicate the generation that he represents, and the higher this number the better should be his producing and "breeding on" qualities (see appended table of sire lines).

For illustration let the breeding qualities of Star Ruby, Golden Garter and Candlemas be calculated and compared as to sires and as to sires of the first five generations of the female line of ancestry.

STAR RUBY.

Sire, Hampton	9
First dam, by Bend Or	10
Second dam, by Macaroni	7
Third dam, by The Cure	0
Fourth dam, by Birdcatcher	6

6)32

5½

Average for each generation of first six.

GOLDEN GARTER.

Sire, Bend Or	10
First dam, by Wenlock	0
Second dam, by Stockwell	8
Third dam, by Don John	3
Fourth dam, by Priam	6
Fifth dam, by Filho-da-puta	1

6)28

4½

CANDLEMAS.

Sire, Hermit	8
First dam, by Marysas	8
Second dam, by Gladiateur	0
Third dam, by Sir Hercules	3
Fourth dam, by Emilius	5

6)24

4

According to this calculation of male or sire lines the potency or "breeding on" qualities in Star Ruby, Golden Garter and Candlemas would be in the ratios 32, 28 and 24, or 5½, 4½ and 4. Of course the greater the number of dams from the first down, in the female line, that can show sires who form links in producing sire chains the more value should be given the pedigree, notwithstanding the fact that the average index of calculation may be a small figure.

Having considered the producing male lines of the sire and the sires of each of the dams for several generations down, there should also be considered and

WILL NOT SCAR OR BLEMISH.

GOMBAULT'S CAUSTIC BALSAM

Is the safest and most effective lotion or blister for ailments of

HORSES AND CATTLE

and supersedes all cautery or firing. It is prepared exclusively by J. E. Gombault, ex-Veterinary Surgeon to the French Government Stud.

As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, etc., it is invaluable. Every bottle of Caustic Balsam sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address THE LAWRENCE-WILLIAMS COMPANY, Cleveland, Ohio.

Duryea Kennels owners, J. M. Arent handler. Equal 4th Cam's Pink (Uncle B.-Cam), white, black and tan English Setter bitch; Joseph Lemon owner, D. E. Rose handler. Equal 4th Blue Belle (Mohawk-Bonnie Lit), black and white English Setter bitch; John Wootton owner, J. M. Arent handler.

All-Age Stake, September 10. For Setters and Pointers which had not won first place in the Eastern, Continental, United States or Manitoba trials in any previous year. Purse \$325. \$150 to first, \$100 to second, \$50 to third, \$25 to fourth. \$5 forfeit, \$10 additional to start; 27 starters (21 English Setters and 6 Pointers).

Winners—1 Portia (Sport's Gath-Pansy B.), white, black and tan English Setter bitch; Paul Rainey owner, D. E. Rose handler. 2 Prince Rodney (Lady's Count Gladstone-Jessie Rodfield), black, white and tan English Setter dog; C. B. Cooke owner, D. E. Rose handler. 3 Tony Man (Tony Boy-May Blue), white, black and tan English Setter dog; Arent & Duryea Kennels owners, J. M. Arent handler. Equal 4th Alambough (Dash Antonio-Lark), white, black and tan English Setter dog; Charlottesville Field Trial Kennels owner, C. E. Buckle handler. Equal 4th Ortiz Lad (Rodfield-Graco G. Darling), white and lemon English Setter dog; Dr. I. C. Shoup owner, D. E. Rose handler.

Champion Stake, September 11th. Open only to placed dogs. Purse, entrance fees and gold medal. \$5 forfeit, \$10 additional to start; 7 starters (4 English Setters and 3 Pointers).

Winner—1 Mohawk (Tony Boy-Countess Meteor), white, black and tan English Setter dog; Arent & Duryea owner, J. M. Arent handler.

PACIFIC NORTHWEST FIELD TRIAL CLUB—Coupeville, Whidby Island, Washington, September 29, 30. J. A. Balmer, judge. 4th annual trials.

Derby, 26 nominations, 14 starters (11 English Setters and 3 Pointers).

Winners—Uncle Jim (Count Whitestone-Sport's May Belle), white and orange English Setter dog; J. A. Peebles owner, C. G. Kyle handler. 2 Valita (California Bell Boy-Rod's Lark), white, black and tan English Setter bitch; John Schumacher owner, W. B. Coutts handler. Equal 3 Cincinnatus' Nat (Cincinnatus' Pride-Ruth T. Etol), white, black and tan English Setter dog; E. B. Roy owner. Equal 3 Count Whitestone's Chief (Count Whitestone-Sport's May Belle), orange belton English Setter dog; N. A. Weeden owner, Hans Hansen handler.

All-Age Stake, 13 nominations, 8 starters (7 English Setters and 1 Pointer).

Winners—1 Lady (Count Gladstone IV-Peach Mark), white and lemon English Setter bitch; J. E. Terry owner, W. B. Coutts handler. 2 Fleet (Dashing Fleet-White Bawn), white and lemon English Setter dog; Mr. Paulsell owner, Hans Hansen handler. 3 Kilgarif (Orion-Mary Lou), white, black and tan English Setter dog; J. E. Terry owner, W. B. Coutts handler.

Members' Stake, 5 starters (4 English Setters, 1 Pointer).

Winners—1, 2 Hick's Lad, Hick's Bat (Doc Hick-Woodcraft), English Setter dog and bitch; J. W. Considine owner. 3 Doc Montez (Roy Montez-Diana Montez), English Setter dog. C. Wenning owner.

BRITISH COLUMBIA FIELD TRIAL CLUB—Seveston, B. C., Thomas Plimley, judge. Inaugural trials.

Derby, October 8. Purse 40, 30, 20 and 10 per cent of entrance. 8 starters (6 English Setters, 2 Pointers).

Winners—1 Roy's Lady (Roy Montez-Victoria Belle II), white, black and tan English Setter bitch; Miss W. E. Davie owner, C. H. Sweetzer handler. 2 Texada (Iroquois Chief-Tony's Destiny), white, black and tan English Setter bitch; N. F. Lyne, owner and handler. 3 Criterion (Rieko-Nellie B.), lemon and white English Setter dog; Dr. Findley owner, C. H. Sweetzer handler. 4 Vancouver Shot (Sport IV-Perrot's Daisy), black and white Pointer dog; L. Wilbaud owner, C. H. Sweetzer handler.

All-Age Stake, October 10. Purse, same division as in Derby. 10 starters and 2 absent (9 English Setters, 1 Irish Setter).

Winners—1 Val's Belle (Bain's Flash-Val's Lady), white, black and tan English Setter bitch; C. Cocking, owner and handler. 2 Val's Rose (Rieko-Val's Lady), white, black and tan English Setter bitch; James Brooks owner, C. H. Sweetzer handler. 3 Tony's Destiny (Tony Boy-Sport's Destiny), blue belton English Setter bitch; N. F. Lyne owner, C. H. Sweetzer handler. 4 Lady Roberts (Grouse P.-Tobe's Val), white, black and tan English Setter bitch; H. Abbott owner, N. F. Lyne handler.

SPORTSMEN'S FIELD TRIAL CLUB—Clare, Mich. Inaugural trials.

Derby, October 27. 12 starters (all English Setters). Winners—1 Clairvoyant (Cowley's Rodfield's Pride-Phoebe-Whitstone), white and orange English Setter bitch; E. H. Waller owner and handler. 2 Gath's Dorrit (Sport's Gath-Little Dorrit), white, black and tan English Setter bitch; E. D. McQueen owner, Thomas Morris handler. 3 Phoebe's Rod (Cowley's Rodfield's Pride-Phoebe Whitstone), white and orange English Setter dog; L. N. Hilsendegen owner and handler. 4 Dike's Dike (Fairland Dike-Top Mark Lady), white, black and tan English Setter dog; E. C. Smith owner and handler.

All-Age Stake, October 29. 18 starters (15 English Setters and 3 Pointers).

Winners—1 Lou Rodfield (Rodfield-Gypsy A. Gladstone), orange, white and tan English Setter bitch; W. M. Tanner owner and handler. 2 Clairvoyant (Cowley's Rodfield's Pride-Phoebe Whitstone), white and orange English Setter bitch; E. H. Waller owner and handler. 3 Rose M. (Kel's Carter-Scraper), white, black and tan English Setter bitch; F. H. Sherer owner and handler. Equal 4th Phoebe's Rod (Cowley's Rodfield's Pride-Phoebe's Whitstone); L. N. Hilsendegen owner and handler. Equal 4th Tony's Nell (Tony's Mark-Nellie F.), white and black English Setter bitch; A. J. Smith owner, E. H. Waller, handler.

MONONGAHELA FIELD TRIAL CLUB—Robinson, Ill. N. Wallace and W. S. Bell, judges; A. C. Peterson, secretary. 9th annual trials.

Members' Stake, October 27. Prizes: gold, silver and two bronze medals. 7 starters (4 English Setters and 3 Pointers).

Winners—1 Lad of Jingo (Jingo-Dot's Pearl), white and liver Pointer dog; W. P. Austin owner, A. B. Caldwell, handler. 2 Hal's Hope (Harold Skimpole-Nellie Bly), white, black and tan English Setter dog; Bell & Anderson owners, A. C. Peterson, handler.

3 May Fly (May Prince-Glory), white and orange English Setter dog; G. O. Smith owner, A. B. Caldwell handler. 4 Mar's Chan (Lady's Count Gladstone-Lontonio); W. S. Bell owner, A. C. Peterson handler.

Derby, October 27. Purse \$600. Gold medal and \$250 to first, silver medal and \$200 to second, bronze medal and \$100 to third, bronze medal and \$50 to fourth. Entrance \$5, \$5 and \$10 to start; 62 nominations, 36 starters (25 English Setters and 11 Pointers).

Winners—1 Shawnee (Tony Boy-Cado), white, black and tan English Setter bitch; Arent & Duryea Kennels owner, J. M. Arent handler. 2 Uncle Sam (Uncle B.-Minnie R.), white, black and tan English Setter dog; C. K. Brown owner, D. E. Rose handler. 3 Young Lad of Rush (Lad of Rush-Gorham's Dorothy), liver and white Pointer dog; Charles Gorham owner, Edward Garr handler. 4 Itaska (Prime Minister-Youma), white, black and tan English Setter bitch; Arent & Duryea Kennels owner, J. M. Arent handler.

All-Age Stake, October 30. Purse \$600. Same division, medals and entrance as the Derby; 62 nominations, 36 starters (25 English Setters, 11 Pointers).

Winners—1 Mohawk (Tony Boy-Countess Meteor), white, black and tan English Setter dog; Arent & Duryea Kennels owners, J. M. Arent handler. 2 Alford's John (Dave Kent-Cleade), white and liver Pointer dog; Foust & Dickey owners, J. T. Jones handler.

3 Sport's Count Danstone (Count Danstone-Sport's Maid); William Brett owner, Charles Askins handler. Equal 4th Prince Rodney (Lady's Count Gladstone-Jessie Rodfield), white, black and tan English Setter dog; C. B. Cooke owner, D. E. Rose handler. Equal 4th Alpine Lad (Lad of Jingo-Fanly Flash), white and liver Pointer dog; Charles Proctor owner, Edward Garr, handler.

OHIO FIELD TRIAL CLUB—Washington C. H., O. Geo. R. Haswell and Major J. H. Taylor, judges. 6th annual trials.

Members' Stake, November 2. 9 starters (5 English Setters and 4 Pointers).

Winners—1 Tip Fauster (Jingo's Pearl-Nellie Fauster), white and lemon Pointer bitch; Dr. J. G. F. Holston owner, T. Houston handler. 2 Lemons (Frackle D.-Baby Gladstone), white and lemon English Setter bitch; Harry L. Brown owner and handler. 3 Ripstone's Jingo (Ripstone-Jingo's Lady), white and black Pointer dog; C. T. Phillips owner, T. Houston handler. 4 J. C. (Young Jingo-Eve), white and liver Pointer dog; F. R. Huntington owner, T. Houston handler.

Derby, November 4. Purse \$500; \$250 to first, \$150 to second, \$100 to third. 12 starters (8 English Setters and 4 Pointers).

Winners—1 Itaska (Prime Minister-Youma), white, black and tan English Setter bitch; Arent & Duryea Kennels owner, J. M. Arent handler. 2 Hickory (Mohawk-Bonnie Lit) white, black and tan English Setter dog; Arent & Duryea Kennels owner, J. M. Arent handler. 3 Algonquin (Prime Minister-Clip Wind'em), white, black and tan English Setter dog; Arent & Duryea Kennels owners, J. M. Arent handler.

All-Age Stake, November 7. Purse \$500; \$250 to first, \$150 to second, \$100 to third. 16 starters (9 English Setters and 7 Pointers).

Winners—1 Tony Man (Tony Boy-May Blue), white, black and tan English Setter dog; Arent & Duryea Kennels owner, J. M. Arent handler. 2 Alford's John (Dave Kent-Cleade), white and liver Pointer dog; Foust & Dickey owner, J. T. Jones handler. Equal 3 Sport's Count Danstone (Count Danstone-Sport's Maid), white, black and tan English Setter dog; J. T. Jones handler. Equal 3 Iroquois (Tony Boy-Cado), black, white and tan English Setter dog; Arent & Duryea Kennels owner, J. M. Arent handler.

MICHIGAN FIELD TRIAL CLUB—Greenville, Mich., November 2. Messrs. W. J. Baughn and J. G. Armstrong, judges; C. D. Stuart, secretary.

Derby, 9 starters (7 English Setters, 2 Pointers).

Winners—1 Daisy Baughn (Petrel's Count-Fly Rod), blue belton English Setter bitch; F. L. Holmes, owner and handler. 2 Clairvoyant (Cowley's Rodfield's Pride-Phoebe Whitstone), white and orange English Setter bitch; E. H. Waller, owner and handler. Equal 3d Phoebe's Rod (Cowley's Rodfield's Pride-Phoebe Whitstone), white and orange English Setter dog; Louis Hilsendegen, owner and handler. Equal 3d Gath's Dorrit (Sport's Gath-Little Dorrit), black, white and tan English Setter bitch; Dr. E. D. McQueen owner, T. Morris handler.

All-Age Stake, 10 starters (All English Setters).

Winners—1 Don Antonio III (Dash Antonio-Eldred's Constance), black, white and tan English Setter dog; W. C. Donaldson, owner and handler. 2 King Do Do (King Bo-Clipperigo), white, black and tan English Setter dog; E. E. Kraal owner, Asher Cady handler. Equal 3d Count Holmes (Count Diamond-Little Dorrit), white, black and tan English Setter dog; C. D. Stuart owner, Asher Cady handler. Equal 3d Lou Rodfield (Rodfield-Gipsy A. Gladstone) white and lemon English Setter bitch; M. W. Tanner owner, E. Pettit handler.

INDEPENDENT FIELD TRIAL CLUB—Robinson, Ill. Messrs. Zell Gaston, S. H. Socwell and A. Trigg, judges; H. S. Humphreys, secretary. 5th annual trials.

Members' Stake, November 11. For unplaced dogs. Purse, entrance fees; four moneys, 50 per cent and cup to first, 30, 20 and 10 to next three; 30 nominations, 22 starters (18 English Setters and 4 Pointers).

Winners—1 Fairy's Rod (Fairy's Ben-Flossie Delaney), white, black and tan English Setter dog; High Land Kennels owner, W. H. Kerr handler. 2 Trixie (Jiogo's Two Spot-Busy Bee), white and liver Pointer bitch; George I. Nunn, owner and handler. 3 Madison Rodfield (Rodfield-Lady Danstone), black, white and tan English Setter dog; R. R. Beardsley owner, Max Middleton handler. 4 Lady Glasgow (Rodfield-Paul's Daughter), white, black and tan English Setter bitch; W. Lee Cook owner, Ed Garr handler.

Derby, November 9. Purse \$500, guaranteed. \$200 to first, \$150 to second, \$100 to third, \$50 to fourth. \$10 forfeit and \$10 to start; 66 nominations, 26 starters (19 English Setters and 7 Pointers).

Winners—1 Flintstone (Robert Count Gladstone-Topsy K), white, black and tan English Setter dog; American-Llewellyn Keonels owner, W. W. Updike handler. 2 Minnesota Joe Jr (Minnesota Joe-Sam's Dream), white and black Pointer dog; C. C. Burkhead owner, I. H. Reginald handler. 3 Pioneer (Count Whitestone-Bonnie Doone), white and orange English Setter dog; Tiltus-Hoover Kennels owner, Er Shelley handler. 4 Osseo (Count Rodstone-Marie's Dot), white, black and tan English Setter dog; Dr. E. R. Hickerson owner, Ed Garr handler.

All-Age Stake, November 13. Purse division and entrance money same as Derby. 24 starters (14 English Setters and 10 Pointers).

Winners—1 Alford's John (Dave Kent-Cleade), white and liver Pointer dog; Foust & Dickey owner, Charles Askins handler. 2 Alpine Lad (Lad of Jingo-Fanny Flash), white and liver Pointer dog; Charles Proctor owner, Ed Garr handler. 3 Jessie Rodfield's Count Gladstone (Lady's Count Gladstone-Jessie Rodfield), white and orange English Setter dog; Jesse Sherwood owner, Er Shelley handler. 4 Doctor Daniels (Plain Sam-Dolly D II), white and liver Pointer dog; California Kennels owner, Charles Askins handler.

INTERNATIONAL FIELD TRIAL CLUB—Ruthven, Ontario. Messrs. Thomas Guttridge and J. W. Baugh, judges; W. B. Wells, honorary secretary. 15th annual trials.

Derby, November 10. Purse, entrance fees; four moneys, 40, 20, 15 and 10 per cent; \$5 forfeit and \$5 to start; 7 starters (6 English Setters and 1 Pointer).

Winners—Trixie's Pearl (Sport's Gath-Kingston's Trixie), white, black and tan English Setter bitch; C. D. Stuart owner, Asher Cady handler. 2 Ruby's Lady (Petrel's Count-Fairland Ruby), black, white and tan English Setter bitch; Dr. Campeau owner, T. Pollin handler. 3 Doctor B (Sam T II-Maud S), white, black and tan English Setter dog; John Huddleston owner and handler. 4 Joe Hawk (Duke I-Fly Ann), white and black Pointer dog; A. J. Pickering owner and handler.

All-Age Stake, 10 starters (8 English Setters and 2 Pointers).

Winners—1 Lou Rodfield (Rodfield-Gipsy A. Gladstone), white and lemon English Setter bitch; M. W. Tanner owner, C. E. Pettit handler. 2 Don Antonio III (Dash Antonio-Eldred's Constance), black, white and tan English Setter dog; E. H. Nelson owner, W. C. Donaldson handler. 3 Selkirk Solus (Selkirk Whyte-Selkirk Tana), white, black and tan English Setter dog; W. B. Wells owner and handler.

CONNECTICUT FIELD TRIAL CLUB—Hampton, Conn. Messrs. H. P. Emory and H. W. Eager, Derby judges; Messrs. Emory and S. A. Ellis, All-Age judges; F. N. Smith, secretary.

Derby, November 10. Purse, entrance fees; four moneys, 40, 30, 20 and 10 per cent. \$5 forfeit and \$5 to start; 11 starters (8 English Setters, 3 Pointers).

Winners—1 Sazarac (Carpenter's Boy-Victoria H), white and orange English Setter dog; J. H. Hoffman, owner and handler. 2 Ledger II (King Cyran-Ledger), white and liver Pointer dog; George H. Clark owner, H. B. Tallman handler. 3 Ben Rodfield (Rodfield's Count-Rod's Dora), black and white English Setter dog; Hutchins & Parkinson owners, G. H. Parkinson handler. 4 Plain Spot (— — — —) white and liver Pointer dog; A. Cooley, owner and handler.

All-Age Stake, November 11. Purse, entrance fees; four moneys, 40, 30, 20 and 10 per cent. \$5 forfeit and \$5 to start; 7 starters (5 English Setters, 2 Pointers).

Winners—1 Breeze II (American Boy-Redfield's Gypsy), black, white and tan English Setter dog; M. H. Coffin, owner and handler. 2 Ruby's Rod (Kingston-Mark's Ruby), black, white and tan English Setter dog; W. G. Comstock, owner and handler. 3 Elegante (American Boy-Redfield's Gypsy), white and black English Setter bitch; O. D. Redfield owner, P. E. Parmelee handler. 4 Teddy Kent (Ned D II-Gypsy), white and liver ticked Pointer dog; Parker Morris owner, H. B. Tallman handler.

Members' Stake, November 11. Purse, entrance fees; four moneys, 40, 30, 20 and 10 per cent. Forfeit \$3 and \$2 to start; 3 starters (All English Setters).

Winners—1 Breeze II (American Boy-Redfield's Gypsy), black, white and tan English Setter dog; M. H. Coffin, owner and handler. 2 Wampanaug Chief (Herbert's Lord of the Manor-Herbert's Fairy Queen), liver and white English Setter dog; W. S. Hawley, owner and handler. 3 Ruby's Rod (Kingston-Mark's Ruby), black, white and tan English Setter dog; W. G. Comstock, owner and handler.

MARYLAND AND DISTRICT OF COLUMBIA FIELD TRIAL CLUB—Chesapeake Beach, Md. R. Robinson, judge; W. R. Armstrong, secretary. Inaugural trials.

Derby, November 9. For dogs owned by members; 4 starters (3 English Setters and 1 Pointer).

Winners—1 Count (Scamp-Polly), white and orange English Setter dog; G. Penniman owner and handler. 1 Bird West (Dash-Bird Wise), white and orange English Setter bitch; Dr. J. L. McCormick owner and handler. 3 Lady Lou (— — — —), white, black and tan English Setter bitch; G. H. Kent owner and handler. 4 Rappahannock (Bildad-Sapher), white and liver Pointer dog; R. T. Seeger owner and handler.

All-Age Stake, November 11. For dogs owned by

GOSSIP FOR SPORTSMEN.

members; 12 starters [8 English Setters, 4 Pointers] Winners—1 Rox [Lady's Count Gladstone-Pink Tea], white, black and tan English Setter dog; G L Nicholson owner and handler. 2 Mack Ewing [Pout's Lloyd-Bessie Hancal], black, white and tan English Setter dog; Dr J L McCormick owner and handler. 3 Dan C. [Devonshire Dick-Lady Grace II], white and black Pointer dog; Dr H F Hill owner and handler. 4 Flash of Heathcote [N. D. of Heathcote-Topsy], white, black and English Setter dog; T Conrad Dodge owner and handler.

ILLINOIS FIELD TRIAL ASSOCIATION—Robinson, Ill. Messrs S R Seewell, W R Green and Dr E R Hickerson, judges, W R Green, secretary. 5th annual trials.

Members' All-Age Stake, November 16. Purse, entrance fees, four moneys, 40, 30, 20 and 10 per cent and also silver cup to first. Forfeit \$2.50 and \$2.50 to start; 14 nominations, 8 starters [all Pointers].

Winners—1 Von's Jack [Jingo Boy-Cook's Bessie], white and liver Pointer dog; O Von Lengerke owner and handler. 2 Trixie [Canada's Two Spot-Busy Bee], white and liver Pointer bitch; George I Nunn owner and handler. 3 Shotell [Ben R-Mee Go], white and liver Pointer dog; James Pease owner and handler. 4 Boone [Keystone Jim —————], white and liver Pointer dog; John G. Drennan owner and handler.

Members' Derby, November 16. Purse, etc., same Members' All-Age; 14 nominations, 6 starters [5 English Setters and 1 Pointer].

Winners—1 Chicago Boy [Robert Count Gladstone-Nellie Rodfield], white and orange English Setter dog; American-Llewellyn Kennels owner, James Pease handler. 2 Cook's Rodfield [Lady's Count Gladstone-Hickory Nell], white, black and tan English Setter dog; C C Cook owner and handler. 3 Lillian O Rodfield [Rodfield-Glad O'Light], white, black and tan English Setter bitch; Henry Scharman owner, E R Raimor handler. 4 Rod's Ruby Rodfield [Rodfield-Louise Danstone], white, black and tan English Setter bitch. Dr. J. R. Burnett owner and handler.

Open Derby, November 18. Purse \$500. \$200 to first, \$150 to second, \$100 to third, \$50 to fourth. \$10 forfeit and \$10 to start; 63 nominations, 21 starters [15 English Setters and 6 Pointers].

Winners—1 Flintstone [Robert Count Gladstone-Topsy K], white, black and tan English Setter dog; American-Llewellyn Kennels owner, W W Updike handler. 2 Oakley Hill's Pride [Oakley Hill-Gleam's Daisy], white, black and tan English Setter dog; Mrs John Cowley owner, Er Shelley handler. 3 Plain Rex [Dan B.-Thelma S.], white, black and tan English Setter dog; Thomas Griffiths owner, Nat B. Nesbitt handler. 4 Imperial [Uncle B.-Cam], white, black and tan English Setter dog; Joseph Lemon owner, D. E. Rose handler.

Open All-Age Stake, November 19. Purse, moneys and entrance same as Derby. 43 nominations, 25 starters [13 Pointers, 12 English Setters].

Winners—1 Alford's John [Dave Kent-Cleade], white and liver Pointer dog; Foust & Dickey owners, Charles Askins handler. 2 Prince Rodney [Lady's Count Gladstone-Jessie Rodfield], white, black and tan English Setter dog; C C Cook owner, D E Rose handler. 3 Alpine Lad [Lad of Jingo-Fanny Flash], white and liver Pointer dog; Charles Proctor owner, Edward Garr handler. Equal 4th Peach Blossom [Count Gladstone IV-Peach Mark], white, black and tan English Setter bitch; W W Van Arsdale owner, Charles Askins handler. Equal 4th Sport Webster [Marie's Sport-Peg's Girl], black, white and tan English Setter dog; F Towler owner, A B Caldwell handler.

Championship Stake, November 21. Open to all Pointers and Setters which have been placed in any field trial. E R Hickerson and James Pease, judges. Purse \$300; \$275 to first, \$25 to runner-up. Forfeit \$10 and \$15 to start; 15 nominations, 10 starters [6 English Setters, 4 Pointers].

Winners—Peach Blossom [Count Gladstone IV-Peach Mark], white, black and tan English Setter bitch; W W Van Arsdale owner, Charles Askins handler. Runner-up Annie B. [Uncle B-Pride of Aherncorn], white, black and tan English Setter bitch; C K Brown owner, D E Rose handler.

[Concluded next week.]

Coast Field Trials.

On Monday, near Bakersfield, the twenty-first annual trials of the Pacific Coast Field Trial Club will commence. Birds are reported to be plentiful and cover favorable, a dry spell may have had some influence on scent, but to offset this it is claimed that the heavy and continuous fogs prevailing in the trial ground districts will make the ground just about right.

Judge W. S. Bell arrived in this city Thursday and was met and taken in charge by Secretary Albert Betz and Dr. C. W. Hihbard. He will go to Bakersfield this evening and look over the grounds to-morrow. A number of the club members and other sportsmen will start for Bakersfield to-morrow.

A notable feature of this meeting is that, besides the fat purses, there will be three cups for each event and also the champion cup. The latter has been won twice by W. S. Tevis. The cups offered in the other events were all donated by club members—to avoid the chance of a member winning his own donation, there was no specified rating made for the prizes when donated. This practically leaves the distribution of the cups one of choice; the winner of first place getting the initial selection, second choice going to the second place winner and third dog to take the remaining cup.

The donors of the cups are: Members' stake—W. W. Richards, J. W. Flynn and Western Field. Derby—J. E. Terry, J. H. Schumacher and W. S. Tevis. All-Age—Frank Maskey, Clinton E. Worden and W. W. Van Arsdale.

The Union Metallic Cartridge Company will henceforth be represented on the road by Mr. "Hip" Justins. His route, unless we are greatly mistaken, will take in the southern portion of the State and Arizona. Mr. Justins is a well known and extremely popular sportsman. Previously he had a position of trust and responsibility under the suave and esteemed Mr. E. T. Allen for ten years. When the latter gentleman retired from active business, Mr. Justins assumed an important billet with the now well known sporting goods house, the H. E. Skinner Co., which firm bought out Mr. Allen's business.

Mr. Justins is well known to the trade and personally acquainted with the majority of sportsmen on the Coast, having traveled extensively for the E. T. Allen Co., prior to the change. His genial personality and thorough acquaintance with the manifold details of the sporting goods trade is a guarantee fund of future success for which the BREEDER AND SPORTSMAN takes the liberty of offering congratulations in advance.

Both shooting and fishing conditions have recently taken on a decidedly pleasing aspect to sportsmen. Duck shooting has been good for a week past. Near Collinsville excellent bags were shot last Sunday by W. W. Richards, G. H. T. Jackson and John Lemmer, the birds were mostly mallards, canvasback were fairly represented however. On the Suisun, generally speaking, results were good. The same conditions prevailed on the Alameda and Alviso marshes.

The "cans" however are very wise and fly extremely high. Last Sunday, on Petaluma creek, the largest flight of these ducks and one of the highest bunches of "cans" that the writer has observed in many years, came from the Petaluma marshes and lit out for the bay. They were up so high that it would have taken a rifle ball to stop one of them.

Possibly the greatest canvasback shoot in the history of the Sonoma marsh, or any of the marshes,

H. JUSTINS

Traveling Representative U. M. C. Co.

for that matter, was had on the Alameda Gun Club preserve near McGills, three weeks ago. Nineteen members each secured the limit of 50 ducks at that time. Some good bags were also made on the preserve last Sunday.

Good duck shooting can be had at Grafton on the overflowed lands.

Geese shooting is now in order. Thousands upon thousands of gray and white geese, with a sprinkling of honkers and brants are now on the Colusa plains. Staten Island is also "infested" by geese. We say infested because these birds do an incalculable amount of damage annually to the wheat sprouting in the fields. Mr. E. E. Drake of this city and F. W. Sheard of Tacoma, bagged over 200 gray and white geese near Willows in two days' shooting this week.

A big run of steelhead in Russian river now on will draw a large contingent of local anglers to that grand stream tomorrow.

A number of fine fish were taken at Point Reyes last Sunday.

Striped bass fishing is still good in San Antonio creek.

The Los Angeles County Fish and Game Protective Association has now 850 members on the roll, its list is steadily increasing and the organization is doing good work in the cause of game protection.

Secretary L. Herzog writes us that he will issue 3000 pamphlets for 1904, one of which will be mailed to every member of the association and the balance used during the year to further the work of the association.

The booklet will contain several new features (as compared to that issued in 1903), among which are the game laws of Southern California, gun clubs and their secretaries; a list of Southern California trap shooters' clubs and a list of the rifle teams of Southern California.

An effort will also be made to arrange for a Southern California trap shooting circuit after the pamphlet has been issued, so that the coming trap season the south will be a lively one.

A California Circuit is a Possibility.

Mr. Arthur Letts informs us that there is a good prospect for an A. K. C. show in Los Angeles. There will be an effort made to have the southern metropolis included in the circuit of the other Coast cities. Letts is the owner of the good Collie Ravenswood and is an enthusiastic fancier. He invites suggestions from Coast fanciers as to the time of holding the show and for other data of mutual interest.

There is no reason why a bench show can not be made successful and attractive for there are many lovers of the dog down south and a number of good dogs could be brought out at a Los Angeles show.

An open air show for one day in Lawrence, Santa Clara county, at the Oak Grove Kennels, is on the tapis for next month. In April a show is listed for San Jose and following will come a summer show in Santa Cruz. These three shows will probably be held under P. K. L. rules.

The spring show of the San Francisco Kennel Club will take place in April or early in May.

From the foregoing it will be seen that there is now a healthy ripening interest among the fancy for a series of bench shows in California this year. There is no reason why a strong combination could not be made of the material at hand. In the event of this being brought about, the enthusiasm will be cumulative and the possibilities of the introduction of "recruits" and "new blood" will be of inestimable value and advantage to Coast dogdom.

It may not be far fetched to suggest the feasibility of a connecting link, say at Santa Barbara, for a neat little show was given at that delightful city on the ocean shore in July 1899; the second annual show of the Santa Barbara Kennel Club.

What the affiliations are, or have been, will not cut any particular figure, the success of the project can be achieved by a unity of effort and cohesion of doggy interests. Whether under A. K. C. or P. K. L. auspices, is to quite an extent a secondary consideration, the main object being circuit organization.

In the event of this, to be hoped for, amalgamation of the fanciers, it will undoubtedly redound also to the benefit of the northern show interests.

One good season, and the project is a feasible one, will do for Coast dogdom what has been ardently desired for a long time past.

If this scheme is to be made a go, there is no time to delay and the sooner there is an understanding all round and the preliminary work started all the more certain will there be a vast and rapid advance in the affairs of the Coast fancy.

Mr. Leon Greenebaum is truly meeting with some exceedingly hard luck in his Bulldog kennels. Some time ago he lost the good bitch Endcliffe Pleasure. She was in whelp, and breaking out from her kennel one day got into a mixup with another dog, she died shortly afterwards. King Commando has only recently come into condition again, having been under treatment for several weeks. Early this week Mr. Greenebaum received the discouraging news that Endcliffe Forceps was dead. This well known stud dog and bench winner had been placed with a friend, at Mission San Jose, who in response to a message to send Forceps to this city telegraphed that the dog had gone to the canine majority. The genial proprietor of the Ellegys Kennels has our sympathy for such a continuous run of mishaps.

Mrs. K. Bradley-Dyne has purchased the Great Dane King Edward from James Cole of Kansas City. This dog was one of two placed on exhibition at the December show by Mr. Cole. In this accession to the Saturna kennels we believe Mrs. Bradley-Dyne has one of the best young stud dogs on the Coast. Why this dog was overlooked by local fanciers when he was here is a puzzle we could never fathom.

A Sportsman's Calendar.

A noble elk in his death throes and lying prone on a rocky slope—in close proximity the dismounted, eager-faced hunter on the qui vive with rifle at "port" and ready finger on the trigger, a well trained, high strung and heavily caparisoned hunting pony waiting, held by the frill anchorage of a trailing bridle; the whole stirring incident framed in a background of green pines and a picturesque vista of rangy mountain distances, such is an illustration of a hunting scene portrayed in living colors on the calendar of the Savage Arms Co. for 1904. This calendar is one that every sportsman should have. The painting is by the magic brush of Mr. Carl Rungis, the noted painter of wild animals and their habitats. Get one by sending 10 cents in postage stamps to T. P. Peckham, Savage Arms Co., Utica, N. Y. It is worth having.

Duck and Quail Outfits.

The demand at Skinner's keeps up for sportsmen's outfits ammunition and guns. A large and new stock of goods has been added to fill the demand for hunting suits, rubber boots and hunters' footwear, canvas and folding wooden decoys, gun cases and a new design of leather-covered shell boxes. Peters Factory Loaded Shells are unequaled. Skinner's place is 801 Market street. You can get anything there you need for duck or quail shooting. Send for a catalogue, if you haven't the time to come, and try a mail order.

Strike!—if they don't give you Jackson's Napa Soda when you ask for it.

THE FARM.

Quinto Stock Farm Cattle.

The accompanying cuts of animals on the Quinto Stock Farm at Ingomar, Colusa county, California, are representative of the famous herd which added fresh laurels to its already long list by taking 41 premiums at the California State Fair of 1903. The picture of Chief of Valley View 4th is from a photograph taken in his yearling form. He won first premium and sweepstakes as a bul calf at the California State Fair of 1902, and first premium in both open and State class for hulls between 18 and 24 months and junior champion sweepstakes at the California State Fair of 1903.

Professor Carlyle in judging the cattle at the California State Fair of 1903 remarked about Chief of Valley View 4th as follows:

"He has that peculiar cylindrical form which is the most popular now for meat production. I don't care whether it is in beef cattle, hogs or sheep or what class of animal is being put on the market the round or cylindrical form with no prominences in any part is the quality we most particularly want."

At latest advices Chief of Valley View 4th is constantly improving and showing his remarkable depth as well as cylindrical form and proving a wonderful breeder. There are also shown some of the prize winning heifers on the Quinto Stock Farm that will be bred to Chief of Valley View 4th this year. The results are easily foretold and the progeny from this cross will be heard from in the show ring at a later day.

The Alfalfa Hog.

It will not be a great while until the term "alfalfa hog" means a different type from that grown East. When the railroads master the problem of carrying hogs through without disease quite a per cent of the pork of the country will be grown west of the corn belt, where alfalfa does better than in the Central States. We look for the time when our pigs will be shipped East to cattle feeders and farmers who have more corn than hogs. These shotes, when put on a heavy corn diet, whether on alfalfa or not, make rapid gains and, we believe, will make better use of corn than hogs grown on a corn ration. Everybody in this country knows that hogs grown on alfalfa have much greater resisting power to cholera than those grown on corn and subjected to the same disease under the same conditions. —*Field and Farm.*

Good Sized Bones Are Necessary.

Small bones in a large hog is a condition that should not be desired. If the bones are very light it is a fact that the percentage of flesh covers the deficiency. But would it not be better to have still more flesh supported by still stronger and heavier bones? A big hog should have big bones and little hogs little bones. Our best breeders and judges insist on strong limbs and good sized bones as necessary to the vigor and symmetry of the hog. —*Farm and Ranch.*

Missouri, according to Dr. F. B. Mumford, is now the second mule state in the Union (Texas being first), with 300,000 animals, valued at \$23,000,000, or 9 per cent of the total in the United States. This in view of the thousands shipped to South Africa during the Boer war, is remarkable.

Jackson's Napa Soda is sold in every city, town and hamlet in the State.

Use of Oil Meal.

The heavy use of oil meal with fattening cattle and especially with hogs tends to make the flesh rather soft and oily, something not desirable in beef production and especially objectionable in the production of pork, says W. A. Henry. The limited use of oil meal should not prove injurious to brood sows, but would be very helpful, especially in preventing costiveness, which may occur at or near the time of parturition. Such a condition should be carefully avoided by the use of

CHIEF OF VALLEY VIEW 4th 182590

oil meal and wheat bran, both of which are valuable for correctives.

The year 1903 has been a red-letter year for Hampshires in the United States. They made the greatest show of the breed in this country at the International. Reports from every part of the country show that the breeders are cleaned out of surplus sheep of both sexes, and the largest Hampshire breeder in the country, Hon. Robert Taylor, reports orders for 3000 more Hampshire rams than he could fill. A well known Indiana breeder of one of the smaller Down breeds has written to all our Hampshire advertisers for prices on ewes, and says they have none for sale. A half dozen or more Hampshire importations are on the cards, and Hampshire sentiment is growing at a pace that suggests a boom of big proportions. —*Sheep Breeder.*

The efforts of the government to re-stock the exhausted stock ranges of the west with grasses should meet with universal approval. This work under federal direction has been at least measurably successful in the mountain ranges of Washington, and it is about to be undertaken on 58 square miles of typical range in Arizona, which has recently been fenced in for this purpose. Thoughtful western men who have canvassed this question believe it can successfully be done all over the west. If the department of agriculture shall have exclusive charge of this work, there is little doubt of a successful issue to the undertaking.

The Lincoln has the distinction of being the largest known breed of domestic sheep, high weights of the breed exceeding 500 pounds, and medium or average weights running from 275 to 300 pounds under avoring conditions of feed and care. The fleece of the well-bred and well-fed Lincoln ewe runs from 11 to 18 pounds, and the ram's fleece from 14 to 26 pounds, though these weights are often exceeded in Lincolnshire. The Dorset is a smaller sheep and has the advantage of the Lincoln in early maturity.

Cleanliness and cold are necessary for the production of sweet milk.

Geese.

Old geese lay a greater number of larger eggs and are more reliable than young birds and lay more fertile eggs. Breeding geese should have considerable exercise and be kept moderately thin in flesh through the winter by light feeding and a free range or facilities for swimming. The Toulouse geese lay well, but often do not sit. The Embden geese lay fewer eggs, but make better mothers. Geese are graziers and too much grain is not good for them. To insure fertile eggs they

Brine for Keeping Pork Meats.

For one hundred pounds of meat, take about eight pounds of salt, two pounds of sugar, one pint of New Orleans molasses and two ounces of saltpetre. Pulverize the saltpetre, dissolve it in water, and with the sugar and molasses stir it into the brine. It requires three gallons of water with the eight pounds of salt to make the brine strong enough. Old barrels must be well scalded and scraped before using again.

The highest priced cattle sold on the Chicago market during the past year were those fattened on the Agricultural College experimental farm at Columbia, Mo., and they brought a hundred cents on the hundred weight more than all other stock offered. This is another demonstration that scientific principles are not all tomfoolery.

Cows give a more regular quantity in winter and the milk is more uniform in quality than in summer, because the feed is of a regular quality and quantity in winter, but often very irregular in summer, owing to the varying condition of the pasture.

There are two objective points towards which ambitious breeders may strive—one is the show ground and the other is the market. There is profit in both. If successful in the exhibit there will be no trouble about getting a reasonably fancy price. If stock is good there is always a good market at a fair price.

Sometimes wounds collect pus and need to be lanced or opened with a knife. When such work is necessary the opening should be large enough to do some good. If it is too small it will close again and will need to be reopened.

Animals will tire of one ration, no difference how fond they are of it, if it is fed to them all the time. They will do better on a variety of foods. This is especially true of those which are confined and do not run on a pasture.

The bulk of beef cattle selling at \$3 to \$4 per cwt. and the bulk of roasts and steaks selling from twenty-five to thirty cents a pound, make stockmen and consumers think they are on earth only for the glory of the meat trust.

Swift & Co., which is incorporated for \$25,000,000, increased its capital stock to \$35,000,000 with the beginning of the new year. The company's net profits for the

PRIZE WINNING HEIFERS

affords, and they will try to have them in spite of hog tamers rings and other devices. They are the worst in the spring and in the fall when the insects are coming out of or going into the ground.

Superior dairy products can always be sold with a profit to the dairyman.

The profitable cow is the one that grows better by being used as a dairy animal.

The Science of Breeding.

[P. J. Shields in Live Stock and Dairy Journal.]

The so-called "Science of Breeding" is one of the first importance to agriculture and livestock husbandry; if we knew more of the laws governing reproduction and the limitations and influences of heredity, we could breed with much greater certainty; if we knew more, we might in breeding approach our ideals. But we are woefully ignorant on this subject; it has not become a science unless the one true and proven law that "like produces like, or the likeness of some ancestor" makes it so. And this law would make a sufficient foundation for a true "science of breeding," if the influences could be controlled for its general application. Within each of the breeds of animals are broadly divergent types; controlling them are breeders with widely different standards. The difficulty is therefore constant to procure the "like" which the breeder so much desires.

I have a mare with a trotting record of 2:10. I find a trotting stallion with a like record and mate my mare with him in the hope of obtaining a foal which will do as well. It may happen that the sire was one of those happy results occasionally obtained from breeding in a strong current of thoroughbred blood and that the mare is bred upon a foundation of excellent California mustang blood. The result of the mating may and probably will be a colt whose dominant characteristics are thoroughbred and mustang, with enough standard inheritances to constitute a nondescript mongrel. So it can easily be seen that breeding a 2:10 horse to a 2:10 mare is not always breeding like to like.

But it may be said that the trotting breed has not yet been completely made, is not yet absolutely pure, and that alien blood is still permitted in it. Admitting this to be true, I will take a breed which is admittedly pure and has been possibly for centuries, the Jersey, and the same thing is true. I have a medium sized, well finished Jersey cow which gives a good quantity of rich milk and is of the exact character which I would like to breed. I send to some prominent Eastern breeder and secure a high priced and handsome bull which I breed to her. Will her resulting calf be like and as good as herself? I find that my model cow was produced by breeding a large coarse St. Lambert cow, which gave a very large quantity of rather poor milk, but which because of its volume produced a large amount of butter, to a fine island type of bull from a family of small but exceedingly rich milkers. My cow was the rare product of the combined excellence of both parents without the faults of either. The bull I bred to her I find to have been bred by a man strongly inoculated with the color craze. He is a "light cream fawn" and was bred from such an ancestry without regard to their possession of the essentials of a dairy breed. And so the calf upon which I had set my heart, from such a scattered heredity picked up the thin milk of one ancestor, the small quantity of another and the absence of udder and teats of a third. And the solid cream fawn skin with which she was covered only made more conspicuous her utter worthlessness. And so breeding one Jersey to another is not always breeding like to like.

These illustrations could be carried through all the breeds. My purpose in calling attention to these divergent influences and types within the various breeds is to emphasize the necessity of a uniform harmony of breeding, of having a fixed standard, a single type and of so directing circumstances as to require and practically coerce all breeders into adopting and breeding towards it.

A man who calls himself a Hereford breeder or a Holstein breeder should not be recognized as such when he produces animals which have not bred type, and which do not conform to some well established standard for his particular breed.

Responsibility for the divergent types within the several breeds lies chiefly perhaps with the several associations controlling them, but the agricultural colleges cannot escape their share of responsibility for it. The college herds are mostly as various as the personality of their several staffs. One herd will be made up of large, rather coarse Holsteins and Jerseys, another with fine and neat animals of these breeds, while a third will choose fine of one and coarse of another, and of course the instruction in each college follows the forms of its cattle. The professors from these colleges act as judges at most of our livestock shows. At one, a leading professor with a national reputation, in judging a certain breed where all of its extremes are represented, awards the prizes in a certain order. The same cattle are shown the following week in a neighboring State where another famous instructor in animal industry officiates as judge, and he exactly reverses the previous awards. This is scandalous and serves not to enlighten breeders, but to confuse them. Fancy what mathematics would be if in one institution it was taught that two and two made four and in another that it made five! Would it be a science or a system? No nor is breeding as too frequently practiced, and as I am sorry to say too frequently taught.

There is often more difference between two types of animals within a given breed, both recognized as correct, than there is between average animals of different breeds. And the results following the mating of such types is as uncertain as from crossing the different breeds. Let our college professors unite upon one type for each of the breeds and educate the people to it. Let the live stock papers cooperate with them, and soon the so-called breeders of animals which do not conform to it will win no prizes at exhibitions, will not be recognized as breeders and will find no sale for their product. I am afraid that our agricultural professors lack courage. Can it be that they fear to offend powerful breeders or influential interests? They should listen to the splendid plea for truth and its pursuits without fear or without favor made by our distinguished President Wheeler in a recent address in Arizona. Our government gives liberal support to our experiment stations; our States generously endow our agricultural colleges. We look to them for truth, and truth is the same in every college herd and in every show ring, and if the standards set there are different they cannot both be true.

In other things too, we look to them for original research, for constant contributions to that enlarging knowledge which constitutes the new and true "science of agriculture." And I feel that they should have contributed more to our knowledge of heredity and the laws governing reproduction than they have. They have not done with animal life what Luther Burbank has done with vegetable. Their opportunity has been great as there are Experiment Stations in every state in the Union, where experiments could have been conducted by the scientific men in charge. These stations represent every variety of food, climate, location and physical environment. The whole system represents an ideal agency for research, and through it, much of the darkness and many of the doubts which now confront the breeder should have been dissolved. But we are still without knowledge as to the relative influence of the sire and the dam upon their offspring. We do not know of the effect produced upon the new life by an enfeebled or diseased condition of one or both of the parents, nor as to whether that effect would result from such condition before conception or afterwards. We are still in doubt with respect to that vast and important field of possible knowledge comprehended within the term "prenatal influences." Will a solid red Shorthorn cow bred from solid ancestry be inclined to produce a broken colored calf through association with Holstein cows during pregnancy? If such

association affects color will it not also modify form? Will the manner in which a prospective mother is treated, the food she eats, the purpose to which she is put, the work she is made to perform, influence the future form and function of her produce? And when the young thing is born can it be rescued from mediocrity or condemned to it, by the environment to which it is subjected? We have so much tradition and "fireside science" on these questions that we should like to have them given such settlement as the facilities of our experiment system permits of.

Another question about which knowledge should be possible, and about which the colleges are without any agreement, is, which of the various breeds are the better for the purposes for which they are bred? Which is the best breed of poultry for laying purposes; which breed of cattle produce meat most economically; which breed of swine does likewise? Which is the better breed of cattle for the production of butter, Guernseys, Jerseys or Holsteins? We have no harmony of answer to this question, and we believe that we should have. There cannot be two best breeds, and considering the difference in the various types, the sources from which they came, the peoples which made the breeds, and the environments which produced them, it seems most improbable that there should be two of exactly equal value for special dairy use. And we ask the colleges to tell us which is the best dairy breed, and why? And we expect an answer, and of course but one answer. When the answer comes it will affect property values, it will hurt patrons of the schools, as it will offend legislators upon which they are dependent for support. But science aims only at truth, and tells it fearlessly. It has unhappily been charged that privately endowed institutions have been influenced in their instruction by the interests of their patrons. Let it never be said of those publicly supported, that they were moved by any other consideration than those of truth and its fullest expression.

Sacramento, Cal.

The Question of Breeds.

[By W. Theo. Wittman.]

The question of what breed or variety is an ever live one, with those new to poultry lore.

I have the question put at me a score of ways by many individuals.

Hence I have pretty thoroughly canvassed this question and am now sticking to a stereotyped reply. "Breed the variety you like best."

There is profit and pleasure in every single one of the many varieties listed in the American Standard.

It is in the Cocks, in the Plymouth Rocks, in the Leghorns, in the Polish and right through the whole list.

People succeed best in an avocation in which they take genuine pleasure and interest and likewise they will succeed best with a variety of poultry they especially fancy.

On the other hand there are people who wish to engage in poultry keeping who have no especial fancy for any one variety or breed.

To these I would say, sensibly choose one of the half dozen most popular varieties.

Their popularity is built on genuine merit and stands for something.

On the other hand a novice had better let the newer varieties alone, no matter if they do happen to be the popular favorites of the hour.

Compromising indecision by putting off the day of starting with pure-bred or thoroughbred poultry and substituting dunghill or common barn yard stock is sheer folly.

If you cannot decide what variety of pure-bred poultry you like best, or that you cannot afford same, then rather than start with mongrels don't start at all.

There is no pleasure, no money, no satisfaction with scant stock otherwise mongrel poultry.

Just as strongly should the temptation to have two or three breeds or varieties be put aside.

This article has no room to go into details why mongrel poultry is undesirable poultry or why it is wisdom and common sense to breed only one variety at a time.

How to start, with eggs for hatching or with grown stock.

Perhaps your ability to raise chicks is an unknown quality.

Anyhow raising chicks is one of the more difficult things for the beginner or amateur.

This seems to be especially true of raising chicks when there are those of only one or two fine sittings of boughten eggs.

There then remains, the buying of stock. All things taken into consideration, buying breeding stock in the fall months, is the more satisfactory.

If your experience is limited or your purse contracted avoid the error made by nine-tenths of all beginners with fancy or thoroughbred poultry.

Buying too many birds or putting quantity ahead of quality.

Swine Breeding.

W. A. Vandiver gives the following account in the *Swine Breeders' Journal* of his experiment with the Yorkshire cross:

I have been crossing Poland-China sows with pure Large Yorkshire boars for four years, and I get more pigs and better ones than I ever got before. They are stronger and more thrifty growers and fatten on less food than any hog I ever saw. Now take the increased number and the saving in feed, and we have much larger profits from a given number of sows. This is not all. They are hardier and not so liable to disease as the native breeds. A few years ago I had seventy head of the native hogs and forty-six Yorkshire and Poland China crosses, and cholera set in among them, and I lost the entire herd of natives and only four of the cross breeds. I fed the forty-two crosses awhile and then sold them at 5 cents above the market. They brought \$460. If the other seventy had been crosses and I had saved the same per cent I would have had \$704 more. Now, these are facts, and I have good reason to like and recommend the Large Yorkshire to my neighbors. I had twenty-six crosses that averaged 175 pounds at a little less than five months old. Last spring twelve sows had 100 pigs and saved ninety of them, and they were the thriftiest lot I ever saw.

Don't Overfeed Brood Sows.

The brood sow is grown to raise her kind in future years and not to compete with other hogs at a fat stock show, says *Stockman and Farmer*. The two kinds of hogs are grown for different ends and are treated differently, and, whatever may happen the latter in its unnatural existence, the breeder of the brood sow should have care that his sows are neither forced into living lard barrels nor a mushroom-like development of bone and muscle. The laboratory inside the sow must do duty for years, and it is of the greatest importance that it be not crippled for usefulness in early life.

Although corn is a practically universal crop, it is maintained that the yield can be materially increased through improvement of varieties and practically in determining the kind best adapted to each section. The Department of Agriculture is studying the development and acclimatization of at least one superior strain of corn for each of the various geographical sections of the United States. It is stated that in several sections where this work has been in progress two or more years, growers have before them an object lesson proving that well bred and selected seed will produce as much as sixteen bushels per acre more than the seed usually planted.

Sober up on Jackson's Napa Soda.

Sheep Notes.

The flesh carrying power of the modern Merino is amply demonstrated in the show ring these days. It takes a fat sheep, a finished one, to get the ribbons.

Some of the sheep breeders are disappointed at the world's fair preliminary prize list. It makes small appropriations to Dorsets, Lincolns, Suffolks and Tunis breeds.

Keeping a ewe a year for her wool and her lamb is a profitable business now, when both of her products are a fair price, but loss of the lamb often knocks out all the profit.

Sheep men generally have a good word for rape and alfalfa. Some losses, however, are reported from pasturing them. They should be used carefully, never turning on when wet or when the sheep are empty.

Spots on Chester White Pigs.

Pedigreed Chester Whites when bred together always produce pigs without black spots, says W. P. Naudain in *Breeders Gazette*. He speaks of the original Chester Whites as bred in southern Pennsylvania and northern Delaware, where the breed originated. These pigs have been bred without foreign blood for the past eighty years. They have taken such a hold on the people in that section that at the least one-half of the pigs are Chester Whites. At a small county fair held in northern Delaware the pens were filled entirely with Chester Whites, not another breed being represented.

Fast Pacer For Sale.

THE PACING GELDING, AL SANDY 2:19 1/4 by Wayland W., dam Rapid Ann by Overland. Can pace three heats better than 2:17. Can brush very fast on the road. Excellent prospect to race. He is one of the best road horses in the city. Gentle and intelligent. Safe for lady to drive. For price and further particulars address S. WATSON, 235 Douglas street, San Francisco.

KICKING,

Balking, Shying or any kind of a habit cured in a few hours by my system. Particulars free.

PROF. J. A. BEERY, Pleasant Hill, Ohio.

FOR SALE.

Three Standard-Bred Trotting Stallions

WILKES STOCK.

One Seal Brown, 16 hands, foaled May 2, 1895; first dam Fearless by Fallis 3:51 (record 2:23); second dam Jean Perant by Signal 3:27.

One Golden Bay, 16 1/2 hands, foaled March 5, 1898; first dam Signal by Dal Sur 1:58 (record 2:24); dam of Gay Line 2:23 1/4; second dam Lady Signal by Signal 3:27.

One Brown, white points, 16 1/2 hands, foaled April, 1899; full brother to the bay.

These colts are all sired by Prince Airlee 2:04 1/2, son of Gay Wilkes 2:07 (record 2:15 1/4), and bred by Wm. Corbitt, San Mateo, Cal. They are pure gaited and show wonderful speed for the little work they have done.

For further particulars apply to

THE \$60,000

DAN PATCH 1:56 1/4

CHAMPION PACING HORSE of the WORLD

[Without Hopples, Wind-Breaks, Etc., Etc.]

EATS

3 FEEDS FOR ONE CENT

EVERY DAY.

"International Stock Food" greatly aids Digestion and Assimilation so that More Nutrition is obtained from all grain eaten. It "tones up" and Permanently Strengthens the entire system and Purifies the Blood so that disease is prevented. Every \$3.50 pail of "International Stock Food" is positively guaranteed to save \$7.00 worth of grain. It will cause your Race Horse to have more speed and endurance. It will make your Carriage Horses healthy, fat and beautiful. It will give your Show Horses more life and action and make them glossy. It will make your Work Horses strong, healthy and of great endurance. It will make your Stallions and Brood Mares surer, and your colts will be better and grow and develop more rapidly. "International Stock Food" is absolutely harmless even if taken into the human system. It is prepared from Roots, Herbs, Seeds and Barks and is fed in small amounts as an addition to the regular grain allowance. It is equally profitable when fed to Horses, Cattle, Sheep, Hogs, Colts, Calves, Lambs or Pigs. It will make you a large extra profit when fed to your stock for Growing, Fattening or Working. It will increase milk 15 to 25 per cent. in Cows, Mares, Sows or Ewes, and only costs 3 FEEDS FOR ONE CENT. A Dan Patch colt commanded \$5,000 at eight months of age. He looked like a yearling and was beautiful, strong and vigorous. The dam was fed "International Stock Food" before and after foaling, and the colt as soon as it would eat. Dan Patch became the World's Champion Harness Horse nine months after commencing to eat "International Stock Food" every day. If it is good for such horses don't you think it would pay you to test it on yours? Our "International Stock Food Farm" contains 650 acres, 12 miles from Minneapolis, and on it we own Dan Patch 1:56 1/4. Directum 2:05 1/4, Roy Wilkes 2:06 1/4, and a band of brood mares. They all eat "International Stock Food" every day. BEWARE OF IMITATIONS and SUBSTITUTES. There are many worthless imitations on the market, put out by people who seem to think that the way to start a business is to steal as much as they can from some prominent firm. No chemist can separate and name all of the ingredients used in "International Stock Food," etc., and any chemist or manufacturer claiming to do so must be an Ignoramus or a Falsifier.

A BEAUTIFUL DAN PATCH PICTURE FREE

We have a very fine, large lithograph of Dan Patch with the great driver, M. E. McHenry, in sulky. This Lithograph, Printed in Six Brilliant Colors, is one of the finest and most attractive horse pictures ever published. It is 21x28 and printed on heavy paper suitable for framing. We Will Mail You One Copy Free, postage prepaid, if You will Answer Two Questions.

1st.—Name This Paper. 2d.—State How Much Stock You Own.

Answer these questions in a letter or on a postal card and we will mail at once. Write at once before the offer is withdrawn.

Dictatus Medium 32499

Will make the coming season at

Race Track, Hollister, Cal.

Jos Sanchez in charge

\$40 FOR THE SEASON.

Payable at time of service, with usual return privilege. Every care taken to prevent accidents, but no responsibility should any occur. Prompt and careful attention in all cases. Pasture furnished to mares sent from a distance at \$2.50 a month.

A DICTATUS MEDIUM PURSE OF \$100.

I will give a purse of \$100, with entrance money added for a race, best two in three, open to any and all colts from the breeding season of 1904, either pacers or trotters. Must be three to start and race to come off on Hollister track, Fair week, 1907 (Exact date to be hereafter announced.) \$5 entrance money, payable June 1, 1905. \$5 thirty days before the race. Three moneys: 60 per cent to first horse; 30 per cent to second and 10 per cent to third. For further particulars, address

R. P. LATHROP, Hollister.

DESCRIPTION.

DICTATUS MEDIUM is 6 years old, weighs 1220 pounds. A beautiful turned bay horse with heavy mane and tail, kind and gentle, with a perfect disposition. Good flat heavy bone. He has great power and speed. Has a record of 2:24, but has worked out in 2:12. He is a horse that will go out any day and do his best. His colts are models of grace and beauty. Only one so far has been worked. This one, Al Wilson's yearling LITTLE MEDIUM, paced an exhibition 1/4 mile on the Hollister Race Track in 32 3/4 seconds, a 2:33 pace. This colt has great promise.

DICTATUS MEDIUM is by Dictatus 217, one of the best bred and fastest horses ever brought to California. The dam of Dictatus Medium is Belle Medium (dam of Stam B. 2:11 1/4), by Happy Medium, grandsire of the dam of Lou Dillon 1:58 1/4. His second dam is Argenta by Almont Lightning, sire of the dam of Zombro 2:11. There is no doubt but Dictatus Medium will prove to be a sire of speed as well as good size, style and disposition.

BAYSWATER WILKES 2:25 1/4

Sire of KELLY BRIGGS 2:10 1/4

WILL MAKE THE SEASON OF 1904 AT

WOODLAND, CAL.

Fee \$40.

BAYSWATER WILKES is a sire of speed, size, good looks, soundness and gameness. Every one of his produce that has been trained can show standard speed. His sire, Sable Wilkes, also sired Nushagak, sire of Aristo, winner of the Occident and Stanford stakes. His dam, Fanny Bayswater, is the dam of Senator L., holder of the champion four-mile trotting record of 10:12. Breed to BAYSWATER WILKES and you will get colts that will sell at good prices. For cards containing full pedigree and all particulars address

S. H. HOY, Winters, Cal.

"SAVE-THE-HORSE" SPAVIN CURE.

\$5.00 WITH WRITTEN GUARANTEE.

On Broken Down, Weak, Sprained and Ruptured Ligaments and Tendons Its Power is Unfailing.

No Man need see his Horse suffer and become incapacitated.

"SAVE-THE-HORSE" POSITIVELY AND PERMANENTLY CURES BONE AND BOG SPAVIN, THOROUGHPIN, RINGBONE (except low ringbone), CURB, SPLINT, CAPPED HOCK, WINDPUFF, SHOE BOIL, WEAK AND SPRAINED TENDONS, AND ALL LAMENESS.

"SAVE-THE-HORSE" cures without scar, blemish or loss of hair; can be applied anywhere and in all conditions and extremes of weather. Horses may be worked as usual with shin or ankle boots, as no harm can result from destruction of hair or scaling of limb.

Cured horses are absolute certainties as to the possibility of the remedy for your own case. Such results, as shown in our booklet, by business men whose reliability can be readily ascertained, have carried "SAVE-THE-HORSE" over skepticism, prejudice and uncertainty. Send for the booklet and copy of written guarantee, which is as binding to protect you as the best legal talent could make it.

\$5.00 PER BOTTLE.

Written guarantee with every bottle. Need of second bottle improbable, except in rarest cases. If your case is different we advise frankly as to possibility of the remedy effecting a cure. Give veterinarian's diagnosis, if he is competent. Describe age, development, location of swellings, lameness, and way horse carries and holds leg. \$5.00 a bottle at all druggists and dealers, or sent express prepaid.

TROY CHEMICAL CO., Manufacturers, TROY, N. Y.

D. E. NEWELL, 519 Mission St., San Francisco, Cal., Pacific Coast Agent

QUINN'S OINTMENT FOR HORSES

stands at the head of all veterinary remedies. Such troubles as Spavins, Curbs, Windpuffs, Splints, Bunches have no well known horsemen speak of it in the highest terms:

Miller & Sibley of Franklin, Pa., owners of St. Bel, brother of late Boj Boy, write, "We have used Quinn's Ointment with great success and believe it is all claimed for it. We cheerfully recommend it to our friends." For Curbs, Splints, Spavins or Bunches it has no equal.

Price \$1.00 per package. Sold by all druggists, or sent by mail.

W. B. EDDY & CO., WHITEHALL, N. Y.

CAMPBELL'S EMOLLIO IODOFORM GALL CURE

For GALL BACKS and SHOULDERS, CRUPPER
SORES and SADDLE GALLS there is none
superior.

The horse CAN BE WORKED AS USUAL.
For BARBED WIRE CUTS, CALKS, SCRATCHES,
BLOOD POISONED SORES and ABRASIONS
OF THE SKIN it has no equal.

It is very adhesive and easily applied to a watery
as well as a dry sore.

Its use will absolutely prevent BLOOD POISONING.
In this respect there is no Gall Cure offered
which can justly even claim to be a competitor.
We placed it on the market relying wholly on its
merit for success, and notwithstanding the fact that
comparatively little has been done in the way of
advertising the sales of 1903 were 100 per cent greater
than the aggregate sales of Gall Cure preceding
that year. This increase was entirely due to its
MERITS, and from it we feel justified in saying that
it is THE GALL CURE OF THE 20TH CENTURY.

It is a quick and sure cure for those troublesome
skin cracks under the feet which injure and often
lay up race horses.

All Trainers Should Have It in Their Stables

PRICE:—3 OZ. BOX, 25c.; 1 LB. BOX, \$1.00.

WINCHESTER

REPEATING SHOT GUNS

A CHANCE FOR A DOUBLE

A QUESTION often asked about Repeating Shotguns is, "How quick can a second shot be fired with them?" Shooters that have used Repeaters answer with one accord: "Doubles" are just as easy to make with a WINCHESTER REPEATING SHOTGUN as they are with a double barreled gun. The third shot that a Winchester Repeater gives often bags a badly crippled bird which otherwise would get away. Winchester Repeating Shotguns are made in "Take Down" styles in 12 and 16 gauge.

RITA H. 2:11 1-4

Pacing Mare by McKinney 2:11 1-4

ELECTRO MCKINNEY

Brown Colt, Four-Year-Old Trotter by McKinney 2:11 1-4

RITA H. is a dark brown mare who stands nearly 16 hands high, and will weigh in racing trim about 1050 lbs. This mare has had this year a very remarkable record. She started in the Northwestern Circuit in the States of Oregon and Washington, and out of eight starts won her first seven races and only lost four heats during the entire circuit, and has a pacing record of 2:11 1/4. The mare is five years old and is excellent on the road. She does not pull or lug, and a lady can drive her anywhere. Last spring she trotted a workout mile in 2:15 1/4 and repeated in 2:16 1/4, after only seven weeks' work. Her owner has driven her in 2:12 1/4 in the Los Angeles Driving Club races, she having won all of them in which she started. This mare can step two heats below 2:10.

ELECTRO MCKINNEY is a brown stallion foaled in 1900, and stands 15 hands 1 inch in height. He trotted a full mile as a two-year-old in 2:31 1/4, last quarter in 35 seconds, and when a three-year-old a full mile in 2:21 1/4, last quarter in 33 seconds. He is perfectly gaited and a grand individual in every respect. Weighs about 950 lbs. ELECTRO MCKINNEY is bred in the purple, and is one of the best sons of McKinney alive to day. McKinney is undoubtedly the greatest sire for his age, living or dead. ELECTRO MCKINNEY was not raced last year, being only a three-year-old and not entered in any stakes it was decided to hold him over.

These horses are all right and there is not a thing the matter with them, but my business demands are such that I cannot afford to devote any time to racing them. For prices and further particulars address

BYRON ERKENBRECHER,

301 CURRIER BUILDING, LOS ANGELES, CAL.

Or inquire at Office of BREEDER AND SPORTSMAN.

A Sidney Stallion With Earning Capacity

FOR SALE.

In pursuance of my intention to retire from the business of breeding horses, and having disposed of all my broodmares at auction, I now offer at private sale the stallion

WILLIAM HAROLD 2:13 1-4.

His sire is the great Sidney 2:19 1/4, grandsire of the champion trotter of the world, Lou Dillon 1:58 1/4, and his dam the great race and broodmare Cricket 2:10 (dam of four in the list) by Steinway, the greatest son of Strathmore.

WILLIAM HAROLD is a producer. The only two of his get to start are that wonderfully fast trotter Janice 2:08 1/4 and the pacer Dan Burns 2:15. WILLIAM HAROLD'S services in the stud were very limited up to three years ago, as he was raced. His weanlings, yearlings and two-year-olds are very promising and have size, good looks and great natural speed, besides being uniform in color, nearly all bays. He is a sure foal getter, is in the very best condition, sound and healthy, and with ordinary good business management can earn in the stud in 1904 the price asked for him.

For tabulated pedigree and full particulars, address

H. W. MEEK, San Lorenzo, Cal.

PALACE HOTEL, SAN FRANCISCO, CALIFORNIA.

TOURISTS and TRAVELERS will, now, with difficulty recognize the famous COURT into which for twenty-five years carriages have driven. This space of over a quarter of an acre has recently, by the addition of very handsome furniture, rugs, chandeliers and tropical plants, been converted into a lounging room—the FINEST IN THE WORLD.

The EMPIRE PARLOR—the PALM ROOM, furnished in Cerise, with Billiard and Pool tables for the ladies—the LOUIS XV PARLOR the LADIES WRITING ROOM and numerous other modern improvements, together with the unexcelled Cuisine and the Most Convenient Location in the City—all add much to the ever increasing popularity of this most famous HOTEL.

Percheron and Belgian Stallions.

Three importations this season of prize-winning Percherons, Belgians and German Coaches and Catalan Spanish and Majorca Jacks. I have the largest Draft and Coach Horses in America, and will sell more quality for the money than you can find anywhere. Come and see for yourself.

"SAVE THE HORSE" SPAVIN CURE.

REG. TRADE MARK

\$5.00 WITH WRITTEN GUARANTEE.

On Broken Down, Weak, Sprained and Ruptured Ligaments and Tendons Its Power is Unfailing.

No Man need see his Horse suffer and become incapacitated.

"SAVE-THE-HORSE" POSITIVELY AND PERMANENTLY CURES BONE AND BOG SPAVIN, THOROUGHPIN, RINGBONE (except low ringbone), CURB, SPLINT, CAPPED HOCK, WINDPUFF, SHOE BOIL, WEAK AND SPRAINED TENDONS, AND ALL LAMENESS.

"SAVE-THE-HORSE" cures without scar, blemish or loss of hair; can be applied anywhere and in all conditions and extremes of weather. Horses may be worked as usual with shin or ankle boots, as no harm can result from destruction of hair or scalding of limb.

Cured horses are absolute certainties as to the possibility of the remedy for your own case. Such results, as shown in our booklet, by business men whose reliability can be readily ascertained, have carried "SAVE-THE-HORSE" over skepticism, prejudice and uncertainty. Send for the booklet and copy of written guarantee, which is as binding to protect you as the best legal talent could make it.

\$5.00 PER BOTTLE.

Written guarantee with every bottle. Need of second bottle improbable, except in rarest cases. If your case is different, be advised frankly as to possibility of the remedy effecting a cure. Give veterinarian's diagnosis, if he is competent. Describe age, development, location of swellings, lameness, and way horse carries and holds leg.

\$5.00 a bottle at all druggists and dealers, or sent express prepaid.

San Francisco, Saturday, January 16, 1904.

THE HOLIDAY EDITIONS of the horse papers devoted to the harness horse were most excellent this year. *The Horse Review*, *The Horseman*, *The Horse World*, *The Trotter and Pacer* and *The American Horse Breeder* all published beautifully illustrated and most interesting numbers. The wealth of advertising matter displayed by each and every one is evidence that the harness horse business is in a thrifty condition.

THE MANY FLATTERING NOTICES of the Christmas edition of the BREEDER AND SPORTSMAN contained in our exchanges and the numerous complimentary letters received from our subscribers in regard to the same have been gratefully received and read. We forego the pleasure of printing them as they would fill several pages, but we appreciate them just the same and are glad that the edition was so well received. We return thanks to each and every one, editor and subscriber, who has paid us this compliment, and hope the new year will be most pleasant and prosperous to all.

THE OUTLOOK for harness racing in California this year is good. Pleasanton will open the circuit with a good program of twelve races which will be printed in the BREEDER AND SPORTSMAN next week. The Breeders Association prints its program this week and hangs up \$13,700 for a four days' meeting. Vallejo and Napa can both be depended upon to give good meetings and Petaluma will doubtless be in line. It is reported that Woodland will give one of its usual good meetings but if the directors of the association there do not see their way clear to giving a meeting the Breeders Association can very easily be induced to give a meeting there and make the circuit complete. A member of the Speed Committee of the State Agricultural Society is authority for the statement that the society will offer \$2000 for a slow class trot and \$1500 for a slow class pace at the State Fair this year, and that the balance of the harness program will consist of good purses. Salinas and Hollister will both give good meetings and San Jose may be in line. The outlook for harness racing in California in 1904 is excellent.

Answers to Correspondents.

HARVEY BOONE, Bodie, Cal.—The stallion Declaration 2128 was sired by Young Jim 2129, he by George Wilkes. The dam of Declaration is Lady Bunker by Mambrino Patchen 58. She is the dam of Guy Wilkes 2:15½, El Mahdi 2:25½ and the producing sire William L., sire of Axtell 2:12. Lady Bunker's dam was Lady Dunn (dam of Joe Bunker 2:19½) by American Star 14, next dam the Capt. Roberts mare, called an inbred Messenger.

T. H. L., San Jose.—Molly Drew is standard and registered. Her record is 2:27 in the sixth heat of a race. She had a trial of 2:23. She was sired by Winthrop 505, son of the Drew Horse 114, and her dam was Fanny Fern (the dam of Balkan 2:15 and Fred Arnold 2:33) by Jack Hawkins, son of Boston. Molly Drew was a chestnut mare, 16 hands high, with a strip in her face and off hind ankle and near hind pastern white.

A. Ottinger, the well known ticket broker of this city, purchased the Diablo stallion Daedalion 2:11 at the Chase sale Thursday evening, his bid being \$700. He has turned Daedalion over to Ed Lafferty, who will take him to Pleasanton next week, and prepare him for racing on the California Circuit. Daedalion was bred by Geo. H. Fox, of Clements, Cal., who consigned him to the sale. He is a magnificent individual and has proved himself a game race horse. It is believed he can beat his record this year, and certainly Mr. Ottinger secured him at a bargain.

PALO ALTO'S FINAL SALE.

Yearlings Are Successfully Sold and Bring
Excellent Prices.

Does it pay to raise trotting colts and sell at auction when a farm has established the reputation of producing the goods? The sale of the Palo Alto foals of 1903, a bunch of seventeen colts and fillies less than a year old, held by Fred H. Chase & Co., live stock auctioneers of this city, Thursday night, proves that it does. The seventeen head averaged \$314 each, the highest priced one being a black colt by McKinney out of Sweet Rose by Electioneer and he brought \$700. Mr. John A. Cole of San Bernardino was the purchaser.

Never has there been a larger crowd of more representative breeders gathered in San Francisco than attended this sale, and there were buyers in the crowd from Washington, Oregon and the far south. The bidding was lively and the final sale a complete success. Superintendent Frank W. Covey announced the breeding of each foal as it was led into the ring, and bids would come before he could complete the remarks, so eager were the buyers. There were at least fifty persons who came prepared to pay from \$150 to \$200 for a colt or filly that had to go away disappointed.

After the Palo Alto horses were sold a number of colts, fillies and aged horses consigned by different individuals were disposed of at fair prices. C. A. Durfee, who with a friend owned four McKinneys in partnership consigned them to this sale, but they went for very low figures. Strange as it may seem the two mares by McKinney, out of the great broodmare Stemwinder, dam of Directum 2:05½, were about the least attractive of the get of McKinney that were ever led into a salesring. They were small, and their individuality not such as would attract breeders. As far as looks were concerned, they showed that the "nick" had not been a successful one. It is more than probable, however, that when bred to good stallions they will both produce speed of a high order. The full list of the horses sold is given below:

YEARLINGS—FOALS OF 1903.

Bay filly by Nutwood Wilkes, dam Cressida 2:18½ by Palo Alto, to Jasper Paulsen for \$130.
Black colt by McKinney, dam Avena 2:19½ by Palo Alto, to Geo. L. Warlow for \$310.
Bay colt by Monbells, dam Maiden 2:23 by Electioneer, to Robert Christy for \$185.
Black filly by McKinney, dam Elden 2:19½ by Nehew, to James Thompson for \$200.
Chestnut colt by Nutwood Wilkes, dam Palita 2:16 by Palo Alto, to E. D. Dudley for \$325.
Bay filly by Nutwood Wilkes, dam Novelist 2:27 by Norval, to Richard Smith for \$155.

That splendid broodmare Belle Medium, dam of Stam B 2:11½ and owned by Tuttle Bros. of Rocklin, was found dead in her box stall one morning this week. She was bred by the late W. T. Withers at Fairlawn Stock Farm in Kentucky and was foaled in 1883, being twenty-one years old at the time of her death. Last year she was not in good condition and lost her foal by Nutwood Wilkes. She was then bred to Mendocino and would have foaled next month. Her death is not only a great loss to Tuttle Bros., but to the breeding interests of the State. She was by Happy Medium, dam Argenta by Almont Lightning, granddam Mary Adams by Mambrino Patchen.

Sam Gamble is out again after a severe illness, and attended the sale of Palo Alto and other horses at Fred H. Chase & Co.'s salesyard Thursday night, where he materially assisted in making the sale a success.

Henry Helman came down to the Palo Alto sale and will visit Pleasanton, San Jose and other points before returning to Portland. He expects to bring his horses to Pleasanton about March 1st.

Sam Hoy has the five year old stallion Jules Verne at Winters and will breed him to a few mares before getting him ready for the races. Jules Verne is by Demonio 2:11½ and is a promising trotter.

Payments were made January 2d on 28 three-year-olds entered in the Occident Stake of this year. It should be a great race. The list appears in another column.

JOTTINGS.

THE CLAIM has been often made by observing horsemen in California that while the get of Diablo 2:09½ are generally fast two and three year olds they will be better race horses if they are waited on until they have matured. It is argued that their natural speed is so great in colthood that the majority of trainers will speed them too much and as a consequence put them on the shelf before they have reached maturity. There have been many instances during the past few years to support this idea, and the fact that numerous green aged horses by Diablo are just now being developed in California and showing wonderful speed is further evidence of its correctness. One of the best I have seen for a long time is a bay gelding six years old by Diablo that is owned by Walter Trefry and is being worked by him at Pleasanton. This gelding was a trotter up to five or six years ago, but never showed speed enough to hurt him. Walter came to the conclusion that pacing is his natural gait and put the hobbles on him. After four weeks, during which he was worked very moderately the gelding stepped a mile in 2:14½ last Saturday, and did it so handily that only those holding watches suspected he was going that fast. I saw the horse flash past the wire and heard one of the numerous "rail riders" remark as he snapped his watch back that the mile was in 2:14½, and went down to the stall to see how the gelding stood it. He did not look as if he had been a mile better than three minutes and the breath from his nostrils would as the saying is "hardly blow out a candle." A better looking horse is not to be seen at the Pleasanton track. He has a very neat hony head, nicely turned body, and smooth round hips. His feet and legs are just about perfection. He is a bright bay, stands, I should judge, about 15.2 and will weigh, probably, a thousand pounds. He looks to me like a 2:05 pacer and one that will go without the straps when he is ready to race. He is bred all right on his dam's side as she is the Palo Alto bred mare May by thoroughbred Wildidle, second dam the famous mare Mayflower 2:30½ by St. Clair. May is the dam of Wildmay 2:30, that produced L. 96 2:16½.

Barney Simpson, who is training quite a string of horses at Pleasanton, headed by the very fast and promising green pacer Arner, own brother to Diablo 2:09½, called my attention to the fact, which I had overlooked, that old Bertha has a new one in the list this year, her three-year-old Owyho by Owyhee 2:11 having taken a three-year-old pacing record of 2:22½ in the East this year. Owyho is the handsome chestnut colt that Ed Mills and Henry Sanders bought at the Oakwood Park Farm last spring and consigned to the Blue Ribbon sale at Cleveland, where he was purchased by William McFarland of Pennsylvania for \$1010. Owyho is the first performer for Owyhee, who was sold to Australian parties two years ago, and is the sixth standard performer for Bertha. The daughter of Alcantara is now the dam of six with records of 2:22½ or better, as follows: Diablo 2:09½, Elf 2:12½, Ed Lafferty 2:16½, Demonio 2:11½, Don Derby 2:04½ and Owyho 2:22½. She has also produced Jar Eff Bee that took a yearling record of 2:26½. Arner, her foal of 1898, will be raced this year and will go into the 2:15 list without much trouble. Bertha has established a wonderful family of pacers, and there now seems to be great prospects of her son Diablo adding to his reputation by siring some very fast trotters, there being several green ones by him now in training in California that are showing 2:10 speed at the diagonal gait.

Mention has been made in this department heretofore of a six-year-old gelding by Diablo that John Gordon owns and has in training at the San Jose track. He is a very promising trotter and looks like a 2:10 prospect according to those who have seen him, and he was never even broke until he was five years old. Henry Sanders has in his string at the present time a four-year-old mare by Diablo, owned by Mr. R. P. M. Greeley of Oakland, that has two minute speed at the trot. She was worked some as a three-year-old and showed remarkably well, but has that highly nervous temperament that keeps many a youngster from doing his best. If nothing happens this mare it

would not surprise me if she trotted in 2:05 when she has more age. She is the sort that has so much speed she hardly knows what to do with it, and a year or two of quiet road work would doubtless calm her down so that she would be reliable. It is said that she is a well behaved roadster now, but she seems very excitable on the track. Henry Sanders is improving her very much, however, and may make a race mare out of her this year. If she gets to going steadily in company she will be a hard one for the free for all horses to beat as she is game as a pebble.

When the late Dr. Hicks came to California from Iowa he brought with him a mare called Flash by Egmont and out of Lightfoot by Flaxtail. In 1892 Flash went to Oakwood Park Stock Farm and became a member of the broodmare ranks there. She was bred to Creole and produced the fast mare Javelin 2:08½. She was then mated with Charles Derby every year and gave to the turf Flare Up 2:14 and Sallie Derby 2:19½. While she was owned by Dr. Hicks she had produced Walker 2:23½, so she has four in the list. A few months ago Ben Chaboya sold to Mr. J. D. Springer of Pleasanton a big pacer by Charles Derby out of this mare Flash, and one day this week Mr. Springer worked him a half in 1:00½. This gelding is a large horse six years old and is a great prospect for the slow classes this year, as he is eligible to all races, having no record.

Over at Corte Madera in Marin county, a few miles across the bay from San Francisco, the little chestnut gelding Little Albert 2:10, now twenty years old, is taking his ease in a pasture and enjoying the declining years of a good old age. He is still owned by Mr. W. B. Bradbury, the capitalist of this city, who says that the son of Albert W., having been good to him, will never want for anything during the rest of his days. It was in the year 1891, when Little Albert was seven years old, that he made his memorable campaign on the Grand Circuit and won something over twenty thousand dollars for Mr. Bradbury. He started nine times that year, winning six races and being second in the other three. One of the races in which he got second money was the \$10,000 stake for the 2:20 class, in which nine heats were trotted and was finally won by Mambrino King's daughter Nightingale. Little Albert won the fifth and the seventh heats and made a dead heat with the mare in the fourth. He closed the year with a mark of 2:17½. The following year he won four races in the free for all class on the Grand Circuit and reduced his record to 2:10½. In 1893, he was campaigned again in the big ring and took his record at Cleveland where he won the free for all purse of \$2000 and defeated Nightingale, Walter E., Lord Clinton, Ryland T. and others in a hard fought

OWYHO (3) 2:22 1-4

race of five heats. He started in the memorable Columbian free for all at Chicago that year but was not in the money at the end of the race which continued for three days. After his racing days were over, Mr. Bradbury used him as a road horse, and up to the time he quit driving him, a year ago, few horses could outbrush the little fellow on the road. It is a pleasure to know that he is now living a life of ease and luxury in his old days and that his owner fully appreciates the fact that the little horse is entitled to all the good things he gets.

James Thompson turned a trick on the wise ones at the Pleasanton track last week. He attended a sale in San Francisco a few weeks ago and bought the mare Monica 2:15 by McKinney. When he reached Pleasanton with her the boys all gave him the laugh, telling him that Monica was a has been and would never be able to pace a mile much better than 2:30,

at the same time advising that he sell her to the first sucker he could find. Now Jeems is a pretty good off hand speaker whenever he wants to let loose his supply of oratory, but he took all the chaffing and kept silent. Last week, on Wednesday, he took Monica out while the rail was occupied with all the "clockers" and drove her a mile in 2:20½ very easily. Some of the onlookers remarked that she would probably never be seen on the track again after that, and just to show them that the old mare is in good condition, James was out with her again by the time the regulation 20 minutes was up and drove her a repeat mile in 2:19. Monica acted as though she liked the game, and Thompson is pretty sure he will beat her record with her by the first of March.

Will Again Stand at Pleasanton.

Stam B. 2:11½, that was one of the greatest colt trotters ever seen on the Pacific Coast, taking a trotting record of 2:15½ as a three-year-old and reducing it the next year in his four-year-old form to 2:11½, will again make a season at Pleasanton under the management of Samuel Gamble. No stallion in California has been more talked about during the past few months than this son of Stamboul 2:07½, and the fact every foal he has sired that has been trained has shown race horse speed has caused breeders to conclude that Sam Gamble was not far wrong when he took the horse two years ago and predicted that he would be a great sire.

On a recent trip through the country Mr. Gamble made investigation to ascertain how many foals Stam B. has that are older than yearlings, and after energetic research he could find but twenty-eight all told, barring the foals of 1903. The Tuttle Brothers of Rocklin, owners of Stam B., have five, M. C. Delano one, Mr. Whitney of Rocklin one, Mr. Ryder of Loomis three, Dr. Whitter of Walnut Grove one, Mr. Sharon of Galt one, Mr. Hodges of Los Angeles one, Geo. T. Beckers two, Mr. Orr of Galt one, Mr. Springer of Pleasanton one, E. A. Gammon one, J. H. Dresser of Isleton one, Mr. Matthews one, Judge P. J. Shields one, J. M. Madison one, parties in Rocklin, San Francisco and Stockton one each, Mrs. Callendine of Sacramento one. The following of his get have started: Swift B., three-year-old record 2:16½, winner of three races and second money in both the Occident and Stanford Stakes of 1903; The Jester, winner of third money in Occident Stake of 1903; Rosalind, that started in three races at Sacramento as a three-year-old in 1902 and won two second and one third money, finishing close up to the winner of a heat in 2:18. These are all the foals by Stam B. that Mr. Gamble has been able to account for after an extended search. The reason for the limited number of his foals is that Stam B. was in training up to 1900, made but very short seasons in the stud and was not largely patronized.

Stam B. is still a young horse, having been foaled in 1892. He was bred to about fifty choice mares last season, a few more than he served the year before. All horsemen who saw him when the late Thos. Keating had him know that Stam B. possessed 2:05 speed. As a race horse his reputation is national. His ancestors have proven to be successful progenitors of world's champions both on the tracks and in the show rings.

Stam B.'s blood lines are so well known that it is only necessary to say that he is by the great Stamboul out of Belle Medium 2:20 by Happy Medium, grandsire of the dam of Lou Dillon 1:58½, second dam by Almost Lightning, sire of the dam of Zombro 2:11, etc.

Stam B. will make the season of 1904 at Pleasanton at the low fee of \$40. On June 1st he will leave there for Salem, Oregon, at the request of a number of owners of high class mares who reside in that vicinity. Those who send their mares to Stam B. this season will be wise. He is one of the coming great sires.

Grand Circuit Dates.

The Board of Stewards of the Grand Circuit will meet at Cleveland, Ohio, January 20th, to arrange dates for the various tracks of that compact for next year. Grosse Pointe will open the circuit as usual, starting on the third Monday in July. Just how the other tracks will follow is a matter that can not be told until the meeting. Last season there was some dissatisfaction with the dates awarded, and some shifts were made in the order of the meetings. To avoid this occurring again great care will be taken in arranging the dates so as to accommodate all the tracks as well as possible. It is rumored that Secretary J. B. Pettit of the Board of Stewards will resign. Mr. Pettit is also secretary of the Detroit Driving Club.

On a hot day drink Jackson's Napa Soda lemonade and be refreshed.

HORSES AT PLEASANTON.

List of Trainers and the Horses Now Being Trained There.

The following list of horses in training at the Pleasanton track was compiled during the last week in December, and was complete up to that time. Since then several trainers have reached the famous track with their horses, so that more than two hundred head of trotters and pacers are now stabled there. Among the late arrivals are twelve head from Walnut Grove Stock Farm, headed by Aristo 2:17½, winner of the Occident and Stanford stakes of 1902. They are in charge of Charles Spencer. We will give the names and breeding of this string in a future issue. The names of the trainers and the horses in their charge are as follows:

MONROE SALISBURY.

TRAINERS, CHAS. DE RYDER AND CHAS. EDWARDS.

Two-Year-Olds—Duke Direct by Direct, dam by Anteeo; Baroness Direct by Direct, dam by Baron Wilkes.

Three-Year-Olds—Bay filly, pacer, by Directum Kelly, dam by Nelson; Dick Walsh, pacer, by Direct, dam by William L.; East View Lass, trotter, by Directum Kelly, dam by Alcantara; East View Queen by Directum Kelly, dam by Baron Wilkes; Miss Betterment by Directum Kelly, dam by Betterton; Princess Atbel by Directum Kelly, dam by Walkill Prince; Sobia Direct by Direct, dam by Robert McGregor; California Cresceus, trotter, by Mendocino, dam by Boodle.

Four-Year-Olds—Cythera Direct by Jersey Wilkes; East View Maiden by Directum Kelly; Lagatia by Direct, dam by Ansel; black gelding by Directum Kelley, dam by Atlantic; East View Belle by Directum Kelly, dam by Betterton.

Aged Horses—Alma Vista by Direct, dam by Baron Wilkes; Consuella S. 2:12½ by Directum, dam by Nutwood; Directwell by Direct, dam by Allerton; Direct View 2:14½ by Direct, dam by Mansfield; Fred Direct by Direct, dam by Harry Plummer; Ledora 2:18½ by Mendocino, dam by Messenger Duroc; Phyllis Kelly by Direct, dam by Anteeo; Venus Direct by Direct, dam by Marquette; Mush 2:08½ by Lottery Ticket, dam by Richard's Elector; Monroe 2:12½ by Seymour Wilkes, dam by Columbus; Judge Green 2:10½ by Directum, dam by Anteeo Jr.; Baron Oaks, bay stallion by Oakland Baron, dam by Baron Wilkes; Dick, bay gelding by Lottery Ticket, dam by Richard's Elector; bay mare by Directum, dam by Bell Alta; bay mare by Richard's Elector; Flora Grand by Le Grand. Chestnut colt by Mendocino.

BEN CHABOYA.

Guy McKinney, black stallion by McKinney, dam by Guy Wilkes; Annie V. by James Madison, dam by Steinway; Erosmont by Eros, dam by Almont; Roan gelding by Diablo, dam by Redwood; brown gelding by Diablo, dam by Redwood; brown gelding by Chas. Derby, dam by Correction; bay mare by Monroe S., dam by Langford.

J. R. ALBERTSON.

George G. 2:12½ by Homeward, dam by Whippleton; Lucky Dillon by Sidney Dillon, dam by Bay Rose; bay gelding by Abaddon, dam by Waterford; chestnut gelding by Son of Electioneer; Alta Vista, black stallion by McKinney, dam Expressive 2:12½; sorrel filly by Chas. Derby, dam by Steinway; chestnut mare by Hart Boswell.

GEORGE BLANCHARD.

Lord Thomas, brown gelding by Steve Damon, dam thoroughbred.

EDWARD MILLS.

Searchlight 2:03½, brown stallion by Darknight, dam Nora Mapes; Lecco 2:09½ by Bonnie Boy, dam Lucy Homer; chestnut stallion by Chas. Derby, dam by Memphis; Search Me by Searchlight, dam by Guide; chestnut mare by Gossiper, dam by Woolsey; bay colt by Waldstein.

BARNEY SIMPSON.

Arner, brown stallion by Chas. Derby, dam Bertha; bay colt by Don Derby, dam by Guide; Annie B. by Beau B., dam Sally Tricks; Roy by Welcome; chestnut filly by Nutwood Wilkes, dam by Fairmont; chestnut mare by Secretary, dam Julia D.; brown filly by Welcome, dam by Hawthorne.

A. L. CHARVO.

Black filly by Capt. Jones, dam by Director; black gelding by Capt. Jones, dam by Rockwood.

J. D. SPRINGER.

Billy Red by Glenelg, dam by Ingrabam; Don Z. by Stam B., dam by Lottery; Argyle by Charles Derby, dam Flash; Bertha Wilkes by Nutwood Wilkes, dam by Forrest Clay.

GEORGE RAMAGE.

Florence Stone by Welcome, dam by Mambrino Wilkes; Bert Arandale by Sidney Dillon, dam by Happy Russell; Clara Oakley by Sidney Dillon, dam by Happy Russell.

WILLIAM BROWN.

Bay gelding by Bay Bird, dam by Western; Morninglory by Woodnut; Midas by Kentucky Baron, dam May Girl.

JOHN PENDER.

Bay stallion by McKinney, dam by Inauguration; black colt by Capt. Jones, dam by Mount Vernon.

H. H. DUNLAP.

Harold D. by Dexter Prince, dam by Gossiper; King Cadenza by Steinway, dam Empress; Explosion by Steinway, dam Flash; Corsicana by Wildnut, dam by Dexter Prince; Larkin W. by Boodle Jr., dam by Electioneer; two-year old by On Stanley, dam by Abbotsford.

J. W. MILLER.

Martha B. by Asland Wilkes, dam Carrie B.; H. H. H. by Allerton, dam by Egmont.

JAMES SLACK.

King Willis 2:16½ by Bright Bell, dam by Prospect; Happy Jack 2:16½ by Capitalist, dam by Bertrand.

TED HAYES.

Master Delmar by Delmarch, dam Lady Hill; Mar-boy by Delmarch, dam by Franklin; Christabel by Charles Derby, dam Algerdella by Allandorf; Bay Leaf by Telephone, dam by Planet; Higbland by Espresso, dam Sepba; Biddy by Re-Election, dam Irish Lady; Lucy May by Oakland Baron, dam Katie Clay; Sally Lunn by Wiggins, dam Bell de Baron.

J. M. ALVISO.

Rey del Diablo 2:14½ by Diablo, dam Rosita A; Major Cook by Chas. Derby, dam by Richards Elector.

JOE COREY.

Easter D. by Easterwood, dam Lottie Lee; Spinaker by Gaff Topsail, dam Easter D.; Donny Brook by Don L., dam by Echo.

JAMES THOMPSON.

John Caldwell by Strathway; Elsie by Mendocino, dam by Piedmont; brown filly by Nazote, dam Lucyneer; brown colt by Monbells, dam by Nephew; black gelding by Altivo, dam by Advertiser; bay stallion by Silver Bow, dam Grace; Monica 2:15 by McKinney, dam by Director; Chestnut filly by Teberan, dam by Nephew Jr.; Teberan by Mambrino Wilkes, dam by Nephew; Loo Loo, by imp. Lapidist.

W. C. TREFRY.

Bain, chestnut gelding by Charles Derby, dam Empress by Flaxtail; bay gelding, pacer, by Diablo, dam May by Wildidle; Directory by Rey Direct, dam Mamie H.; black filly by Rey Direct, dam Birdie McClain.

S. K. TREFRY.

Tom Carneal by Diablo, dam by Cresco; black colt by McKinney, dam by Cresco; bay mare by Diablo, dam thoroughbred.

A. W. BOUCHER.

Miss Logan 2:06½ by Gen. Logan, dam by Firetail; Harry Logan 2:12½ by Harry Gear, dam Miss Logan; Bert Logan by Colbert, dam Miss Logan; Suomi by Zombro, dam Belle Medium; Dart by Hector, dam by Killarney.

AL McDONALD.

Forrest W. 2:14½ by Wayland W., dam Silver Shield; Ilo Ilo 2:15 by Welcome, dam by Nutwood Wilkes; Rosie Woodburn 2:16 by Easter Wilkes, dam Lady Beth; Rey McGregor by Rey Direct, dam by Steinway; Sutherland, brown gelding by Diablo, dam Missie Medium; yearling by McKinney, dam by Dexter Prince; Peter Zombro by Zombro; bay filly by Zombro; two-year-old gelding by McKinney; bay mare by Sidney Dillon, dam Lottie Stanley.

GEO. A. KELLY.

Bonnie McK, three-year-old by McKinney, dam Bonsilene 2:14½; Birdman, three-year-old by Antrim, dam by Jay Bird; Searchlight Jr. by Searchlight, dam by Sable Wilkes; black mare by Antrim, dam Nellie Blackwood.

THOS. RONAN.

Birdie by Jay Bird, dam by George Wilkes; roan colt by Antrim, dam Birdie; Antonelle by Antrim, dam by Meredith; bay filly by Antrim, dam by Meredith; Knott Boy by Arronmax; Midget by Meredith; Vantram by Antrim; bay mare by Arronmax; chestnut filly by Antrim; Darwina by Meredith; black gelding by Antrim.

SUTHERLAND AND CHADBOURNE.

Chestnut gelding by Strathway, dam by Geo. M. Patchen Jr.; brown gelding by Linmont; sorrel gelding by Chas. Derby, dam by Flaxtail; brown colt by Prince Direct, dam by Piedmont; weanling by Stam B., dam by Piedmont; sorrel colt (3) by Nutwood Wilkes, dam Nellie W. by Woolsey; sorrel colt (2) full brother to last named.

JAMES BERRYMAN.

Queen Bess by Silverwood, dam by Nutwood Wilkes; black filly by Chas. Marvin, dam by Mambrino Wilkes; Tessie, brown filly by Gossiper, dam by Bay Rose; bay filly by Chas. Marvin, dam by Poscora Hayward; bay filly by Chas. Marvin, dam by Anteeo; bay mare by Lottery Ticket, dam by McKinney; bay stallion Silver Moon by Silver Bow Jr., dam Leona

by Almoon; Welcome Jr. by Welcome, dam by Anteeo.

HENRY SANDERS.

Chestnut mare by Diablo, dam Winnie Wilkes by Mambrino Wilkes; Rey Vera by Rey Direct, dam by Anteeo; Anona by Chas. Derby, dam by Anteeo; Charlotte by Chas. Derby, dam by Direct; Mamie Rey by Rey Direct, dam by Alexander's Bay Allen; chestnut filly by Diablo; Tuna 2:16½ by Jas. Madison, dam Ituna by Steinway.

CHAS. L. GRIFFITHS.

Bonnie Direct 2:05½ by Direct, dam Bon Bon by Simmons, and the following colts and fillies by that horse: Bonnie D., dam by Altamont; Bay colt, dam by Whips; black filly, dam by Lakeland Pilot; bay filly, dam by Steinway; bay filly, dam by McKinney; chestnut colt, dam by Simmons.

H. R. WARD.

Bay gelding by Antrim; bay gelding by James Madison, dam by Steinway; bay two-year-old by Altamont, dam by Sidney.

M. HENRY.

Black two-year-old by McKinney, dam by Director; three-year-old filly by Educator, dam Elsie by Silver Bow; bay three-year-old gelding by Gossiper, dam by Algona; bay two-year-old gelding by Gossiper, dam by Algona; bay three-year-old gelding by Headlight, son of Searchlight, dam by Decorator, son of Director; bay mare Elsie by Silver Bow, dam Addie S. by Steinway; bay yearling colt by Educator, dam Tbor a by Albion; black mare by Educator, dam Puss by Naubuc.

"FARMER" BUNCH.

Louise Croner, gray mare by Wildnut, dam by Abbotsford; Hattie Croner, bay mare by Bay Bird, dam by Algona; Jimmie Corset, bay gelding, breeding not given; Marconi by Boodle 2:12½, dam Much Better 2:07½; bay filly by Dictatus, dam by Electioneer; Alto Down, bay colt by Iran Alto 2:12½, dam Elsie Downs by Boodle; Dewey, brown gelding by Welcome 2:10½, dam by Lustre 2:22.

PROGRAM FOR BREEDERS MEETING.

\$13,700 to be Hung Up for a Four Days' Race Meeting in August.

The Board of Directors of the Pacific Coast Trotting Horse Breeders Association met at the office of Secretary Kelly, 36 Geary street, on Tuesday of this week and arranged the following program for its race meeting to be held during the month of August this year. There is a total of \$13,700 for the horses to win in the thirteen races provided.

WEDNESDAY—FIRST DAY.

No. 1—Green Class Trotting Stakes (horses without trotting records eligible).....\$ 800
No. 2—Pacific Slope Stake, for pacers eligible to 2:20 class..... 1500
No. 3—2:14 Class Trotting Stakes..... 700

THURSDAY—SECOND DAY.

No. 1—Two-year-old Pacing Division Futurity Stake No. 2, \$6000, guaranteed..... 950
No. 2—2:18 Class Trotting Stakes..... 600
No. 3—2:10 Class Pacing Stakes..... 800

FRIDAY—THIRD DAY.

No. 1—Two-year-old Trotting Division Futurity Stakes No. 2, \$6000, guaranteed..... 1450
No. 2—2:25 Class Pacing Stakes..... 600
No. 3—Three-year-old Pacing Division Futurity Stakes No. 1, \$6000, guaranteed..... 1300
No. 4—Race for Local Horses (Purse not fixed).

SATURDAY—FOURTH DAY.

No. 1—Three-year-old Trotting Division Futurity Stakes No. 1, \$6000, guaranteed..... 2300
No. 2—California Stakes (for trotters eligible to the 2:24 class)..... 2000
No. 3—2:14 Class Pacing Stakes..... 700

Entries to all of the above stakes, except the Futurity Stakes, will close on Tuesday March 1st, with 2 per cent to enter. Nominators being liable for an additional 1 per cent if not declared out by May 1st, and 1 per cent by June 1st and 1 per cent by July 1st.

The Kenney Manufacturing Company, 531 Valencia street, San Francisco, has a second-hand Toomey cart with wood wheels, extra heavy carriage tie, cushion, etc., that is as good as new, having been used but little, which will be sold for \$90, regular price \$135. Harness, blankets, etc., goes with it. They also have a fine surrey for sale cheap and manufacture sulky wheels and attachments to order. Pneumatic tires, solid cushions put on all kinds of vehicles.

Good for Galls and Sprains.

Weyburn, Assn., Canada, Oct. 30, 1903.

Dr. B. J. Kendall Co., Enosburg Falls, Vt.
Gentlemen:—I enclose a stamp for which please send me a copy of your "Treatise on the Horse and His Diseases." I find your Kendall's Sprain Cure is an excellent remedy for Galls and Sprains, and always have a supply on hand. Yours truly,
O. ROBINSON.

For all kinds of weather there is no drink like Jackson's Napa Soda—plain or in a lemonade.

Notes and News.

The program for the Breeders meeting is printed on another page.

Pleasanton's program for the July meeting will be out next week.

Nutwood 2:18½ is the leading sire of dams of new standard performers for 1903, eleven trotters and two pacers.

John H. Downey advertises that he is located at Alameda Race Track and will take horses to train for track and road.

Frank Dohle, a brother to Budd and Charles, will train for Warren F. Daniel of Franklin, N. H., the coming season.

The Prince of Orange 2:06½, Mr. Billings' last purchase, has been shipped to Memphis and will be trained by Millard Sanders.

Consuella S. 2:12½ by Directum is showing all her old time speed at Pleasanton. One day last week she was permitted to step a half and did it in 1:04½.

Dr. Book 2:10 by McKinney, has been bought by D. G. McDonald of Pittsburgh, Pa., for matinee and road use. The doctor is a great horse in these classes as well as on the track, and is a hard proposition to beat.

Lord Russell, 23 years old, sire of Kremlin 2:07½, and full brother to Maud S. 2:08½, is owned by a prominent business man of Newark, Ohio. He does a good business in the stud and still looks strong and full of vital energy.

The Sacramento Driving Club has set a date twice within the last four weeks on which to hold a matinee but bad weather has caused a postponement each time. The third attempt will be made to-morrow at Agricultural Park in the capital city.

It was announced in Pleasanton last week that Monroe Salisbury had leased the Merriwa Stock Farm (formerly the Valensin farm) and will keep the East View Farm horses that are not in actual training or are in need of turning out, at that place.

Ed Parker, who broke and handled Rey Direct 2:10 and his get so successfully, is now in the employ of Mr. J. B. Iverson of Salinas, and expects to take a string of seven trotters and pacers from the Iverson farm to Pleasanton about February 1st.

Waldstein 2:22½, that still holds the champion five mile trotting stallion record, is now at Pleasanton, having been shipped there recently by Mr. M. J. Zahner of Rohnerville, Eureka. Waldstein will probably make the season of 1904 at Pleasanton.

Kinney Lou 2:07½, will get his limit of mares before his season ends on May 1st. Budd Doble is getting letters from all parts of California in regard to his horse and several mares have already been booked. Kinney Lou will beat the San Jose track February 1st.

Directors of the Napa Agricultural Society will meet the latter part of this month, when the proposition of holding a race meeting this year will be considered. Secretary Bell writes that in his opinion the prospects for a meeting at Napa and a successful circuit in California are excellent.

In the tables of "best on records," compiled annually by statisticians, one notably prominent mile has never been given space. During C. W. Mark's ownership of Joe Patchen, he, a simon pure amateur, drove the famous campaigner and a sire a best-on-record race heat against Chehalis over at Portland, Me.,—2:01½.

A firm of tanners and carriers suggests that as a rule farmers and horse dealers are not aware of the fact that horsehides, whether taken off slaughtered horses or those which have died by disease or perished from other causes, have a value in the market. Fair sized horsehides free of cutholes and other blemishes are now bringing from \$3 to \$3.25 in the market.

One of the best lookers in the East View Farm string at Pleasanton is the stallion Direct View 2:14½ by Direct, dam by Mansfield, son of Hambletonian 10. He jogged a mile in 2:25 the other day and stepped the last quarter in 35 seconds and last eighth in 16 seconds. He is a square trotter and made his record last year.

An arrangement has been reached between the Gentlemen's Driving Club and the Driving Park Co. of Cleveland, O., whereby the long homestretch of the famous Glenville course will be maintained all winter a glary sheet of ice and either bicycle sulkies or sleighs may be used on it for brushing. The jogging hack to the head of the stretch will be done on the inner track.

An eastern exchange says: Ed Bass may race the elegantly bred stallion Almahoul by Stamhoul 2:07½ from old Alma Mater the dam of Alcantara, Alcyone and so many others. His owner, A. N. Kingsley, Ashuelot, N. H., contemplates mating the great broodmare Rosemont by Piedmont, dam Beautiful Bells, to him after she foals. Rosemont was one of the choicest at Palo Alto, and to Mendocino to whom she is now in foal should produce a rare performer.

Joseph Hubinger, of New Haven, Conn., has commenced a suit for \$30,000 damages to his string of trotters and pacers by the wreck near St. Louis last summer. It will be remembered that the Texas reinsman W. O. Foote, who was in charge of Mr. Hubinger's horses, was also severely injured in that accident. Mr. Foote will bring a separate action for damages.

Broodmares are bringing good prices once more. Expressive 2:12½ sold for \$1700 at the Old Glory sale in December last, and now the hay mare Quoddy Girl 2:16½ has been sold by J. L. Tarlton of Lexington, Kentucky, to D. J. McDonald of Aurora, Illinois, for \$1500. She is safe in foal to Larabie the Great and will be bred back to that horse before being shipped to her new owner.

Geo. T. Beckers, owner of the great young stallion Zombro 2:11 by McKinney, came up from Los Angeles on a flying trip this week and gave this office a call. Mr. Beckers has about decided that he will take Zombro to Cleveland, Ohio, about May 1st this year, as he intends taking a few of his colts over to the Blue Ribbon sale to be held there that month. Zombro's season at Los Angeles will, therefore, end May 1st.

Last week's Trotter and Pacer said: Monte Carlo and Nora McKinney are at Matt Dwyer's stable in charge of Johnny McQuaig. Mr. Ives is highly elated with Monte Carlo, and says he is one of the nicest road horses he ever saw or heard of. He was jogged on the snow last Sunday by his trainer, who says he is one of the finest snow horses that ever stepped on the path. Nora McKinney is good on the snow, but not as well put up for it as the fast California gelding.

The Percheron is the farmers' horse and good stallions of this breed will be well patronized this year, by the farmers of California, as there is a big shortage in the supply of draft horses and prices are high. Mr. J. A. Beall, of Laton, Fresno county, advertises

six Percheron stallions for sale. Three are black and three dapple grays. Four are registered horses, the other two have fifteen-sixteenths of pure blood. Read the advertisement and correspond with Mr. Beall in regard to prices.

Members of the Gentlemen's Riding and Driving Club of Denver, Col., held their annual parade Dec. 19th to commemorate the fact that at that date the club had the largest membership of any club in the country. Over 130 vehicles of all sorts from a bike sulky to a break were in line. A feature of the procession was the line of record horses, led by W. W. P. 2:05½. Carbonate 2:09 came next and then Silver Sign 2:10½, Daisy Field 2:08½ and others of that sort. A set of "moving pictures" was made of the procession as it moved up Grant avenue, the intention being to use the films in advertising Denver in other cities.

Al McDonald is handling a black gelding by Zombro 2:11 at Pleasanton that is one of the best gaited youngsters ever seen at the famous track. The gelding will be four-years-old this spring. He is out of a mare by Gen. Benton and is a full brother to Lord Kitchener 2:26. Peter Zombro, they call him, and although he worked a mile in 2:19½ at Los Angeles last year as a three-year-old, he is expected to trot much faster than that this year. Peter Zombro does not wear a boot of any kind, is a free open gaited horse and should make a very fast trotter. He is owned by Mr. M. A. Murphy of this city.

Lady Yeiser by Garrard Chief 2253 is one of the great brood mares of which little has been written in the turf journals. She is credited with eight standard performers by the last Year Book and put two new ones in the list in 1903, giving her ten with standard records. Of these six are trotters with records from 2:28½ to 2:29½, and four are pacers with records from 2:06½ to 2:17½. Her son, Don Pizarro 2:14½, is the sire of sixteen in the list, of which six have records below 2:15, and her daughters have produced five. Garrard Chief, the sire of Lady Yeiser, was by Mamhrino Chief. Her dam was Jewell by Vermont 104, a grandson of Black Hawk 5. There are several crosses of running blood in Lady Yeiser's pedigree.

There are 97 entries in the Occident Stake of 1906, entries for which closed January 2d. The list was received just before this issue of the BREEDER AND SPORTSMAN went to press and too late for publication. It will appear next week.

Another star performer of the season of 1903, Jay McGregor 2:08, goes to a Gotham owner. C. L. McClain, a New York broker, has purchased of W. L. Spears his half interest in Jay McGregor at the reported price of \$12,500. Mr. McClain now owns the horse entire. It is said the horse will remain in Scott Hudson's hands at Lexington, and will be driven by the auburn haired reinsman in the Grand Circuit this year.

Mr. W. H. Houghton of Marion, Ohio, President of the McMurray Sulky Company, is in California for a few weeks with his family on a pleasure jaunt. Mr. W. J. Kenney, of the Kenney Manufacturing Company of this city, has been showing Mr. Houghton around during his stay here, and they visited Pleasanton one day this week. Mr. Houghton found that the McMurray sulky is deservedly popular with California trainers, and that the company has in Mr. Kenney an active and enterprising agent for this Coast.

A recount of the winnings of the Keene stable of Thoroughbreds in this country and England shows a total of \$117,000. Race horses were sold in Britain from this stable for \$80,000. In this country horses in training and yearlings were sold at auction for \$45,000 and \$50,000 worth was sold from the Castleton Stud in New York, making a grand total of \$292,000 as the gross return for 1903. Carrying the recount still farther the *Morning Telegraph* states that at Brookdale the Keenes have 32 yearlings worth \$192,000, at Castleton 50 yearlings worth \$100,000 and in addition there are on the farm named 110 broodmares of the most fashionable blood and the stallions Com-mando, Voter, Ben Brusb, Kingston and Horoscope, together with the broad acres of Castleton, making the investment altogether about \$1,000,000 on which a return of \$292,000 is very large even if in gross.

One of the handsomest three year-olds in California is Elden Bells by Monbells, dam Elden 2:19½, (dam of Eleata 2:08½) by Nephew, second dam Eleannr by Electioneer, third dam Sallie Gardner, thoroughbred mare by Vandal. Elden Bells is owned by Col. J. C. Kirkpatrick, manager of the Palace Hotel in this city, who has been driving him on the Park roads this winter, and finds him a most agreeable road horse. The accompanying photograph, taken a few days since, is a good likeness of the colt and a pretty fair one of his owner. There is no more enthusiastic road driver than Col. Kirkpatrick, and about the only days he misses are when it is raining or the days he goes to Pleasanton, where he is now building a capacious bungalow close to the famous training track there. This bungalow is nearing completion and when finished will be a model country residence. Col. Kirkpatrick is a very active business man, managing with great success the immense Sharon Estate, besides being one of San Francisco's Harbor Commissioners and filling many other positions of trust. He is a director of the P. C. T. H. B. A. and a member of the Board of Appeals of the National Trotting Association. He finds his best relaxation from business in driving good harness horses, and as a reinsman behind a fast trotter has few superiors.

Harry Fancher, of New York, is buying considerable speed for the European market, and it seems the huskyheaded foreigners are now taking kindly to pacers. Last Saturday, Mr. Fancher shipped fourteen head to London to one man. These he had purchased on an order. They were mostly pacers with records ranging from 2:08½ to 2:23½, and the larger percentage were geldings. On Monday, January 4th, Mr. Fancher received a letter from Emanuel Petersen of Copenhagen, Denmark, requesting him to purchase a trotting stallion for the Danish Trotting Association. Mr. Petersen's letter stated that he wished a horse 17 hands tall, black or brown in color, with no defects in body or limb, possessed with an even temper, must be standard bred, with a record of 2:30 or better, and possessed with style and action of superior quality. Mr. Fancher will hardly be able to find a 17 hand trotting bred stallion, to fill his order. Perhaps some of our readers can help him with one.

Says *Sports of the Times*: "Almont Jr. is back again at Village Farm, after several years absence and in spite of his years looks virile. Almont Jr. will be 32 years old next spring, but he looks 15 years younger. He is still vigorous, and Superintendent Bradburn has decided to mate with him next spring some of the best of the young broodmares owned at Village Farm. Almont Jr. has sired more fast, handsome and perfect mannered road horses than any other stallion that ever stood in Western New York, and considering that when he was the premier sire at Village Farm the broodmares there were vastly inferior in breeding to those of the present day, his showing as a sire is little less than wonderful. He was displaced by Mamhrino King before he had been given an opportunity to leave any sons out of real great mares, and it is to be hoped that from his services next spring some colts may come that will develop into horses of the individuality and breeding that will make them desirable horses to use in the stud and thus save from dying out a line of the Almont family that has some most valuable qualifications."

PACIFIC BREEDERS FUTURITIES.

Payments Made January 2d on Stakes to be Decided This Year.

There will be four cootests at the meeting of the Pacific Coast Trotting Horse Breeders Association to be held this year, two of which will be for two year olds and two for three year olds entered in the Futurities.

Of the 122 colts and fillies on which payments were made as two year olds January 2, 1903, 54 had payment made on them as three year olds January 2d this year. This means that fifty-four colts and fillies have been or will be put in training for the two divisions of the stake that are given to three year olds. The trotters get \$2000, and the pacers \$1000 to contest for. The nominator of the dam of the winner in either event will get \$200, and the owner of the stallion that sires either winner will be paid \$100 out of the stake. It will not be possible to know just how the three year olds will be divided as to their gaits until the starting payments for the races are made ten days before the meeting opens. Of the 176 colts and fillies foals of 1902, on which payment was made as yearlings January 2, 1903, more than three-fourths, or 141 to give the exact number, had fourth payment made on them as two year olds January 2, 1904, and are now eligible to the two year old divisions of that stake to be decided this year. The two year old trotters will compete for \$1250, and the two year old pacers for \$750. As in the three year old events, the nominator of the dam of the winner of either race will be paid \$200 out of the stake. The complete list of foals on which payments have been made and that are eligible to these two stakes are as follows:

Stake No. 1, \$3000, for Mares Bred in 1900.

Fifth payments of \$10 each were made January 2, 1904, by the following nominators on foals of mares bred in 1900:

Book, C K, b c by McKinney, dam Leonor.
Barstow, T W, b f True Heart by Nearest, dam Camma.
Boone, Harvey, b f Bodie Girl by Stranger, dam Juna.
Brown & Brandon, b c Longitude by Meridian, dam Media.
Borden, I L, b c Cresco Wilkes by Nutwood Wilkes, dam Alice Cresco; h c Ella G hy Hamb. Wilkes, dam Alice Bell.
Brown, Alex, ch c hy Prince Ansel, dam Nosegay.
Coleman, W H, h f Geraldine by Zomhro, dam Gypsy Girl.
Durfee, C A, bl c Almaden hy Direct, dam Rose McKinney; b c Johnnie McKenzie hy McKinney, dam Babe.
Durfee, W G, hlc by McKinney, dam Belle.
Dudley, E D, br f Friskarina by Bayswater Wilkes, dam Bee; hrc Eben Holden by Bayswater Wilkes, dam Babe.
Farnum, Dr. C E, b c by Cupid, dam Bessie Hock.
Gray, Jas H, br c Carahina hy McKinney, dam Biscara; h c Calamaca by McKinney, dam Rose Russell.
Greene, W C, b c Bulletneck hy Zombro, dam Belle Raymo.
Hogboom, H S, b c Red Hot by Dagan, dam by Waldstein.
Hunfreville, Mrs W B, ch c McKinley by Nutwood Wilkes, dam Nellie.
Harris, Mrs B E, b c Gen DeLarey by Mambrino Chief Jr, dam Honor.
Hoy, S H, b c Tee Hee by Bayswater Wilkes, dam Clara Belle.
Haile, J W & Co, h f Suisun hy Demonio, dam Hancock.
Iverson, J B, ch f Tbelma by Dictatus, dam Salinas Belle.
Jones, C L, b c Carlokin hy McKinoey, dam Carlotta Wilkes.
Kelly, Geo A, b c Bonnie McK by McKinney, dam Bonsaline.
Kirkman, Geo W, gr f My Way hy Stoneway, dam Ethel Bastler.
Langan, G S, b or hr c hy McKinney, dam Anna.
La Sista Ranch, h f Wanda II by McKinney, dam Wanda.
Lawrence, H W, b c Murray M by Hamb Wilkes, dam Anna Belle.
Magruder, Geo H, s c Harold H hy Lymont, dam Mollie Mac.
Myers, H C b c Spinnaker by Gaff Topsail, dam Easter D.
Morgao, Wm, b f Eva by Zombro, dam Nellie K.
Morgan, Geo J, h f Neerqueto hy Neernut, dam Verona.
Mintorn, Jas W, b g Strathcarma by Strathway, dam Carma.
Montgomery, J E, b c Seymow by Diawood, dam Nancy H.
Mastin, W, b c Marvin Wilkes by Don Marvin, dam Nora S.
Meek, H W, b f Tahitba by McKloney, dam Fenella.
Nutwood Stock Farm, ch f M M, by Nutwood Wilkes, dam Brown Eyes; h f K W by Klatawab, dam Queen C; ch f Miss Carter by T C, dam Bissie.
Oakwood Park Stock Farm, b f Belladirect by Direct, dam Bella II; b c Stillwell hy Chas Derby, dam Bertha; b f Greggins hy Steinway, dam Maggie McGregor.
Peterson, U G, b m Arbalita by Arthur W, dam Dinah.
Rodman, A B, b c Culpit by McKinney, dam Patty Washington.
Rose Dale Stock Farm, h f by Saint Whips, dam Fila D.
Sanders, Henry, hr f Directrix by Ray Direct, dam Antera.

Sebafer; Jacob, blk f Directrine by Direct, dam Doora.
Shaw, L E, h c Lugo by Zolock, dam Daisy Mason.
Smith, Thos, hlc c Gen Frisbie hy McKinney, dam Daisy S.
Steele, C C, hr c Algonawood hy Black Jack, dam Bell R.
Williams, J H, blk f Zenut by Neernut, dam Dulcet.
Wills, W LeM, br f Bonnie Madelaine by Conifer, dam Bonnie Ela.
Williams, C H, s c Collis H by Nutwood Wilkes, dam Net.

Stake No. 2, \$6000, for Mares Bred in 1901.

Fifth payments of \$10 each were made January 2, 1904, by the following nominators on foals of mares bred in 1901:

Arvedson, C A, b c Rettus by Sutter, dam Lady Phelps.
Babcock, Graham E, b f hy Athaneer, dam Lady Estel.
Bohon, Jos H, ch c Bolock by Zolock, dam Boellen; b c Hylock hy Zolock, dam Happy Belle.
Barstow, T W, b f Just It hy Nearest, dam Babe; s c The Victory by Nearest, dam Princess Airlie.
Bemmerly, Sam, b f by Diablo, dam Belle Button.
Borden, I L, hl f Black Wings hy Robert I, dam Alice Cresco; ch c Prince Robert hy Robert I, dam Alice Belle.
Brierly, Sam, h f hy Nushagak, dam Hattie W.
Brown, Alex, b c by Nushagak, dam Pioche.
Chiles, J F, hr f Cbiapa hy Bayswater Wilkes, dam Little Martin.
Comisto, S, b f Alice C by Monterey, dam Hazel Cole, John A, b f Near Kinney hy Neernut, dam Leonora McKinney.
Christopher, L J, b f Direct Maid by Direcho, dam Ida Direct.
Callendine, Mrs E W, cb f Lady Caretta hy Nutwood Wilkes, dam Abbie Woodnut.
Cone, D S, h c by Kinney Lou, dam Kitty Marvin.
Carter, Martin, b c hy Nutwood Wilkes, dam Ingar; b c hy Nutwood Wilkes, dam Zeta Carter; h f hy Nutwood Wilkes, dam Bessie C; b c by T C, dam Lew G.
Crowley, T J, b c Pemberton by Boydello, dam Lottie Parks.
Cuicello, J G, blk g by Ray Direct, dam Bahe Marion.
Curtis, W S, b f Fairy Belle by Zolock, dam Siren.
Davies, Ben, b f Delilah by Zolock, dam Gipsy.
Dudley, E D, h f Miss Valentine by Bayswater Wilkes, dam Bee; b f Ima Jones by Capt Jones, dam Babe.
Durfee, C A, h c Covey hy Mendocino, dam Rose McKinney; h c Galindo hy McKinney, dam Elsie.
Durfee, W G, br f hy Coronado, dam Lola.
Erlanger, Edward, h c by Strathway, dam Fly.
Fallmann, F J, b c Sir Robert, hy Nushagak, dam Hilda Rose.
Faris Stock Farm, b f Monabella Benton hy Monhells, dam Nellie Benton.
Foley, P, h f Lady Montesol hy Montesol, dam Lady Bird.
Griffith, C L, — hy Bonnie Direct, dam Petrina; — by Bonnie Direct, dam Alta Nola.
Grove, Jas A, b c Baydon by Athandon, dam Bell.
Gordon, Mrs Mary L, ch c Saint Cloud by Scott McKinney, dam by Antinous.
Greene, W E, gr c by Nutwood Wilkes, dam Little Witch.
Hashagen, Wm, b c Kinney Rose hy McKloney, dam Golden Rose.
Hennagin, George, b h Anti V by Alta Vela, dam Laura Z.
Hoy, S H, s c Ben Hoy by Capt Jones, dam Camilla.
Heald, E P, b c by Nutwood Wilkes, dam Princess Nona; h c hy Nutwood Wilkes, dam Princess McKinney.
Henry, M, h c John C Henry by Educator, dam Silver Bow.
Haile, J W & Co, br c by Demonio, dam Corolla; b f by Demonio, dam May Norriss; b c by Demonio, dam by Nutwood Wilkes; h f hy Demonio, dam Hannah.
Harkey, W S, h f Devilita by Diablo, dam Clara H.
Herbert, Dr E F, b f Ferodale Princess hy Neil W, dam Ferndale Queen.
Hogshoom, Robert, h c Waldstein McKinney by Wash McKinney, dam Yolo Belle.
Iverson, J B, h c North Star hy Nutwood Wilkes, dam Ivoneer; ch c Derby Chief hy Chas Derby, dam Ruby.
Johnson, J W, hr c General Marden by Falrose, dam Primrose.
Jones, J A, b f Bellemont hy Zomhro, dam Daisy Q Hill.
Kavanagh, Ed, ch c Statysail hy Gaff Topsail, dam Dolican.
King, C E, b f Azolia by Diawood, dam Dolly G.
Kingsbury, Geo W, h f Della K by Silver Bow, dam Elma.
Keefer, M C, blk c Raokluwater by Bayswater Wilkes, dam Bessie Rankin.
Laugenour, Chas F, b c Alexander Diablo by Diablo, dam Alexandra B.
Lasell, L M, s c Bill Bow by Silver Bow, dam Belle Caprice.
Leet, Wm J, b f Still Better by Iran Alto, dam Much Better.
Loorya Sol, ch f Annie Diawood by Diawood, dam Lady Marvin.
Lumsden, W H, br f by Bonnie Direct, dam Myrtle; br f by Bonnie Direct, dam Roblet.
McAleer, Oweo, b f Reela Newo by McKinney, dam Eva Wilkes.
Markham, Andrew, h c Sir Paul by Wash McKinney, dam Lady Bulger.
Marshall, J W, h f Mona Wilkes by Demonio, dam Trix.
Martin, Dr A H, h c Blennerhasset by Nushagak, dam Boydella.
Martin, S F, blk c Kenneth C hy McKinney, dam Higblaod Maid.
Mercer, E S, h f by Daedalion, dam Angelins.
Maseroo, Dr C, b f Tina by McKinney, dam La Moscovita.

Morris, L A, br f, Fanny Briggs by Bayswater Wilkes, dam Algenie.

Morgan, Wm, h or blk c Kaiser hy Neernut, dam Grace McK; b c Uoa Boy by Neernut, dam Una K; br c Signet hy Newton Direct, dam Nellie K.

Mosher, I C, b c Oosoola by Zombro, dam Athalene; b f hy Zomhro, dam Scappos.

McLaughlin, Dr A, b c hy Welcome, dam Alameda Maid.

Mastin W, br f Ardis hy Falrose, dam Nora S; b c Uncle Ben by Falrose, dam Miss Mooney Filly.

Meek, H W, b f hy Nutwood Wilkes, dam Cricket; br c hy Welcome, dam Edwina; hr f hy Welcome, dam Rosemary; b c hy Wm Harold, dam Pansy; b f by Wm Harold, dam Directress.

Mitchell, S U, b or blk f Berneice P by Zombro, dam Jenny Winston.

Mowry, Jos C, b f by McKinney, dam Electress Wilkes.

Oakwood Park Stock Farm, b c hy Cbas Dehry, dam Bella II; f hy Chas Derby, dam Ione; c hy Chas Derby, dam Chipper Simmons; f by Chas Derby, dam Susie Mambrino; b f by Owyhee, dam Economy; f by Owyhee, dam Pippa; f by Chas Derby, dam Bertha.

Powers, L O, h c April Fool by Rex Gifford, dam Hinda.

Raschen, Fred, h f hy Iran Alto, dam Bell Bird.

Rea, Jas W, b f Miss Eva B. by McKinney, dam Altilla.

Rodman, A B, b c by Tube Rose, dam Advocatrix. Rankin, Wm B, b f McKinney Belle by McKinney, dam hy Antinous.

Reed, A L, hr c Joe Reed by McKinney, dam Catinka.

Rice, J D, b c Ricewood by Diawood, dam Genevive.

Rose Dale Stock Farm, h c by Wash. McKinney, dam Dalla; h c by Wash. McKinney, dam Darion.

Runyon, Mrs Sol, h c Roy Runyon hy Mendocino, dam Coressa; h c Live Oak Runyon by Exioneer, dam Dextress; h f Ora Runyon hy Azmoor, dam Altwood.

Sblippe, W A, s f by Temescal, dam Trosswood.

Smith, Thos, h f hy McKinney, dam Daisy S.

Solano, Alfred, h f Novia Mia hy Sky Pointer Jr, dam Nashawena; blk f Vivandera hy McKinney, dam Vista.

Smith, W W, b m Vimosia by Vinmont, dam Maggie.

Stickie, G E, b f hy Daedalion, dam Alaska Filly; b c by Silver Bow, dam Cornelia.

Strong, N M, hrc Ambush by Zolock, dam May Kinney.

Thornquest, C O, b f by McKinney, dam Miss Peacock.

Todhunter, L H, br f Zombelle by Zomhro, dam Silver Bell; h f Zomitella by Zombro, dam Itella.

Truesdell, Edward C, ch f Eliza Lincoln, by Zolock, dam Gift.

Tuttle Bros, br c Advance by Suomi, dam Klickitat Maid.

Tuttle, Dr Jay, b c Zadok hy Zomhro, dam Maisie.

Thompson, J W, ch f Miss Monbells hy Monbells, dam Emaline.

Valeocia Stock Farm, br f La Belle Harriett hy Derby Heir, dam by La Belle; b f hy Direct Heir, dam Rosedrop.

Vance, W L, b c Sir John S. by Diablo, dam Elisa S.

Vanderhurst, W, c Roberto hy Robbin, dam Lilly V.

Wadham, Fred W, h f Ielwin by Neernut, dam Johannah Treat.

Warlow, Geo L, b f Sextette by Athable, dam Donatrine; b c Athasham by Athadon, dam Cora Wickersham; b f Strathalie by Strathway, dam Athalia.

Wellington, B F Jr, h c Navarre hy Nutwood Wilkes, dam Miss Leah.

White, C F, hlc f Marguerite W by Exioneer, dam Lillie Thorne.

Wempe, G, — by Nutwood Wilkes, dam Belle W.

Williams, C H, br c by McKinney, dam Twenty-Third.

Williams, Mrs P J, h f Mary Neilson by Monterey, dam Egyptian Maid.

Wills, W LeMoyn, br c Hancock Johnston hy Conifer, dam Bonnie Ela; s c Fremont by Conifer, dam Pastora.

Wilson, A G, b c Little Medium by Dictatus Medium, dam Little Ooe.

Wilson, J K, b f by Sidney Dillon, dam Lilly Stanley.

Young, John D, br c Gleo Alto by Rex Gifford, dam Glennita.

Horse Owners Should Use

GOMBAULT'S
CAUSTIC BALSAM

The Great French Veterinary Remedy.
A SAFE, SPEEDY & POSITIVE CURE.

Prepared exclusively
by J. E. Gombault, ex-
Veterinary Surgeon to
the French Government
Stud.

SUPERSEDES ALL CAUTERY OR FIRING.

Impossible to produce any scar or Nephth. The safest best Blisters ever used. Takes the place of all liniments for mild or severe action. Removes all Bunches or Remedies from Horses or Cattle.

As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, etc., it is invaluable.

WE GUARANTEE that one tablespoonful of Caustic Balsam will produce more actual results than a whole bottle of any liniment or ointment ever made.

Every bottle of Caustic Balsam sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address

THE LAWRENCE-WILLIAMS COMPANY, Cleveland, Ohio.

ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

Save the Birds.

The Cooper Ornithological Club of California held its eleventh annual meeting January 9th at the residence of the president, H. R. Taylor, 1375 Regent street, Alameda. There was a large attendance of students of ornithology from Stanford and Berkeley universities, Oakland, San Francisco and other points. The club is the most active State organization for the study of the habits of birds in the Union, and now has a membership of over two hundred, scattered throughout California, with some members in Oregon, Washington, Nevada and Utah. Much scientific research has been accomplished by members of the club, and important contributions to science are published in pamphlet form for circulation among museums and students of the country, as well as in the club magazine, the *Condor*, issued at Stanford University for the society by Walter K. Fisher, the editor, who is a son of Dr. A. K. Fisher of the United States Department of Agriculture.

At the meeting M. P. Anderson gave a talk on "A Bird Island in Cook's Inlet, Alaska." Professor Otto Emerson of Hayward presented a valuable paper on the subject, "The Feet and Bills of Birds in Relation to Their Food Habits."

Officers were elected to serve for the ensuing year as follows: President, Henry Reed Taylor; first vice-president, R. B. Moran of San Luis Obispo; second vice-president, Earl Mulliken of Berkeley; secretary, Charles S. Thompson of Stanford University; treasurer, Joseph Grinnell, Pasadena. Walter K. Fisher was appointed editor of the club's official organ, the *Condor*. Following the business session the club members enjoyed a banquet.

The value of birds as insect destroyers is gradually dawning on the general public and it is to be hoped that ere long the useful birds—and they comprise 95 per cent of the feathered denizens of field and woodland—will have the same protection that has been accorded game birds.

Statistics gathered in every State of the Union show conclusively the wisdom of protecting the birds. Much has been published and argued against the birds for their destructiveness in the orchard and grain field. When the whole evidence gathered has been holed down and weighed in the balance it has been clearly proven that in a large majority of instances the birds have a big allowance coming on the credit side of the ledger.

The New York Department of Agriculture was recently informed that, in some sections of the state, people were killing wild birds because of damage done by them to early fruit. That is not only against the laws of the state, but against the best interests of all who try to produce anything from the soil—"farmers, orchardists, gardeners and all." Injurious insects are increasing very rapidly all over that state. The worst forms have been imported, and there is good reason to fear further introduction of these destructive pests, as they are at our borders. The brown-tail and gypsy moths are liable to show up there at any time. The latter has cost Massachusetts over \$1,000,000 so far to keep it under subjection. This suggests the desirability of using every possible means to check their depredations.

Much has been said and written on the proper use of poison sprays; but the acreage now covered by the spray-pump is very small in comparison to the cultivated acres of that state, and is confined almost wholly to a part of the commercial orchards and the potato fields; while the great acreage of farming lands lies exposed to the attacks of seriously injurious insects, working untold damage, unmolested, except by the natural enemies of the bugs and beetles and their larvae.

Of animal life, insects outnumber, by far, all other species. Over 500,000 forms (Kingsley) are known, and the individuals of some of these species number many millions. Were it not for the natural checks on the wonderful reproductive power of insects, no living plant could mature, and utter desolation would result. To those most familiar with insects it is a daily wonder that they are not many times more destructive than they are, and that their damage is so often local and not general.

A conservative estimate of the loss to the farmers of the state of New York caused by insects would be 10 per cent of their entire crops. Prof. Webster, the state entomologist of Ohio, places the loss in that state at 20 per cent. It has been recently stated that "up to June 1, 1900, 5,240,000 acres of winter wheat in the United States was abandoned and plowed, or cut for forage, as the result of the ravages of worms, bugs and flies." Let estimates be what they may, the losses are large, and it is necessary to look for every possible remedy.

Investigation of the food supply of birds has in recent years been carried on by the United States government and by many careful observers in several States, and yet the work is far from complete; but enough has been ascertained to prove that our wild birds are very important factors in insect control.

The food of all land birds consists of seeds, buds and animal matter, especially the latter, and most species of birds consume a large quantity of the larvae of insects, an enormous amount at time of feeding their young. Many of the insectivorous birds have two broods a year, and both broods come at the season when insect larvae are most abundant. Many of the more injurious insects pass most of the year in the egg state, and some birds feed very largely on the eggs.

Birds are intensely active. They are comparatively

light, and have a marvelous muscular system, which must be sustained by an abundance of animal food. Some birds will consume in twenty-four hours a quantity of food equal to their own weight, a fact not paralleled by any other warm blooded animal. They have strong and very active digestive organs, and the number of insects consumed and destroyed by them is very great. As a rule, birds are of delicate organization, nervous and timid; they have numerous enemies, among which are other birds, reptiles, cats, the small boy and the "sportsman" (?).

When there is abundant food, then there will be found creatures seeking that food, but with birds other matters than a food supply are to be considered. Special attention should be given to the protection of wild birds. Their nesting places must be kept quiet, trees should be reserved for their use, food should be given them in inclement weather, and destruction of birds and their nests should be stopped.

The clearing of forests and the removal of undergrowth, and especially the scarcity of evergreen trees, have taken away the favorite resting places of desirable birds. They need the protection of dense trees for many weeks each summer, in which to build their nests, hatch their eggs and feed their helpless young, and always need them to escape pursuit.

In the East fir, pines and spruces afford desirable nesting places for many species of beneficial birds, especially crow-black birds. Small bird-houses on poles, or even two-inch holes bored into barns or out-houses, hack of which small boxes are placed, will supply a home for wrens and other species.

Some of the most injurious insect pests, says a New York writer, we have are the spring caterpillars of the elm and willow, the tent caterpillars, gipsy moth, tussock moth, etc., and owing to their spines or hairs it would seem that they would not be very attractive food for birds; but recent investigation shows that great numbers are eaten by them. At times they will swallow an entire insect, and at others only a portion, but always a vital part.

Recent reports on the food habits of birds show many interesting facts. Even birds that have been condemned because they eat fruit or grain are known to feed most of the year on insects and noxious seeds, and if they lived wholly on fruit during the fruit season (which they do not) they would be on the whole of value.

The United States authorities at Washington have dissected nearly 15,000 birds and recorded the stomach contents, and others have done work along similar lines.

The following notes have been made from various sources and may prove interesting:

Forty-seven species of birds feed on hairy caterpillars. Thirty-two species feed on tent caterpillars. Crows eat half a pound of insects per day. A pair of chipping sparrows had a nest containing three young; in one day they made two hundred visits to the nest, bringing food nearly every time. One-half the winter food of chickadees—black-capped titmouse—was insect, largely eggs, and the stomachs each contained 300 to 450 eggs of canker worm. In Massachusetts 38 species of birds feed on gipsy moth. Blackbirds, during breeding season, live mostly on insects. Damage by crows is confined to a short corn season, but the remainder of the year they consume enormous numbers of insects. Ninety-nine per cent of the stomach contents of thirty meadow larks was caterpillars, grasshoppers and beetles, especially snapping beetles, so destructive in grasslands. Of two hundred species of birds listed in West Virginia, fifty-one feed mostly on insects.

The following record will show the result of the examination of the stomachs of a few Eastern birds:

Forty-six black-billed cuckoos contained 906 caterpillars, 44 beetles, 96 grasshoppers, 100 sawflies, 30 stick-bugs, 15 spiders, etc. One stomach contained 100 sawflies. One hundred and nine yellow-billed cuckoos contained 1865 caterpillars, 93 beetles, 242 grasshoppers, 67 sawflies, 69 bugs, 6 flies and 80 spiders. One stomach contained 250 tent caterpillars, and another 217 flat webworms. Two-thirds to three-fourths of the food of downy and hairy woodpeckers consists of insects. Two flickers contained over 3000 ants each. Of 281 stomachs of kingbirds, 14 only contained bees, and 90 per cent of their food was of insects. Of eighty stomachs examined, the phoebe showed that 93 per cent of their yearly food was insect. The bluejay eats many noxious insects, as also does the crow, and to save these birds for the good they do, it is well to resort to considerable trouble to protect the orchard and the corn fields from their attacks without killing either of these birds. The bobolink, while a troublesome bird in the rice fields, had the merit of feeding mostly on insects during its nesting season in this State. Two hundred and thirty-eight stomachs of the meadowlark contained 73 per cent insects. Caterpillars formed 34 per cent of the food in 113 stomachs of Baltimore Orioles.

The following birds are known to be valuable as insect destroyers, and it is hoped that careful observation of their habits may be made, with a view of seeing the good done by them and of protecting them, so they can increase in numbers to combat the rapid spread of injurious insects: Bobolink, barn swallow, catbird, cuckoo, cedar bird, chickadee, chipping sparrow, finch, grosbeak, martin, meadow lark, night hawk, oriole, phoebe and all fly catchers, robin, quail, thrasher, tanager, vireos, warblers, woodpeckers, and all sap-suckers and wrens. Hawks, owls, bluebirds, kingbirds, crows, crow blackbirds and red wing blackbirds do far more good than harm.

A Mix-Up With Lions.

A most surprising story of an adventure with lions is that related by Game Ranger Wolbuter whilst in the service of the Transvaal Government. So extraordinary and unusual is the narrative that it is attested by a magistrate's certificate, for ordinarily it would be the subject to an incredulous reception. The tale is sensational to a degree and told in the words of Wolbuter himself, is as follows:

"I was riding along a Kafir path about an hour after sunset; it had been a long march, and I pushed on ahead of the boys in order to get to the kraal at Metzi Metz as soon as possible. My dog barked at something which I took to be reedhucks, but a moment later I saw a lion crouching close to me on the off side. I turned my horse sharply in the opposite direction, and this no doubt caused the lion to miss his spring, as, though the horse had some nasty claw marks on the quarters, the bound which he gave saved him. I was unseated, and simultaneously I saw another lion coming at me from the opposite direction; the horse rushed off with the first lion in pursuit, and the second, no doubt considering me the easier prey, picked me up almost before I touched the ground, and gripping me by the right shoulder in such a position that I was face up, with my legs and body dragging underneath his belly, proceeded to trot off down the path, uttering all the time a loud growling, purring noise."

"The lion took me nearly two hundred yards, my spurs all the time catching in the ground until the leathers broke. Suddenly I bethought me of my sheath knife, which I carry on my belt behind my right hip; as the lion had hold of my right arm and shoulder, I had to reach behind with my left hand, a matter of some difficulty; but I at last succeeded, and I am sure no one ever gripped anything so tight as I did that knife after I had got it out. On reaching a large tree with overhanging roots the lion stopped, and I then stabbed him twice in the right side with my left hand, near where I judged the heart to be. I found afterwards that the first stab touched the bottom of the heart, and the second one slit it down for some distance. The lion immediately dropped me, and I again struck him in the throat with all my force, evidently severing some large artery or vein, as the blood poured over me. He jumped back, and stood two or three yards off facing me, and growling. I scrambled to my feet, not knowing that I had mortally wounded him, but after a few moments he turned and went slowly away still growling; soon the growls turned to moans and then ceased, and I felt he was dead. Before this, however, I had got up the tree as fast as my injured arm and shoulder would allow me, and I was hardly securely seated when the other lion, which had returned from unsuccessfully chasing my horse, came back to the spot where I had been seized, and coursed along on my blood spoor to the foot of the tree. He had been pursued throughout by my dog, a large, rough and courageous animal, with whom I had often hunted lions previously; he, no doubt, was of assistance to the horse in his escape."

"I now shouted to my dog, and set him on the lion; he came up barking furiously, and the lion retreated, but came back again and made a rush at the dog, who dodged him and continued to bark all around him, until presently the lion went off. After a time I heard the boys coming along the road, shouted to them, and they came up and rescued me from my position. The horse was found next morning not much injured, and the boys found and skinned the lion, an old male, with the canines worn flat at the points. He must have been hungry, as his stomach was absolutely empty."

The certificate of authenticity states:—"Komatie Poort, Nov. 3, 1903. I hereby certify that the accident described did occur to Game Ranger Wolbuter on August 26, 1903, in the Game Reserve, that Wolbuter killed the lion, that carried him off, with an ordinary sheath-knife, and that Wolbuter is still in Barberton Civil Hospital recovering from his injuries. Alfred E. Pease, Acting Resident Magistrate, Barberton District, Transvaal."

"It was down in Texas several years ago that I came across the greatest dog I ever saw or heard of," remarked Phil B. Bekeart to a coterie of fellow sportsmen who were discussing the field trials one day this week. "The animal belonged to an army officer friend of mine, and was the greatest quail dog you ever saw. We have taken that dog out frequently and he would never go wrong, and would point quail in the most unlooked-for places. One day as we were walking into town from the army post where my friend was stationed, a well-dressed stranger passed us. Immediately the dog stuck his tail in the air and assumed the attitude recognized as 'pointing.'"

"It was some time before we were able to determine what he was pointing, but finally we decided that it was the stranger, which proved to be correct. We called to the man, and asked him if he had any quail about him, or if he had eaten any quail, explaining why we asked. He said he had nothing of the kind and did not remember having eaten any for some months. Turning to my friend, I said:

"Your old dog has gone wrong."

"Not a bit of it," he replied. "That dog is right, and I'll bet you \$10 he is."

"I did not see then how the bet was going to be settled, but took it up, anyway, and we continued on to town. We went to the biggest hotel in the place to get some refreshments, and there saw the stranger we had met on the road. My friend asked the clerk who the stranger was, and the clerk pointed to the register. As soon as my friend saw the name he gave a shout and called me to come over there."

"Give me your money, my boy," he exclaimed. "That dog knew what he was doing when he pointed that man."

"To satisfy myself I glanced at the register and saw the stranger's name. It was 'Robert F. Partridge!'"

Winners of Field Trials, 1903.

[Concluded from Last Week.]

VIRGINIA FIELD TRIAL ASSOCIATION—Chase City, Va., November 30. Messrs C B Whitford and B Tignor, judges; Chas R Cooke secretary. 2nd annual trials.

Members' All-Age Stake, 16 starters (8 Pointers, 8 English Setters).

Winners—1 Sam Jingo (Plain Sam-Jingoline), white and liver Pointer dog; Dr Leigh Buckner, owner and handler. 2 Regina (Summer's Kent-Superius), liver and white Pointer bitch; R L Gill, owner and handler. 3 Bob's Tony (Tony Boy-Virginia Reel II), white, black and tan English Setter dog; E P Wilkins, owner and handler. 4 Sallie Kinloch (Kinloch-Emma Sargent), black, white and tan English Setter bitch; C B Cooke, owner and handler.

Members Derby, 14 starters (7 English Setters and 7 Pointers).

Winners—1 Jack (Captain Tony-Pink R), black and white English Setter dog; R A Croxton, owner and handler. 2 Blue Bonnet (Sport's Boy-Sallie Kinloch), black, white and tan English Setter bitch; C B Cooke, owner and handler. 3 Hanover Blythe (Jingo's Light-Bang's Pearl), white and liver Pointer bitch; R L Gill, owner and handler. 4 Spotswood Bird (Governor Spotswood-Cy's Daughter), white and liver Pointer bitch; J R Purcell, owner and handler.

INDIANA FIELD TRIAL CLUB—Clay City, Ind., December 1. Messrs W J Baughn and W Nattakemper, judges; C F Young, secretary. 2d annual trials.

Members' Stake. Purse, sweepstakes, three moneys, 50, 30 and 20 per cent. 4 starters (3 English Setters and 1 Pointer).

Winners—1 Fairland Lady (Kingston-Mark's Ruby), white, black and tan English Setter bitch; G G Williamson owner, J H Johnson handler. 2 Rap's Ranger (Rip Rap-Eldred Polly), white and liver Pointer dog; C A Paetzle owner, J H Johnson handler. Equal 3d Lady Hope (Count Greystone-Annette Jane), white and orange English Setter bitch; Charles Ehrbar owner and handler. Equal 3d Joe's Count (Joe Cumming-Lady's Belle), white, black and tan English Setter dog; G G Williamson owner, J H Johnson handler.

Derby. Purse \$200. \$150 to first, \$60 to second, \$40 to third. \$5 forfeit and \$5 to start; 25 nominations, 8 starters (7 English Setters and 1 Pointer).

Winners—1 Trixie's Pearl (Sport's Gath-Kingston's Trixie), white, black and tan English Setter bitch; C D Stuart owner, Asher Cady handler. 2 Cuba Von Rip (Von Rip-Belle of Orange), white and black Pointer bitch; Jack J Duke owner, John T Mayfield handler. 3 Duchess Greystone (Count Greystone-Duchess O'Neal), white and black English Setter bitch; Charles Ehrbar owner and handler.

All-Age Stake. Purse \$140. \$70 to first, \$42 to second, \$28 to third. \$5 forfeit and \$10 to start; 15 nominations, 6 starters (4 English Setters and 2 Pointers).

Winners—1 Count Greystone (Count Ladystone-Fairland Ruby), white, black and tan English Setter dog; C F Yung owner, Charles Ehrbar handler. 2 Trixie (Jingo's Two Spot-Busy Bee), white and liver Pointer bitch; George I Nunn owner, John T Mayfield handler. 3 Sandy K (Koran K-Midnight Gipse), white and chestnut English Setter dog; C D Stuart owner, Asher Cady handler.

CONTINENTAL FIELD TRIAL CLUB—Thomasville, N. C., December 7. Messrs Wm R Tillman, R Huntington and A D Lewis, judges. John White, secretary.

Derby. Purse \$500; \$250 to first, \$150 to second, \$100 to third; 19 starters (16 English Setters, 3 Pointers).

Winners—1 Oakley Hill's Pride (Oakley Hill-Gleam's Maid), white, black and tan English Setter dog; Mrs John Cowley owner, Er Shelley handler. 2 Pioneer (Count Whitestone-Bonnie Doone), white and orange English Setter dog; Titus-Hoover Kennels owner, Er Shelley handler. 3 Geneva's Speed (Jack-Champion Geneva), white, black and tan English Setter bitch; P Lorillard owner, Wm. Tucker handler.

All-Age Stake. Purse \$500; \$250 to first, \$150 to second, \$100 to third; forfeit \$10 and \$20 to start, 30 nominations; 11 starters (9 English Setters, 2 Pointers).

Winners—1 Cowley's Rodfield's Pride (Rodfield-Sport's Belle), white and orange English Setter dog; John Cowley owner, Er Shelley handler. 2 Jessie Rodfield's Count Gladstone (Lady's Count Gladstone-Jessie Rodfield), white and orange English Setter dog; Jessie Sherwood owner, Er Shelley handler. 3 Lea, Cincinnati's Pride-Ruth T Etol, white, black and tan English Setter bitch; Dr J H Parker owner, Luke white handler.

ALABAMA FIELD TRIAL CLUB—Huntsville, Ala., December 14. Messrs W B Maddins, W M Hundley and W B Hamilton, judges.

Derby, Purse, entrance fees, 50, 25 and 15 per cent. Forfeit \$3 and \$5 to start; 7 starters (5 Pointers, 2 Setters).

Winners—1 Styx (Jingo's Light-Nellie O.), white and liver Pointer dog; C F Eastman, owner and handler. 2 Gipse Stone (Victor Okaw-Ruby Danstone), black white and tan English Setter bitch; D C White owner, W D Gilchrist handler. 4 Ightfield Don (Ightfield Shott-Alix Druid), white and liver Pointer dog; D J O'Connell owner, W J Allen handler.

All-Age Stake, Purse, entrance fees, 50, 25 and 15 per cent. Forfeit \$3 and \$5 to start; 8 starters (5 English Setters, 3 Pointers).

Winners—1 Rip (Young Rip Rap-Belle of Erin), white and liver Pointer dog; Johnson & Cox, owners, B Brooks handler. 2 Tony Boy's Kate (Tony Bend-Nellie Harris), white, black and tan English Setter bitch; H H Mayberry owner, W J Allen handler. 3 Rip's Lass (Young Rip Rap-Jingo's Lass), black, white and ticked Pointer bitch; Garth, Keller & Rison owners, W D Gilchrist handler.

Free-for-All Stake Purse, entrance fees and \$50

contributed by members; 60, 30 and 10 per cent, forfeit \$5 and \$10 to start; 7 starters (4 English Setters and 3 Pointers).

Winners—1 Tony Boy's Kate (Tony's Bend-Nellie Harris), black, white and tan English Setter bitch; H H Mayberry owner, W J Allen handler. 2 Rip's Lass (Young Rip Rap-Jingo's Lass), black, white and ticked Pointer bitch; Garth, Keller & Rison owners, W D Gilchrist handler. 3 Andy S (— — —), liver and white Pointer dog; W W Cowden, owner and handler.

DOINGS IN DOGDOM.

Jack Bradshaw of Woodlawn Kennels will leave for the East next week on a business trip. During his visit in New York he will attend the W. K. C. show. We know that his reception by the Knickerbocker talent will be a cordial one, for he is not unknown to the doggy fellows who are "in the go."

The Selwonk Kennels at Magnolia, Mass., and owned by Mr. L. J. Knowles, and of which George S. Thomas is the manager at the reported salary of \$5000 a year, will be broken up and all the dogs sold without reserve. The lot includes Ch. Ivel Doctor and Ch. Selwonk Floradora, two of the best Bulldogs in this country. The list comprises some cracks in French Bulldogs, Bostons, Wirehairs, Welsh, Irish and Manchester Terriers. These dogs have won over 500 first and specials during the last year. This sale is one of the most notable kennel dispersals up to the present time.

Wandee Kennels has lost the Fox Terrier Ch. True. The dog did not long survive his return from the East, he succumbed to hemorrhages last week. Mr. Harley has just purchased the good stud dog Norfolk Trueman from N. H. Hickman.

Alta Rachel, really one of the best St. Bernard bitches we have on the Coast, was found the other day in a Richmond district stable in almost a starving condition. She was so weak she could not stand. She is now in the hands of Mr. W. W. Wallace and is getting along nicely. It was a case of cruel neglect on the part of the person in whose charge the poor dog had been left. Le King, Mr. Wallace states, has put on 30 pounds weight since the December show and is in better shape than ever before.

Mr. George Raper has not been long in replacing the famous wire-haired Fox Terrier, Baby Coast-guard, which he recently transferred to an American buyer in exchange for a big cheque. He has now purchased from Mr. Yeoman, Rambling Major, who won the championship at the Kennel Club Show at the Crystal Palace for the best wire-haired Fox Terrier dog in the show, and was also placed reserve to the curly-coated Retriever, Belle Vue Surprise, when in competition for the special for the best sporting dog of any breed, on which occasion Mr. Raper offered to give \$150 for him. Mr. Yeoman, however, declined to part with the dog, as it was the first big winner that he had ever exhibited, and he sent him to the Fox Terrier Club Show at Cheltenham, where he was again successful in winning two or three first prizes. Mr. Raper was, however, determined to complete the purchase, and eventually persuaded Mr. Yeoman to transfer the animal in exchange for something like a couple of hundred pounds. This was a big figure to give for a puppy not yet twelve months old, but he is undeniably well bred, as he is by the Duchess of Newcastle's Commodore of Notts, and his dam, Rambling Fairy, is descended from the celebrated Tipton Slasher, one of the best wire-haired terriers that ever lived.—*English Shooting Times*.

Promises of the best show ever given in Portland were made at the annual meeting of the Portland Kennel Club held last month, officers and members alike joining in a discussion of plans for the future. The newly elected directors are a unit in declaring that they will do their utmost to see that the bench show is a credit to the club and to the city. Work upon the coming show, which will be held in April, will commence at once including not only the gathering of cups to be offered as prizes, but for a large list of entries.

It was an enthusiastic meeting that was held at which reports of the out-going officers were received and a number of applications voted upon. Officers for the ensuing year were elected as follows: J. A. Taylor, president; E. F. Willis, vice-president; T. E. Daniels, secretary; William Goldman, treasurer and Dr. J. Smith, F. H. Fleming and Frank F. Watkin, to compose the board of directors. Auditing committee, F. H. Fleming, J. A. Taylor and W. M. Davis, chairman.

Secretary W. W. Peaslee reported the club to be in a good financial condition, despite the fact that some \$90 was lost in the last bench show. There is at present a membership of 225, as against 180 for last year, with cash on hand \$689.33.

Dr. A. E. Tucker, the retiring president, made an address. He called attention to the fact that three years ago, when the club gave its show, there were a large number of entries, while the number has since dwindled chiefly because all the people could not gain prizes. In closing he said:

"Last year's show, however, was the best show we ever had, although we lost \$90, instead of making a financial success. The dogs were better and the entry list was not small. The prizes were all that could have been expected, and the show was the best bench show that has ever been held anywhere in the Northwest."

In speaking of the proposed affiliation with the American Kennel Club, Dr. Tucker stated that the Portland Kennel Club was now an assured success, as the successful shows of the past had demonstrated beyond a doubt that it mattered not whether the club was a member of the American Kennel Club or the Pacific Kennel League.

Pit Dogs.

In both England and America for ages dog fighting has been a popular sport, and the custom of breeding and matching dogs and fighting them in the pit, while contrary to law, is practiced in many cities throughout the United States.

The first dog fight of importance in the United States occurred about 1817, and a description of all the famous canine battles since then would fill a large sized volume indeed.

The fighting dog is neither the Bulldog nor the Bull Terrier. He is a "take down" of the two. That is, the Bull Terriers are bred from the full-blooded, bow-legged, heavy-faced English Bulldog and the thoroughbred Foxhound, and the best come from the north of England. In the breeding of these animals a high-spirited hound is selected, and, as she is somewhat of a fighter herself, her offspring retain all of the father's and some of the mother's ferocity and vigorous nature and inherit the mother's brains. It is claimed as a scientific fact that the real Bulldog has the smallest brain capacity known in the animal kingdom.

The "pit dog," half hound and half Bulldog, possesses intelligence (much required in the pit), strength and endurance in equal qualities but he has the weakness of his hound mother—that of "letting go" when he should hang to his antagonists.

To overcome this defect the Bull Terrier is again bred back to the Bulldog proper, and the combination thus obtained—two-thirds Bulldog and one-third hound—is termed the "pit Bull Terrier." They are strong, willing fighters, and possess much science, frequently changing a bad for a good hold during the progress of a battle, when their full-blooded grandfather would hold to his death.

The coloring is varied—pure white, white and brindle, solid tiger brindle, lemon and white, but never black or with black markings whatever. The weight averages from twenty-five to fifty pounds, and the best fighters known scale near thirty-five pounds in pit condition.

These dogs are trained for the pit much in the same manner as are the prizefighters trained for the ring, or horses for the turf. They are dieted, rubbed, sweated (a dog sweats only from the mouth), walked, run on a treadmill, blanketed, etc. They are fed sparingly until they are brought almost to the weakening point, when their diet is changed gradually and they are built up in muscle with strictly first-class beefsteak, cooked rare, sponge cake soaked in wine, claret preferred, until the day before the fight, when they are "dried out." This consists of keeping the dog free from food or drink for at least twelve hours, at the expiration of which time he is fed a little sponge cake and wine, and given a cup of cold tea to allay any fever which might be noted as a result of his hard training.

On the day of battle the dogs are placed in blankets and driven to the pit. Here they are washed in the presence of a selected referee. The washing also takes place where all bettors can satisfy themselves that no pernicious drugs, such as carbolic, strychnine or arsenic soap, has been placed on either animal. No dog will take hold of another where such soap has been rubbed. Soda is added to the water as a preventative against such practices.

The washing completed, the dogs are dried with clean approved towels, and are then ordered to their corners. They are generally muzzled until the words to "let go" or "loosen dogs" is given by the referee.

The pit is generally made of rough boards three feet high, sixteen feet long by ten feet wide. The bottom is usually covered with soft carpet.

Through the centre of the pit a line is drawn, which is termed the "scratch."

The seconds then take up their positions in their respective corners. The referee (who by the way, is all powerful and must be a man of great determination, good judgment and integrity), orders the dog handlers searched. This is done further to prevent any trickery on the part of the handlers, who are frequently well versed in "rubbing," "doping," etc.

All ceremony concluded, the dogs are ordered released. Up to this time the animals are kept with their tails toward each other, as, if they faced each other their constant tugging and struggling would work harm to their "wind." When released they turn quickly, and with tails wagging, fly at each other, meeting on or close to the "scratch." Both take hold and the fight is on.

There are various rules governing the alleged sport. Each American city has its own rules and its canine representative by whom the local sports lay great store.

The general fighting rules call for five minute rounds with three minutes intermission for sponging, fanning, etc. If the fight be a finish affair, this is continued until one or the other dog refuses or is dead. After the first scratch each dog must cross the line and attack his adversary in succession, and the dog stopping on the way or refusing to leave his corner is considered the loser.

Dog fighting, while not as brutal as the uninitiated might be led to suppose, frequently results in the death of one or both of the animals, but this rule does not hold good in all cases. Pilot, a Cincinnati canine, fought twenty-eight battles without killing one of his doughty little enemies, and he finally died of old age.

If the wag of a dog's tail can be ascribed to pleasure, then nine-tenths of the fighting dogs love the sport as much as do their masters. During the progress of a battle both dogs frequently wag their tail throughout the contest and spring to the attack with a cry resembling an exclamation of joy as much

as hate. They are entirely fearless and will attack a horse, cow or in fact any animal.

The present champion fighting dog in this country is Bob, owned and bred by John Robinson of Fortuna, Ariz. He is fifty-two pounds, lemon and white, and has killed eight dogs, in his eight battles.

Breeding and fighting dogs is not confined to the plebeian classes alone. Men of high public, social and financial standing purchase, import, breed, maintain and employ experts to handle them, and large sums of money are put up on such contests by this class of sporting men.

The American bred pit dog has proved himself to be far superior to the English product, and has invariably won when matched against his Cockney counterpart.

The foregoing article taken from a St. Paul exchange is of some little interest, but in a few respects we believe the writer is a bit vague and inaccurate to a certain extent.

Fighting dogs have been bred in England for many years back—the Beagle and Bulldog cross is a standard cross. Much of the good fighting qualities, however, it is claimed, emanate from the white English Terrier (a strong cross in the Bull Terrier), the latter breed is one that is noted for its pugnacious tenacity in a scrap. Bulldogs at one time were the fighting dog of the day. One of this breed has the faculty of holding on with a death grip once its jaws are fastened on an adversary. The Bull Terrier is the more active and full of resources, which prove that he can use his brain. A good fighting Bull Terrier will work his hold on another dog, shifting from place to place until he feels the other dog wince, then he goes into the vulnerable spot on leg, hody, neck or belly and will cut in and worry his antagonist until the hold is broken or the under dog worried to death. Dogs have been killed in a pit that did not show any other evidence of damage than just the incisions of the teeth where the death hold had been taken. The Bull Terrier is dead game without a doubt. A dog a bit down faced has better punishing jaws than one with straight or pig jaws. Champion Woodcote Wonder, who is a scrapper by the way, may be mentioned as a dog with a good punishing jaw formation.

There are many styles of training dogs for battle, far too numerous for us to touch on here. We might mention two methods used for wind and speed. A revolving table upon which the dog is placed, harnessed and securely fastened so that he can not get away from one spot. Nearby is a caged rat or a cat. The dog will make an effort to get at the smaller animal. The more he scrambles, the faster does the table revolve, the dog meanwhile being held in practically one spot but going like the wind. Another method is where a sack is partially filled with straw and suspended two or three feet from the floor. In the bag is placed a cat. The dog has a square muzzle on, the bag is given a hard enough bunt to make the cat yeow! and the dog is turned loose and literally makes a punching bag of poor Tabby in his futile but vigorous efforts to get fur.

As a preliminary to a combat the handlers "taste" each other's dog. Should anything unsatisfactory be found by one or the other in the flavor of a dog's coat, then a demand is made that the suspected dog be washed. Tasting in itself was quite an art among old time handlers. The main dope these gentry used for a dog's hide was nothing but ordinary red pepper, but it was potent; for a dog when he got a mouthful of capscum would invariably break away and sneeze—and then the jig was up for him. Dogs are sometimes "tasted" after washing as an extra precaution.

The searching of the handlers by the referee is a hit unnecessary, for what with keeping his dog ready in its corner for the call of time, and sponging and fanning between rounds, it would be a pretty clever juggler who could do very much at so busy a time and in plain sight of referee and spectators, and they interested to the extent of a few bets.

The writer before referred to is somewhat misleading in the location of the "scratch." The dogs are "let go," each from its respective corner and fly at each other. The initial place of meeting in the pit can be anywhere so long as they both get together. The first dog that turns his head away from his adversary is at "fault." They are then ordered to their corners by the "ref." The dog at fault has to "scratch." This line is a semi-circular mark drawn on the floor, or generally cut through the sawdust or tanhark with the ready toe of the handler's shoe, and in each dog's corner not more than a foot or two from where the dog is held back by his handler. The dog to "scratch" must come over to his rival's corner and tackle him on the scratch line. After the first round the dogs scratch turn and turn about. If a dog falters, stops or turns, or does not get to the scratch line in two seconds he loses. Scratching is done to show a dog's gameness. The old timers would not breed to dogs that failed to scratch. Instances are known where injured dogs have crawled over from their own corner to scratch; dogs with broken legs have also gamely gone at their adversary. In a case of this kind bets have been made that an injured dog wouldn't "scratch" and which were won by the wise ones who knew their dog's mettle. Clever handlers have a number of resources to divert or technically stop an on coming dog.

The prevailing rules for a fair scratch and turn fight are the Police Gazette rules. The intervals between rounds are, we believe, one minute, time is counted from when the dogs are separated.

A famous local dog pit in the early '60s was Con Mooney's Pony Express saloon on the corner of Commercial and Kearny streets. The champion dog of that day was his unbeaten Irish Mike, a dog who always had many pounds the best of a fight—you could take him or leave him alone.

The late John P. Dalton's Napoleon Jack was a famous canine gladiator a decade or so ago. His fight with the English dog Crib made history in "pit" annals. Jack's big fight took place in New Orleans; it lasted two hours and forty minutes, and

the largest purse ever hung up at a dog fight went to Jack's backers. His adversary was killed in the pit.

A memorable fight here at Canavan's Park was that between Napoleon Jack and Boston Ben, a dog brought out here by "S. A." Riley, a sporting char-

A Fine Pistol Target—96 Out of Possible 100.
(Half Size.)

acter of those days. Jack fought Ben to a standstill and Ben was not a had goer by any means. The surprising feature of this contest was that the winner was over ten years old. He was an all white dog and a good fair specimen of the breed and could have won on the bench easily among the Bull Terrier classes that were shown a few years ago.

Few, if any, fighting dogs ever showed the head and ring generalship of old Jack. He won most of his battles in short order and was never defeated. Generally he would work "like lightning" for ten minutes or so and at other times he would "jog" his adversary along until he saw the opening he wanted, then in he would go slap bang and it was all off with the other dog. He was also very clever in getting a grip and then holding the other dog away; he would let him do all the tugging and hauling until he was spent. Then when he had his dog winded, the finale came in jig time. One of his favorite tricks was an ear-hutt hold. He had jaws powerful and holding as a vice and when he got a dog in that situation he could hold him off and worry his soul out and the hung up dog could not get at him to save his canine life.

The white old warrior, we are sorry to say, passed his last days neglected and uncared for. Surely an unmerited reward for a dog who in his palmy days of a victorious career in the arena had the best of everything a dog needed and likewise—a strong following of sports who staid with him just so long as they made dollars out of his prowess. He died in the stable of a Western Addition fire-engine house. His skin was afterward stuffed and mounted and is in the possession now of a resident of this city.

The bench show Bull Terrier, so called, is a game animal from the ground up. It will be remembered, that Hink's Kit, was taken from the bench after winning an English show brought to a pit and fought a winning fight.

Dog fights are not without their brutal phases. Combats are innumerable where one or both dogs have been cruelly punished.

There are many so-called fighting dogs in San Francisco and vicinity, but perhaps now none of real championship form.

In the '60s and '70s dog fighting was a sport that had a strong following in this and nearby cities and many hot contests have been pulled off, generally at one or other of the well known roadhouses of those days. At present, while we now and then hear of a pit dog and a "turn up," the sport has been discouraged to so great an extent that these affairs are conducted with the greatest secrecy and in the presence of but a limited audience.

The Coast field trials are on at Bakersfield this week. The winners of the Derby are Stockdale Kennels' Pointers, Cuha's Glenwood and Cuha's Ivywood, first and second. Equal third, H. W. Keller's English Setter Somhra and W. W. Van Arsdale's Keepsake. The Derby was finished on Tuesday evening. The purse amounted to \$645 (50, 30 and 20%), besides there were three handsome silver cups. The All-Age started Wednesday. Dry weather conditions prevailed early in the week, but there was a decided improvement later on. A full report of the trials will appear next week.

The suggestions made last week relative to a state circuit seem to have made a favorable impression. Santa Barbara is now in line for a show. Mr. R. Armstrong, a prominent fancier of that city, states that there is every possibility of holding a successful show in Santa Barbara.

The San Francisco Kennel Club held a meeting last Monday evening. The Pacific Fox Terrier Club will meet next week.

Duck and Quail Outfits.

The demand at Skinner's keeps up for sportsmen's outfits, ammunition and guns. A large and new stock of goods has been added to fill the demand for hunting suits, rubber boots and hunters' footwear; canvas and folding wooden decoys, gun cases and a new design of leather-covered shell boxes. Peters Factory Loaded Shells are unequaled. Skinner's place is 801 Market street. You can get anything there you need for duck or quail shooting. Send for a catalogue, if you haven't the time to come and try a mail order.

A Fine Pistol Target.

During the month of September revolver and pistol marksmen belonging to the United States Revolver Association shot for the association's championship and medal trophies, on recognized open air ranges. As usual some of the best targets were made after the record targets had been finished—always so elating (?) to a marksman.

One of the targets so made now stands as the record pistol target for the Chicago Sharpshooters' range, and was shot by E. L. Harpham during the match for the pistol championship of the U. S. R. A., in which match he scored 445 out of a possible 500.

The target, shown herewith, reduced to half size, was shot immediately after the match, when the strain of trying to make the highest score was off. It was shot in the presence of W. T. Church and G. Springsguth, at 50 yards, 22-caliber single shot pistol, Paine sights, 2½ pounds trigger pull, and U. M. C. long rifle cartridges. The score, as shown, is 96, 10 shots, 50 yards.

The only perfect targets we call to mind, made with a 22-caliber pistol at 50 yards, are those of Charles H. Taylor of the Harvard Pistol and Rifle Club, who scored 100 in 10 shots, 50 yards, in Philadelphia, 1901, and Thomas Anderson of Boston who, at the Walnut Hill Range, a year later, did the same thing. A 96 target is hard to beat. Who can do it?

The "ad" of Glen Tana Stock Farm Kennels on page 15 is of interest to Collie fanciers. Mr. Griffiths writes that "Vesta whelped on January 2d, nine puppies (4 dogs), all sables with white collars. Every litter she has she throws one or two prize winners."

The English Fox Terrier Club is to be commended for two important resolutions in connection with the showing of dogs under judges who have recently sold a dog thus exhibited, and also concerning the tampering with dogs' coats. They are the following:

1. "The committee of the Fox Terrier Club, although aware that there is no law against a judge judging a dog recently sold by him, or against an exhibitor showing a dog under a judge from whom he has recently purchased it, view this practice with very great disfavor, because, in their opinion, such a practice is against the best interests of dog shows and is calculated to lead (and they understand, has led) to much abuse."

The committee has further hinted that a continuation of the latter practice will leave no other course open to them but to approach the Kennel Club with a view to legislation on the subject. This difficulty must, however, always arise so long as judges sell dogs, unless a rule is passed by the Kennel Club that a dog must not be exhibited under the person from whom it has been purchased until six months after the sale.

2. "In consequence of the practice of tampering with the coats of wire-haired Fox Terriers, by the use of sticky substances, the Fox Terrier Club committee beg to call the attention of judges to this reprehensible practice, in the hope that they will call in the advice of the veterinary inspector in cases where there is ground for suspicion, with a view to lodging an objection."

It is reported that the next show of the London Fox Terrier Club is to take place on April 19th and 20th at the Crystal Palace, when Mr. J. C. Tinné will judge the smooth variety, and Mr. R. Vicary the wire-haired.

Steelhead fishing in the coast streams is unusually good at present. A run of fish in Russian river has attracted the attendance of a large number of local anglers who are having a glorious outing now at Duncan's Mills. Reports from Eel river, the Gualala, from Scotts and Waddell creeks state that the game fish are much in evidence. The run this year is a bit earlier than usual and the fish are nearly all large ones. Paper Mill creek tide waters are also full of steelheads.

Salmon fishing on the Santa Cruz side of Monterey bay is excellent just now. A big run of fish, after the immense schools of sardines, started in last week. Boats have been taking from 15 to 40 fish daily—on spoonhooks.

The San Antonio seems to be inexhaustible, last week Al Cumming caught 40 striped bass that weighed 240 pounds all told.

Duck shooting in this vicinity is of a patchy order. The hay is covered with thousands of canvasback and bluebills, but they are very wary. Marsh shooting generally seems to be a bit on the wane.

It is not often that sea lions appear in the rivers as far north as this county, states the Sutter County Farmer, but this season several have been seen in the upper river. One day last week Charles Ulrey and James Murphy, two hunters, heard what they thought was a dog barking in the tules on the Browning land southwest of Sutter City, and on investigating the disturbance found a huge sea lion stranded in the shallow water. When they approached him he showed fight and got around quite lively on his big flippers until they finally had to shoot him. The lion was eight feet long and weighed over 500 pounds. His skin weighed 150 pounds and the fur was fine and glossy. He had come up the Sacramento river on a fishing excursion and wandered out into the tules. The water receding left him stranded and unable to get back.

Strike!—if they don't give you Jackson's Napa Soda when you ask for it.

Scene at Burlingame—San Mateo Hunt Club.

Poultry Pointers.

The point of using pure bred, healthy and vigorous male birds cannot be too strongly impressed.

Your laying houses should be well built, dry and well ventilated, but see that there are no drafts.

In any man's orchard poultry always more than pay their way from the simple fact of their destroying curculia as well as other insects detrimental to all fruit trees.

The three great evils to the handling of poultry is had ventilation of the buildings, filthiness and over crowding of birds.

In the fall and spring is the best time to make a start and do this with stock.

With poultry it is best to go slowly and surely at first, and be careful to make the beginning with good stock, for a great deal depends upon this first starting in the business.

If your chicks or ducklings are carelessly handled in the first few weeks of their lives, they will never get over it.

As to the best breed of poultry this depends invariably upon who is behind it.

The more birds you have in one building the more attention should be given them in the way of cleanliness.

Do not neglect to chop some onions for your poultry, for they will eat them with a great relish.

THE FARM.

Controlling Egg Fertility.

Many are now thinking about filling their incubators with eggs and are wondering how and where to get enough fertile ones to do the business.

If you raise your own it should not be a difficult job to have them fairly fertile.

Do not force your hens all winter trying to make an egg record and then expect a lot of fertile eggs when the breeding season opens in the spring. Just keep your fowls healthy, do not feed them too much stimulating food nor get them too fat. If they lay a few eggs it will do no harm, but do not force them with green bone, mashies, etc., until you want eggs for hatching, then do not overdo the matter.

I always have noticed that we get the most fertile eggs after the hens have been out on the ground for a week or two. If we want fertile eggs early we must follow these natural conditions as nearly as possible, supplying food that will take the place of bugs, worms, grass, etc.

Some form of meat meal or green bone, also clover meal and cabbage or apples in addition to a variety of grains will do this.

Feed a mash once a day. Fowls should not be compelled to grind all of their food, they do better and lay more and stronger eggs when part of it is done for them.

I am sure two-year-old hens will give more fertile eggs than younger ones and their eggs will hatch stronger chickens.

If you mate two vigorous cockerels to about twenty-five hens, keeping one shut by himself, and changing them every day or two it will assist in getting more fertile eggs, as in this way all of the hens will mate to either one or the other of the males.

In mating in this way, have cockerels brothers and as near alike as possible in size, shape, color, etc., for best results. Gather eggs promptly on cold days, never letting them get chilled, and do not keep them over ten days before incubating.—
E. E. Lawrence.

Oat meal or rolled oats can be fed to advantage to growing chicks, but we advise not feeding it too freely.

Smoking Pork.

The big old fashioned smokehouse may be useful as a storing place for plunder, but they are too large to smoke meat successfully unless one is willing to devote a good deal of time and fuel to the business, writes F. M. Wood in the *Ohio Farmer*, and when an old building of this kind has a few loose boards or missing ones to give the smoke a chance to escape, getting the meat smoked seems like an endless job to the women and children who often have this work to do.

Many farmers in this section of the country are constructing very small buildings for this purpose, just large enough to hold the meat after it is hung, so the pieces will not touch. They are made as tight as possible. A little smoke goes a long way in a building of this kind. It is important that pork should be well smoked. The rich brown color that is given by thorough smoking gives the meat an attractive look. Then it tastes, keeps and sells better. Sometimes the farmer has a surplus of smoked side meat, and buyers prefer meat that is well smoked. We find that an old heating stove that has outlived its usefulness comes handy to smoke meat. It is worth more for this purpose than the junk man would give us. As to fuel there is nothing better to make a big volume of smoke than new, clean corn cobs. When they show an inclination to blaze too much we dip a few of them in water. The wet cobs keep down the fire and furnish a lot of smoke.

We like to smoke our meat early in the season in order to get it sacked and put away before the troublesome bugs and frisky flies make their appearance. We tie each piece tightly in paper flour sacks, and insects never bother. The paper sacks protect the meat better than the muslin sacks so often used for this purpose. We always purchase our flour in fifty and eighty-five pound bags. When emptied we preserve them for this purpose. The fifty pound sacks are just the right size for large hams and shoulders, while the smaller pieces fit nicely in the smaller sized sacks. The sacks containing meat should be hung in a dark, cool closet or room where the air will reach them on all sides, then they will keep perfectly during the hot summer months. If meat is piled up on a shelf, or in a box, or hung so the pieces touch, it is sure to mold badly in warm, rainy weather.

There are many different and successful ways of putting away smoked meat for summer use. Some put the meat in a large box and fill in between the pieces and in all the crevices with wood ashes, bran or oats, with a thick layer of whatever filling is used on top. With any of these methods care must be used to put enough of the filling between the pieces so they will not touch. A hot, stuffy room is a poor place in which to keep meat. There must be good ventilation where meat is stored. A good way to keep home cured dried beef is to pack it in dry salt. Meat that is properly cured, smoked and carefully put away will keep until hog killing time rolls around again. We think those who complain of meats spoiling or becoming inhabited must be careless in their methods.

We have no serious objection to many of the harmless insects who ply their vocation, without serious inconvenience to any one. But there is a tribe which whet their lances and insist upon visiting us in the silent watches of the night and drawing from us our life blood. We have seen many remedies suggested to get rid of them. Here is another: Seven ounces turpentine, 1½ ounces camphor, 1½ ounces corrosive sublimate. Apply with a brush, every week, for three weeks. This is said to be a sure cure.

Nearly every breeder needs to practice the economy of manufacturers in saving and planning and utilizing what used to go to waste. Modern methods, applied to almost any part of farm work, will render it profitable.

The Life of a Farmer.

The farmer is a happy man—
Sometimes.
He lays a wealth of dollars up,
And dimes.
He has no cares to worry him
Or fret
His soul, because he never is
In debt.
When he is hungry all he has
To do
Is to go out and blithely dig
A few
Potatoes, or to pick some fresh
Green peas.
His life is full of simple joys
Like these.
He sees the sun rise nearly every
Day.
Oh, life to him is only sport
And play!
He does not have to think about
His dress;
He gets along with one good suit,
Or less.
He wife so seldom has to go
In town
She only needs to have one ging-
Ham gown.
And he is never tortured with
The blues,
Because the children never need
New shoes.
Oh! life is just one round of joy
And fun
To farmers. How I wish that I
Were one!
I'd blithely lay the dollars up,
And dimes,
Just as the happy farmer does
Sometimes. —Selected.

Advice on Feeding.

Professor Henry of the University of Wisconsin gives the following advice regarding grinding feed for stock:

"The subject is a difficult one to discuss owing to the great variety of conditions existing as to both grain and animals. Directions are here given which may serve to guide the feeder in his practice. For horses which are out of the stable during the day and worked hard all grain, with the possible exception of oats, should be ground. For those at extremely hard work all grain should be ground and mixed with chaffed hay. For idle horses oats or corn should not be ground, nor need the hay or straw be chaffed. A cow yielding a large flow of milk should be regarded as a hard working animal and her feed prepared accordingly. Fattening steers and pigs may be crowded more rapidly with meal than with whole grain, though there is more danger attendant upon its use.

Sheep worth feeding can always grind their own grain. In general idle animals and those having ample time for mastication, rumination and digestion do not need their grain or roughage prepared as carefully as do those with only limited time for these essential operations. Experiments quite generally show increased gains from grinding grain, but in many cases they are not sufficient to pay the cost of grinding."

The New Way of Oiling Roads.

A new method of oiling roads is being experimented with at the Huntington Park tract in South Pasadena, which is said to make a pavement as hard as asphalt and one that will wear longer. The plan is to mix the oil and earth and then tamp and press it. The first step in the process is to plow up the road way and saturate it with water, which is followed by a thorough soaking with oil. Then a 2800-pound roller is run over the road way. There are long spikes on the surface of the roller, which serves the double purpose of packer and mixer. Then the road is treated again with water, oil and roller. After this a two-ton roller is run over the road. By this time it is as solid as a rock. It is then surfaced and is ready for use.—*Suisun Republican*.

The size and shape of the udder count for a good deal, but some milkers do not show much udder, while some very poor milkers have large, fleshy development of the mammary glands.

Breeding for Bone.

Export dealers in American draft horses insist on animals with good bone and blocky formation. The symmetry of a draft horse depends largely upon well distributed substance in all parts of the personality of the animal. The quality of inferior bone and substance is the natural inheritance of many of the draft horses bred in America, occasioned by the importation of sires of light bone formation. Dealers more ambitious to get rich quickly than to improve the quality of American horses brought over many inferior animals for breeding purposes. It takes several generations of methodical breeding to establish any family characteristic. The stallion with inferior bone, by crossing with mares of superior bone development, and then mating the progeny with sires of extra bone and substance, might in a few generations of consecutive breeding produce horses of the desired substance. The best breeders of Europe are particular to patronize stallions with strong bone and substantial personality. The strong bone of the Belgian, Shire and Clydesdale horses has been developed by methodical breeding and scientific rations during the period to maturity. The superlative quality of a breed can be largely nullified by injurious feeding. From the day the foal is dropped until maturity the ration should be adapted to building up a grand superstructure. In nearly all of the pronounced horse-breeding States the leading ration is corn, a grain rich in fat producing qualities, but deficient in properties that promote bone formation. With a medium bone as the natural inheritance of a foal, and reared principally on the ration of corn, the animal will develop into a cheap, light boned horse. Instead of corn the animal should be fed liberal rations of bran and oats that are rich in the elements stimulating bone formation. There is no reason why the American horse breeders can not equal or even exceed their foreign competitors in horse breeding, but to succeed they must follow the method of feeding adopted by the foreign breeders. Foreign bred horses are raised principally on nitrogenous foods, while the American bred horses are matured on feed deficient in nitrogenous constituents. The foreign bred horse is increasing in bone development, while in too many instances the American horses are degenerating.—*Spirit of the West*.

Defertilization of Farms.

The soil is so rich on many California farms that there are many owners who seem to think their land is inexhaustible. They will find ere long, however, their mistake, unless they return to the soil some of the elements that have been, and are being taken from it year after year. The *Chicago Stock World* says on this subject: "An Iowa man went down into New York State the other day and bought a farm for \$35 an acre. Originally it was fertile land, worth double what he paid, but generations of successive cropping had all but exhausted its fertility and rendered cultivation unprofitable. And there are thousands of such farms scattered all over the Eastern States seeking buyers. The tenant system is one cause of this alarming sterility and as tenants flee from skinned farms the real estate goes on the bargain counter simultaneously with his disappearance. This process has not been confined to the far Eastern States by any means. Indiana, Michigan and Ohio have suffered from it and Illinois is already infected. Wherever railroad tonnage shows a decrease in live stock the microbe of soil poverty is at work. It is this defertilization that explains why the Eastern farm has depreciated while Western lands have increased in value. Undoubtedly the greatest problem confronting the skilled agriculturist is the economical and profitable refertilization of denuded land. It

offers an attractive sphere for acquiring wealth. It has been said that any fool can spend money, but wisdom is needed to make it, and the axiom applies with equal force to the man who skins the soil. Eastern farms are depreciated because they have been robbed of their chief value and the improvident element that did the pilfering has of necessity moved on."

Raising Mules.

"Twenty reasons why the farmer should raise mules," is the title of a folder published by a breeder of Kansas. It is worth reproducing and is as follows:

1. They can be raised cheaper than any other stock.
2. Will go into market sooner than horses.
3. They are marketable at any time from weaning time (four months old) until incapacitated by old age.
4. Are less liable to contract disease than the horse.
5. Pasture a number of colts through the grazing season and you will find plenty of blemishes at feeding time. Mules prove the contrary and have few if any blemishes, and their value is not decreased by blemishes as a horse.
6. They are easy to raise, easy to sell and hard to blemish.
7. They instinctively avoid holes and dangerous places. A team of runaway mules seem to run more for sport than fright, and usually stop before damage is done, while a horse never stops until he is completely freed.
8. The mule is more steady when at work than the horse, less nervous and is not so liable to become exhausted, and trusty as to need no driver or lines.
9. Can stand heat better than the horse, are steady and can be relied upon.
10. Can stand more abuse and hardship than a horse, but will respond as quickly as the horse to good feed and kind treatment.
11. The profit in mule-raising is their quick growth. Are marketable at three years old. A horse colt can not be sold to an advantage until five. So the expense of two years' feeding and handling is saved.
12. No kind of horse flesh is more stable in price, excepting thoroughbreds or fancy specimens. Will bring more per pound upon the open market or cost less to produce in the actual value of food consumed and time and labor required.
13. There is always a steady demand for good mules. A buyer will always handle them. If there are plenty of mules raised in a section of a country there will be plenty of mule buyers. Mule buyers are not going where there are no mules to buy. In time of war in any country mules are always picked up at a high price and very highly prized. Why? Because they must have them. They endure all kinds of hardships.
14. Buyers make money by buying at weaning time, and by pasturing and feeding eighteen months have them ready for the market. Can be raised and handled easily as a lot of cattle and sheep.
15. One steer will eat as much as a team of mules. A good steer at three years old is worth \$70 to \$75. A team of mules at the same age (good ones) will sell from \$250 to \$300, having eaten no more feed.
16. Feed the same amount to a bunch of mules that you do to your hogs and see which will make you the most money.
17. A good cow fed to make butter, will consume as much or more feed than a team of mules from the time dropped until three years old.
18. As for line animals, they can not be beaten, and are being used on the farms more extensive for this purpose. Also in our large cities are being used exclusively for draying and heavy street work, standing the wear of the hard streets twice as long as a horse.
19. As they will not breed they were created for a special purpose, and that is, as true, honest, durable and valuable workers, taking the place of a team of horses and lasting much longer.
20. The reader will probably say: "Why not more mules raised?" Simply because in some localities there are no jacks to breed to. Good mules cannot be raised unless you breed to a good jack. If farmers could sell yearling horse colts at \$80 each they would be willing to buy all the stallions in sight at \$2000 to \$3000 each. Then why should they hesitate to buy jacks at \$500 to \$1000 each, when a jack has four times the service of a horse in his natural life, and lives to be almost twice the age of a horse?

Beef and War.

Wars are invariably productive of an increased demand for food supplies in the countries involved, consequently the prices of certain articles of foods, especially meats, rise in those nations from which the bulk of such supplies is obtained. It is therefore certain that the American beef trade will derive stimulation from the augmented request for beef which is sure to come in the event of an armed conflict between Russia and Japan. It has already been reported that the former country recently purchased a million pounds from an American pecking house for the commissary department of its army, and it was intimated by the Russian representative at the time of the purchase that his country would make larger drafts should it become involved in war. To what extent the price of beef would be influenced by the contingency in question no one may foretell, but a materially enlarged demand for American beef from whatever source will increase its price, and producers would share in whatever financial benefit which might accrue to our meat-making industry as a result of war between Russia and Japan.

Meat is the conquering soldier's staff of life. It is the material which supplies him with energy and force, gives him the power of endurance and puts into his blood and fiber the elements that make armies brave, courageous and victorious. Meat-eaters rule the world both in peace and war. For this reason the country whose meat-making industry has assumed such large proportions as that of the United States seems not only secure from successful invasion, but is in position to profit by wars between foreign powers. America is a large producer of meat and offers it for sale to the world to use as it may see fit—to feed soldiers or the apostles of peace. In the prosecution of Oriental wars the helligent nations must seek food supplies in the Occident, and should Russia and Japan come to blows large quantities of American beef and other provender would undoubtedly find their way to those distant climes.—*Breeders Gazette.*

Geo. F. Thompson, of the bureau of animal industry, writes in the *Farmers' Review*: In building up a flock of Angoras from common goats, the males must not be permitted to grow into bucks of breeding age; and even among the high grades there are comparatively few bucks to be retained as such for breeding purposes. They should be castrated early. The great majority of these wethers, especially if they are of the first or second cross, do not produce sufficient mobair of good quality to warrant flock raisers in keeping them. These should be converted into meat as soon as large enough. Those wethers and does which produce a fair quality of mobair may be retained for that purpose for a few years and then killed for meat. They are not, however, so good for this purpose as the younger animals. There is a deep seated prejudice, as has already been stated, against the use of goats of any kind for meat. This is founded upon ignorance rather than experience. The most ill-smelling Billy of the worst possible type is by many made the standard of goat meat for the whole goat family. As far back as Abraham's day we read of goats being used for meat (very likely Angoras), and this, too, when there were many cattle and sheep. Certainly no prejudice existed against them at that time.

It is announced that a New England man has succeeded in making a substitute for willow ware, tough and durable, which will supplant the German willow ware, of which we import millions of dollars worth annually. Whether this invention is a practical one or not, there is no reason why American farmers cannot raise all the willow rods which this country can consume in the way of baskets and willow work. Thousands of farms contain willow supplies or little streams which furnish excellent opportunities for willow growing, and which are of little use otherwise.

Alfalfa for Pigs.

Pigs complete their growth in much less time than either calves or colts. Alfalfa alone will not furnish enough mineral matter to secure the greatest development of bone in pigs. In addition to alfalfa growing pigs should be fed all the corn and charcoal they will eat, as this supplies the needed mineral matter. In a test made by the writer pigs were forced to the limit of feed and weighed daily, and it was found that the gains were proportionate to the amount of corn and charcoal eaten.

With growing animals other than pigs we have not found it necessary to supply more mineral matter than that furnished by alfalfa.

The stockman can develop cheaply hogs in his pigs, calves and colts with alfalfa in summer and alfalfa hay in winter. He can safely and profitably feed his breeding females—mares, cows and sows—alfalfa hay every day in the year and thereby secure well developed hogs in the young at birth. Under favorable conditions his cows and calves can be pastured on alfalfa.

Sales at Fairs.

Sales at fairs have long been a feature of the English cattle shows. In fact, they have become so general that many of the English shows are really market days and are held at frequent intervals. Sales have played a more or less important part with American exhibitors, but have always been made privately, and fair officials have taken little or no interest in encouraging them. There would seem to be an opportunity in this country for advancement in this direction. If sale classes are arranged for and a certain part of the day set aside for auction sales of cattle or other produce both the fair management, exhibitors and general public might be benefited thereby. It would help the farmer out at the spot where he is weakest—that is, in marketing what he grows.—*American Agriculturist.*

Not a Bad Story.

The Texas *Stock Journal* says that an Iowa farmer had a cow killed by a train on a railroad. He presented his claims to the company in a note, in which he said, "Thirty dollars will be considered sufficient, as the animal killed was but a common cow and by no means the best of my herd." The claim agent of the road answered the letter promptly and inclosed a check for \$100. He wrote the farmer, "It is the first instance since my connection with the road that any other than a full blooded animal of great value has been killed by our trains, and I inclose \$100 as damages and a reward for your bonesty, and I would humbly ask for your photograph to be framed and placed in my office."

Jackson's Napa Soda is sold in every city, town and hamlet in the State.

Worth \$100 A Bottle.

Collinsville, Texas, Feb. 10, 1903.
Dr. B. J. Kendall Co., Enosburg Falls, Vt.
Gentlemen:—I read your advertisement the other day in regard to Kendall's Spavin Cure, and having two fine and valuable horses which had been lame with Spavin for nine months, I sent to the druggist at Decatur for a bottle of Spavin Cure, which in six weeks removed all lameness and soreness, and a Splint from another one, and all three horses are sound as colts. The one bottle was worth \$100 to me. You may use my name at any time you wish.
P. H. SEGLER.
Price \$1; six for \$5. A 10-cent bottle for family use it has no equal. Ask your druggist for Kendall's Spavin Cure, also "A Treatise on the Horse," the book free, or address
DR. B. J. KENDALL CO., ENOSBURG FALLS, VT.

Grind Grain for Hogs.

In feeding dry whole wheat there is much waste because much of the grain is swallowed whole. Any small grain used for feeding hogs should be coarsely ground, for underground grain is totally indigestible, for the outer skin that protects the digestible portion of the grain is unaffected by the digestive juices of animals, and, having no gizzard and grit whereby to do the grinding themselves, it is not digested, but wasted.—*Farm and Ranch.*

PERCHERON STALLIONS FOR SALE.

TWO SIX YEARS OLD, TWO THREE YEARS old and two two years old. Three blacks and three grays. Four of them registered. Full pedigrees given. Apply to J. A. BEALL, Laton, Fresno Co., Cal.

FOR SALE OR LEASE.

THE HANDSOME BAY STALLION, DON FALLIN (trial 2:16); weighs 1250, stands 16½ hands. Don Fallin is by Fallin, he by Electioneer, dam by Baywater, granddam by Lancelot by Blackhawk. Don Fallin sires size, quality and speed. Address MRS. LILLIAN GRAAFF, Guerneville, Cal.

FOR SALE.

THOROUGHBRED YEARLING COLTS
By DUCAT, out of Strongbred Mares.
.....ALSO.....

TROTTER BRED
YOUNG STALLIONS AND FILLIES

TROTTERS AND PACERS.
THE SIRE OF THESE COLTS ARE DIABLO, Nutwood Wilkes, Monhells, Cupid and Sidney Dillon. The sires of their first, second and third dams are Guy Wilkes, Hock Wilkes, Director, Harold, Electioneer, Cornelius, Paul's Abdallah, Venture, Lodi and St. Clair. All of these sires trace in the male line to Hambleton 10 through his best producing male descendants, excepting the thoroughbreds Venture and Lodi and the pacer St. Clair.

C. E. FARNUM, M. D.
305 Parrott Building.

FOR SALE.

Three Standard-Bred Trotting Stallions
WILKES STOCK.

One Seal Brown, 16 hands, foaled May 2, 1898; first dam Fearless by Fallin 4781 (record 2:23); second dam Jean Perault by Signal 3327.
One Golden Bay, 16½ hands, foaled March 5, 1899; first dam Signal by Del Sur 1008 (record 2:24); dam of Guy Line 2:29½; second dam Lady Signal by Signal 3327.
One Brown, white points, 16½ hands, foaled April 1899; full brother to the bay.
These colts are all bred by Prince Airlee 28045, son of Guy Wilkes 2807 (record 2:15½), and bred by Wm. Corbitt, San Mateo, Cal. They are pure gaited and show wonderful speed for the little work they have done.

For further particulars apply to
P. H. McEVY, Menlo Park, Cal.

FOR SALE.

MY ENTIRE STOCK OF STANDARD-BRED Trotting and Pacing Horses. Single drivers and double teams. Some excellent prospects for stake winners entered in the Occident, Stanford and Breeders Futurity stakes. The great brood mare Daisy S. (dam of Tom Smith 2:13½, General Vallejo 2:20½, Sweet Rose 2:25 (trial 2:21) and Little Mac (3) 2:27). The driving horses and colts can be seen at my stable in Vallejo, and the broodmares, etc., at the race track. Apply to or address THOMAS SMITH, Vallejo, Cal.

BALLISTITE

The Standard Dense Powder of the World
 STILL LEADS AT THE TRAPS OR IN THE FIELD.

Ballistite wins from the limit marks in distance handicaps, at either live birds or flying targets as it always gives the highest velocities with the closest and most even patterns at all ranges. Ballistite is absolutely unvarying in results, being waterproof, smokeless, odorless, without residue, rashes, lower than black powder, unaffected by age or climatic changes, and never pits, rusts or corrodes the barrels. Ballistite is sold with above guarantee.

ALL OF ABOVE ARE AMATEUR RECORDS.

CAMPBELL'S HORSE FOOT REMEDY IS THE BEST REMEDY

EVER USED ON HORSES' FEET.
 IT PENETRATES and DRIES IN quickly and DOES NOT GUM and FILL UP THE PORES like tar and oil compounds. It is the GREATEST REMEDY ever used to remove SORENESS and FEVER from the foot, and makes it possible to get good services out of a horse working on hard and hot pavements.
 It gives natural nourishment to the foot and incites a rapid, healthy growth—ALL DRYNESS and BRITTLENESS quickly disappears.
 QUARTER CRACKS and SAND CRACKS are rapidly grown out when directions given in our booklet are followed.
 It is a SURE CURE for CORNS, CONTRACTED FEET and NAIL WOUNDS if directions are followed.
 It PREVENTS SOUND FEET FROM BECOMING UNSOUND and GROWS a TOUGH STRONG ELASTIC WALL and HEALTHY FROG—A FOOT WHICH WILL STAND WORK on race courses.
 Many of the best owners and trainers state that for track work nothing equals it. In many cases horses have reduced their records several seconds, due to its use.
 It is a CERTAIN CURE for THRUSH and SCRATCHES.
 We Guarantee That It Will Do What We Claim and Will Refund Money if It Fails.

PRICES:—Quarts, \$1.00; Half-Gallon, \$1.75; Gallon, \$3.00; 2 1/2-Gallon, \$5.50; Five-Gallon, \$10.00.

Books giving full directions for its use and much valuable information as to shoeing are supplied free.

Don't fail to read "ad." giving information concerning Campbell's Iodoform Gail Cure in next issue of this paper. It is the best and because of its merits is rapidly displacing all others.

WINCHESTER

REPEATING SHOT GUNS

A CHANCE FOR A DOUBLE

A QUESTION often asked about Repeating Shotguns is, "How quick can a second shot be fired with them?" Shooters that have used Repeaters answer with one accord: "Doubles" are just as easy to make with a WINCHESTER REPEATING SHOTGUN as they are with a double-barreled gun. The third shot that a Winchester Repeater gives often bags a badly crippled bird which otherwise would get away. Winchester Repeating Shotguns are made in "Take Down" styles in 12 and 16 gauge.

CAMPBELL'S EMOLLIO IODOFORM GALL CURE

For GALL BACKS and SHOULDERS, CRUPPER SORES and SADDLE GALLS there is none superior.

The horse CAN BE WORKED AS USUAL. For BARBED WIRE CUTS, CALES, SCRATCHES, BLOOD POISONED SORES and ABRASIONS OF THE SKIN it has no equal.

It is very adhesive and easily applied to a watery as well as a dry sore.

Its use will absolutely prevent BLOOD POISONING. In this respect there is no Gall Cure offered which can justly even claim to be a competitor. We placed it on the market relying wholly on its merit for success, and notwithstanding the fact that comparatively little has been done in the way of advertising the sales of 1900 were 100 per cent greater than the aggregate sales of Gall Cure preceding that year. This increase was entirely due to its MERITS, and from it we feel justified in saying that it is THE GALL CURE OF THE 20TH CENTURY.

It is a quick and sure cure for those troublesome skin cracks under the fetlock which injure and often lay up race horses.

All Trainers Should Have It in Their Stables

PRICE:—3 OZ. BOX, 25c.; 1 LB. BOX, \$1.00.

Speed, Breeding and Individuality FOR SALE.

RITA H. 2:11 1-4

Pacing Mare by McKinney 2:11 1-4

ELECTRO MCKINNEY

Brown Colt, Four-Year-Old Trotter by McKinney 2:11 1-4

RITA H. is a dark brown mare who stands nearly 16 hands high, and will weigh in racing trim about 1050 lbs. This mare has had this year a very remarkable record. She started in the North-western Circuit in the States of Oregon and Washington, and out of eight starts won her first seven races and only lost four heats during the entire circuit, and has a pacing record of 2:11 1/4. The mare is five years old and is excellent on the road. She does not pull or lug, and a lady can drive her anywhere. Last spring she trotted a workout mile in 2:18 1/2, and repeated in 2:16 1/2, after only seven weeks' work. Her owner has driven her in 2:12 1/2 in the Los Angeles Driving Club races, she having won all of them in which she started. This mare can step two heats below 2:10.

ELECTRO MCKINNEY is a brown stallion foaled in 1900, and stands 15 hands 1 inch in height. He trotted a full mile as a two-year-old in 2:31 1/4, last quarter in 32 seconds, and when a three-year-old a full mile in 2:14, last quarter in 32 seconds. He is perfectly gaited and a grand individual in every respect. Weighs about 950 lbs. ELECTRO MCKINNEY is bred in the purple, and is one of the best sons of McKinney alive to-day. McKinney is undoubtedly the greatest sire for his age, living or dead. ELECTRO MCKINNEY was not raced last year, being only a three-year-old and not entered in any stakes it was decided to hold him over.

These horses are all right and there is not a thing the matter with them, but my business demands are such that I cannot afford to devote any time to racing them. For prices and further particulars address

BYRON ERKENBRECHER,

301 CURRIER BUILDING, LOS ANGELES, CAL.

Or inquire at Office of BREEDER AND SPORTSMAN.

A Sidney Stallion With Earning Capacity

FOR SALE.

In pursuance of my intention to retire from the business of breeding horses, and having disposed of all my broodmares at auction, I now offer at private sale the stallion

WILLIAM HAROLD 2:13 1-4.

His sire is the great Sidney 2:19 1/2, grandsire of the champion trotter of the world, Lou Dillon 1:58 1/2, and his dam the great race and broodmare Cricket 2:10 (dam of four in the list) by Steinway, the greatest son of Strathmore.

WILLIAM HAROLD is a producer. The only two of his get to start are that wonderfully fast trotter Janice 2:08 1/2 and the pacer Dan Burns 2:15. WILLIAM HAROLD'S services in the stud were very limited up to three years ago, as he was raced. His weanlings, yearlings and two-year-olds are very promising and have size, good looks and great natural speed, besides being uniform in color, nearly all bays. He is a sure final getter, is in the very best condition, sound and healthy, and with ordinary good business management can earn in the stud in 1904 the price asked for him.

For tabulated pedigree and full particulars, address

H. W. MEEK, San Lorenzo, Cal.

PALACE HOTEL, SAN FRANCISCO, CALIFORNIA.

TOURISTS and TRAVELERS will, now, with difficulty recognize the famous COURT into which for twenty-five years carriages have driven. This space of over a quarter of an acre has recently, by the addition of very handsome furniture, rugs, chandeliers and tropical plants, been converted into a lounging room—the FINEST IN THE WORLD.

The EMPIRE PARLOR—the PALM ROOM, furnished in Cerise, with Billiard and Pool tables for the ladies—the LOUIS XV PARLOR the LADIES WRITING ROOM and numerous other modern improvements, together with the unexcelled Cuisine and the Most Convenient Location in the City—all add much to the ever increasing popularity of this most famous HOTEL.

San Francisco, Saturday, January 23, 1904.

GOOD ROADS do more to develop a country than any one thing and yet, paradoxical as it may seem, countries are generally pretty well developed before the roads are in a condition that may be called good. This is because the cost is so great that a sparsely settled country cannot afford the expense of good highways. Congress Brownlow of Tennessee has introduced a bill that is now pending in Congress which appropriates \$24,000,000 as national aid for the building of wagon roads. This sum is to be available at the rate of \$8,000,000 a year; is to be divided according to the population of the different states, but no state is to receive less than \$250,000. Every state receiving national aid must appropriate and spend a like amount. The asserted growth of sentiment in favor of the measure has been chiefly due to the institution and extension of the rural free mail delivery system, which has brought the disadvantages of poor roads home to the farmers and other country dwellers. Applications for the extension of the free rural delivery system are being refused by the Post Office authorities on account of the roads, and the disappointed communities demand their improvement. These demands are so in excess of the ability of the local boards to respond to that for a year past highway commissions all over the country have been putting themselves on record in favor of national aid. The amount which California would receive under this bill would be \$430,000 and with the same amount appropriated by the State a fund would be established that would make a great improvement in the roads of California. Nothing will help the horse breeding business more than good roads and for this reason alone our readers will doubtless favor the bill, and look for their representatives in Congress to vote for it. If every horse breeder in the State would write to the Congressman from his district, requesting him to support the bill, it would have a large influence in favor of the measure.

THE OCCIDENT STAKE for 1906 has 98 entries instead of 97 as stated on page 5 of this issue where the list of entries is printed. After the forms of our paper containing page 5 had been printed we received the following letter from Acting Secretary D. R. Miller:

SACRAMENTO, Cal., Jan. 21, 1904.
BREEDER AND SPORTSMAN—Please add to record of Occident Stake for 1906 the following entry:
S. Bartlett's oh f Flora Lowell by Frank B. Miss Johnson.

I have only received this entry this morning, but it is dated January 1st and postmarked Auburn, January 1st, but the envelope is marked "missent," which accounts for its not having reached me before.

I trust this will reach you in time for you to publish with the rest of the entries, at the same time calling attention to the fact that there are 98 entries.

Very respectfully, L. R. MILLER,
Acting Secretary.

THE \$50,000 WORLD'S FAIR HANDICAP will be one of the great races of 1904. It will be run in June at the St. Louis Fair Association meeting, which will hold one of the greatest meetings ever held in the country. According to the conditions of the stake it is reopened for entries to be made on February 1st. The entrance fee for horses put in at that time is \$750. Entries will close at the same time for a large number of additional stakes; the advertisement for which appears in our business columns this week. The World's Fair at St. Louis this year will cause that city to be visited by people from all parts of the globe, and horsemen will naturally want to kill two birds with one stone by taking in the fair and racing for some of the rich purses. The St. Louis Fair Association Stakes should be liberally patronized.

Jackson's Napa Soda does not tangle the feet

Is Siring Speed, Size and Style.

From all points in the country to Cleveland, Ohio, intelligent horse breeders are sending mares enough to the great trotter John A. McKerron 2:04½ to fill his book, and California breeders should remember that there is at San Jose a full brother to that horse, and keep in the front rank by sending him some of their mares. The horse referred to is Nearest 2:22½ that has already produced one in the 2:10 list, the mare Alone 2:09½ that took her record in 1902 and was the fastest four-year-old of her year. Though not campaigned in 1903, she paced a half in 59½ seconds in a public exhibition, showing that she had more speed than any pacer in California at the time. Alone is the only one of Nearest's get ever raced, but there will be several of them out before long and they will make him one of California's greatest speed sires. A half broke filly by Nearest out of a mare by Danton Moultrie that is now at the San Jose track is one of the best prospects ever seen there. She can step a 2:20 clip now without boots or hoppers, and is hardly hridlewise. When the bell rings for the stakes she is entered in, her competitors will have to be fast and just right or the race will not be interesting. The trotting mare Our Lady by Nearest that is now owned by Mr. H. B. Gentry, owner of McKinney, stepped a trial of 2:20 at San Jose, before Mr. Gentry purchased her and is one of the handsomest mares ever driven.

All of the get of Nearest have size and good looks, and wise breeders aim for both these qualities when selecting a stallion.

The breeding of Nearest is gilt edge. He combines the blood of the Wilkes, Director, Nutwood and Williamson's Belmont families and should be a very successful horse when mated with a mare carrying the blood of McKinney, Electioneer, Sidney, Steinway, Sultan or any of the prominent stallions that have stood in this State. Mr. T. W. Barstow, owner of Nearest, has put the stallions fee for 1904 at \$40, certainly a very reasonable price, as the full brother John A. McKerron 2:04½ is standing at a fee of \$200.

Association Formed at Pleasanton.

PLEASANTON, Jan. 21.—An association to promote the horse interests of this section has been formed with Lou Crellin as president and F. E. Adams as secretary. The directors are among the leading citizens of Pleasanton and are W. H. Donohue, A. F. Schweer, George Davis and G. A. Kelly.

This association is to be permanent in its character and its has been decided that it will take charge of a race meeting to be held each year on the Pleasanton track. At the meeting this year the association will offer \$4000 in purses.

The harness horse industry of Pleasanton is thriving, and there are hundreds of the finest animals in the country stationed here at all times. It is proposed by the racing association to give a meeting each year, at which animals can be both raced and exhibited. Such a meeting was held a year ago with marked success.

Advisory Board's Decisions.

At the meeting of the Advisory Board of the American and National Trotting Associations held in New York the following decisions were rendered in regard to time performances made in 1903:

"We find that the performance of Lou Dillon at Cleveland, O., September 12, 1903, in 2:05 to a high-wheeled, ball-bearing sulky, with a pace-maker, with dirt shield in front, was not a record, because the mare had previously performed in faster time, which performance was her record, and precluded a slower performance being a record.

"We also find the performance of Maud S. at Cleveland, O., in 1885, was to a high-wheeled, plain axle, according to rules; that the time, 2:08½, was not only her best time, but the best time ever made up to that date, and was a record.

"No record can be made with a 'wind shield' other than the ordinary dirt shield and pace-maker in front.

"A performance with pace-maker in front, with dirt shield, shall be recorded with a distinguishing mark, referring to a note stating the facts."

Will Race on the Speedway.

Members of the San Francisco Driving Club will meet on the Speedway in Golden Gate Park at 11 o'clock a.m. to-morrow, Sunday, January 24th, and hold three races. All the events will be half-mile heats, best two in three, and some good sport can be expected. The entries are as follows:

First race—Mr. Verlach's Gertie A., Mr. Becker's Dan Aland, Mr. Cuicello's Hutton or Puerto Rico, Mr. Sprague's Clara G., Mr. Watson's Al Sandy.

Second race—Mr. Ellsworth's Bill Ellsworth, Mr. Finch's Edward, Mr. Verlach's Victor, Mr. Pease's Monkey, Mr. Cuicello's Welladay.

Third race—Mr. Lottwasser's Bellflower, Mr. Cuicello's Lady Lou, Mr. Benson's Starry Banner, Mr. Schotler's Roy, Mr. Taylor's Zulu Lass.

Sacramento Track News.

SACRAMENTO, Jan. 20, 1904.

Training is almost at a standstill here at Agricultural Park, as the track is too wet to work on, owing to the rain of Sunday last, but as the roads are good jogging is done on them whenever the weather is clear, and the Sacramento Driving Club, that has been compelled to postpone its matinee twice in the last month on account of rain, will race next Sunday on the track unless another downpour stops them. As the country needs rain, and it has only fallen on the days when the driving club announces a matinee, the weather bureau officials here are almost tempted to promise the farmers another shower on Sunday next.

Walter Masten has the largest string here at the present time. He has Falrose 2:19, Penrose (the fast son of Falrose) and several youngsters by McKinney and Diablo. Walter is sweet on his three-year-old, Marvin Wilkes by Don Marvin, that won second money in the two-year division of the Breeders Futurity last year and would have made the winner step faster had he not been so unfortunate as to throw two shoes during the first heat of the race Marvin Wilkes will make the three-year olds step some this year to beat him.

L. W. Clark is training a string of six. They are Ouhoul 2:22½ by Stamhoul 2:07½, the three-year-old filly Ouhoulita by Ouhoul out of Lady Turner that is the pride of his heart, two young trotters by Silver Bow 2:16, a two-year-old by Owyhee 2:11 and one other that I don't just remember the breeding of.

Chris Jorgensen has several head in training, the majority being road horses, some of them high class.

Mrs. Emma W. Callendine has Guynut, a three-year-old by Nutwood Wilkes; also Lady Caretta, a two-year-old that is entered in the Breeders Futurity. She is quite a promising filly. She also has Sir Carlton, that is entered in the Occident Stake. "Carly," as his fair owner calls him, is quite a trotter, and the horsemen here say he will be the winner of his year.

Mrs. Callendine is an enthusiastic lover of the trotter and breeds medal winning stock.

U. S. Mitchell is training here the colt Peter Shields and three more by Zombro 2:11, besides some others that are showing well.

Mr. Haggin has five in his string, among them a filly by McKinney and one by Nutwood Wilkes that are entered in stakes. Yours, LADY NORINE.

Answers to Correspondents.

W. W. P., Butte City—Please give the breeding of Clifton Bell.

Answer—Clifton Bell, Register No. 5333, bay horse foaled 1883, got by Electioneer 125, dam Clarabel by Abdallah Star, son of American Star Jr.; grandam Fairy by Hambletonian 10; great grandam Emma Mills by Rediker's Alexander W. Bred by Leland Stanford, Palo Alto Stock Farm.

Monroe Salishury has discovered another promising trotter. Last year he purchased from the horses that Louis Carillo was working at Pleasanton for Mr. A. W. Shippee, a black gelding by Hawthorne that was a nice stepper and a good looker. The horse was purchased for Mr. Salishury's brother who lives in Salt Lake city, to use as a road horse, and was left with that gentleman when the Salishury string stopped at Salt Lake on its way East. The horse showed so well on the road that his owner shipped him back to Pleasanton last month for a little training. Charles De Ryder drove the black one day last week and let him step the last half of the mile. He made it in 1:04 and three or four watches stopped at 1:03½. Perhaps the horse will be permitted to race a little and get a record before he goes back to the road again.

To date thirteen stallions have sired one hundred or more standard performers, the list being as follows: Onward 2:25½, 174; Nutwood 2:18½, 169; Red Wilkes 166; Electioneer 160; Alcantara 2:23, 153; Gambetta Wilkes 2:19½, 143; Pilot Medium 121; Simmons 2:28, 119; Allerton 2:09½, 118; Wilton 2:19½, 115; Baron Wilkes 2:18, 109; Robert McGregor 2:17½, 101; Sidney, pacing, 2:19½, 100. The last two entered the list this year. Of the thirteen sires only six, Red Wilkes, Alcantara, Gambetta Wilkes, Allerton, Baron Wilkes, and Sidney, are now living. Allerton, seventeen years, is the youngest. While thirteen stallions have sired one hundred or more standard performers, only six are credited with 100 or more standard trotters, as follows: Electioneer 158, Onward 135, Nutwood 133, Red Wilkes 121, Alcantara 106, Wilton 100.

Charles S. Caffrey, who built the high-wheel sulkies drawn both by Maud S. and Lou Dillon, states that the sulky to which the former mare was hitched when she trotted in 2:08½ was fitted with anti-friction roller-bearing axles, which, though not like ball-bearings, answer the same purpose in reducing the friction incident to the use of ordinary steel bearings. Mr. Caffrey further says that the sulky drawn by Maud S. weighed about forty-three pounds, or twelve pounds less than the weight of the one drawn by Lou Dillon. But the Bonner heirs say the Maud S. sulky has no roller-bearings.

JOTTINGS.

THE MOST ABSURD RULING ever made in regard to harness horse records was the one made by the Advisory Board of the American and National Trotting Associations in which it was declared that Lou Dillon's mile in 2:05 to a high wheel sulky is not a record and does not displace the 2:08½ of Maud S. In other words, the protest made by the sons of Robert Bonner was sustained. The text of the decision is as follows:

"We find that the performance of Lou Dillon at Cleveland, Ohio, September 12, 1903, in 2:05 to a high-wheeled, ball bearing sulky, with a pacemaker, with dirt shield in front, was not a record, because the mare had previously performed in faster time, which performance was her record, and precluded a slower performance being a record."

Shades of the great Blackstone, and of all the law makers and commentators from the time of Moses to the present day: wouldn't that jar you? The Advisory Board would have done better had it struck out everything after the word "because" and let it go at that. If Lou Dillon's mile in 1:58½ at Memphis, when hitched to a modern bike, precludes her getting a record of 2:05 to a high wheel sulky, then it must necessarily preclude her getting a record of 2:00 to a wagon. According to this decision of the Advisory Board, Lou Dillon could not get a record if she pulled a stage coach a mile in two minutes. Was anything more absurd ever handed down by any deliberative body? Why, according to this interpretation of the rules, nearly all the wagon records are null and void because the horses making them "had previously performed in faster time" when hitched to a bike. If there is anything more ridiculous in the entire history of harness racing jurisprudence will some one please point it out. I have an idea that this decision is a record in itself, but according to the law laid down by the Advisory Board it may not be, as the Board may have, at some previous date, made a worse one, and if so this one don't count.

There has been considerable said recently in some of the magazines and other Eastern publications about the Americo-Arab horse as the only horse in America that can be depended upon to reproduce his type. When we read these amusing effusions about the Americo-Arab we are always reminded of the question asked by Monroe Salisbury of a man that wanted to sell him a horse. After listening for a half hour to a glowing description of the horse's conformation and a statement of his pedigree back to the "steenth" cross on both sides, the King maker said: "That's all very good, but what can he do?" As the horse did not have speed for the track or road Mr. Salisbury had no use for him. We have heard much from Randolph Huntington, John Gilmer Speed and Colonel Spencer Border about the type of the Americo-Arab and his wonderful beauty, and we wish some of them would now tell us what he can do.

An Excellent Sale.

Last Monday evening, Mr. William G. Layng, proprietor of the Occidental Horse Exchange at 246 Third street, in this city, sold at auction ten thoroughbred horses, the property of W. B. Sink Jr., the well known turfman. The sale was one of the most successful held in this city for years and good prices were obtained. Mr. Sink will leave soon for France, where he has accepted a position to train and manage a large stable of horses. Mr. Layng engaged for his auctioneer at this sale Col. William Riley, known to every horseman who follows the Grand Circuit as "silver voiced Bill" Riley, who sells the auction pools all through that great circuit of harness racing, and who made a most favorable impression on this, his first appearance on the block in California. The prices obtained for the horses were as follows:

The Mist, b f, 1902, by Magnet-Tenebrae, to H. Hammond for \$2300.

T. J. Cox, b c, 1901, by Libertine-Grace S., to J. C. Murray for \$500.

Impromptu, b g, 1898, by Crescendo-Amida, to J. W. Painter for \$225.

St. Winifrede, ch f, 1900, by St. Carlo-Santa Cruz, to J. W. Painter for \$1100.

Wolhurst, b g, 1894, by Ventilator-Nutbrown, to D. Anthony for \$450.

Glendenning, ch g by St. Carlo-Glenlivet, to H. Hammond for \$1550.

Rose Farr, ch f, 1901, by imp. Crighton-Sevens, to F. G. Reynolds for \$525.

F. E. Shaw, ch c by Magnet-Vioia, to W. Fisher for \$4000.

Wiggins, b f, 1901, by Sam Lucas-Callatine, to McAlister & Co. for \$925.

The Fog, ch c by Magnet-Tenbrae, to "Boots" D.nell for \$2500.

Kinney Lou 2:07 3-4.

Now that McKinney 2:11½ has gone from California breeders are beginning to realize the value of his blood, and the desire to own a son or a daughter of the great sire has caused every one of his get offered for sale to be snapped up quickly. McKinney is a great horse, but if there is any such thing as improvement in breeding, why should not one of his sons prove much greater than he?

There will be standing for service at San Jose this year, for a short season ending May 1st, the stallion Kinney Lou 2:07½, owned by Budd Dohle, the renowned reinsman who piloted to world's records Dexter, Goldsmith Maid and Nancy Hanks. Mr. Dohle purchased Kinney Lou two years ago, and last year campaigned the horse on the Grand Circuit. He closed the season winner of \$11,450 and holding a record of 2:07½, made in the second heat of a hotly contested race. During the season Kinney Lou won six heats in better than 2:10, and although a sick horse part of the time gained a reputation of being as game as the gamest that ever fought for first place under

A Son of Kinney Lou—Foaled 1902.

the wire. When it is considered that of all the numerous band of trotters that were out for the money in 1903 but six won upwards of \$11,000, the great showing made by this brown son of McKinney is apparent. It is Mr. Dohle's intention to again try conclusions with the fastest trotters on the Grand Circuit this year, and for that reason Kinney Lou's stud season will be limited to a dozen mares and will end May 1st.

This stallion was bred for a trotter and on breeding alone no horse is more entitled to be one. His sire McKinney we all know about. He is the greatest sire of his age that has yet been produced. He has 54 in the 2:30 list and of these fifty per cent are in the 2:15 list. This alone is a wonderful showing but he enjoys another distinction—he has five trotters in the 2:10 list, which is more than any other stallion has of whatever age. To be the champion sire of 2:10 trotters at sixteen years of age entitles McKinney to the honor of champion trotting sire without a question. So much for the sire of McKinney Lou.

The dam of Kinney Lou is that famous game old race mare Mary Lou 2:17, bred by the late J. L. McCord of Sacramento. She is remembered by every horseman who attended the meetings on the California circuit twelve or fifteen years ago. She was a great winner in her day and the race was never too long for her. Mary Lou was an own sister to the famous trotter Shylock 2:15½ and to that well known pacer Ned Winslow 2:12½. It was a game family clear through. The dam of Mary Lou, Shylock and Ned Winslow was Brown Jenny, the great broodmare by Dave Hill Jr. and the grandam was by Black Hawk 767. Through these two stallions McKinney Lou gets two strains of the best Morgan blood ever brought to this State and intelligent breeders hold it in high favor. The sire of Mary Lou was Tom Benton 15705 that was by Senator Stanford's great broodmare sire Gen. Benton out of Nelly Patchen, a daughter of Geo. M. Patchen Jr. 31. Great speed and gameness come through these lines. Tabulate Kinney Lou's pedigree back four crosses and there will be found racing and producing families on both sides and in every branch. Mr. Dohle has put Kinney Lou's fee at \$100 for the season and quite a number of mares have already been booked.

The oldest of Kinney Lou's get are two years old. He was bred to but a very few that year and the following year served fifteen mares up to the time Mr. Dohle bought him and took him east. There are eleven yearlings, the result of that season's services. All his colts are much like him. They are bays or browns and in size, conformation and disposition a credit to any horse.

An English Opinion.

In a late issue of the London *Live Stock Journal*, appeared the following in regard to the recent winning of a first prize at the New York Horse Show by Forest King:

"The news that has reached this country by cablegram to the effect that Forest King, driven by his new owner, Mr. Moore, has taken first prize in single harness at New York show, defeating, among others, the crack Lord Brilliant, should instill courage into the hearts of hackney breeders on this side of the Atlantic. No doubt Forest King is quite an exceptional mover, and with one exception, namely, when he went down before Heathfield Squire last autumn at Cardiff show, he possessed an unbeaten record as a harness horse. The fact of his great achievements in this country having been so numerous, may therefore induce some people to say, "Oh! Forest King was an exceptional horse." So no doubt he was, and so is Lord Brilliant, whom he beat; and consequently, New York being the leading harness horse show of America, we are entitled to claim that the best English horse—a full-blooded hackney, by the way—can beat the best of the Americans.

It is perfectly permissible, I should say, to carry the argument a little further, and to suggest that as our best can beat their best on their own ground, it is highly probable that our other topsawyers can hold their own with the American horses. A New York champion, Von Harbinger, has done very well in the show ring since he landed on these shores some years ago, but his successes, when pitted against our crack animals, have not been so conspicuous as to justify our breeders being afraid of competing anywhere against the best horses of America or elsewhere. The victory of Forest King, moreover, has proved a contention of mine, which I am very glad to see corroborated by such an emphatic and practical illustration, namely, that English horses will get as much fair play meted out to them in America, and judged by American judges, as they receive in England with one of their own countrymen in the ring. How the idea got about that there was more prejudice rampant in America than here I could never understand, for both observation and experience have convinced me of the fallacy of the impression.

At all events, it is to be hoped that now English hackneymen and others who exhibit horses, and who are influenced by patriotic motives, will be induced to arrange a friendly invasion of American shows and ascertain the strength of the enemy upon his own ground. In the case of the hackney, it is most desirable that something should be done in that direction, for in spite of the plucky stand that is being made by its transatlantic admirers, the breed is not making the progress in America that it should. Not many weeks ago, a friend residing near New York, in writing to me, said: "The hackney men are being swamped out of the field in the States, not because the horse is not good enough to hold his own, but because his enemies are so numerous and his friends so few. The public here are about sick of seeing the same horses out every year, and unless some new blood is introduced, just for the sake of variety, popular interest in the breed will die out." All this seems so true that it would be a work of supererogation to enlarge upon it; but surely the victory of Forest King should accomplish a great deal in the way of reviving the popularity of the hackney in the States.

It must, at all events, be a very bitter pill for the hackneyphobes of both countries to have to swallow, and no doubt attempts will be made to explain it away. Deeds, however, are always more powerful than words, and the fact will always remain that a pure-bred hackney has beaten the cracks of America in single harness at New York show.

Polo Dates are Changed.

There is every assurance that the tournaments to be held this spring by the California Polo and Pony Racing Association will mark a new era in these sports in this State, and be the most successful ever held on this Coast. A change of dates has recently been announced and it is now decided that the meet at Del Monte will be held from February 18th to 22d inclusive, and at Burlingame from February 26th to 29th inclusive. All entries for the events to be decided at these meets will close on February 14th. At both places the program will consist of polo and pony racing on alternate days and the handsome trophies already arranged for will attract a very large number of entries. Owing to the importance of these meets, there will be great rivalry among the contestants, who are already casting about for the best ponies to be found, and there is a demand for both racing and polo ponies of quality that cannot be supplied.

For all kinds of weather there is no drink like Jackson's Napa Soda—plain or in a lemonade.

Payments in Occident Stakes.

Acting Secretary L. R. Miller of the California State Agricultural Society sends us the following lists of foals on which payments have been made in the Occident Stakes of 1905 and 1906. There are 97 entries in the stake of 1906, which is for the foals of 1903. This is a splendid showing, especially as both Palo Alto Stock Farm and the Jesse D. Carr estate made no entries, while in former years they made four or five each.

The Kenney Manufacturing Company, 531 Valencia street, San Francisco, has a second-hand Toomey cart with wood wheels, extra heavy carriage tie, cushion, etc., that is as good as new, having been used but little, which will be sold for \$90, regular price \$135. Harness, blankets, etc., goes with it. They also have a fine survey for sale cheap and manufacture sulky wheels and attachments to order. Pneumatic tires, solid cushions put on all kinds of vehicles.

A Handsome Horse.

On the front page of our issue this week is a photo engraving of the stallion Mahomet, owned by Mr. A. C. Dietz, proprietor of the Ferndale Ranch, Santa Paula, Cal. Mahomet is one of a pair that Mr. Dietz is driving as a road team. They are full brothers six and four years old, are both pacers, and so near alike that the casual observer has difficulty in telling them apart. Mr. Dietz, who has long been a breeder of trotting and pacing horses, and has owned many goods ones, has been experimenting for the past fifteen years in breeding for color, and has finally succeeded in pleasing his ambition. Some years ago he purchased, in Napa county, three parti-colored mares, that were said by their owner to have been sired by an Arabian stallion. One of these mares had taken the prize at the fair as the best saddle animal and the others were one and two years old. One died before being put to breeding. Of the others one was black and white, and the youngest bay and white and a pacer. Their dam was of Whipples Hambletonian blood, dark bay or brown. The dam of Mahomet is the bay and white mare. Mr. Dietz says: "Mahomet and his brother Arab are so near alike that it takes close inspection to detect the difference. They have most perfect heads, broad and with more intelligence than any horse I ever saw. They have the finest, softest skin, with hair like satin. They were both sired by Longworth 2:19, son of Sidney and sire of Alfred C. 2:12½ and El Moro 2:13½. There is probably no such team in the United States. They have most perfect legs and feet and indicate the legs of a deer. The black and white mare, full sister to the dam, was bred to Mahomet, the oldest of the pair, and produced a pure white colt with white eyes and white hoofs. Unfortunately this colt died from an accident."

Something About Athalie.

Grattan, that interesting writer on harness horse affairs, writes as follows in the last *Kentucky Stock Farm*:

In the course of his stallion announcement, Mr. George L. Warlow, Fresno, Cal., makes a prediction that is decidedly interesting and, in all probability, not much out of line despite the task it sets before the gentleman, who says: "Athalie is but sixteen years old, and if she lives to be twenty I will make her the greatest brood mare in the world as a speed producer." Athalie was bred in Kentucky, at Jacksonville, by H. C. Stone, who sold her to Bowerman Bros., from whom she passed to Mr. Warlow, then a resident of the State of Illinois. It is stated in the register that her second dam's breeding is not established. But the Year Book gives the breeding of her sensational yearling son as "dam Athalie by Harkaway 11808, second dam by Alcalde 103." And that is her breeding. Athalie has produced six standard performers; the trotters Athanio 2:10, Athavis 2:18½, Athabla 2:24½ and Athadon, yearling, 2:27; the pacers Ira 2:10½ and Athnio 2:14½. Athanio took his record in this country while a member of the Village Farm stable and was then sold to parties in Europe. There he was champion for at least one season, defeating the best trotters raced in Austria. He is the sire of The Aristocrat 2:12, pacing, record made this year. Athadon is the sire of Sue 2:12½, Listerline 2:13½ and five others. There is no telling what Mr. Warlow has up his sleeve, but it looks as if Athalie's 2:10 list is getting ready to increase to about four, and if she continues to throw speed with the same uniformity that has marked her past efforts in that direction she will pass Beautiful Bells, who is at the top with eleven performers. They are all trotters, but the fastest is Belleflower with a mark of 2:12½, while Athalie already has to her credit a 2:10 trotter. Harkaway, sire of Athalie, was sired by Strathmore 408, and his dam was by Basil Duke, second dam by imp. Glencoe. Taking it all in all Athalie has a lot of good blood, but from the standpoint of the standard she is not very well bred. But she has done something, in fact has accomplished a great deal, so that whatever else may be said about it she needs no one to offer apologies for any lack of ancestors with pedigrees in the register."

Board of Appeals Meeting.

SAN FRANCISCO, Cal., January 20, 1904.

A meeting of the Pacific District Board of Appeals of the National Trotting Association will be held at the office of the Secretary, 36 Geary street, San Francisco, Cal., at 2 o'clock p. m., on Thursday, February 18, 1904.

All communications intended for consideration of this Board at this meeting must be forwarded to the Secretary not later than February 4th.

F. W. KELLEY, Secretary,
Pacific District Board of Appeals.

By order of E. P. HEALD, Chairman.

Notes and News.

A well-bred McKinney mare is offered for sale. See advertisement.

The Los Angeles Driving Club will hold an afternoon of matinee racing to-day.

It is now reported that the blind stallion Rhythmic 2:06½ will go to the auction block.

Bonnie Direct 2:05½ is certain to be a great sire. His colts show more finish than those of any other son of Direct and they all have speed.

Bay Leaf by Princess, dam by New York, sold at auction once for \$30, is the dam of Pat Ford 2:16½, and Josie Aegon 2:17½, new ones for 1903.

Bayswater Wilkes is now located at Woodland. He has some of the best looking colts in Yolo county that have ever been seen there and will get a good patronage this year.

The twenty-second biennial congress of the members of the National Trotting Association will convene at the Murray Hill Hotel on Wednesday, February 10, 1904.

The stallion Don Fallis, trial 2:16, is offered for sale by an advertiser. Don Fallis is a horse of good size and handsome proportions and has good earning capacity in the stud.

Joe Corey, who recently removed from Vallejo to Pleasanton with his string of horses, is training a colt called Spinnaker that is by Caff Topsail out of Easter D., and is a very fast youngster.

There will be three harness races on the Speedway in Golden Gate Park, Sunday, beginning at 11 o'clock. The contests will be between horses owned by members of the San Francisco Driving Club.

Trainer Frank Bogash, of Ft. Wayne, Ind., expects to go down the Grand Circuit with a good stable in 1904 for Spy Run Farm which will contain nothing that is not by their stallion Atlantic King 2:09½.

The get of Nutwood Wilkes that are entered in the three year old stakes this year will make quite a showing if no accidents happen them. We hear of several that are showing remarkable speed already.

A. H. Anderson presents his advertisement in this issue. He is a live stock auctioneer and will conduct a general auction business in this city or in any part of the State. He has a branch office at Sacramento.

The five-year-old gelding Don Z. by Stam B, dam by Lottery, that Mr. J. M. Hackett, of Rocklin, Cal., bred and raised and is now owned by Mr. J. D. Springer, of Pleasanton, is one of the good green trotting prospects of the year.

By some accident the program for the Pleasanton meeting failed to reach us this week, but will doubtless be in time for publication in our next issue. The classes will be nearly the same as the Breeders meeting and the purses range from \$100 to \$1000.

Rosebud by General Washington, dam Goldsmith Maid 2:14, is entitled to a place in the list of broodmares that have produced four or more trotters that have secured standard records. Her four are Regy 2:26½, Rose Direct 2:29½, Rose Worthy 2:29½, Artus 2:29½.

M. J. Zahner, who is training a string of horses at Pleasanton, has just received the pacing mare Maud W. by Waldstein from Alton, Humboldt county, and will train her for the circuit this year. Mr. Zahner expects several more horses from Humboldt county shortly.

An advertisement was inserted in the BREEDER AND SPORTSMAN recently in which a McKinney colt was offered for sale. Among answers to the same received within a couple of weeks was one from a party in Winnipeg, Ontario, and another from one in New Orleans.

Of the twenty-six new 2:10 performers for 1903, six of them came from Scott Hudson's stable. Hudson is the only driver that has won two \$20,000 stakes, the Nutmeg Stakes, \$20,000, and the Bonner Memorial, \$20,000. Hudson took up about a dozen of his horses January 1st.

Coney 2:02 is now owned by Mr. H. B. Allen, of Kansas City, Missouri, who purchased McKinney's fastest performer recently while on a trip to New York. It is said that Coney will be driven in some of the free for all races on the half-mile tracks this year by Mr. Allen's wife.

It pays to breed good ones. R. P. Lathrop, the bay merchant of Hollister, bought at the Santa Rosa Stock Farm sale June 23, 1903, for \$140, the chestnut mare Diva by Piedmont 2:17½ with a colt at her side by L. W. Russell, be by Stamboul, dam By by Nutwood. Mr. Lathrop has just sold the colt to Moody Brothers of Elko, Nevada, for \$200. The colt now is in the hands of Jo Sanchez at Hollister, and shows great promise. He is level headed and a square trotter. He will be carefully handled and later taken to Elko, and he used in the stud.

Thos. Ronan, proprietor of the Pleasanton track, came down to Oakland this week and purchased an additional 40,000 feet of lumber to build more stalls and make other improvements. Mr. Ronan is finding it rather difficult to keep up with the demand for stalls but is doing his best.

The *Rural Spirit* says "Henry Helman owns a yearling colt by Pete Williams' stallion Monterey that he considers a wonder at the trot." Mr. Payne Shafter of Olema, Marin county, was in the BREEDER AND SPORTSMAN office last week and has the same story to tell. The young Montereys are all right.

C. W. Welby, owner of the fast young pacing stallion 2:14 by Bay Bird, has taken the horse to Oregon and will make the season of 1904 with him at Irvington track, Portland. There is no better bred stallion on the Coast than Yukon. His dam is by Algona and his second dam a full sister to Beautiful Bells.

Scott Hudson and Harry Benedict are jogging Twinkle 2:05½; Guy Fortune 2:11½; Dr. Madara 2:08; Tertimin 2:24½, and others preparatory to sorting them over for the coming campaign. Tertimin has paced well below 2:10 in several races. It will be interesting to note Twinkle's showing after a year's let up.

George Ramage, who is training a few horses at Pleasanton, among them a full sister and brother, two and three years old by Sidney Dillon, has to stop nearly every day and answer the question as to whether either is for sale. The gelding is just about the cleanest gaited trotter that steps over the Pleasanton track.

One of the best bred youngsters in California is the stallion Alta Vista that is in J. R. Albertson's string at Pleasanton. He is by McKinney out of the great race mare Expressive 2:12½ by Electioneer. He is a big handsome four-year-old and will be trained for the races and a record this year. He should make a great stock horse.

At the convention of the Cycle State Board of Trade held in Oakland on Wednesday evening of this week, W. J. Kenney, the well known sulky builder of this city, was elected President of the Board for the third term. After his election the members of the Board presented Mr. Kenney with a handsome gold watch and chain.

George Leavitt, the Boston horseman, says that the great broodmare Maggie H. by Homer, should be given credit for the mare Gayety Girl 2:15½ by Red Wilkes. The Year Book does not give the breeding of her dam, but Mr. Leavitt, who purchased the mare in Kentucky, says that he is confident that the breeding given above is correct.

Mr. Henry Scott, of San Jose, has a two-year-old by Owyhee 2:11, out of the producing mare Primrose by Sidney, that is one of the most promising young trotters in Santa Clara county. Last year as a yearling he trotted a quarter in 40 seconds after being hitched up a few times. He will be put in training again this year for a short time.

J. B. Stetson of Boise, Idaho, will move to Portland, Oregon, to train his horses and has engaged stalls at Irvington track. He has in his string that good four year old Swift B. by Stam B, that took a record of 2:16½ last year as a three-year-old; Oregon Maid 2:14½; Del Norte (2) 2:24½; Monroe S. 2:13½; Geta-way 2:24½ and several horses without records.

Birdman, the roan three-year-old colt by Antrim out of Birdie by Jay Bird, that is owned by Geo. A. Kelly of Pleasanton, promises to be one of the good colt trotters of the year. Mr. Kelly's colt Bonnie McK. by McKinney out of Bonilene 2:14½ is another good prospect. This is a wonderfully well bred fellow as his second dam is Bon Bon, the dam of Bonnie Direct 2:05½.

The McCarthy sale, to be held at Portland, March 1st, 2d and 3d, is attracting great attention all through the Northwest and a number of high class horses have already been consigned to it. Well bred California horses should bring good money at this sale and we advise owners to open correspondence with J. L. McCarthy & Son, Room 8, Hamilton Building, Portland, in regard to consignment.

L. V. Harkness will own as many broodmares at Walnut Hall Farm, if he keeps collecting, as there ever were at Palo Alto. Recently he secured ten matrons, paying therefore \$11,000, from F. M. Buck, Fairbault, Minn. Among them are the dam of Lady Constantine 2:12½, the dam of Cloria 2:13½; Krem Marie 2:16½ and some other royally bred and record mares. He now owns about 200 broodmares.

Manager G. A. Wahlgreen of the Overland track, Denver, Col., reports the outlook for the racing season in Colorado as most encouraging. The regular meeting will commence at Overland Park on June 18th and conclude on July 4th. There will be two harness and five running races each day, and two \$1500 and six \$1000 stakes for trotters and pacers will be announced soon. The regular purses will be \$500 each.

Many of the old time Morgans were long-lived horses, and some of the present day seem to have inherited the qualities upon which longevity depends. We learn from the successful starting judge James Walker, of Coldwater, Mich., that his Morgan stallion, Royal Fearnought, now 31 years old, is hale, hearty, vigorous and frisky. His grandsire, Young Morrill 2:31, lived to be 32 years old.—*American Horse Breeder*.

The mare Explosion by Steinway, dam Flash by Egmont, that Henry Dunlap is training at Pleasanton, is showing lots of speed. All the produce of Flash are afflicted with the same disease. Mr. T. J. Crowley, of this city, purchased for a friend in San Francisco a year ago at Oakwood Park Farm a gelding by Chas. Derby, out of Flash, that is now used as a road horse and can show a quarter close to 30 seconds without training.

Henry H. Helman, who came down from Portland, Oregon, to attend the final Palo Alto sale, tells us that he has sold his promising green trotter Roy Benton to Ed Dyer of Spokane for \$2000. Roy Benton is by Benton Boy and his dam is Antera by Anteeo. With very little work last spring Roy Benton worked a mile in 2:18 and trotted quarters fast enough to assure Mr. Helman that he is a 2:10 trotter. He will be trained this year by Lou Childs and raced on the North Pacific Circuit.

Representatives of the Canadian Horse Breeders Association waited upon the government last week and urged that, in the interest of pure-bred stock, the customs duty on horses entering Canada from the United States be raised to \$30 on animals of the value of \$150 and under. The association claims that inferior horses are brought in on spurious pedigrees and thus work great harm to native breeds. A meeting of the representatives of live stock interests has been called by the government, and the date is set for March at Ottawa.

The proprietor of the BREEDER AND SPORTSMAN received a letter this week from a relative "way down in Maine," who says that at the town of Gardner, a mile track has been scraped on the ice of the Kennebec river, and that racing is to be held during the winter. The prizes are 50 bushels of oats for the first horse, 25 bushels for the second and 10 bushels for the third. Horses with speed can evidently earn their oats in Maine even in the coldest weather.

Willis Parker of Stockton, Cal., who has bred and owned quite a number of standard trotters, visited his old home in Maine a few weeks ago and while in Waterville met C. H. Nelson, breeder and owner of the stallion Nelson 2:09, who invited him to take a ride behind the old champion. Although 22 years old this spring the son of Young Rolfe stepped out like a horse in training and Mr. Parker says he seems to have as much speed as he ever did when allowed to brush a short distance and certainly enjoys it.

Mr. E. D. Dudley of Dixon, Solano county, purchased at the recent Palo Alto sale the yearling chestnut colt by Nutwood Wilkes 2:16½, dam Palita by Palo Alto 2:08½, second dam Elsie by Gen. Benton, third dam Elaine by Messenger Duroc and fourth dam Green Mountain Maid, dam of Electioneer. Mr. Dudley has claimed the name Palite for this colt, which was one of the best bargains of the sale as well as one of the best bred colts in this country or any other. Palite should make a great stock horse, as he is a grand individual.

Several weeks ago when the Earl of Lonsdale was visiting San Francisco, he called at the Harness and Saddlery depot of the Jepsen Bros. Company and purchased two fine California hair bridles at \$75 each, one of which he intends to present to Queen Alexandra. The Earl also purchased from the same firm a whole wagon load of articles of California manufacture consisting of silver bits, spurs, rawhide bridles, riataes, quilts, hair ropes, several saddles and many other things with which to please and astonish his friends when he reaches home.

Earl Medium, one of the successful sons of Happy Medium, died recently, the property of R. E. Goddard, Burgin, Ky., who purchased him early in 1903. Though never so situated that he was in the way of making a reputation, Earl Medium sired six standard performers, of which five beat 2:20 and three had records better than 2:15, as follows: Maybud 2:13½, Kanawha Star 2:14½, Tom Martin 2:14½, all pacers. He was bred at Fairlawn, and was out of the Almont mare Francesca, who also produced I. Direct 2:12½, Sable Frances 2:15½, and Guvica 2:26.

The horses which Mr. Lou Robertson of Auckland purchased in Kentucky last fall and shipped to Auckland from this city December 31st, were a six-year-old stallion by Bow Bells, dam Russia 2:29; two-year-old stallion by Birchwood, dam Marks Maid; five-year-old mare Bodeau by Bow Bells dam Myrth by The King; three-year-old mare by Heir at Law, dam Conway; two-year-old mare by Birchwood, dam Vera Capel. While there were no very striking individuals in this lot, they were all well bred and will be valuable additions to the trotting stock of the antipodes.

J. Y. Gatoomb, former partner of Scott Hudson, now located at his home in Concord, N. H., has purchased at a reputed price of \$8,000 from R. H. Plant, Macon, Ga., the three year old bay filly Grace Bond by The Bondsman, dam Grace Boyd by Ashland Wilkes 2:17½. Grace Bond won the two year old division of the Kentucky Futurity last year, beating Bessie Benyon, Alta Axworthy, Bequeath, The Hermit, Alice Edgar, and California Cresceus. She took a mark in that race of 2:17½. She also won the Lexington stakes, beating about the same field, and scoring a mark, her present record of 2:14½. Her only defeat was in the Horse Review purse at Oakley, where she won the first heat in 2:14½, and was defeated by Alta Axworthy, who she later defeated in the Futurity. From the manner in which she won her stake engagements last year, many predict that she will repeat Feren's record by winning also the three year old division of the Kentucky Futurity this year.

Interfering, Striking, Cutting or Brushing in Horses.

Of the many faults, accidents or habits to which horseflesh is heir, "interfering" is one of the most troublesome. Fortunately, however, it is one that admits of a large measure of prevention, and the ill-effects of it can be to a very considerable extent overcome. In the consideration of this subject one of the most important points to thoroughly study is the causes. Of the somewhat numerous influences which contribute to this fault, defective conformation is a very important one in predisposing to it. It is important from the fact that cases that are largely the result of defective formation are the most difficult to successfully cope with. A horse of perfect formation of limbs should raise, advance and put down his feet approximately in a straight line in the act of progression, in the walk or trot. Any deviation inwards from the straight line renders a horse liable to strike if any exciting cause is brought into operation.

Narrow horses, particularly if they are leggy, are apt to go close both behind and in front, and consequently to "brush." Those that "toe out," either in the hind or fore extremities, usually wind inwards in progression, and are consequently apt to interfere. In fact, there is no formation of limb that so strongly predisposes to this fault, in its most aggravated form, as the defect just mentioned. Horses as a rule that "toe in" in the fore limbs wind outwards, and consequently show no disposition to "brush." In such cases the "turning in" of the toes is due to the position in which the legs are fixed onto the body. It is due to the hack part of the leg showing a tendency to turn outwards from the body. This can be most clearly observed at the elbow in the front leg where the point inclines outwards. "Toeing in," however, is not always the result of a malposition of the limb throughout, for sometimes the deformity is confined to that portion of it from the fetlock down, constituting what might be called a "club foot." This formation often predisposes to "striking" to a marked degree, as in progression the foot comes very close to the opposite limb. In spite of the predisposition many horses show to interfering from defective formation, such animals may be seen working month after month without inflicting any injury to themselves.

Horses that are in good condition, well balanced in going, and that have complete power of co-ordinating the movements of their limbs, are the ones that are likely to escape the not infrequent consequences of defective formation of limb. The exciting causes of interfering are numerous, but the one one hears most frequently spoken of is defective shoeing, and it is no doubt sometimes a cause, but not nearly so frequently as is sometimes supposed. The unfortunate shoer is frequently maligned for what is no fault of his. It does not matter how some horses are shod, or whether they are shod or not, they will interfere under some circumstances.

The best that we can do in the way of shoeing is to use a good rational shoe, properly applied on a suitably prepared foot. Too heavy a shoe will sometimes act as a cause from the excessive weight, taxing the muscular control of the limb unduly, so that during quick movements and sharp turns "striking" is particularly apt to occur. Leaving the hoofs too large is sometimes a cause, from the simple consequence of its bringing the hoof closer to the opposite leg. Not only that, but the increased length of the toe resulting from too large a hoof intensifies the tendency to "cut."

The first step, then, in the attempt to prevent striking, is to reduce the wall to reasonable dimensions with the rasp. Defects of the form and direction of hoof may sometimes be remedied in a measure; as, for instance, take a horse that "toes out," and shorten the outer part of the toe to a greater extent than the inner, the tendency is not only to correct the unsightliness of the deformity, but also to remedy in a measure its ill-consequence in progression. The same may be done, but just in the opposite way, in horses which "toe in." In the hind legs it is generally the inner part of the toe of the hoof that inflicts the injury. This can be rasped so as to reduce its convex form to an approach to a straight line with the rasp, which lessens somewhat the danger. The shoe should be of reasonable weight (strong enough to keep it from breaking) and set in as much as possible on the inside without running too much risk of bruising the sole. Have the inside branch of the shoe narrow and rounded, so that there will be as little danger of inflicting injury as possible. The nails may also be withheld from the inside of the toe, so that no injury may be done from the clinches. It is a good plan to also shorten the inside of the hoof more than the outside, and compensate for this by deepening the inside branch of the shoe, so as to keep the foot level and have even bearing. The inside

branch of the shoe may be made almost straight from the toe back, and the hoof made to correspond pretty much in form. The following out of this plan of shoeing will minimize the likelihood of injury being done by striking.

The weighting of the shoe on the outside is often recommended by having the outer branch considerably heavier than the inner one, with the idea that the weight on the outside makes a horse go wider. This would, no doubt, be the tendency, and providing it does not increase the weight of the shoe too much there is no objection to it.

Another plan sometimes followed is to raise the inside of the foot higher than the outside, with the idea that the fetlock of the leg on the ground will be thrown outwards, and thus be more likely to escape injury from the opposite foot. This plan is irrational, from the fact that it causes a horse to tread unevenly, and thus tend to result in injury to some other part of the leg, disturbing the relations of the various parts that make up the weight-bearing column.

In the front legs a three-quarter shoe is sometimes used, the shoe only coming half way round on the inside and not covering the ground surface of the inner quarter. The difficulty about this plan is getting the shoe so applied that all the wall will bear its normal amount of weight. It doesn't do to leave the inner quarter unsupported, for in that case there will be tilting of the leg inwards when the foot is put on the ground, or, in other words, uneven treading, with the ill consequences already explained.

Charlier shoes sometimes do very well and are much safer than a three-quarter shoe. This is a light, narrow webbed shoe, that only comes half way round on either side of the hoof and is sunken in to a groove cut out of the plantar surface of the wall, so that the lower surface of it is just flush with the quarters that are not grooved out. By this plan there is an even bearing surface all round the hoof, a light shoe, and one no more likely to cause injury to the opposite leg than the natural unshod hoof. The drawback about this shoe for general use on hard roads is that it has not strength enough to form a substantial stay to the hoof. It also lessens the action, and horses are apt to go sore with them on very hard roads.

It is questionable if we have a much better device for shoeing interfering horses than the rubber pads now so generally in use in cities. Their use has a tendency to prevent interfering by virtue of their effect in preventing slipping, which is one of the exciting causes of this trouble. In the hind legs where "cutting" is most usual, the inner and hack part of the fetlock is the common seat of injury. Occasionally in horses with a good deal of hock action they will strike the leg higher up, and in very low, close going horses the inside of the coronet is scraped.

In the front legs the injury may be anywhere from the fetlock to the knee. When it is high up it generally gets the designation of speedy cut. Another cause of "striking" is fatigue. It has already been pointed out that when a horse has not perfect control of his legs he is apt to "brush," so that horses that have not had regular work and good feed for a length of time, or, in other words, are not in good condition, are easily fatigued, and consequently liable to interfere.

The uneven footing of rough roads, slippery roads or pavements, the swaying of a two-wheeler, are all circumstances likely to interfere with a horse's equilibrium, and consequently are not infrequently exciting causes of "striking."

Another very fertile exciting cause, particularly in cities, and one which, strange to say, is never referred to in print, is the influence of discomfort in connection with the mouth in causing "interfering." There is nothing that puts a horse out of balance more completely than anything, wrong with his mouth. Horses that cross their jaws, open their mouths, put their tongues out, or over their bits, carry their heads sideways, fuss with their bits, slobber, pull, etc., generally have some soreness of the mouth caused by their hits, and if they are at all predisposed are very apt to "cut." We see examples of this every day in cities where dealers get horses from the country that have chiefly been used to snaffle bits. They at once begin to drive them with curb bits, and they nearly all show some discomfort at the change in the various ways already mentioned, in addition to which there is "pulling out" and "crowding" in double harness. It is very common to see a horse cut his legs badly under such circumstances that shows no evidence of ever having struck before. The treatment of "interfering" resolves itself largely into methods of prevention. The most important point is to remove the cause, where practicable, and if not, to endeavor to neutralize its operation as much as possible.

If a horse is in danger of "striking" himself from the mouth not being in proper order, or from any exciting cause remaining in operation, protect the part or parts with a hoot or hoots that are likely to be in-

jured. If any part is injured from "cutting" keep that part protected until it has entirely recovered from effects of injury.

In a large majority of cases after a horse is in good condition, his mouth well made, and he is properly shod, there will be no need for hoots, unless he is likely to be subjected to some exciting cause, or unless he is markedly predisposed from defective formation. —American Sportsman.

Leading 2:15 Sires.

The 2:15 list is already a large one, containing many hundreds of trotters and pacers. But the difficulty of breeding them with any approach to certainty is accentuated by an examination of the list under their sires. Only seven stallions so far have succeeded in siring twenty-five or more such performers, viz.:

	2:15 list.	2:10 list.
Alcantara 2:23 by George Wilkes 2:22.....	31	6
Baron Wilkes 2:18 by George Wilkes 2:22.....	20	11
Onward 2:25½ by George Wilkes 2:22.....	27	10
Gambetta Wilkes 2:19½ by Geo. Wilkes 2:22.....	27	12
Brown Hal 2:12½ by Tom Hal Jr.....	27	11
McKinney 2:11½ by Alcyone 2:27.....	27	8
Simmons by George Wilkes 2:22.....	26	2

All belong to the Wilkes family except Brown Hal, whose entire list are pacers. Five are sons of George Wilkes, and the sixth, McKinney, is a grandson, being sired by Alcyone 2:27, the brother of Alcantara, who heads the list with the largest total of trotters and pacers. Three are bred in the same way—George Wilkes crossed on Mambrino. Patchen mares. McKinney's sire is of this same blood, and Onward's dam is Dolly by Mambrino Chief, the sire of Mambrino Patchen. The odd Wilkes stallion is Gambetta Wilkes, a remarkable sire but principally confined to fast pacers. The fact that McKinney is of a younger generation than the other horses in this list shows what a remarkable sire he is.

Strike!—if they don't give you Jackson's Napa Soda when you ask for it.

VETERINARY DEPARTMENT.

WM. F. EGAN, M. R. C. V. C., F. E. V. M. S.

—Subscribers to this paper can have advice through these columns in all cases of sick or injured horses, cattle or dogs by sending a plain description of the case. Applicants will send their name and address that they may be identified.

OAKLAND, January 15, 1904.

ED. BREEDER AND SPORTSMAN:—What shall I do for a thrifty weanling which is showing signs of distemper, swelling under the throat; is also troubled with pin worms. I have her in the city and have no pasture. Respectfully, J. W. S.

Answer—As distemper and glanders are somewhat similar in their symptoms, and you are within reach of a veterinary surgeon, I would advise you to consult with one. Glanders is a disease that is very dangerous, being contagious to man, and almost always fatal. The general treatment for distemper consists of placing the colt in a comfortable, well ventilated, but not draughty stall, giving soft nourishing food, poulticing the swollen glands and throat, and in the fine part of the day allowing him to stand where the sun shines. Blanket him, if the stable is cold. If he be discharging from the nose, do not let him drink from the same trough, or vessel, that other horses drink from until you are sure that he has not got the glanders.

EFFECTUAL

The most effectual remedy in use for the cure of ailments of horses and cattle is

GOMBAULT'S CAUSTIC BALSAM

Used as a Blister or Lotion.

This preferred remedy is prepared exclusively by J. E. Gombault, ex-Veterinary Surgeon to the French Government Stud.

As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, etc., it is invaluable. Every bottle of Caustic Balsam sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address: THE LAWRENCE-WILLIAMS COMPANY, Cleveland, Ohio.

ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

Choke Bores, Their Advantages and Disadvantages.

Despite the great advance made within the last decade in the science of shotgun ballistics, there is still a very great deal to be discovered and explained before experts can be said to have thoroughly grasped all the laws relating to shooting in the field or at the traps. If anything were wanted to prove this, it would only be necessary to refer to sporting and expert discussion during the last two years, as to what really occurs in shooting with a gun that is choke bored at the muzzle. Choke in a shotgun is an invention not much more than thirty years old. It is still a subject of dispute whether we are indebted for its invention to the United States, or to Mr. W. W. Greener, of Birmingham, or to Mr. Pape, of Newcastle. In his lifetime the late Mr. J. D. Dougall, senior, of St. James street, London, accepting the invention as American in origin, claimed to have been the first introducer of the novelty in England. Nevis in the *Country Gentleman* states: "We remember his relating to us, as we sat in his London sanctum one day in the early seventies, how his eldest son, while travelling on business in the United States, came across a specimen of a choke bore gun there, and was so struck with its shooting powers that he brought it home with him to Glasgow and submitted it to his father. At that very time, apparently, so far as we remember, Mr. Pape had accidentally hit upon a similar principle in boring, which he was engaged in experimenting with and improving, while Mr. Greener was similarly working on the same lines in Birmingham. Although Mr. Greener then does not claim to have invented choke boring, there can be no question that he brought it to perfection, and was the medium of popularising the system in this country, having, as we all know, beaten all competitors with his choke bores at the gun trials of 1875. In the late seventies full choke bored guns were all the rage, but their popularity rapidly waned, except with pigeon shooters, who took great trouble in 'plating' their choked guns, and thus conquering the tendency in full chokes, experienced by game shooters, to shoot too close, and not to the centre.

Though full chokes became unpopular before the eighties in game shooting the discovery of the principle of construction has ever since then been invaluable to gun makers in giving them that command of pattern that previously was more or less dependent upon chance in a cylinder gun, even though that chance was reduced very materially in the beautifully bored guns produced by Manton, Boss, Lancaster, Lang, Moore and Purdey, without any idea of choke boring as now understood. The driving of game, of course, helped the fall of full chokes, even full choke in the left barrels, but the principle was merely dormant during the reaction towards cylinders that speedily followed, and it is carried out in its modified form today in the best types of what are now termed 'improved cylinders,' improved by more than a suspicion of choke in both barrels, or, at any rate, in the left barrel. The King, in truth, is believed to prefer more choke in his left barrel than in his right, also an 'improved cylinder,' equal to the tallest pheasant shooting. Choke is by no means dead, then, even in the highest quality of driving guns, and it is very much alive and active in the left barrels of the cheaper grades of gun, suitable for all round shooting."

Such, then, is the position of choke in shotguns for game, giving gunmakers the full command of pattern. Yet to this day no one has been able thoroughly to explain the action of the choke as it affects the position and arrangement of the pellets leaving the muzzle, and their pattern on the manufacturer's plate. Explanations have been attempted, certainly, but unfortunately they all differ. They are at best in our present stage of ballistic information mere conjecture, innocent of proof, untested by actual measurement, owing to its extreme difficulty. The attempt was made to solve the obscure problem by Mr. R. W. S. Griffith, manager of the Schultze Powder Company, in his lecture to the Gunmakers' Association, on the subject of shotgun patterns. No one had more right to speak as an authority on the subject, for Mr. Griffith, as is well known, was the first expert across the water, to apply to the shotgun the principles of measurement adopted for big guns. But on this abstruse question of the action of the choke on the pellets Mr. Griffith spoke with some hesitation, as merely guessing what occurred inside the barrel from the action of the choke on the shot charge, and its ascertained results on pattern, of which he had made a painstaking and profound study. Other explanations have since been attempted on that of Mr. Griffith, who believed that the direction of the shot was turned inwards by the choke. One well known authority indicated the view that the pellets when stayed by the choke of the barrel received a violent jerk, which opened spaces between them through the first pellets recovering from the jerk before those behind, thus separating them within an inch of the muzzle which they left in that formation, preventing wedging, or deformation outside, occasioned in a true cylinder by

the pressure from behind, the pellets meeting the pressure of the air outside the muzzle, the underneath pellets being wedged between those in front, owing to the greater pressure on them just before they leave the barrel, and thus resulting in a lateral spread.

Opinions all differed, then, it can be seen, as to what the particular action is in the choke that has the observed effect of concentrating the pattern of the pellets discharged from a choked gun; but until recently it seemed to be assumed as incontrovertible, that the direct action of the choke on the pellets themselves in the barrel, and before they left the muzzle was the true cause of their closer pattern on the target. An additional theory has recently been added to these others, and one that, as stated by a contemporary, seems very reasonable, which is all that can be said of it in the absence of any proof whatever of its accuracy.

It is known that the powder gases travel nearly three times as fast as the shot charge on emerging from the muzzle and meeting the resistance of the air, that resistance being broken to some extent by the mass of pellets in favor of the traveling gases. There can be no doubt that these fast traveling columns of gas on emerging from the barrel after the pellets have gone out have a scattering influence upon the shot charge, and which perceptibly spread its pattern. The latest theory is that the choke gets rid of this disturbing influence, not by its action on the shot charge, but on the gas propelling it. That result is attempted to be explained in this wise. The obstruction of the choke reduces the velocity of the shot charge near the muzzle. The delayed movement of the shot at the choke causes a "piling up" of the gases behind the over powder wad, causing these gases to rebound backwards against those further down the barrel, thus momentarily delaying their whole movement and letting the shot charge leave the muzzle entirely undisturbed by the powder gas behind it, or its pressure on the wadding. This is an entire reversal of the theories hitherto current to account for the closer shooting of choke bores, as given out by the best authorities on the point some years ago. But it is given at a time when knowledge of the laws of ballistics has considerably advanced, and it is not inconsistent with the latest information extant obtained.

This new theory, in fact, ascribes to "muzzle blast" the vagaries in pattern known to appertain to a true cylinder gun, where the wadding happens to be driven against the charge of shot at a velocity due to the gases of more than twice that of the pellets in the charge. It is stated, not unreasonably, that when the "muzzle blast" is decreased by a smaller powder charge the pattern is improved in all cases owing to there being no interference with the direct course of the pellets in the charge of shot to the target plate.

It is argued that the very small amount of choke in an improved cylinder barrel decreases the "muzzle blast" by delaying, as described, the exit of the gases from the muzzle, and so getting rid of this upset influence with or without the wadding upon the shot charge within the first two inches of travel beyond the muzzle.

There is little doubt that improved cylinders are more popular with our best shots than what is called a true cylinder, more subject as the latter may be to vagaries in pattern. These vagaries are now put down by suggestion to the powder gases emerging from the muzzle occasionally overtaking the wadding, and thus spreading wide the pattern to such an extent as to spoil the shooting on that particular instance.

Now, all of this is very interesting to the keen shooter, but, like too many other solutions of shooting problems, it is not based on absolute evidence leading inevitably to one conclusion. The latest view, however, has the substance of being not only the most ingenious of all, but on the whole the most likely ultimately to be found—squaring with known facts in connection with the patterns made by various types of shotguns and the latest data as to the behavior of a shell load shot from a sporting gun, both in the travel up the barrel and after it leaves the muzzle of the gun.

If correct, the moral of it all, is: that an improved cylinder is the best gun, doing away, as it does, with the disadvantages of the true cylinder as well as of the full choke, both considerable, though entirely different in kind.

English snipe have been plentiful near Point Arena recently. Limit bags have been shot daily by the lucky sportsmen who were at the Point.

A homing pigeon was recently shot by a hunter near the Napa Soda Springs. The shooter was after wild pigeon, which were numerous in the vicinity. The bird shot had around one leg a thin silver band, upon one side of which was stamped "J 510," upon the other the figure of a pigeon. Wild pigeons will now and then flock with tame birds, much to the discontent of the latter, but instances of tame birds consorting with their wild cousins are somewhat rarely recounted.

Duck and Quail Outfits.

The demand at Skinner's keeps up for sportsmen's outfits, ammunition and guns. A large and new stock of goods has been added to all the demand for hunting suits, rubber boots and hunters' footwear; canvas and folding wooden decoys, gun cases and a new design of leather-covered shell boxes. Peters Factory Loaded Shells are unequaled. Skinner's place is 801 Market street. You can get anything there you need for duck or quail shooting. Send for a catalogue, if you haven't the time to come and try a mail order.

Pacific Coast Field Trials.

[By Albert Betz.]

The twenty-first annual trials of the Pacific Coast Field Trials Club were run at Bakersfield, Kern county, commencing January 11, 1904. The stakes were the Derby, with twenty starters; All-Age with nineteen, and Members', with five starters. The number of starters in the two former stakes were the largest in the history of the club.

The Derby purse amounted to \$625, the largest ever offered for a similar event by any club in this country; three silver cups were the special prizes; 50% of this purse and cup went to first, 30% and cup to second, and 20% of the purse was divided between the owners of the dogs awarded equal third. There being but one cup for third place, Messrs. Van Arsdale and Keller agreed to toss for the cup, the winner to buy a similar cup for the loser. Mr. Keller was the lucky man.

The All-Age purse amounted to \$400, the prizes were also three cups; 50% and cup to first, 30% and cup to second, and 20% and cup to third.

In the Members' Stake trophies were awarded to first, second and third.

W. S. Bell of Pittsburg, Pa., judged the trials, and showed himself the peer of any judge in America. That his decisions were correct and entirely satisfactory to owners and handlers alike, is evidenced by the fact that it was the unanimous wish of all that he would return and judge the club's trials of next year. An invitation was extended him to do so; and, while he expressed the desire to come, it is yet too early to announce definitely his ability to be on hand.

The extreme dryness, on account of lack of rain, greatly hampered the dogs, especially the Derby entries, in showing to the best advantage. However, enough bird work was had to enable the judge to arrive at a correct conclusion as to the respective merits of the dogs. The young dogs placed in the Derby will no doubt be hereafter heard from. The All-Age dogs seemed to have less difficulty in locating birds and some excellent work was done, considering conditions. Lady, winner of first in the All-Age has for several years been a consistent performer at our trials and those of the Pacific Northwest; and Kilgarif, placed second, sustained his sensational record last year as the winner of our Derby; McCloud Boy, winner of third, is a highly bred and well formed dog, classy enough to go against the best.

The annual meeting of the club was held on Wednesday evening, January 13th, a large and enthusiastic gathering being present. The following officers were re-elected for the ensuing year: W. W. Van Arsdale, San Francisco, President; Clinton E. Worden, San Francisco, First Vice-President; H. W. Keller, Santa Monica, Second Vice-President; Albert Betz, San Francisco, Secretary-Treasurer. Executive Committee—C. N. Post, Sacramento; W. S. Tevis, Bakersfield; John H. Schumacher, Los Angeles; T. J. A. Tiedeman, San Francisco. W. W. Richards of San Francisco was elected the fifth member of the committee.

The following named gentlemen were proposed for and elected to membership: C. F. A. Last, Los Angeles; Howard B. Smith, Colton; Floyd S. Judah, Frank H. Mayer, James S. Brownell, E. A. Mocker, Walter D. Mansfield, Alexander Hamilton, A. Cheesbrough, L. O. Kellogg, Mountford Wilson, San Francisco; A. G. Park, Hanford; J. Sub Johnson, Visalia; C. J. Berry, Selma; Frank Ruhstahler, Sacramento; W. E. Gerber, Sacramento; C. A. Winship, The Palms, Los Angeles county; H. L. Betten, Alameda; H. P. Anderson, Los Angeles; E. D. Roberts, San Bernardino and Judge W. S. Bell, elected an honorary member.

Amongst those noted present were the following: W. W. Van Arsdale, J. M. Kilgarif, P. D. Linville, Wm. Dormer, H. T. Payne, Dr. Craig, J. W. Flynn, W. W. Richards and wife, Clinton E. Worden, Albert Betz, Mr. Campbell, Frank H. Mayer, San Francisco; Judge C. N. Post and J. E. Terry, Sacramento; C. W. Coggins, Igerna; H. W. Keller, Santa Monica; John H. Schumacher, H. P. Anderson, C. F. A. Last, John Hauerwass, Los Angeles; A. Abbott, Victoria, B. C.; J. McDaniels, Paso Robles; Howard B. Smith, Colton; J. F. and Mrs. Elwood, Capt. W. H. McKittrick, Mr. Martin, Bakersfield; C. J. Berry, Selma; A. G. Park, Hanford; W. B. Fred and Chas. Coutts, Kenwood; J. E. Lucas, San Clemente; C. H. Babcock, Del Rey; Mr. Valencia, Napa; R. M. Dodge, Bakersfield and others. One of the most pleasant of the many pleasant features of the trials was a luncheon given by Mr. Tevis at the Gosford Ranch to members of the club and their friends.

THE DERBY.

The draw for the Derby was had on Sunday evening, January 10th. Twenty entries paid the starting fee, and the draw resulted as follows.

Charles W. Coggins' English Setter dog Sharon Boy with H. W. Keller's Setter bitch Sombra.

J. E. Terry's Setter bitch Countess Lou with B. J. Baum's Setter dog Starlight Jr.

Stockdale Kennels' Pointer dog Cuba's Cottonwood with C. W. Coggins' Setter bitch Miss Nelson.

J. W. Considine's Setter bitch Hick's Bab with Stockdale Kennels' Pointer dog Cuba's Glenwood.

T. J. Watson's Setter dog Star's Rod with C. E. Worden's Pointer dog Sandilewood.

W. B. Coutt's Pointer dog Glen Rose with W. W. Van Arsdale's Setter bitch Keapsake.

J. W. Considine's Setter dog Hick's Lad with Stockdale Kennels' Pointer bitch Fly's Pearl.

John H. Schumacher's Setter bitch Valita with Stockdale Kennels' Pointer bitch Cuba's Ivywood.

W. W. Van Arsdale's Setter dog Klamath with John H. Schumacher's Pointer dog Frank W.

Dr. A. T. Leonard's Pointer dog Wallace Bruce with Alexander Hamilton's Setter dog Lady's Lad.

MONDAY, JANUARY 11, 1904.—The first brace Sharon Boy-Sombra, were cast off at 9:45 A. M., in open territory, with fairly good cover, and where birds had been located by the riders. Sombra showed best in pace and range, and kept up pace to end of the beat. Sharon Boy seemed lopy and spiritless. Both missed opportunities to point, after birds had been driven from trees in which they sought refuge after being flushed. Ordered up at 10:40. Sharon Boy banded by J. E. Lucas; Sombra by W. B. Coutts.

Countess Lou-Starlight Jr.—Down at 11, in a field east of where former brace was run. Neither showed much pace or range, the bitch, however, probably having the better of it in that respect. No bird work was done, and they were ordered up at 11:30. Countess Lou banded by Coutts; Starlight Jr. by Lucas.

Cuba's Cottonwood-Miss Nelson—Down at 11:55, in a field designated by the Judge as the "Cat" field, where cover was rank. Shortly after being put down Cottonwood flushed a bevy, the birds scattering, but neither dog located, though birds were raised by the spectators on ground over which dogs had run. Both were good goers, but of restricted range. Up at 12:40. Cottonwood handled by R. M. Dodge; Miss Nelson by Lucas.

Lunch was partaken of at the Gosford Ranch; and after a drive of several miles to the "Mule" field, the next brace—

Hick's Bab-Cuba's Glenwood, was cast off at 2:40, in good cover and where birds were known to be. This was a nice going pair, Bab having the better style and, possibly, being wider in range. After running some time without finding birds, the railroad track was crossed and the first bird work of the day was had. Glenwood was first to find, pointing a small bevy, and was backed by Bab. Both dogs were steady to shot. Glenwood made two more points before ordered up, and was steady to shot and wing. He clearly excelled in bird work. Bab flushed several birds which she should have pointed. Up at 3:25. Glenwood banded by Dodge; Bab by Lucas.

Sandlewood not being on the ground the next brace—

Glen Rose-Keepsake, were put down at 3:30 on same ground. Keepsake is probably the most diminutive Setter ever seen in trials, yet, notwithstanding, she is fast and rangy. The Pointer, also showed speed, style and range, and was the better in bird work, although both ran over birds. Keepsake was first to come to point, but was ordered on by her handler; a moment afterwards the birds she had been pointing were flushed by spectators. Glen Rose made in all three points during the heat and in each instance was steady to either shot or wing. He had the better of the beat. Up at 4:10. Glen Rose handled by Chas. Coutts; Keepsake by Babcock. This was the last brace of the day.

TUESDAY, JANUARY 12.—Star's Rod-Sandlewood—Down at 9:25 in good open ground with fine cover. Both ranged well, but ran over birds which should have been pointed. After running some time Sandlewood came to point, nicely backed by Rod, but no bird was found. Ordered up at 10. Star's Rod handled by Coutts; Sandlewood by Lucas.

Hick's Lad-Fly's Pearl—Down at 10:05. Lad was best in range and speed, and soon after being cast off ranged into timber which was the last seen of him. Pearl's Fly, rather restricted in range, continued on to end of heat, and although taken to ground over which birds had scattered failed to locate. Up at 10:45. Hick's Lad handled by Coutts; Fly's Pearl by Dodge.

Valita-Cuba's Ivywood—Down at 11, on grounds not before used. Shortly after being put down the riders flushed a bevy of birds from dense tumbledowns onto open ground with short cover, where Valita soon came to point; bird flushed and she was steady to wing. Ivywood next pointed on bank of roadbed, backed by Valita; both steady to shot. Ivywood made two more points, one of which she left and bird was later flushed. Both missed opportunities. Up at 11:40. Valita, a stylish bitch, was banded by Coutts; Ivywood by Dodge.

Klamath-Frank W.—Cast off in field adjoining where last brace had been worked. Immediately after being placed down both took after rabbits and it was some time before they could be brought in. Aside from several more rabbit chases nothing was done, although toward the latter end of the heat both had opportunities on birds. Both ranged well, and Klamath is exceptionally stylish. Klamath handled by Babcock; Frank W. by Lucas. A short drive was then made to Gosford's ranch and lunch partaken of.

Wallace Bruce-Lady's Lad—Down at 2 P. M. A nice going pair, ranging well and showing speed, Lad being especially stylish. Both had opportunities on birds which had been scattered by spectators and were lying in good cover, though no bird work was done. Lad twice came to point, no bird in either case, however, being raised. Bruce handled by Lucas; Lady's Lad by Coutts.

This was the last brace of first series and Judge Bell announced that the following dogs would be carried into the second, viz.: Sombra-Cuba's Glenwood; Hick's Bab-Glen Rose; Keepsake-Ivywood.

SECOND SERIES.

Sombra-Cuba's Glenwood—Down at 3:10. Both dogs ranged well. A bevy of birds was flushed from bare ground into a cornfield and along a dry ditch, and when dogs were carried across to where birds were, Glenwood was the first to find, making two stylish points on edge of ditch, being steady to shot. Sombra also found, was backed by Glenwood, and both were steady. Each made several more points. Sombra is a very stylish bitch and will no doubt be later heard from. Up at 3:55.

Hick's Bab-Glen Rose—Cast off at 4:30 in corn field where birds had been flushed by spectators before brace was put down. Cover fairly good. Glen Rose was easily the best of the brace and made one nice, steady point, the only bird work of the heat. Many birds were flushed by spectators from ground where dogs had worked. Seemingly they could not locate. Up at 4:45.

Keepsake-Cuba's Ivywood—Down at 4:50 in same field where former brace worked, later being worked across ditch into adjoining field where birds had flown. Keepsake showed best in range, speed and style, but was outclassed by Ivywood in bird work, the latter making no less than five points in the heat to the former's one. Both ran over birds and each was somewhat inclined to chase, unless cautioned by handler. Up at 5:05.

Returning to the wagons which had been left on other side of fence, Judge Bell announced the winners as follows: 1st. Stockdale Kennel's Cuba's Glenwood; 2d. Same Kennel's Cuba's Ivywood; Equal 3d. H. W. Keller's Sombra; W. W. Van Arsdale's Keepsake.

ALL-AGE STAKE.

The drawing for All-Age Stake, in which there were nineteen starters, was held on Tuesday evening, January 12, and resulted as follows:

C. E. Worden's Setter dog Harry H. with same owner's Pointer bitch Pearl's Jingle.

W. W. Van Arsdale's Setter dog Detroit Joe with C. E. Worden's Setter dog Jay M.

J. E. Terry's Setter dog Kilgarif with W. W. Van Arsdale's Setter dog Oakley's Pride.

J. W. Considine's Setter bitch Policy Girl with W. W. Van Arsdale's Setter dog McCloud Boy.

Stockdale Kennels' Pointer bitch Margarette with J. W. Flynn's Pointer bitch Nellie Bang.

Stockdale Kennels' Pointer dog Cuba's Zep with W. W. Van Arsdale's Setter dog California Bell Boy.

J. W. Considine's Setter bitch Count's Clip with Stockdale Kennels' Pointer bitch Midget.

Stockdale Kennels' Pointer bitch Petronella with A. H. Nelson's Setter bitch Sport's Destiny.

J. W. Considine's Setter bitch Count's Peg with Stockdale Kennel's Pointer dog Cuba Jr.

J. E. Terry's Lady, a bye—

WEDNESDAY, JANUARY 13.—Harry H.—Pearl's Jingle—Down at 9:20. Harry showed great range, speed and style, while the bitch was slow, improving in pace and range toward latter part of heat. Jingle was first to find, pointing a bevy which flushed wild, she being steady to wing, and scattered in good cover. She made four more good points and was steady to shot and wing, while Harry H. running over same ground was unable to locate. Up at 10. Harry H. banded by Coutts; Jingle by Lucas.

Detroit Joe-Jay M.—Down at 10:10, in large open field. Both showed excellent range and speed, although, like last year, Detroit Joe could not resist the temptation to chase rabbits. Both had opportunities on scattered birds but failed to locate. Up at 10:40. Detroit Joe handled by Babcock; Jay M. by Lucas.

Kilgarif-Oakley's Pride—Down at 11:05 in alfalfa field, adjoining cornfield where birds had been driven. Kil showed great range and good speed going to extreme outer end of field before dogs were brought into cornfield where birds lay. Each dog made two points and was steady to wing and shot. Kilgarif showed up the better of the two and demonstrated that he had not deteriorated from his Derby form. Up at 11:35. Kilgarif handled by Coutts; Oakley's Pride by Babcock.

Policy Girl-McCloud Boy—Down at 11:45, in field adjoining where last brace had run. Both fast and wide-rangers. Going down bank of dry ditch McCloud Boy whirled into a snappy bevy point, but was a trifle unsteady to shot. The birds flushed into another field, and although dogs were taken to place where birds had been marked, no further point work was done. Policy Girl pointed twice, but no birds were found. Birds were afterwards raised by followers on ground over which dogs had run. Up at 12:20. Policy Girl handled by Lucas; McCloud Boy by Babcock.

Margarette-Nellie Bang—First brace down after lunch at 1:55. Margarette shortly came to point and was nicely backed by Nellie, a rabbit being raised. Margarette again pointed and was steady to shot. Nellie pointed, but moved on, and later came to stop. She excelled in style, speed and range. Just before being ordered up Margarette made another point and was steady. Up at 2:27. Margarette handled by Dodge; Nellie Bang by Coutts.

Cuba's Zep-California Bell Boy—Down at 2:32. Bell Boy was the more stylish and ranged better, being first to find, the birds flushing. Working on scattered birds Bell Boy made several good points; Zep came to point several times, but no birds were found. Later, however, he found and was steady to shot. Bell Boy had best of heat. Up at 3:15. Cuba's Zep handled by Dodge; Bell Boy by Babcock.

Count's Clip-Midget—Down at 3:37. Clip showed best range and speed, and was more stylish, while Midget excelled in bird work, making three good points, one a bevy point in good cover, and being steady to shot. Clip pointed and was nicely backed by Midget, the former being somewhat unsteady to shot. Up at 4:10. Count's Clip handled by Coutts; Midget by Carlyle.

Petronella-Sport's Destiny—Down at 4:27, in field across road from where former brace had run. Birds were lying in sunflower patch and were roared by both dogs until they flushed into field where cover was low and dense. Both showed excellent range and speed. Each had many opportunities to point. Petronella made three good points, being backed by Destiny, but was a trifle unsteady. Destiny several times came to point, but no birds could be raised. She was a number of times backed by Petronella, who showed an inclination to break in. Up at 5, and last brace of the day. Petronella banded by Dodge; Destiny by Lucas.

THURSDAY, January 14—Although an early start was made, owing to the fog, the first brace of the morning—

Count's Peg-Cuba Jr. was not put down until 10:58, in large open field. Peg showed best in range and speed, but though taken on ground where birds had been marked down she failed to locate. Cuba Jr. had two points to his credit, being steady to wing and shot, on one of which he was backed by Peg. Both missed opportunities. Up at 11:43. Count's Peg banded by Lucas; Cuba Jr. by Dodge.

Lady (a bye)—Cast off at 11:48, in large open field. Lady at once showed the classy hitch she is, ranging out for nearly a mile, yet being always under perfect command. Returning from her long cast she came to a stylish, snappy point on a single which had been marked down by spectators. Being ordered on by handler the bird flushed, but she was steady to wing. This was her only work on birds, but her performance was of such character that many of the onlookers picked her as the coming winner. W. B. Coutts, handler.

This was the last of the first series; and after partaking of a bountiful luncheon provided by Mr. Tevis for members and their friends, the Judge announced the following dogs carried into second series: Harry H.—Jay M.; Kilgarif-McCloud Boy; California Bell Boy-Midget; Cuba Jr.—Lady.

Harry H.—Jay M.—Down at 2:20, on grounds across track from "Mule" field. Harry showed speed, style and great range, excelling in these respects, though both were unfortunate in not finding birds. Up at 3 P. M.

Kilgarif-McCloud Boy—Down at 3:14 in same field near railroad track, finally being worked across track to where birds had been located. Kil was first to find, pointing a bevy, and followed with three more points, being steady to shot and wing. McCloud Boy also came to point, and moved on as bird was running, finally coming to stop when bird was flushed. Kilgarif excelled in range and speed and showed excellent judgment in locating birds. Up at 3:27.

California Bell Boy-Midget—Down at 3:46. Bell Boy was best in range, speed and style, though Midget also ranged well and showed good speed, and was better in bird work, making two good points and being steady to shot and wing. Up at 4:07.

Cuba Jr.—Lady—Down at 4:27 in field adjoining Canfield schoolhouse. Lady was first to locate and pointed bevy, the birds flushing into open field where both dogs made a number of good snappy points, being steady to shot and wing, and stanch backers. Lady showed best in range, speed and style, and verified the morning's prediction. Up at 4:45.

Judge Bell announced that he would require the following dogs on the grounds the next morning, viz.: Lady, Kilgarif, McCloud Boy, Cuba Jr., Harry H.

FRIDAY, JANUARY 15—Lady-Kilgarif—Down at 9:35 in large open field where dogs had opportunity to show range and speed. Lady showed to advantage, having wider range, better speed and style than Kil. No bird work was done in the heat, and it was evident that Judge Bell desired merely to compare the dogs in the respects mentioned.

After being ordered up Judge Bell announced that no further running would be required and declared the winners as follows: 1st. Lady; 2d. Kilgarif; 3d. McCloud Boy.

MEMBERS' STAKE.

The drawing for the Members' Stake was held immediately after completion of the All-Age and resulted as follows:

H. W. Keller's Setter bitch Sombra with J. W. Flynn's Pointer bitch Nellie Bang.

C. W. Coggins' Mountain Quail with W. S. Tevis' Cuba of Kenwood.

W. W. Van Arsdale's Setter dog Count's Mark a bye.

Dogs banded by owners.

Sombra-Nellie Bang—Cast off in heavy cover. Nellie was first to find, two birds being raised by her handler. Nellie soon made another point, moved up, but stopped when birds flushed. Sombra flushed wild; but when flushed on scattered birds did excellent work, making four points in rapid succession. Nellie also made several more points, and both were steady to wing and shot. Sombra displayed better range and style. Up at 11:37.

Cuba of Kenwood nor Mountain Quail being on band, the bye dog—

Count's Mark was next put down, with Cuba Jr. as a running mate. Count was at first somewhat wild, flushing a number of birds on edge of dry ditch, finally getting down to hard work in heavy cover, where birds were in plenty, and made a number of stylish points, being steady to shot and wing. Count's Mark is a litter brother to Lady, winner of All-Age, and is a fast and stylish dog.

Cuba of Kenwood-Mountain Quail—Quail was in poor condition from lack of work, being fleshy and soft. Cuba, though somewhat enfeebled and suffering from rheumatism when warmed up showed some of his old-time form and did some very clever work, making three very pretty points, one of which Quail refused to back. He was steady to shot. Towards end of heat Quail made a very stylish point and was steady to shot. Ordered up at 2:52.

Judge Bell announced the winners as follows: 1st. Count's Mark; 2nd. Cuba of Kenwood; 3rd. Sombra.

Thus ended one of the most pleasant trials in the history of the club.

SUMMARIES.

Bakersfield, January 11, 12, 1903—Pacific Coast Field Trial Club's twenty-first annual trials. Derby, for Setters and Pointers whelped on or after January 1, 1901. Purse, \$625—three moneys, 50, 30 and 20% and three silver cups donated by Jos. E. Terry, J. H. Schumacher and W. S. Tevis; 53 nominations,

(32 paid second forfeit); 20 starters (12 English Setters 8 Pointers.

I.

Sharon Boy, black, white and tan English Setter dog (Tony Boy-Sport's Destiny). Chas. W. Coggins, Igerna, Cal., owner; A. H. Nelson, breeder; J. E. Lucas, handler.

With

Sombra, orange and white English Setter bitch (Llewellyn Drake-Shadow). H. W. Keller, Santa Monica, owner; W. W. Van Arsdale, breeder; W. B. Coutts, handler.

Countess Lou, black, white and tan English Setter bitch (Count's Mark-Mary Lou). Jos. E. Terry, owner and breeder; W. B. Coutts, handler.

With

Starlight Jr., black, white and tan English Setter dog (Starlight W.-Rod's Sylvia). B. J. Baum, San Francisco, owner and breeder; J. E. Lucas, handler.

Cuba's Cottonwood, liver and white Pointer dog (Ch. Cuba of Kenwood-Petronella). Stockdale Kennels, Bakersfield, owner and breeder; R. M. Dodge, handler.

With

Miss Nelson, white, black and tan English Setter bitch (Tony Boy-Sport's Destiny). C. W. Coggins, owner; A. H. Nelson, Tacoma, breeder; J. E. Lucas, handler.

Hick's Bab, white, black and tan English Setter bitch (Doc Hick-Woodcraft). J. W. Considine, Seattle, owner; F. A. Malbaugh, Liberty, Ind., breeder; J. E. Lucas, handler.

With

Cuba's Glenwood, white and liver Pointer dog (Ch. Cuba of Kenwood-Petronella). Stockdale Kennels, owner and breeder; R. M. Dodge, handler.

Glen Rose, black and white Pointer dog (Glendale-Kenwood Rose). W. B. Coutts, Kenwood, owner and breeder; Chas. Coutts, handler.

With

Keepsake, white, black and tan English Setter bitch (California Bell Boy-Peach Blossom). W. W. Van Arsdale, owner and breeder; Chas. Babcock, handler.

Star's Rod, orange and white English Setter dog (Starlight W.-Rod's Sylvia). T. J. Wattson, San Francisco, owner; B. J. Baum, San Francisco, breeder; Coutts, handler.

With

Sandlewood, liver and white Pointer dog (Ch. Cuba of Kenwood-Petronella). C. E. Worden, San Francisco, owner; Stockdale Kennels, breeder; J. E. Lucas, handler.

Hick's Lad, white, black and tan English Setter dog (Doc Hick-Woodcraft). J. W. Considine, owner and breeder; Coutts, handler.

With

Fly's Pearl, black and white Pointer bitch (Cuba Jr.-Winnipeg Fly). Stockdale Kennels, owner and breeder; R. M. Dodge, handler.

Valita, white, black and tan English Setter bitch (California Bell Boy-Rod's Lark). J. H. Schumacher, Los Angeles, owner; W. W. Van Arsdale, breeder; Coutts, handler.

With

Cuba's Irywood, liver and white Pointer bitch (Ch. Cuba of Kenwood-Petronella). Stockdale Kennels, owner and breeder; R. M. Dodge, handler.

Klamath, black, white and tan English Setter dog (California Bell Boy-Rod's Lark). W. W. Van Arsdale, owner and breeder; Chas. Babcock, handler.

With

Frank W., liver and white Pointer dog (Don Graphic). J. H. Schumacher, owner; F. W. Emery, Pasadena, Cal., breeder; J. E. Lucas, handler.

Wallace Bruce, liver and white Pointer dog (Kenwood Dan-Whisper). Dr. A. E. Leonard, San Francisco, owner; Tod Sloan, breeder; J. E. Lucas, handler.

With

Lady's Lad, black and white English Setter dog (Clipper W.-Lady). Alex. Hamilton, San Francisco, owner; Jos. E. Terry, breeder; W. B. Coutts, handler.

II.

Sombra with Cuba's Glenwood.
Hick's Bab with Glen Rose.
Keepsake with Cuba's Irywood.

RESULT.

First, Cuba's Glenwood; second, Cuba's Irywood; equal third, Sombra and Keepsake.

BAKERSFIELD, January 13, 14, 15, 1903—Pacific Coast Field Trial Club's twenty-first annual trials. All-Age Stake, open to all Pointers and Setters. Purse \$400, three moneys, 50, 30 and 20% and three silver cups donated by Clinton E. Worden, W. W. Van Arsdale and Frank Maskey. \$10 forfeit and \$10 additional to start; 21 nominations, 19 starters (12 English Setters, 7 Pointers).

I.

Harry H., black, white and tan English Satter dog (Why Not-Sue). C. E. Worden, owner; Geo. E. Gray, Appleton, Minn., breeder; W. B. Coutts, handler.

With

Pearl's Jingle, liver and white Pointer bitch (Young Jingo-Pearl's Dot II). C. E. Worden, owner; Geo. E. Gray, breeder; J. E. Lucas, handler.

Detroit Joa, white, black and tan and ticked English Setter dog (Joe's Count-Queen of Diamonds). W. W. Van Arsdale, owner; L. N. Hilsendegen, Detroit, breeder; Chas. Babcock, handler.

With

Jay M., orange and white English Setter dog (Col. R.-Spot's Girl). C. E. Worden, owner; Geo. E. Gray, breeder; J. E. Lucas, handler.

Kilgariff, black, white and tan English Setter dog (Orion-Mary Lou). Jos. E. Terry, Sacramento, owner and breeder; Coutts, handler.

With

Oakley's Pride, white, black, tan and ticked English Setter dog (Oakley Hill-Gypsy Queen). W. W. Van Arsdale, owner; Chas. W. Tway, Irwin, Ohio, breeder; Babcock, handler.

Polly Girl, black, white and tan English Setter bitch (Dave Earl-Tot's Queen). J. W. Considine, owner; Lucas, handler.

With

McCloud Boy, black, white, tan and ticked English Setter dog (Way Boy-Sadie). W. W. Van Arsdale, owner; Hugh Hopkins, Mantua, Cal., breeder; Babcock, handler.

Margarette, black and white Pointer bitch (Cuba's Zep-Jingo's Bagpipe). Stockdale Kennels, owner and breeder; R. M. Dodge, handler.

With

Nellie Bang, lemon and white Pointer bitch (Ch. Senator P.-Lady Belle). J. W. Flynn, San Francisco, owner; B. E. Pindar, breeder; Coutts, handler.

Cuba's Zep, black and tan Pointer dog (Ch. Cuba of Kenwood-Jaquina). Stockdale Kennels, owner and breeder; Dodge, handler.

With

California Bell Boy, white, black, tan and ticked English Setter dog (Tony Boy-Lena Belle). W. W. Van Arsdale, owner; Pierre Lorillard, breeder; Babcock, handler.

Count's Clip, black, white and tan English Setter bitch (Ch. Lady's Count Gladstone-Jessie Rodfield). J. W. Considine, owner; Dr. J. A. Bown, Charlton, Ia., breeder; Coutts, handler.

With

Midget, black and white Pointer bitch (Cuba's Zep-Jingo's Bagpipe). Stockdale Kennels, owner and breeder; Carlyle, handler.

Petronella, liver and white Pointer bitch (Young Jim-Florida). Stockdale Kennels, owner and breeder; Dodge, handler.

With

Sport's Destiny, black, white and tan English Setter bitch (Marie's Sport-Mark's Fleet). A. H. Nelson, Tacoma, Wash., owner; H. B. Ladbetter, Farmington, Mo., breeder; Lucas, handler.

Count's Peg, black, white and tan English Setter bitch (Ch. Lady's Count Gladstone-Jessie Rodfield). J. W. Considine, owner; Dr. J. A. Bown, breeder; Lucas, handler.

With

Cuba Jr., liver and white Pointer dog (Ch. Cuba of Kenwood-Florida). Stockdale Kennels, owner and breeder; Dodge, handler.

Lady, lemon and white English Setter bitch (Ch. Count's Gladstone IV-Peach Mark). Jos. E. Terry, owner; W. W. Van Arsdale, breeder; Coutts, handler. A bye.

II.

Harry H. with J. M. Kilgariff with McCloud Boy. California Bell Boy with Midget. Cuba Jr. with Lady.

III.

Lady with Kilgariff.

RESULT.

First, Lady; second, Kilgariff; third, McCloud Boy.

BAKERSFIELD, January 15, 1904.—Pacific Coast Field Trial Club's twenty-first annual trials. Members' Stake. Prizes, silver cups donated by W. W. Richards, J. W. Flynn and Western Field. \$10 to start. 5 starters (3 English Setters, 2 Pointers). Dogs handled by owners.

I.

H. W. Keller's English Setter bitch Sombra.

With

J. W. Flynn's Pointer bitch Nellie Bang.

W. W. Van Arsdale's English Setter dog Count's Mark, a bye with Stockdale Kennel's Cuba Jr.

Stockdale Kennel's Ch. Cuba of Kenwood, liver and white Pointer dog (Glenbeigh Jr.-Dodge's Stella).

With

Chas. W. Coggins' Mountain Quail, black, white and tan English Setter bitch (Charm-Jessie Gladstone). G. W. Tibbetts, Colusa, Cal., breeder.

RESULT.

First, Count's Mark; second, Ch. Cuba of Kenwood; third, Sombra.

G. W. MILLER

San Francisco Kennel Club.

The annual meeting of the San Francisco Kennel Club was held Monday evening, January 11, 1904 at the Occidental Hotel. The following officers were elected: Charles K. Harley, President; John E. De Ruyter, Vice-President; John L. Cunningham, Secretary-Treasurer. John E. De Ruyter, W. C. Ralston, W. S. Kittle, John L. Cunningham, Charles K. Harley, Directors. John E. De Ruyter, John L. Cunningham, Charles K. Harley, Bench Show Committee. The eighth annual show will be held in the Mechanics' Pavilion April 13th to 16th, four days.

DOINGS IN DOGDOM.

Julius Redelsheimer, of Seattle, was on a brief visit in this city last week.

Seattle has fixed its dates for April 13th to 16th, and will probably use Coast judges as will San Jose.

The proposed one day show at Oak Grove has been postponed, it will be held, probably, the same week as the San Jose show.

The California Collie Club will hold its one day show the day before San Jose. As San Jose will be a three day show, this will enable three shows, San Francisco, Collie Club and San Jose to be held in two weeks and will, it is expected, bring many of the Northern dogs down.

The Santa Clara Kennel Club was organized in San Jose on the 13th inst.

The officers elected were: H. Doble, President; C. W. Coe, First Vice-President; H. Centre, Second Vice-President; Miss Della Beach, Secretary; J. Perry, Treasurer. Bench Show Committee—N. J. Stewart, W. C. Bogen, J. Perry and Miss Della Beach.

The club has applied for membership in P. K. L. The club's initial show will be held the week after the spring show in this city.

The Seattle Kennel Club have elected the following officers for the ensuing year: John W. Riplinger, President; E. L. Reber and C. E. Blethen, Vice-presidents; Arthur Murphy, Treasurer; Charles McAllister, Secretary; L. B. Youngs, F. A. Pontius, F. W. Gilbert, C. B. Yandell and J. A. Peebles, Bench Show Committee. The committee will later on select

a superintendent and veterinary surgeon for the springshow.

Among the questions discussed was that of the proposed conference between the various Pacific Kennel League Club members, scheduled to meet at an early date in Seattle. The local club delegates were instructed to take such steps as would promote the welfare of the Coast clubs, with the object in view of bringing about a unification of all (Coast) doggy interests and with the ultimate purpose of combining all of the Western kennel clubs under one jurisdiction.

The Seattle correspondent adds: "The success of the recent P. K. L. show in San Francisco has inspired the various P. K. L. league clubs to renewed activity in kennel affairs and it is probable that the league will not only continue to exercise control over bench show affairs, but will shortly inaugurate several new features calculated to solidify all of the P. K. L. clubs under one parent head and insure the supremacy of the league throughout the West. The move means the segregation of all Coast clubs from the A. K. C. and the substitution of a government adapted to the peculiar (?) requirements of the territory over which the Pacific Kennel League now holds complete sway."

The following from the Victoria Daily Colonist is indicative that Northern fanciers are actuated by much enthusiasm. In this respect it would not be a bad example to follow. Small shows, for an evening, particularly specialty shows, for a cup or other trophy, are a nucleus for big shows. One of the largest bench shows in England today, the Cheltenham show, is the outgrowth of small one night gatherings:

"The entertainment committee of the Victoria City Kennel Club have now completed arrangements for the holding of the last evening show of the season, which will take place in the Philharmonic hall on Fort street on the evening of Thursday, the 28th of January 1904. The breeds will be Cocker Spaniels, all varieties of Terriers, Collies, St. Bernard's and a miscellaneous class. Dr. G. L. Milne has consented to judge Cockers; Mr. Hodgson will take all Terriers and Mr. Turner the Collies, St. Bernard's and miscellaneous class.

The entry fee will be the same as heretofore, viz., 25 cents per dog for each class entered in. Prize money to be devoted to purchase of silver medal for best in each breed, provided at least three dogs are entered in a class. Members of the club and exhibitors free, admission for others, ten cents per head.

Exhibitors are earnestly requested to have their dogs in the hall by half-past six, so that there will be no delay in commencing judging at 7 o'clock sharp, and are also reminded that each dog must be provided with collar and chain."

The American Kennel Club was incorporated at Albany, N. Y., December 30th. The board of directors is August Belmont, Hempstead, N. Y.; Hollis H. Hunnewell, Wellesley, Mass.; Hildreth K. Bloodgood, James W. Appleton, William G. Rockefeller, New York City; Marcel A. Viti, Philadelphia; Gouverneur M. Carnochan, Riverside, N. Y., and Wm. B. Emery, Boston.

King Commando has been purchased from the Ellesby Kennels by H. M. Pabst.

J. F. Mahoney, of this city, states that Mrs. A. W. Lee, the well known owner of the Alta Kennels, Toledo, Ohio, will pay a visit to the Coast this spring. Mrs. Lee proposes to take in the April show.

Striped Bass Angling.

Striped bass fishing in the waters near Tiburon, Marin county, is now a defined quantity and the possibilities of enjoying sport with rod and line are demonstrated by a partial record of fish taken by Mr. G. W. Miller and a few notes of catches made by several other anglers. It will be seen by the dates below that the fish taken were evidently caught at times when they were frequenting the waters here mentioned, for the anglers were out a number of times and returned empty handed. These fish were all taken on No. 5 and 6 Wilson spoons. It will be remembered that during October some big catches were also made by members of the Pacific Striped Bass Club.

Mr. Miller is a resident of Belvidere, and despite his age, nearly three score and ten, is an expert boatman and can give some of the younger devotees of the fishing grounds a few pointers in hooking and landing a bass.

The fish Mr. Miller landed were taken in Belvedere cove, near Peninsular Point, and between the point and the fish wharf on Belvedere island. This fishing ground, as is well known, being at certain stages of the tides rather turbulent and full of swift currents and stormy, swirling eddies.

Mr. Miller's take for

April was—23rd, 2 bass, 5 pounds each; 25th, 1 bass, 6½ lbs.; 28th, 1 bass, 4½ lbs.; 30th, 1 bass, 5 lbs.

May 9th, 1 bass, 4½ lbs.

July 31st, 1 bass, 9 lbs.

October 2nd, 1 bass, 21 lbs.; 3rd, 1 bass, 12 lbs.; 4th, 1 bass, 13 lbs.; 7th, 1 bass, 12 lbs. (these two fish were caught off Angel island); 18th, 1 bass, 14 lbs.; 21st, 1 bass, 4 lbs.; 22nd, 1 bass, 11 lbs.; 23rd, 1 bass, 11½ lbs.; 27th, 1 bass, 19½ lbs.; 31st, 1 bass, 8 lbs. (This fish was a very game one and put up a good fight until gaffed).

November 16th, 1 bass, 3 lbs.; 25th, 1 bass, 15 lbs.

December 2nd, 1 bass, 13 lbs.

The 21 pound bass measured 37½ inches in length; 19½ pounder, 36½ inches; 15 pounder, 34½ inches; 14 pounder 32½ inches.

On July 31st, Roy and Fannie Miller, grandchildren of Mr. Miller landed two fish weighing 10½ and 7 pounds respectively. On October 4th, Mr. Chas. E. Miller, his son, was fishing with him off Angel island.

From the foregoing record it will be readily seen

that Mr. Miller, Sr., is an angler of skill and perseverance.

In connection with this Mr. Miller has given us the results of a fine combined catch made on October 27th at Pettycoat cove, Angel island, by Mr. Chas. E. Miller and the late James R. Pariser. Eight bass were taken on their trolling spoons, and the weights were: 14, 13, 12, 11, 10, 4, and 4 pounds respectively.

Close season on steelhead trout will ensue from February 1st until April 1st.

Until the last rains fishing for the game trout of the Coast streams has been better than for several seasons past.

The best steelhead fishing enjoyed by local anglers was had near Point Reyes in the Paper Mill creek. Last Sunday there was quite a gathering of Wal-toolians at that resort. The heavy rains of the previous night, however, spoiled to a great extent the fishing for the day. The creek however was getting into fine shape again this week, and clear weather today and to-morrow will invite another gathering of the anglers.

Russian river, up as far as Austin creek, has proven a fairly good steelhead fishing water until the recent rain. A large number of local fishermen were at Duncan's Mills enjoying the sport. Prominent among them were, Champion John Gallagher and the Dook of 'Ayden. These two veteran anglers have not missed a season on the river (when there was any fishing), for years past. Butler (the Dook) returned to the city with several fine fish. "President" Lemmer also took a shy at the stream and landed several big fish. Among others present were "Alek" Vogel-sang, "Al" Wilson, Harte Williams and S. A. Wells.

The Christmas number of the *English Shooting Times* is, as usual, replete with stories contributed by some of the most practical and interesting sportsmen writers of the times. The illustrations are timely and in keeping with the letter press. The edition is one that will commend itself to sportsmen the world over.

Fred Gilbert, who lead the trap shooters in 1903, has missed but one live bird out of the last two hundred shot at, his handicap being from thirty-two to thirty-three yards. He always shoots Winchester factory loaded Leader shells.

Coming Events.

Rod.

April 1-Sept. 10. Oct. 16-Feb. 1—Open season for taking steel-head in tidewater.
Nov. 1-April 1—Trout season closed.
July 1-Jan. 1—Open season for black bass.
Aug. 15-April 1—Open season for lobsters and crawfish.
Nov. 1-Sept. 1—Open season for crabs.
Sept. 1-May 1—Open season for shrimp.
Sept. 10-Oct. 16—Close season in tidewater for steelhead.
Nov. 15-Sept. 10—Season open for taking salmon above tide water.

Gun.

July 1-Feb. 15—Dove season open.
Nov. 1-July 15—Deer season closed.
Sept. 1-Feb. 15—Open season for mountain quail, grouse and sage hen.
Oct. 15-Feb. 15—Open season for quail, ducks, etc.

Bench Shows.

Jan. 20, 23—Toledo Fanciers' Association. Toledo, O. A. W. Lee, Secretary, Toledo, O.
Jan. 27, 30—National Fanciers' and Breeders' Association. Chicago.
Feb. 2, 7—Ohio State Poultry Association. Columbus, O. W. A. Lott, Secretary, Wooster, O.
Feb. 9, 12—Fanciers' Association of Indiana. Indianapolis, Ind. C. R. Milhouse, Secretary.
Feb. 10, 13—Westminster Kennel Club, Madison Square Garden, New York. James Mortimer, Superintendent.
Feb. 18, 20—Johnstown Poultry and Kennel Club, Johnstown, Pa. J. R. Flinn, Superintendent.
Feb. 22, 25—New England Kennel Club. Boston, Mass. Wm. B. Emery, Secretary.
March 1, 2—Merrimack Valley Kennel Club. Lawrence, Mass. Albert Mitchell, Secretary.
March 2, 5—Duquesne Kennel Club of Western Pennsylvania. Pittsburg, Pa. Fred S. Stedman, Secretary.
March 9, 12—Rochester Kennel Club. Rochester, N. Y. H. H. Kingston, Secretary.

March 10, 12—Chicago Kennel Club. Chicago, Ill. H. J. Cassidy, Secretary.

March 22, 25—Buffalo Kennel Club. Buffalo, N. Y. E. P. Sharp, Secretary.

March 28, 30—Brantford Kennel Club. Brantford, Can. Thos. H. Terry, Secretary.

March 30, April 2—Atlantic City Kennel Club. Atlantic City, N. J. Thomas H. Terry, Secretary.

April 7, 9—Victoria Kennel Club. Victoria, B. C. Thos. H. Torry, Secretary, Victoria, B. C.

April 13, 16—San Francisco Kennel Club. Eighth annual show. Mechanics' Pavilion. J. L. Cunningham, Secretary-Treasurer.

April 13, 15—Seattle Kennel Club. Seattle, Wash. Charles McAllister, Secretary.

April 20—California Cotilla Club. Oak Grove, Lawrence, Santa Clara Co.

April 21, 23—Santa Clara Kennel Club. San Jose, Cal. Miss Della Beach, Secretary, San Jose, Cal.

April —Portland Kennel Club. Portland, Or. T. E. Daniels, Secretary.

Oct. 4, 7—Danbury Agricultural Society. Danbury, Conn. Jas. Mortimer, Superintendent.

Field Trials.

Jan. 19—Georgia Field Trial Association. 2d annual trials. Waynesboro, Ga. P. M. Essig, Secretary, Atlanta, Ga.

Jan. 25—United States Field Trial Club. Grand Junction, Tenn. W. B. Stafford, Secretary, Trenton, Tenn.

Feb. —National Championship Association. Grand Junction, Tenn. W. B. Stafford, Secretary, Trenton, Tenn.

Kennel Registry.

VISITS.

J. C. Berrett's (San Jose) Irish Terrier bitch Nora (Wilmount Highwayman-Endcliffe Kitty) to Mr. W. R. Whittier's Irish (—) January 16, 18, 1903.

WHELPS.

Woodlawn Kennels' Bull Terrier bitch Newmarket Queen (Ch Newmarket Marvel-Newmarket Duchess) whelped January 2, 1903, five puppies (3 dogs) to A. Joseph's Bloomsbury Baron (Sherburne King-Bloomsbury Buttery).

SALES.

Woodlawn Kennels sold the Bull bitch True Blue (Ch. Ivel Rustic-Baby Jean) to H. M. Papst, January 15, 1903.

Walter Magee sold the Bulldog Woodlawn Rustic (Ch. Ivel Rustic-Dixie) to Woodlawn Kennels, January 15, 1903.

Sober up on Jackson's Napa Soda.

Notes for the Cowkeeper.

Wheat bran is better for the production of milk than corn meal.

The cow, as well as any other farm stock, will pay a better profit if treated kindly.

A cow is profitable just as long as she gives a profitable return for the food she consumes.

The best cream raising can only be secured by keeping the milk sweet as long as possible.

To a very considerable extent the matter of notable performances is wholly an individual function.

A combination of bran, oil meal and corn meal makes one of the best rations for dairy cows in the winter.

Loss of flesh and shrinkage of milk follows neglect, and starvation follows rations of improper food.

Garret most often sets in after calving, and this is nearly always due to a failure to get the udder dry.

Milk regularly twice a day. If a cow does not give a sufficient amount of milk to warrant this, let her go dry.

The dairy cow is a milk-making medium and should be kept in the best working condition, which is one of quiet.

Many of the cows kept on the farm cannot, either by feed or care, be induced to yield a profitable amount of milk. The sooner this class is fattened and marketed, the better for the profits of the farm.

The best foods to make blood are the best for milk production, and the cow to make good milk needs good blood. That can heat and cheapest be made by generous, comfortable treatment, comfortable quarters, pure air, pure water and wholesome, nutritious food.—Kimball's Dairy Farmer.

Cold Grafting Wax.

Every orchardist knows what trouble it is when top grafting in cold weather to warm his wax. He has to carry some kind of heating apparatus along with him and by some carelessness if the wax is too hot, it is impossible the bark of the stock or scions will get burnt. This never occurs when cold grafting wax is used and it is not very costly if made as follows:

One pound of resin melted slowly on the stove. When it is melted, warm two and one-half ounces of alcohol and one tablespoonful of linseed oil, add this to the melted resin. Put it in a tin pot mix well and let cool slowly and then close hermetically. This wax can be put on

small wounds with a stick or brush and is very useful for grafting.

1. This grafting wax we can use in any kind of weather, warm or cool, dry or moist.

2. It holds good on moist wounds.

3. That the callous forms quick under them.

4. It holds off air and wetness.

5. No scions get burned as when using warm grafting wax.

6. It takes less material.

7. It is cheaper than some other grafting wax.

8. Everybody can make it with less trouble and cost.

Poor Cows.

When a man increases the number of his cows at the expense of quality he does a very unbusinesslike thing, says *Dairy and Creamery*. Better not keep more cows unless they are good ones. Take better care of what you have and be content rather than buy poor cows. Where one raises his own cows he should test

1904 RACE PROSPECTS

2:20 TROTTERS
2:10 TROTTERS
2:20 PACERS
2:10 PACERS

Names and Records of Trotters and Pacers Under 2:20 and Liable to Race in 1904

We have just published a fine book giving names and records of all Trotters and Pacers below 2:20 that are liable to race in 1904. This book contains 52 pages of fine paper with extra good cover and *Just The Right Size To Go In Your Pocket*. Every Horse Trainer, Care Taker, Horse Breeder or any one interested in horses can have one of these books. *Absolutely Free*, for reference. It also contains names of all horses holding world records. We had it compiled at a large expense and you will find it a valuable and handy reference book for the entire year of 1904.

IT WILL BE MAILED FREE With Postage Prepaid IF YOU WILL STATE WHERE YOU SAW THIS OFFER And Tell Us Whether You Own Any Stock Or Not.

out the heifers that do not promise as well as possible, no matter if they are registered and have a good pedigree. We must have something in the dairy barn beside a breeding to make a success. We want individuality. When this is well backed up by breeding all the better, but the profitable cow we must have. It is not always judicious to sell a heifer if she does not come up to the standard the first season provided she gives promise of better work later on. One must use his judgment as well as the scales and Babcock test with a heifer. It is a good plan to have an annual clearance sale and dispose of the undesirable cows to the butcher.

Jackson's Napa Soda is sold in every city, town and hamlet in the State.

Holstein-Friesians at Home.

[S. Hoxie, before the New York State Breeders' Association].

Holstein-Friesian cattle have been produced by an environment in which the peasant farmers of North Holland and Friesland have unconsciously taken a large and very essential part. These peasants are the descendants of the ancient Friesians, of which Tacitus wrote nearly two thousand years ago, that they were peaceable cattle breeders dwelling on the shores of the North sea. How they were then protected in this peaceable occupation amid the roving, piratical tribes that surrounded them is unknown. They claim to have never been conquered, but admit that their ancient ancestors formed an alliance with the Roman Empire, and paid to it an annual tribute of ox hides and horns.

It is almost impossible for an American farmer to imagine the intense conservatism of these peasant farmers, especially those of Friesland, where the ancient blood is pure. Here they use the ancient Friesian dialect in conversing with one another, although educated in their very excellent common schools, exclusively in the Holland or Dutch language. They seldom intermarry with other races, and evidently cherish an abhorrence to such unions. They apparently have no ambitions beyond dwelling with and handling cattle. Doubtless they constitute the wealthiest class of peasantry in Europe, yet they refuse to be regarded other than third class people. In North Holland, where there is a considerable admixture of Celtic blood, this conservatism is not so intense, and farmers are sometimes called to high positions of state.

The conservative spirit that I have thus described, together with the soil, climate and the influence of markets, must be largely credited with producing the characteristics of this breed, to which we American breeders have given the name Holstein-Friesian.

The first thing we note is the natural richness of the soils. Those on which the cattle are bred and used in dairy husbandry generally range from light to exceedingly heavy clays, although some fine herds are found on loam and peat soils. The larger cattle are found on the heavier soils. So important, in the development of cattle, do breeders regard the influence of soils, their herd books require that the kind of soil on which the animal is bred and raised shall be published in its entry. In their view, the value of a pedigree may be determined to some extent by the soils on which the animals included in it were bred. I do not propose to draw any inferences in this paper as to the value of the various features of the environment that I shall try to describe. I leave this for the discussion that I hope will follow.

The second thing we note is the climate and the provisions made against its extreme severity in winter. It is said that the ice freezes on the IJ, an arm of the Zuider Zee, at Amsterdam, to the depth of three and a half feet. The region is a stormy one in winter, it lies so exposed to the easterly and blasts of the North Sea. Against these the cattle must be protected. Immense structures—call them houses or barns—are seen in every direction, in which the cattle are kept during this period, in close intimacy with the farmer's whole family. In form they resemble immense tents. A description of one will give the general type. On the ground, 80 feet wide and 135 feet long; outside wall of brick, 6½ feet high; an inside structure of large poles similar to our telegraph poles supports a very steep roof, the ridge of which is forty or fifty feet from the floor; in the rear is a modern structure about 20 wide and 25 feet long, in which are a narrow hall, a family sitting room and parlor. The kitchen is in the main building, a door opens from it into the cow stable, which is about 16 feet wide, and runs one side of the great structure its full length. It accommodates 36 cows

in stalls, two in a stall, a window in each stall fronting the cows. Here they are fed and watered during the whole winter without leaving their stalls. They have no exercise save what they get in the stalls.

This stable seems to be comfortably warmed by the heat that emanates from the cows, but do they have sufficient change of air? About eight feet above the stable is a loose covering of boards on which there is a layer of loose straw. Evidently to a certain extent the heated air from the bodies of the cows passes up through this covering into the great roof space and thence to the outside by ventilators in the ridge of the roof. Fresh air is supplied from the great barn space below, through doors and perhaps more or less crevices in the partition that separates the stable from this space.

The third thing we note is the necessities of these farmers. As a class they are tenants, and have to pay an annual rent to their landlords of from \$10 to \$20 an acre on their holdings. Their cows must be rent payers. They cannot afford to keep a single cow at a loss, as our farmers sometimes do. In their system of management the cows must be made profitable, both in the products of milk and the products of flesh. When I was a young man I worked for a dairy farmer who held that some dairy cows could be profitably fattened for beef and others could not be thus profitably fattened, and that the difference lay in the fact that the one class deposited fat largely around the kidneys and on the intestines, the other largely on the ribs and the interstices of the muscles. I do not know that this theory is correct, but I venture it as a hypothesis to explain the success of these Friesian dairymen.

Lastly, a few minor features are worthy of note. Among these are the bull shows held in the springtime in almost every village and the cow markets held weekly or bi-weekly in the principal towns and villages. Both are fostered by the local governments. The former are designed to educate the farmers in the best types of hulls and to enable them to select and purchase such as are suitable for their herds. There is no display about these shows and no holiday excitement. They are for business. The same may be said of the cow markets, yet I doubt if a finer display of cows has ever been seen at any of our World's Fairs that are shown every week at some of the market places. In order to give a correct impression of the influence of these markets on the development of the breed, I will describe the one at Leuwarden, the shire town or capital of Friesland. The market ground occupies from four to six acres. Here on every Friday may be seen from two hundred to four hundred cows, nicely groomed and in fine condition, the great majority in milk. They are such as the farmers themselves in the surrounding districts have selected from their herds to sell. The probabilities are that they are not as great milkers as they desire to keep. Here are buyers from Germany, South Holland, Belgium and probably France. Every convenience for shipping is provided. Probably, the majority are sold. Of course some will return to their own pastures or stables and be brought on the next day. Thus a constant sifting process goes on. With rare exceptions they do not keep cows beyond six years old. Thus it will be seen that their herds are constantly renewed by the offspring of cows in their prime.

Before leaving this part of my subject, I hope it will not be regarded out of place to refer to the productiveness of these cattle in the province of Friesland. In 1874, before oleomargarine was known, England imported from this province 40,763 hundred weight of cheese and 266,041 hundred weight of butter. I quote these figures from Chambers' Encyclopedia. The area of this province is 1,253 square miles, about that of Herkimer county, in this State. In 1879 a census of cows was taken and found to be 144,802. If there was a like number in 1874,

England's importation of butter from that province that year, averaged 204¾ pounds to every cow of whatever age or condition.

A Dairy Cow Standard.

Some twelve years ago, when I took charge of the dairy department, we had about a dozen ordinary grade cows.

At present we have about thirty cows milking and twenty younger animals coming on.

We have steadily increased the production of our herd and last year the average of the herd was over 8000 pounds of milk per cow, and over 300 pounds of butter per cow.

For 1902 the record is not so large, owing to the fact that we have five heifers with first calves, which have brought down the average.

However, I believe we are steadily improving our herd.

We selected first the best grade cows we could get, using pure-bred sires of the dairy breeds always, and raising practically all the heifer calves; then at the end of the second milking period weeding out all that had not come up to our standard.

Here is the first principle I would lay down as necessary in founding and maintaining a dairy herd. Have a standard, and if a cow does not come up to that standard, the wise dairyman will get rid of her, no matter what she cost.

Our standard is 6000 pounds of milk and 250 pounds of butter.

I expect we shall bring our herd up to 10,000 pounds of milk and 400 pounds of butter per cow.

That can only be done by a process of breeding and selection.

When we buy a cow we weigh her milk every night and morning, take a sample and put it into the Babcock test and test it.

Then at the end of the month we know the number of pounds of milk she is yielding and the percentage of fat.

At the end of the year we know what each cow has done, and if she does not come up to the standard we get rid of her.

In the case of heifers, with their first calves, we give them a second trial.

That briefly is the plan we have adopted—raising all our heifer calves, having them drop their calves at two and one-half or three years old, milking for two lactation periods, and weeding out at the end of the second lactation period.

To improve the quality of the herd and the quantity of the milk yield, a man must not only breed his cows right, and weed them out according to standard, but it also involves the question of feeding.

People say: "No wonder your cows milk well; you feed them so well."

Cows cannot be expected to milk well on a small quantity of feed.

I have no time to discuss the question of feeding in detail; the main thing is to give the cow all the bulky food she will eat; but it should be of a digestible and palatable nature.

In addition to this she should receive eight pounds of meal to every thirty pounds of milk produced in order that she may produce milk economically.—Prof. H. H. Deane, Ontario College of Agriculture.

When your laying birds have a warm place to roost and a scratching room where they are protected from the cold winds, they have all that is needed in the way of housing and proper feeding will do the rest.

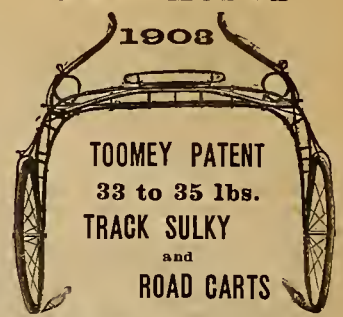

The fall is always the best time to make a beginning in the poultry business and we advise starting with your own breeding birds and not depend upon somebody else to furnish your eggs.

PERCHERON STALLIONS FOR SALE.

Small Sheep Farming.

A small grass farm for sheep should be divided into small fields of from five to ten acres each, according to the size of the farm and the number of sheep.

The land devoted to sheep should be fully stocked to use the pasture to the best advantage and forage crops provided for fall feeding when pasture fails and the sheep need a little extra feed to put them in good condition for winter.

Rape is one of the best crops for this purpose. It is easily grown, yields a large tonnage per acre, sheep like it and it agrees with them.

Sheep need but little grain, except when giving milk. At this time, as well as for some weeks before weaning and after weaning, the ewes should receive careful attention. Their feed should be well balanced to keep them in good healthy condition and to supply plenty of milk for the lambs.

A shed, open to the south, with a yard that is protected from cold winds, is one of the best arrangements for sheep in winter. The shed should be tight boarded on three sides. If there is no wall under the sills, rough boards may be set along with the lower edge below the surface of the ground. Old rails with straw and earth thrown over them will answer the same purpose, but it is a slovenly way. But some means must be provided to prevent air currents. Plenty of fresh air and light is necessary, but sheep should be kept dry and free from draughts.

Doors or gates are necessary to keep the sheep in during stormy weather, as they are very foolish at such times. They will, if permitted, stand outside of the shed during winter storms until their wool is soaked.

Feed well bred sheep liberally, keep them free from parasites and vermin, protect them from wind and rain and they will pay handsomely —H. A. Franklin.

Blood meal is one of the best foods we have, either for egg producing or for fattening or rearing chickens, says an Ontario correspondent of *American Cultivator*. There is no more economical food to buy. It costs \$3.50 per hundred, but it is almost all good. It is all albumen. We use one pound of blood to sixteen pounds of meal. Sometimes we use blood right from the slaughter house, putting it in sacks and boiling for a couple of hours. The blood is boiled in water. Put it into a bag, and then put the bag into a wash boiler and pour water over it and boil for two hours. It is then like bran, and you mix it with the meal.

Calves up to one year old fed on alfalfa and corn for baby beef require only from one-third to one-half as much grain to produce 100 pounds gain as is required by mature steers. In this country where steers can be grown to maturity very cheaply by ranging in summer and feeding a little alfalfa in winter and where grain is always high it is well to sell mature stock to Kansas, Nebraska and Missouri feeders and finish up a certain per cent of baby beef each winter on the surplus alfalfa with a little corn and considerable sugar beets, beet pulp and tops.

If a little and a little more milk is left in a cow's udder at each milking the result will be a gradual drying up. On the other hand if the cow is milked absolutely clean and every drop is stripped from the udder each time the effect will be to make the cow give all the milk she is capable of producing. Clean milking pays and it also pays to have one person milk each individual cow regularly all the time.

Dehorned steers are best for feeders. They are more quiet, can be kept in a smaller lot and more of them be fed at each bunk than those with horns. In this saving of equipment and labor in feeding is effected, besides making a uniform gain on the same amount of feed because the steers do not punch each other all over the whole works.

Dictatus Medium 32499

Will make the coming season at

Race Track, Hollister, Cal.

Jos Sanchez in charge

\$40 FOR THE SEASON.

Payable at time of service, with usual return privilege. Every care taken to prevent accidents, but no responsibility should any occur. Prompt and careful attention in all cases. Pasture furnished to mares sent from a distance at \$2.50 a month.

A DICTATUS MEDIUM PURSE OF \$100.

I will give a purse of \$100, with entrance money added for a race, best two in three, open to any and all colts from three to start and race to come off on Hollister track, Fair week, 1907. (Exact date to be hereafter announced.) \$5 entrance money, payable June 1, 1905. \$5 thirty days before the race. Three moneys: 60 per cent to first horse; 30 per cent to second and 10 per cent to third. For further particulars, address

DESCRIPTION.

DICTATUS MEDIUM is 6 years old, weighs 1220 pounds. A beautiful turned bay horse with heavy mane and tail, kind and gentle, with a perfect disposition. Good flat heavy bone. He has great power and speed. Has a record of 2:24, but has worked out in 2:12. He is a horse that will go out any day and do his best. His colts are models of grace and beauty. Only one so far has been worked. This one, Al Wilson's yearling LITTLE MEDIUM, paced an exhibition 1/4 mile on the Hollister Race Track in 38 1/2 seconds, a 2:33 gait. This colt has great promise.

DICTATUS MEDIUM is by Dictatus 2:17, one of the best bred and fastest horses ever brought to California. The dam of Dictatus Medium is Belle Medium (dam of Stam B. 2:11 1/4), by Happy Medium, grandsire of the dam of Lou Dillon 1:58 1/4. His second dam is Argenta by Almont Lightning, sire of the dam of Zombro 2:11. There is no doubt but Dictatus Medium will prove to be a sire of speed as well as good size, style and disposition.

BAYSWATER WILKES 2:25 1/4

Son of Sable Wilkes 2:18
and
Fanny Bayswater

Sire of KELLY BRIGGS 2:10 1/4

WILL MAKE THE SEASON OF 1904 AT

WOODLAND, CAL.

Fee \$40.

BAYSWATER WILKES is a sire of speed, size, good looks, soundness and gameness. Every one of his produce that has been trained can show standard speed. His sire, Sable Wilkes, also sired Nusbagak, sire of Aristo, winner of the Occident and Stanford stakes. His dam, Fanny Bayswater, is the dam of Senator L., holder of the champion four-mile trotting record of 10:12.

Bred to BAYSWATER WILKES and you will get colts that will sell at good prices. For cards containing full Pedigree and all particulars address

S. H. HOY, Winters, Cal.

SIDNEY DILLON 23157

Sire of LOU DILLON 1:58 1/4 (the Fastest Trotter and Greatest Record Breaker in the world), Dolly Dillon 2:06 1/4 (the fastest mare of 1901), B. S. Dillon 2:16 1/4 and Captivity 2:28 1/4.

SANTA ROSA STOCK FARM
SANTA ROSA, CAL.

SIDNEY DILLON was sired by Sidney 2:19 1/4; dam Venus (dam of Adonis 2:11 1/4, Lead 2:24 1/4, Cupid 2:18 and Juno, the dam of Mercury 2:31 and Ida 2:30) by Venture 2:27 1/4. Sire of dam of Directum 2:05 1/4. SIDNEY DILLON is a model of symmetry and imparts his grand individuality, inherent speed and excellent disposition to all his progeny.

Terms for the Season, \$100.

Only a limited number of approved mares taken. Usual return privilege. In case horse is sold service fee will be returned if mares have not proven in foal. Season ends July 1, 1904. Pasture \$4 per month. Best of care taken of mares, but no responsibility assumed for accidents or escapes. For particulars regarding shipment of mares, etc., address

FRANK TURNER,
Supt. Santa Rosa Stock Farm,
Santa Rosa, Cal.
Or IRA PIERCE, 728 Montgomery St., S. F.

No. 23444

THREE-YEAR-OLD
2:15 1/2

STAM B.

FOUR-YEAR-OLD
2:11 1/4

A Colt Trotter Himself, and His Produce Perform Early, and the Blood of the Two-Minute Trotters, Futurity and Horse Show Winners can be found in his Veins.

WILL MAKE THE SEASON From Feb. 15 to June 1, 1904, at **PLEASANTON**

AFTER THAT DATE (by request) **AT SALEM, OR.**

At \$40 the Season, or \$60 to insure.

Fast Pacer For Sale.

THE PACING GELDING, AL SANDY 2:19 1/4 by Wayland W., dam Rapid Ann by Overland. Can pace three beats better than 2:17. Can brush very fast on the road. Excellent prospect to race. He is one of the best road horses in the city. Gentle and intelligent. Safe for lady to drive. For price and further particulars address S. WATSON, 235 Douglas street, San Francisco.

FOR SALE.

BLACK TROTTER MARE, RECORD 2:18 1/4; standard bred; sound; nearly 16 hands high; weighs about 1100 pounds. Gentle and a high-class road mare. Can be bought cheap. To see the mare and for particulars call or address Telephone: Pine 1789 J. W. ZIBBELL, 345 Twentieth Ave., San Francisco.

The Fastest Trotting Son of McKinney KINNEY LOU 2:07 3/4

(Winner of \$11,450 in 1903) Will Make the Season of 1904, Limited to One Dozen Approved Mares, at

AGRICULTURAL PARK, SAN JOSE.

Service Fee, \$100.

SEASON ENDS MAY 1, 1904.

KINNEY LOU was one of the great race winners of 1903 on the Grand Circuit, and is a high class race horse, game as a pebble and perfectly gaited. He is from race winning and producing families on both sides, his dam, Mary Lou 2:17, being a great race mare and own sister to the well-known race horses Shylcock 2:15 1/4 and Ned Winslow 2:12 1/4. Mary Lou is by Tom Benton out of Brown Jenny (dam of 3 in list) by Dave Hill Jr., next dam by Black Hawk 700. Kinney Lou's oldest colts are two-year-olds and all have size, good color, and are natural trotters with good dispositions.

WINCHESTER

REPEATING SHOT GUNS

A CHANCE FOR A DOUBLE

A QUESTION often asked about Repeating Shotguns is, "How quick can a second shot be fired with them?" Shooters that have used Repeaters answer with one accord: "Doubles" are just as easy to make with a WINCHESTER REPEATING SHOTGUN as they are with a double barreled gun. The third shot that a Winchester Repeater gives often bags a badly crippled bird which otherwise would get away. Winchester Repeating Shotguns are made in "Take Down" styles in 12 and 16 gauge.

Fair Grounds, St. Louis, Mo.

CAMPBELL'S HORSE FOOT REMEDY IS THE BEST REMEDY

EVER USED ON HORSES' FEET.

IT PENETRATES AND DRIES IN quickly and DOES NOT GUM AND FILL UP THE PORES like tar and oil compounds. It is the GREATEST REMEDY ever used to remove SORENESS and FEVER from the foot, and makes it possible to get good services out of a horse working on hard and hot pavements.

It gives natural nourishment to the foot and incites a rapid, healthy growth—ALL DRYNESS AND BRITTLENESS quickly disappears.

QUARTER CRACKS and SAND CRACKS are rapidly grown out when directions given in our booklet are followed. It is a SURE CURE for CORNS, CONTRACTED FEET and NAIL WOUNDS if directions are followed.

IT PREVENTS SOUND FEET FROM BECOMING UNSOUND and GROWS a TOUGH, STRONG, ELASTIC WALL and HEALTHY FROG—A FOOT WHICH WILL STAND WORK on race courses.

Many of the best owners and trainers state that for track work nothing equals it. In many cases horses have reduced their records several seconds, due to its use.

It is a CERTAIN CURE for THRUSH and SCRATCHES. We Guarantee That It Will Do What We Claim and Will Refund Money if It Fails.

PRICES:—Quarts, \$1.00; Half-Gallon, \$1.75; Gallon, \$3.00; 2 1/2-Gallon, \$5.50; Five-Gallon, \$10.00.

Books giving full directions for its use and much valuable information as to shoeing are supplied free.

Don't fail to read "ad." giving information concerning Campbell's Iodoform Gull Cure in next issue of this paper. It is the best and because of its merits is rapidly displacing all others.

JAS. B. CAMPBELL & CO., Manufacturers, 412 W. Madison St., CHICAGO, ILL
Sold by all Dealers in Harness and Tack Goods. If not in stock ask them to write any Jobber for it

PALACE HOTEL, SAN FRANCISCO, CALIFORNIA.

TOURISTS and TRAVELERS will, now, with difficulty recognize the famous COURT into which for twenty-five years carriages have driven. This space of over a quarter of an acre has recently, by the addition of very handsome furniture, rugs, chandeliers and tropical plants, been converted into a lounging room—the FINEST IN THE WORLD.

The EMPIRE PARLOR—the PALM ROOM, furnished in Cerise, with Billiard and Pool tables for the ladies—the LOUIS XV PARLOR the LADIES WRITING ROOM and numerous other modern improvements, together with the unexcelled Cuisine and the Most Convenient Location in the City—all add much to the ever increasing popularity of this most famous HOTEL.

PERCHERON AND BELGIAN STALLIONS

The Farmer's Supply of Cedar Rapids (Iowa) Jack Farm

Three importations this season of prize-winning Percherons, Belgians and German Coachers and Catalan Spanish and Majorca Jacks. I have the largest Draft and Coach Horses in America, and will sell more quality for the money than you can find anywhere.

Remember, the largest sale of imported and High-Bred Jacks ever held in America will take place at the Cedar Rapids Jack Farm some time during the first half of April, 1904. Watch for date.

THE REQUEST OF THE AMATEURS to be permitted to charge gate receipts to their meetings, and at the same time have no records given the horses that win amateur events, was denied by the Advisory Board and the question will probably not come up before the Board of Reviews when it meets in New York next month. This question of records has bothered the amateurs for a long time and they think it unjust that some plan cannot be devised by which they can race their horses among themselves without incurring the penalties of records. However the Advisory Board acted right in the matter and will be upheld in the decision by horsemen generally. The trouble with nearly all amateurs is that they want to eat their cake and have it too. Nine out of ten of them want all the glory they can possibly get out of driving a horse a fast mile, yet they desire to escape the penalties that naturally follow. It would be a rank injustice to horse breeders and trainers if the wealthy amateurs were permitted to give their horses all the experience of actual racing that the matinee plan undoubtedly furnishes, and after demonstrating to a certainty that they were capable of trotting or pacing three successive heats in company in 2:15 or better, and then enter them in the green or slow classes on the regular circuit where stakes and purses are offered. The plea that the amateur owner is only racing for glory does not seem to be an honest one when he desires to enter a horse in the M. & M. \$10,000 stake for 2:23 class trotters after he has won several amateur races where the heats were all trotted in better than 2:15. If an amateur is a true sportsman he will be perfectly willing to enter his horse only in the classes to which he is eligible by the amateur as well as the professional records. The trotting turf could not have a more serious blow struck it than to permit amateurs to charge admission fees to their meetings and at the same time avoid records made by their horses.

ALFONSO 2:29 1/4, son of the great stallion Baron Wilkes and of the still greater mare Alma Mater, was sold at auction in Chicago last week for \$750. Alfonso was foaled in 1886, being therefore eighteen years old. Grandly bred as he is, his success in the stud has not been such as would cause him to take high rank among the sires of to-day. He is the sire of but eighteen performers, the fastest being the trotting mare Alfonso Maid 2:12 1/4 that took her record this year. She is his only 2:15 performer, the next fastest being Marie C. 2:16 1/4. But three have records better than 2:20. These few facts will show why a stallion by Baron Wilkes out of Alma Mater, probably the greatest of broodmares, brought only \$750 at auction.

THE DROUTH in the southern part of California has assumed a most serious aspect and unless rain falls there within the next two weeks thousands of cattle and sheep will doubtless perish in the district south of Bakersfield. On the coast from Monterey south there is also a great need of rain and efforts are being made by owners of cattle to have

the quarantine raised that they may ship their cattle north. That section has been afflicted with Texas fever and a quarantine established against it by the authorities. Cattle can now be removed if they are inspected officially and found clean, but after January 31st this privilege expires. There are between 400,000 and 500,000 head of cattle in the drouth stricken district and unless rain comes within two weeks they will have to be moved or die.

Answers to Correspondents.

L. C. G., Modesto—I would like for you to get me the name and the breeding of a thoroughbred horse that made the season at Dayton, Nevada, in the year 1877.

Answer—We have no record of horses standing in Nevada that long ago. Perhaps some of our readers may be able to give this information. Probably the best way to get the facts would be to consult the files of the Dayton papers if any were published in that year.

J. O'GRADY, Seattle—Please give the pedigree of Deborah by Sable Wilkes through your columns?

Answer—Deborah 2:21 1/2, bay mare, foaled 1890, star, black points. Sire Sable Wilkes, dam Sproule by Le Granie 2:36 1/2, second dam May Sproule (dam of Margaret 2:28) by The Moor 870, third dam the Belmont mare, said to be by Williamson's Belmont. Deborah is standard and registered.

Lou Dillon's Future Trials.

It is unofficially stated that Mr. Billings intends starting the trotting queen to the Maud S. sulky, which Mr. Robert E. Bonner tendered him recently, and over the Cleveland track with exactly the same pace used back in 1885. This would mean that the pacemaker must draw a high-wheel sulky or cart.

It is also stated that the Chicago gentleman intends to start the mare with pace at the side, rather than preceding her at the pole. He may or may not do this. Those who stop a moment and consider that he brought Lou Dillon to New York, used her over a crowded roadway like our Speedway, and to a frail wagon, will recognize the fact that when he assumes control of any horse he does not keep it under glass or give hothouse care. He is a horseman par excellence, fearing absolutely nothing, and those who know Lou Dillon recall her fractious days when the close observers considered her worthless to race, as she would not be rated at the score.

We may see Lou Dillon at the pole, too, if the owner so elects, although no one could select a trotter capable of keeping the clip she would set. All this may be on the tapis, yet till Mr. Billings gets ready to plan Lou Dillon's schedule for 1904, nothing official will be given out. It is useless prophesying as to her eventual record, as none know how fast she can trot. Charlie Tanner said that he had timed a trotter a quarter in 26 1/2 seconds, and what other could it have been?—Trotter and Pacer.

Not Hambletonian's Son.

It having been stated that the stallion Orange Blossom 2:26 1/2, now 37 years old, is a son of Hambletonian 10 the Richmond Dispatch makes this correction:

"An erroneous item is now going the rounds of the turf press to the effect that Orange Blossom 2:26 1/2, owned by Hon. H. B. Holton, of Powhatan, Md., is by Hambletonian 10, some of them giving him as the oldest living son of that famous progenitor, when the fact is, he was sired by Middletown, son of Hambletonian 10; dam Nelly Post by American Star 14. The bay stallion was foaled in 1867, is still alive and apparently in good health, although he has reached the advanced age of 37 years."

The introduction of fifty-pound wagons for speedway work has revolutionized the mounted policeman's art of stopping runaways on the road. To snatch a horse by the head and bring him up with a sharp turn, like a cowboy roping a steer, is nowadays more dangerous to the occupant of one of these feather-weight pneumatics than to let the horse run, as the wagon is instantly overturned and the driver pitched out. The clever men of the speedway squad have learned to slow the runaway horse down gradually, after nabbing him, and always keep him going straight if possible until brought to a standstill, in order to avoid overturning the wagon.

In spite of the dullness of the export market in pedigree trotters, the National Trotting Association issued 89 certificates last year. Of course there were a large number of trotting bred roadsters and carriage horses exported for which no certificates were taken, as they were not intended for racing or breeding purposes.

Jackson's Napa Soda is sold in every city, town and hamlet in the State.

One of the Sidney Family.

Stallions carrying the blood of Sidney will receive an increased patronage this year. The wonderful flights of speed shown by Lou Dillon have furnished the evidence that the admirers of the Sidney family have been looking for to prove their theory that Sidney is one of the greatest sires that ever lived and for his opportunities the greatest of the Strathmore family. Now that a son of Sidney has sired the fastest trotter in the world, other sons of Sidney will doubtless be patronized by breeders who have rather given them the go-by in the past. For several years the BREEDER AND SPORTSMAN has advised breeders to not overlook Monterey 2:09 1/4, son of Sidney and the great mare Hattie (dam also of Montana 2:16) by Commodore Belmont. Monterey is a large, handsome horse with that magnificent high action that the majority of intelligent breeders now consider necessary in a great sire. And then Monterey is a race horse. He has demonstrated that he can trot heat after heat and not get "that tired feeling" which so many alleged race horses experience after a fast mile or two. Mr. P. J. Williams, his owner, is confident that, in shape, Monterey can closely press Cresceus' great two-mile record of 4:17. Monterey Jr., a very handsome three year old owned in Humboldt county, got a race record last year of 2:24 1/4 and a three year old colt called Irish by Monterey, showed a trial in 2:15 last year on one of the eastern training tracks, and will be raced this year.

We advise breeders to write to Mr. Williams for a tabulated pedigree of Monterey and arrange for hooking some of their mares. He is the fastest son of Sidney and his son is a great broodmare.

Los Angeles Matinee.

Good racing and a large attendance made the matinee of the Los Angeles Driving Club last Saturday a complete success. The program was one of the best given by the club for some time. The summaries are as follows:

First race—
Mr. Mott's Zealous..... 1 2 1
Mr. Adcock's Neerbird..... 3 1 3
Mr. Snowden's Nell..... 2 3 2
Time—2:38, 2:37, 2:34.

Second race—
Dr. Bryson's George B..... 1 1
Mr. Snowden's Rowdow..... 2 3
Mr. Needham's Chloera Girl..... 3 2
Time—2:32 1/2, 2:33 1/4.

Third race—
Mr. Block's Maud..... 1 1
Mr. Smith's Directus..... 2 3
Mr. Budinger's Glen..... 3 2
Time—2:23 1/2, 2:23 1/4.

Fourth race. Free for all pace—
Mr. Cocke's Billy K..... 1 2 1
Mr. Cunningham's L. W..... 3 1 3
Mr. Heifer's Electra..... 2 3 2
Mr. Spooner's Wood B..... 4 4 4
Time—2:18 1/4, 2:17, 2:23.

Fifth race—
Mr. Canfield's Chino..... 1 1
Mr. Myer's Road Disk..... 2 2
Mr. Spooner's Grey Bess..... 3 3
Time—2:32, 2:31 1/4.

Bonnie Direct 2:05 1-4.

This superb stallion will be in the stud at Pleasanton again this year to a limited number of approved mares at \$100 the season. Bonnie Direct, as all horsemen know, is not only one of the fastest pacers of the Direct family, but he is probably the most perfectly formed horse ever sired by the great Direct. His dam Bon Bon 2:26 by Simmons was also the dam of that handsome mare Bonsilene 2:14 1/4, and came from a family that was endowed with good looks for generations. The oldest of Bonnie Direct's get are two-year-olds, of which there are three now at Pleasanton, as well as three yearlings. They are all from differently bred dams, and show that Bonnie Direct gets handsome foals from all kinds of mares. They have more finish than the get of any of the Director family we have yet seen, and are large, handsome and with great natural speed.

Mr. Griffith has also in the stud at Pleasanton the young stallion Bonnie Steinway, a four-year-old by Steinway out of Bon Bon, dam of Bonnie Direct. This stallion will stand at a fee of \$25, a very low figure when his individuality and breeding are taken into consideration.

Mr. Griffith has issued a very neat pamphlet giving the tabulated breeding of these horses, together with a lot of interesting facts about the records of their ancestors, which will be sent on application. See the advertisement in this issue.

Thoroughbreds have curious histories sometimes. Hands Across was one of the best looking and best bred sons of Hanover ever sold at auction in this country. He was bought for \$14,000 when two years old, but he fell sick soon after and never won a dollar until a week or so ago when he took down first money in a purse at New Orleans.

JOTTINGS.

THE SECRETARY of each district fair association in California should make an effort to get his board of directors together at an early date and decide whether or not the association will give a harness race meeting this year. There is a condition existing at the present time in regard to a circuit that associations must take into consideration and act upon without further delay, or they will be left "off the map" and not be able to get enough entries to make a meeting profitable. Three good meetings are certain. They will be the Pleasanton meeting, the Breeders meeting and the State Fair. Pleasanton will give the first meeting on the circuit. This has been fully decided upon by the new association formed there and it is only delaying the announcement of its date to give other places an opportunity to get in line. The Breeders, on account of its four colt stakes, desires to make its date as late as possible and yet precede the State Fair, and if no other associations claim dates, these meetings will be held in August, to be followed by the State Fair at Sacramento and then all the leading stables of horses will be shipped North to race for the big purses and stakes that will be hung up by the Oregon State Fair at its meeting at Salem. It is learned from Mr. Thos. Smith that Vallejo will give a meeting this year with two or three stakes of \$1000 each and a good program of \$500 purses, but its date has not yet been claimed, nor its meeting authoritatively announced. Napa is inclined to give a meeting but it is in the same shape as Vallejo so far as official announcement is concerned. Woodland has made no announcement at all, but the horsemen living there say that a meeting will probably be held on the usual date, which is the week before the State Fair. Now, if these associations would only get a move on, claim dates and announce that meetings will be held, the Pleasanton association and the Breeders will arrange their dates in accordance with a plan that will make the circuit most convenient for horsemen.

If Woodland will claim the week prior to the State Fair and officially announce the fact, the Breeders will take the week preceding Woodland; Napa and Vallejo and Petaluma can come in before the Breeders meeting, and Pleasanton open the circuit sometime in July. This will give a circuit about as follows:

Pleasanton, week ending July 23.
Petaluma, week ending July 30.
Napa, week ending August 6.
Vallejo, week ending August 13.
Breeders, week ending August 20.
Woodland, week ending August 27.
State Fair, two weeks ending September 10.

This will give eight weeks of racing before the Oregon State Fair opens and give all the best California and Oregon strings a chance to race here before going North.

Now, unless the California associations that desire to get into the circuit this year select dates and announce the fact before the Pleasanton and Breeders associations close their stakes on March 1st, then those two associations will in defense of their best interests be compelled to select the last two weeks in August as the dates for their meetings, and other associations will have to take dates prior to that time if they desire to secure the leading stables for their meetings.

It will not cost a cent for an association to claim a date and say that it will give a meeting. The BREEDER AND SPORTSMAN and every other newspaper in the State that prints any harness horse news will be glad to publish the item. There are more horses in training in California at the present time than there have been for years. Forty trainers are working trotters and pacers at Pleasanton. A dozen trainers will be at work at San Jose within another week, some seven or eight being there now. Los Angeles track is stabling over 175 horses that are being trained for the harness events this year. Santa Rosa, Petaluma, Ukiah, Eureka, Sacramento, Fresno, Salinas, Hollister, Alameda, Bakersfield, Hanford, San Bernardino and many other places have from a dozen to fifty horses at work on their tracks.

The North Pacific Circuit was a great success last year and the California horsemen want to go there again. They would rather race at home, however, during the early part of the season and strike the northern circuit at Salem, which opens the week after the California State Fair will close. Then, again, there are quite a number of Oregon and Washington horsemen who would like to come to California to train during April, May and June, and race at a few meetings here before returning home. So the

chances for big entry lists are good in California this year wherever there are good purses hung up and the dates are convenient. But dates must be announced in February or there will be many places left out in the cold.

Just why the district associations barged back until May or June to announce their meetings is one of those things hard to understand. If the Pleasanton association and the Breeders claim the two weeks just preceding the State Fair for their meetings, there will probably be objections raised by the Woodland and one or two other associations that have heretofore held those dates; but they will be compelled to take this course unless Woodland and the other places announce their intention of holding meetings. The horsemen who want to race in California this year will not start their horses in July, or the first week in August, and then be compelled to lay up three or four weeks without any racing until the State Fair. When the circuit starts there must be continuous racing in California for several weeks, or the horses will be taken north or somewhere they can race continuously. It costs money to keep a string of horses in racing shape, and owners do not care to pay racing expenses for horses that are not racing. California should have a good circuit of eight or ten meetings every year, but such a circuit cannot be organized if associations persist in holding back their announcements until after other circuits are formed. It is to be hoped that by next week's issue of this journal that Petaluma, Napa, Woodland and others of the leading towns will know whether they will have a meeting or not and be able to announce the fact. If these announcements are not made, and the derelict associations find later, when they want dates, that they have already been taken, they will have only themselves to blame.

Since the above was written the following has been received from Thos. Smith, manager of the Vallejo race track:

VALLEJO, Cal., Jan. 27, 1904.

EDITOR BREEDER AND SPORTSMAN—You can announce that it is my intention to give three or four days the second week in August, but I will not close them before April or May. Will give three \$1000 stakes and the balance from \$300 to \$500, or perhaps more if the entries will warrant it. Yours truly,

THOMAS SMITH.

The Grand Circuit Stewards Meet.

The Stewards of the Grand Circuit were convened in executive session at the Hollenden Hotel, Cleveland, Ohio, Wednesday, Jan. 20th at 11 o'clock. Among the tracks represented were Detroit, D. J. Campau; Cleveland, Geo. A. Dietrich; Buffalo, C. R. Bently; Empire City, James Butler; Brighton Beach, C. A. McCully; Readville, C. M. Jewett; Providence, A. H. Moore; Hartford and Cincinnati, A. J. Welch; Columbus, H. D. Shephard; Memphis, Murray Howe, and Syracuse, A. E. Perrin. The first business considered was the dates. This brought out a sharp contest and finally resulted in the following dates being selected:

Detroit—July 18-23.
Cleveland—July 25-30.
Buffalo—August 1-6.
Empire City—August 8-13.
Brighton Beach—August 15-20.
Readville—August 22-27.
Providence—August 29-September 3.
Hartford—September 5-10.
Syracuse—Sept. 12-17.
Columbus—Sept. 19-24.
Cincinnati—Sept. 26-Oct. 1.
Memphis—Oct. 17-27.

The Cleveland Driving Club tendered the stewards and newspaper men a banquet at the Hollenden, where an elaborate luncheon was served. Toasts were responded to by H. K. Devereux, D. J. Campau, W. G. Pollock, Andy Welch, Judge Babcock and others.

Steps were taken towards a closer and more permanent organization of the members comprising the Grand Circuit, and a committee composed of the following gentlemen were appointed: D. J. Campau, H. K. Devereux, A. H. Moore, H. D. Shephard, C. A. McCully and C. M. Jewett.—*American Sportsman*.

An Australian paper speaks of the once famous Yankee trotter Commodore trotting a race when he was 30 years old. The meeting was at Breakfast Creek, Queensland. Commodore was entered under the modest name of Jack. His appearance was not such as to encourage betting on him. His knees showed signs of frequent prayers and his haggard and broken appearance generally prompted a funny man in the crowd to admonish the starter to get them off before Jack fell down. But Jack showed them something they had never seen before. He rattled his old bones and the sulky to the wire a long way ahead of the field. Commodore had a record in this country of 2:23. When sold to Australia he brought 500 guineas.

Sired the Fastest Wilkes Trotter.

The tribe of Geo. Wilkes has been the great money winning branch of the Hambletonian family since it was founded by that great stallion whose gameness and endurance made him the most talked of horse in America. For years past the largest portion of the money hung up on the Grand Circuit and at the trotting tracks all over the United States has gone to horses that descended in the male line from the son of Hambletonian 10 and old Dolly Spanker. For a stallion to have the honor of siring the fastest trotter of all the Wilkes tribe is therefore quite a distinction and it belongs to Nutwood Wilkes 2:16½, owned by Mr. Martin Carter, proprietor of the Nutwood Stock Farm, Irvington, California. He is the sire of John A. McKerron 2:04½, a stallion that has reduced his record from year to year and is expected to yet trot close to the two-minute mark, perhaps come within that time.

Few stallions have ever stood for public service in California that sire a more uniform lot of colts than Nutwood Wilkes, and they not only have a very high rate of speed at early colthood and improve with age, but they have that finish that denotes high breeding and stamps them as something above the ordinary. When hooking mares to a stallion it is very important that this quality of finish be considered. Horse breeding must be progressive to be successful. If there cannot be improvement in looks and style as well as speed, then the American trotting horse is not advancing as he should. But this improvement is very evident in many families that have descended from William Rysdyck's old horse and in none more than the family founded by Nutwood Wilkes 2:16½. Good looks, size and style are all found in his get. Then they have the racing instinct—that desire to keep in the lead of other horses which is absolutely necessary to making a racing family. Their speed comes early, it is of the extreme kind and it breeds on through successive generations. Nutwood Wilkes has sired John A. McKerron 2:04½, Who Is It 2:10½, Claudius 2:13½ and Boh Ingersoll 2:14½, all trotters.

(If the fast pacers sired by him are Stanton Wilkes 2:10½, Georgie B. 2:12½ and the three year old Tidal Wave 2:13½. He has twenty more in the list, the majority of them trotters. The daughters of Nutwood Wilkes are destined to be great producers. There is no doubt of this. They seem to nick with all classes of stallions. Nutwood, the sire of Lida W. dam of this horse, is by far the greatest broodmare sire yet produced. There are 214 of his daughters that have produced standard speed and the daughters of Nutwood Wilkes seem to have the same power to reproduce. Very few of them have foals old enough to be trained. Not over a half dozen of these foals have ever been started in a race, but among them are Caroline L., a high-class trotting mare that took a record of 2:13½ in the east last year; Iloilo, one of the handsomest trotting horses ever seen in California that earned a race record of 2:15 last season; Miss Georgie, a pacing mare that took a record of 2:25 as a three year old and was one of the fastest pacers out in 1903. She was second to Ben F. 2:10 in his best races, and was separately timed in a race in 2:09. Caroline L. is by Simmocolon, Iloilo by Welcome, and Miss Georgie by McKinney. Sam Hoy has a trotter by Demonio out of a Nutwood Wilkes mare that has shown a mile in 2:17. Nearest, a son of Nutwood Wilkes, is the sire of the fast mare Alone 2:09½ that paced a half mile at Petaluma last season in 59½ seconds. It will thus be seen that Nutwood Wilkes is not only a producer but his sons and daughters are producers. The breeding on quality is inherent in the family.

Although there has been an increasing demand for the services of Nutwood Wilkes during the past two years, Mr. Carter has decided not to raise the service fee which will remain at \$50 for the season. This for a horse that has sired the fastest trotter of the Wilkes tribe is, indeed, a low figure.

North Pacific Circuit Dates.

The North Pacific Fair Association met at Portland last week and selected the following dates for its circuit of 1904:

Seattle, August 22-27; Everett, August 29-September 3; Whatcom, September 5-10; Salem, September 12-17; Portland, September 19-24; North Yakima, September 25-October 1; Spokane, October 3-8; Walla Walla, October 10-15; Boise, October 17-22.

The following officers were elected for the ensuing year: President, W. H. Wehrung, Hillsboro, Oregon; Vice-President, A. J. Splawn, North Yakima, Wash.; Secretary, Robert Leighton, Vancouver, B. C.; Treasurer, Dan Currie, Everett, Wash.; Board of Appeals, A. T. Van De Vanter, M. D. Wisdom, R. B. Caswell, Dan Currie, J. E. Shannon.

Pleasanton Program.

Secretary Fred Adams of the newly organized Pleasanton Racing Association announces the following program of the harness meeting to be given at Pleasanton and which will open the California circuit. The date of the meeting is not yet fixed, but will be before the first of March when the entries to the stakes will close. The Pleasanton and the Breeders associations are only waiting for a few of the other associations to announce that they will give meetings, and they will then be ready to fix dates that will be agreeable to all concerned. If other associations do not announce their intentions before the middle of February, they may find there will be no dates for them that will be convenient for horsemen as a large number will probably go to Oregon immediately after the California State Fair. The Oregon State Fair will not open until after the Sacramento fair and horses campaigned in California will thus be enabled to race on both circuits, as there will be racing at Portland, North Yakima, Spokane, Walla Walla and Boise City after the Oregon fair closes. The official advertisement of the Pleasanton program will be printed next week. The following are the classes and amounts provided for:

FIRST DAY—WEDNESDAY.

Citizens Stake, Pacing, 2:30 class.....	\$1000
Trotting, 2:30 class, purse.....	500
Local race, horses owned in Pleasanton and Murray townships, purse.....	100

SECOND DAY—THURSDAY.

Livermore Valley Stake, Pacing, 2:15 class.....	\$500
Trotting, 2:15 class, purse.....	500
Local race for horses owned in Pleasanton and Murray townships.....	100

THIRD DAY—FRIDAY.

Pleasanton Stake, Trotting, three-year-olds.....	\$600
Trotting, 2:14 class, purse.....	500
Race for horses owned in Contra Costa county, purse.....	100

FOURTH DAY—SATURDAY.

Pacing, 2:25 class, purse.....	\$500
Stake, trotting, 2:24 class.....	1000
Pacing, 2:10 class, purse.....	600

The officers of the Pleasanton Racing Association who will have charge of the arrangements for the meeting are as follows:

President, C. L. Crellin; Vice-president, N. Hansen; Secretary, F. E. Adams; Treasurer, Bank of Pleasanton. Executive Committee, Geo. A. Davis, A. F. Schweer, A. S. Olney, Geo. A. Kelly, James Sutherland, C. L. Crellin, W. H. Donahue, F. E. Adams, Secretary.

Stakes of Kansas City Jockey Club.

In another column will be found the advertisement of the Kansas City Jockey Club. This, the first meeting of this new and enterprising club, surely deserves the support of all the horsemen, as its stake offerings are most liberal, and as there will be no purse offered of less value than \$500 added, its daily average distribution should be as large, if not greater, than any other club during the time of their meeting in the west.

They offer three stakes for two year olds, the largest of which is \$2000 added, the smallest \$1200 added. For three year olds they offer the Kansas City Derby, one and one-quarter miles, with \$5000 added, and the Missouri Handicap, one mile, with \$1500 added. For three year olds and upwards they offer five stakes, one of these being a steeplechase, called the Hunt and Polo Steeplechase. This has \$1500 added. The Elm Ridge Handicap, one and one-eighth miles, has \$3500 added, and is one of the richest handicaps offered in the west; and the Country Club Handicap, one and three-sixteenths miles, has \$2000 added, and this handicap to be run the latter part of the meeting.

They also offer a stake for sprinters, six furlongs, called Star-Times Handicap, with \$1200 added, and a Selling Stake, fifteen-sixteenths of a mile, called the Kansas City World Stakes, with \$1200 added.

Horsemen should notice that the entrance fee is very light, as in the majority of stakes it is only \$5 to enter. This stake offering will compare with any stake offering in the west.

The Kansas City Derby is conditioned so that it will not penalize the winner of a single Derby; a horse to get a penalty must win two derbies, yet non-winners of \$2000 will have an allowance, giving them a chance to even defeat a Derby winner; As to the two year old stakes, there is a stake for fillies and a stake for colts and geldings, the distance of each being four and one half furlongs, each of these having \$1200 added, and the Swope Park Stakes for two year olds, with \$2000 added, distance five furlongs.

This meeting will open April 30th, and continue nineteen days, closing May 21st. The stakes will close March 1st.

The Detroit News-Tribune says that the only way to stop the practice of laying up heats and to compel the drivers to drive for each heat is to place the distance flag about 25 yards from the finish, then get a cold-blooded, merciless individual, who hasn't a friend on earth and doesn't want one, to handle the flag.

Sacramento Driving Club Matinee.

[Sacramento Union, Jan. 25.]

There was a fine crowd at Agricultural Park Sunday afternoon to witness the harness events given at the initiatory matinee of the Sacramento Driving Club with owners as drivers. The members of the club were glad of this manifestation of appreciation on the part of the public. The members of the club say they are simply endeavoring to afford some clean sport for the people, and they are pleased to know that they have not failed to arouse interest in these events, which are free to the general public.

In the first race (mile dash) Dr. McCollum's Jennie H. took first prize by a half length, with Albert Elkus' Rosa Gold second and C. W. Paine's Colonel third. This was a pretty exhibition and the spectators responded with enthusiastic applause. Time, 2:06.

J. L. Richards failed to show up with Mollie Nourse in time for the second race, and F. E. Wright sent his black mare Margaretta for an exhibition half in 1:03½, paced by a running mate.

F. J. Rubstaller, Jr., with his Hans clearly out-classed, Albert Elkus' Fritz, in the second race (mile dash), the official time being recorded at 2:54. Mr. Elkus asked for another trial, which was good naturedly accorded, but the result was equally disastrous to Fritz. Time, 2:48.

The fourth race (mile dash) brought out three nags, Bobby Dohba, driven by J. Wheeler; Harry R., driven by Chas. Rust; Queen S., driven by Captain Charles Silva. Bobby Dobbs averted toward the gate just after the start, and was so badly disappointed in not being allowed to leave the track that he went in the air, and came in third. Harry R. won, with Queen S. second. Time, 2:31¾. Mr. Rust was congratulated on his victory.

Captain Silva's Duke Cameo was scratched in the fifth race, leaving F. E. Wright's Royal Dame and John Norton's Light Bird to start. Royal Dame won. Time, 2:32.

"Events like this are good for the town," said ex-Mayor Clark at the close of the races. "They ought to be encouraged by business men. There is no better sport for the people, as will be seen by the crowd here today. There is a bigger crowd than is often to be seen at State Fair races. These events ought to take place at least twice a month."

Dr. Weldon said that the club's plans provide for such meetings every three weeks during the spring and summer.

Judges (who also served as timers) were George H. Clark, William Lampert and Dr. E. J. Weldon. Walter Tryon served as Marshal.

It was estimated that there were at least 2500 people in the grand stand and quarter stretch. The infield contained a great many carriages filled with interested spectators.

Saddle Horse Paces Fast.

The Kentucky Stock Farm is responsible for the following bit of news: In May, 1902, Walter H. Williams, of Detroit, Mich., bought from a firm at Versailles, Ky., a gelding named Judge Denny for a saddle horse. As a saddle horse he was one of the showiest ever seen in Detroit's parks, being able to walk, trot, fox-trot, running-walk, single-foot and canter. All that summer and fall his owner rode him, and about the middle of September had him harness broken. Up to that time Judge Denny had never worn a harness, and it was after about a month that the trainer discovered that he had any speed, and since then it has come to him very fast. Last winter Mr. Williams drove him on the snow and he paced him along so smoothly that Mr. Williams decided to have him trained and worked through the summer. He was given slow work all summer, and not until late was he asked to show what he could do. One day in October, when the Grosse Pointe track was muddy and in bad condition, Judge Denny paced a mile in 2:12½, the last half in 1:03, and the last quarter in 29½ seconds, causing the watch holders to open their eyes in wonder. Judge Denny went into winter quarters in perfect condition, and the trainer, Sam Kerr, thinks he will be good enough for any of the stake engagements next season. He is a big, powerful fellow, has lots of endurance, and the mile never seems too long for him, as his best flight of speed is at the end. Judge Denny is very well bred, being by Time Medium 2:29½ (son of Happy Medium), out of Nettie Vance by Sherman's Hambletonian. He is seven years old.

Among the best record horses that died during 1903 were: Arch W. 2:11½; Beuzetta 2:06½; Blonda Redwood 2:08½; Birchwood 2:15; Bell Bird 2:22; Courier 2:15; Edna Cook 2:12; Hal Pointer 2:04½; King Charles 2:08½; Lou Vaughn 2:09½; Pixley 2:08½; Rima 2:09½; Seneca See 2:11½; The Merchant, 2:13½; The Swift 2:09½, and Vendor 2:11½.

Proposed Change in the Rules.

Some forty changes in the rules of the National Trotting Association will be submitted to the congress of members, that is to meet in New York February 10th. Some of these changes proposed are not material, others are important. Besides these it is proposed to strike out Rule 7, Sec. 1; Rule 20, Sec. 2; Rule 21, Sec. 1; Rule 22, Sec. 1, and Rule 68. The rules struck out are rendered obsolete or useless by proposed amendments to other rules. An important amendment is in Rule 7, Sec. 1, regulating the entry of horses to race meetings as follows:

The entry shall give the name and address of the owner, and if signed by an agent, the name and address of said agent, also, the name and color of the horse, whether a stallion, gelding or mare, the name of the sire and the name of the dam, if known; if unknown, it shall be so stated in the entry. If any of these requirements are not complied with, the offending party shall be fined not less than \$5 or more than \$50 for each offense, and if the facts are falsely stated for the purpose of deception, the guilty party shall be fined, suspended or expelled.

This rule will require drivers and owners entering horses to study pedigrees, and will make entries by wire rather expensive.

The change proposed in Rule 5, Sec. 2, is as follows:

A horse shall not be eligible if the time specified has been obtained by him at a greater distance; that is, a horse having made two miles in five minutes shall take a record of 2:30 and be eligible for a 2:30 race, but not for a race limited to horses of a slower class than that.

Rule 11, Sec. 7, has been changed materially. The proposed amendment is as follows:

All engagements, including obligations for entrance fees, shall be void upon the decease of either party or horse, prior to the starting of the race, so far as they shall affect the deceased party or horse; except where the proprietorship is in more than one person, and any survivor, the survivor and horse shall be held; but forfeits, also matches made "play or pay," shall not be affected by the death of the horse.

It is proposed to add a new section to Rule 15, which is quite strenuous. It is also an all-embracing rule, a sort of drag-net-rule. It reads thus:

If any person be guilty of, or shall conspire with any other person for the commission of, or shall connive at any other person being guilty of any corrupt or fraudulent practice in relation to racing in this or any other country; or who shall have administered a drug or stimulant internally or by hypodermic method prior to or during the progress of a race, or who shall have used appliances electrical or mechanical other than the ordinary whip and spur shall be fined, suspended or expelled according to the gravity of the offense.

Rule 28 will be improved with a new section to which the alert attention of all race drivers is herewith called. It reads as follows:

After each heat the drivers or riders shall come to the judges' stand and not dismount or leave their vehicles without permission of the judges, and no driver or rider shall be changed after starting except by order of the judges.

This rule is not very important so far as changing drivers is concerned, as the judges would hardly endanger the chances of a horse winning a heat by an attempt to change drivers after starting, which means, of course, after the starting judge gives the word "go."

Before the rule is finally adopted by the congress it should be made more specific.

There is an important change proposed in Rule 35, Section 2, that is vital, as follows:

The judges shall not declare the deciding heat of a race void, unless the winning horse was guilty of improper conduct in that heat, or his winning was the result of collusion or other fraudulent conduct on the part of other contestants in the race.

A very important rule is proposed, to be known as Section 3, Rule 59, the violation of which involves expulsion with no provision for milder treatment by the judges. It reads as follows:

No horse sold or bargained for, conditionally or otherwise, after 7 P. M. of the day preceding an engagement is eligible to compete. Any person violating this rule shall be expelled.

None of the other amendments and changes proposed are important. Race horsemen and drivers should study these proposed amendments carefully and if they disapprove of any of the changes forward your opinion to Secretary Wm. H. Goebel, Hartford, Conn. He will submit your views to the Rule Committee of the Twenty-second Congress. The Rule Committee will meet in New York, February 8th.—*American Sportsman.*

The Kenney Manufacturing Company, 531 Valencia street, San Francisco, has a second-hand Toomey cart with wood wheels, extra heavy carriage tie, cushion, etc., that is as good as new, having been used but little, which will be sold for \$90, regular price \$135. Harness, blankets, etc., goes with it. They also have a fine surrey for sale cheap and manufacture sulky wheels and attachments to order. Pneumatic tires, solid cushions put on all kinds of vehicles.

For all kinds of weather there is no drink like Jackson's Napa Soda—plain or in a lemonade.

Notes and News.

Pleasanton's program is out.

Vallejo claims second week in August.

What association will make the next announcement.

Kinney Lou 2:07½ will be shipped from Alameda to San Jose on Monday next.

Fred E. Ward, of Los Angeles, has a good green trotting mare by James Madison for sale. See advertisement.

The California pacer, Clipper 2:06, is said to be king of the snow path in Chicago. He is owned by Morris Vehon.

Trilby Direct 2:08½, will be raced over half-mile tracks this year by Tom Murphy, one of James Butler's trainers.

Budd Doble and Homer Saxe have sold the Diablo colt Diogenes, and he has been shipped to Mexico where he will be placed in the stud.

Citizens of Syracuse will guarantee a \$10,000 early closing stake for trotting horses to be made the feature of the Grand Circuit meeting there.

A fine surrey, one of the best made, and handsomely finished is for sale at about half its value, by the Kenney Manufacturing Company, 531 Valencia street, San Francisco.

The special edition issued by the *North Pacific Rural Spirit* during the session of the National Live Stock Convention at Portland, was a splendid paper filled with many interesting and instructive articles.

The Green Meadow Farm at Santa Clara is offered for sale. This is one of the most beautiful and thoroughly equipped stock farms in California and the price asked for it is very reasonable. See advertisement.

Stam B. 2:11½, had a larger season in 1903 than he did in 1902. The breeders of California are just beginning to realize that he is one of the highest class horses in America, and he will have a heavy season this year.

Lecco 2:09½, the handsome stallion owned by Ed Mills of Pleasanton, has the distinction of being a son of the only mare that has ever produced two 2:10 trotters. That's the sort to breed to. It can't help but pay with ordinary luck.

Blackbird, a mare owned by Grant Stringer, of Bouckville, New York, is known to be 38 years old. She raised a colt in 1903 and is certainly with foal again. It is safe to say there is no parallel case to this in the annals of horse breeding.

Thos. Smith, lessee of the Vallejo track, will give a harness meeting during the second week in August. Three stakes of \$1000 each will be hung up. The circuit is beginning to assume shape, and four meetings are certain: Pleasanton, Breeders, Vallejo and the State Fair.

Henry Dunlap of Pleasanton came down to the city this week and purchased from the Kenney Manufacturing Company one of those handsome McMurray sulkies finished in white enamel and trimmed in gilt. It is a beauty and Mr. Dunlap says it is one of the best running sulkies he ever sat in.

The wideawake horse owners of Pleasanton are strongly agitating the formation of a gentlemen's driving club. The Pleasanton Racing Association has already been organized and will give one or more regular meetings each year. A gentlemen's driving club would be a powerful adjunct to the sport at the horse centre and its matinees would draw big crowds.

There will be a hundred horses in training at San Jose before the first of March. The strings of trainers C. A. Durfee, J. W. Gordon, W. H. Williams, John Phippen, T. W. Barstow and others are already there, and Joe Cuicello, Hans Frellson, J. W. Zibbe will move to the track in a few weeks. The San Jose track is one of the best training tracks in California.

W. L. Spears recently sold his half interest in the trotting stallion Jay McGregor 2:08 to his partner, J. L. McLain, for \$12,500. McLain paid \$7,500 for the other half interest, and so now owns the fast son of Jay Hawker at an outlay of \$20,000. He intends to keep Jay McGregor in the stud for a season before turning him over to Scott Hudson, who will again take him down the Grand Circuit.

Mr. Paul R. Isenberg, of the Wailae Ranch, Hawaiian Territory, now owns the pacing mare Ruby M. 2:12½ by Almont Patchen. Ruby M. is due to foal in a few days to a grandson of old Marin 19940, sire of the gray whirlwind trotter Marin Jr. 2:13, that Pat Farrel developed and raced so successfully on the California circuit nine or ten years ago. Mr. Isenberg is also the owner of a handsome young stallion coming three years old that is by Boodle 2:12½, dam by Sahle Wilkes, second dam by Hanpy Medium. This young stallion and several others belonging to Mr. Isenberg are being developed at Honolulu by Will Morris.

It is said that dash racing may be given a thorough trial at next summer's Grand Circuit meeting at Brighton Beach.

Tom James left for his old home in Des Moines, Iowa, last week, taking his stallion Barondale 2:14½ with him. We believe every mare Barondale was bred to last year is reported in foal.

If Woodland will claim its usual date which is the week before the California State Fair, the Breeders will take the week before Woodland, and Pleasanton the week before Vallejo, thus opening the circuit the first week in August, and insuring six weeks of good racing.

Searchlight 2:03½ never looked better than he does this spring. His percentage of foals from the mares served last year will be very large. As he had a large number of high class mares, the foals of this year will doubtless be winning stakes in their two and three year old form, adding a value to the foals of next year. Those who send their mares to him this season will be wise.

Robert Leighton, secretary of the North Pacific Racing Circuit, and who was presiding judge and starter at several of the meetings held in Washington and Oregon last season, has been offered and has accepted the position of general manager and clerk of the course for race meetings of the California Polo Pony Racing Association, which will hold its first meeting at Del Monte, February 18th to 22d, inclusive.

New York will have its annual parade of light-harness horses this year, the Road Drivers Association again having decided to promote the event that has always aroused so much interest among followers of the trotter. The date will be May 7, when the association expects to have an affair of even greater importance than the parades of the past. Last year the plan was abandoned for speedway brushing, but this spring there will be brushing in addition to the parade.

Millard Sanders, trainer and driver of Lou Dillon, the queen of the turf, has written to Superintendent Frank A. Turner, of the Santa Rosa Stock Farm, where the great mare was bred, regarding the coming season with that animal. Sanders complains of the cold weather in which he is spending the winter. Heretofore he has wintered in California. He declares his belief that with perfect handling Lou Dillon can step a mile in 1:54 or 1:55 and this is the only thing that could possibly cause him to remain in the Eastern climate for the rest of the winter.

Gentry Stock Farm, Bloomington, Ind., has issued a neat catalogue, and we are under obligations to the owner for a copy. Mr. Gentry has already received in service fees nearly the entire sum of the \$25,000 he paid for McKinney and has been offered \$40,000 for him, which offer was declined. The Gentry farm contains 400 acres of choice blue grass land, "the kind that made Kentucky famous," and a band of very choice broodmares, several of them California bred, has been collected. McKinney is to be limited to 35 outside mares this year at \$200 and next year will be a private stallion.

It is announced that C. K. G. Billings has expressed a determination to procure, if possible, the identical sulky that Maud S. pulled when she lowered the world's champion trotting record to 2:08½, and let the public know how fast a mile Lou Dillon 1:58½ can trot hitched to that vehicle. It is to be hoped that the sulky will be loaned and that it will be in as good condition as on the day Maud S. pulled it in 2:08½ and that if the California mare pulls it in 2:00 there will be no protest made on the ground that her driver wore a necktie of a lighter color than the one worn by W. W. Bair at Cleveland, July 30, 1885.

The following telegram from Salem, Oregon, was printed in the *Chronicle* of this city last Wednesday: "Charged with stealing Diablo, a pacing stallion valued at \$5000, C. D. Crookham, a prominent San Francisco horseman, was arrested in this city to-day. Diablo is held under lease by Sam Casto, a well-known Oregon horseman. The owner of the pacer is Mrs. William Murray of Woodland. Crookham arrived in Salem to-day and demanded possession of the horse. This was refused, whereupon he repaired to the State Fair grounds, broke open the stable and took the animal. Casto promptly caused his arrest. He was released on his own recognizance and will be given a hearing to-day. Both sides have employed the best of legal talent and a battle royal is expected. The whole question apparently hinges upon the right of Casto to hold the horse under his lease. A large number of owners of brood mares who have contracts on Diablo's services are greatly interested in the outcome."

In an interview in Chicago C. W. Marks, speaking for Mr. Billings, says: "As long as there is any question over the validity of the record made by Lou Dillon to a high-wheeled sulky, braaking the record made by Maud S., Mr. Billings does not want the record. I have heard Mr. Billings talk many times of record-smashing, and I know his sentiments, and I think I know the man well enough to say that, if there is any question of a record held by his mare, he is willing to try over again and get the record only through the most perfect condition." This is correct. With the same sulky that Maud S. was harnessed to and under the same conditions, every horseman in the country who has seen Lou Dillon step knows that she can beat 2:03½ at least three seconds, but according to the peculiar decision Lou Dillon must draw this same sulky in 1:58½ or better or it is not a record. She must beat her own best record or she can not get a mark. The absurdity of the ruling is becoming more ridiculous every day.

Mr. A. C. Dietz has re-purchased the pacer Alfred D. 2:12½ by his good stallion Longworth 2:19 son of Sidney. Mr. Dietz bred and raised Alfred D. and sold him for \$150 as a two-year-old. His record was made as a three-year-old. Alfred D.'s dam is Ferndale Belle by Judge Salisbury, he by Nutwood; second dam Satinella by Winthrop, third dam Fanny Norris, a thoroughbred mare from Kentucky, said to be by Printer. In her day she was the fastest mare in the State for a half mile. Alfred D. is 16½ hands high, bright bay, and of such a disposition that a child can drive him. The former owner says he can drive him in two minutes. Alfred D. is undoubtedly one of the grandest looking horses in California or the United States.

On the front page of the BREEDER AND SPORTSMAN this week is an engraving from a picture taken recently of the stallion Director 2:17, founder of a great family. Director is now 27 years old, but is strong and vigorous and will doubtless live for several years yet and be a useful horse in the stud. He is owned by the Locust Grove Stock Farm, at New Castle, Pennsylvania. He is now the sire of 58 standard performers including Directum 2:05½, Direct 2:05½, Nathan Straus 2:05½, Direction 2:08½ and twenty more with records below 2:20. Over 30 of his sons have sired fast performers, and fifty standard trotters and pacers have been produced by his daughters. In his great campaign on the Grand Circuit in 1883, he won ten races including one purse of \$10,000, two of \$5000 each, one of \$3000 and one of \$2500.

Mr. Ed. Mills, who recently purchased of the Oakwood Park Stock Farm the five-year-old chestnut mare Derbertha, has since sold her to Mr. Robert Niles, at present a resident of Pleasanton but formerly of Humboldt Co., for the sum of \$1500. This mare is a grand individual as well as a great bred one being by the great sire Chas. Derby 2:20, dam the wonderful broodmare Bertha by Alcantara 2:23, the greatest son of George Wilkes. She is, therefore, full sister to the great race horse and sire Diablo 2:09½, Don Derby 2:04½, Demonio 2:11½, Ed Lafferty 2:16½ and Jay Eff Bee 2:26½, at one year. Bertha also produced Elf 2:12½ by Steinway and Owyho (3) 2:22½ by Owyhee. Derbertha is a beautifully gaited pacer and as a three-year-old worked a mile over the Oakwood Farm track in 2:16½. She has had no work but will now be trained at Pleasanton by the former Humboldt Co. trainer, Matt Zahner. Mr. Niles is to be congratulated on securing this grand young mare for what seems to be such a low price for one of her kind.

Budd Doble, who will take his stallion Kinney Lou 2:07½ to San Jose on the 1st of February, will begin giving him slow work and not move him up very fast until after the close of his season, May 1st. Mr. Doble brought with him from the East last fall a sulky new to this Coast, called the Decker. It is a very handsome vehicle, and Doble claims has many advantages over other sulkies. The horse can be hitched closer than in any other sulky by reason of the bars or rather curved axles, of which there are three instead of the usual two, all being placed flat against the lower side of the sulky seat, so there is no extension below the seat. By this plan a gain of three or four inches is made in the space under the seat, and consequently the seat can be that much lower—a great advantage. The tubings are all filled with wood which prevents the steel from crystallizing or breaking through jarring. In both shafts half tubes are set in the wood, which makes them lighter and at the same more rigid.

A newcomer to the list of fast trotters during 1903, was the mare Caroline L. 2:13½, whose dam is a daughter of the California stallion Nutwood Wilkes 2:16½. Caroline L. was bred at the Ypsilanti Stock Farm in Michigan and is by Sammocolon. Her dam is the mare Edna Nutwood by Nutwood Wilkes, second dam Sedina 2:28½ by Sidney, third dam Star, (dam of Hailstorm 2:30) by Geo. M. Patchen Jr. 31, fourth dam Lady Primus by Primus, fifth dam Fanny McCourtne. Nutwood Wilkes is rapidly coming to the front as a sire of producing mares. Two of his daughters have produced Caroline L. 2:13½ and Illoilo 2:15, both trotters, while another daughter is the dam of the pacer Miss George 2:25, that was second to Ben F. 2:10 in his races last year and was timed separately in 2:09 in a race. His son Nearest 2:22 is the sire of the champion four-year-old pacing mare of 1902, Alone 2:09½. A item worthy of note in the pedigree of Caroline L. is that her third dam is an own sister to the second dam of the champion four-year-old trotter of 1903, the bay gelding Judge Green 2:10½ by Directum.

Judge Dougherty of Santa Rosa has sent to Ed Mills to be trained his very promising young trotting mare Sonoma Girl by Linwood Wilkes 2:20½, dam Maud Fowler 2:21½ by Anteeo 2:16½; second dam the great broodmare Evelyn, dam of Robet 2:12, Tie tain 2:19 and others, by the great Nutwood 2:18½. This mare is very fast, good gaited and good headed, has been handled and developed by Dick Ahles at Santa Rosa, and is considered by him as one of the greatest prospects he has ever handled. It will be seen that she is one of the best bred ones in America. Her sire, Linwood Wilkes, was raced by the late John Goldsmith as a two-year-old and obtained his record of 2:20½ that year. Mr. Goldsmith regarded him as the greatest trotter ever sired by the great Guy Wilkes 2:15½, and offered Mr. Wm. Corbett, his breeder and owner at that time, a very large price for him, which was promptly refused. He unfortunately met with an accident which prevented his further development and cut his racing career short. His dam was by Sultan Jr. 12771, son of Sultan. Sonoma Girl's dam is a daughter of Anteeo 2:16½, one of Electioneer's best sons, next dam a great broodmare by Nutwood, so as will be seen she carries the blood of three of the greatest trotting families, coming through the best representatives of each family.

The Trotter's Wind Shield.

The advent of the two-minute trotter and the faster pacer was received during the past season with much jubilation by horsemen all over the land. Many an old-timer's prediction was fulfilled, and many there were who acknowledged the error of their judgment as to the impossibility of the feat, but a calmer consideration of these sensational records has resulted in discrediting or throwing out the same by harness horse authorities, and the decision thus rendered has started a bitter controversy on all sides among horsemen. Let us throw aside all sentiment in the matter and attempt a mathematical solution of the problem as to the benefit rendered a performing horse by the wind or dirt shield pacemaker.

On a perfectly still day a horse going around two minutes is breasting a wind of 30 miles an hour created by his motion. Overcome this force which is opposing his speed, either completely or even partially, and you will materially accelerate his motion by preventing a distressing waste of energy to the performer. We will now find what the pressure of the air amounts to when no shield is employed. For several centuries machines have been invented to determine the pressure of wind of various velocities. The sails of a vessel under a breeze of 30 miles an hour stand a pressure of over six pounds per square foot. Windmill experiments show $4\frac{1}{2}$ pounds pressure per square foot for a 30-mile an hour wind, while perhaps the most reliable instrument, the anemometer of Dr. Lind, gives 5 pounds per square foot for a 30-mile wind. This we will abide by as a conservative figure. The United States Weather Bureau uses Smeaton's rule, which gives $4\frac{1}{2}$ pounds pressure per square foot on a flat surface. Observations in England showed 14 pounds per square foot for a 38-mile wind and 42 pounds pressure for a 70-mile wind, or about twice as great as Smeaton's rule would give.

Now the surface presented by a harness horse when rushing through the atmosphere, is made up by the front part of the horse, his legs, part of the driver, part of the sulky, and the fore part of the wheels, all of which, measured on a present time champion, amount to about twelve square feet; however, the surfaces whose section is twelve square feet, are not flat, but rather spherical or cylindrical; hence the pressure on such surfaces is different from that on flat surfaces, or is equal to one-half, according to Troutwine and other experimenters. Thus the two-minute horse on a dead calm day, facing a thirty-mile wind created by himself, meets an opposing force of one-half of five pounds per square foot, or two and one-half pounds; and the section of the cylindrical surfaces in this case being twelve square feet, we find by multiplying twelve by two and a half, a pressure of thirty pounds against the unshielded trotter.

Behind the shield, the horse benefits most when close up, but benefits some if within any reasonable distance. The partial vacuum and suction, so called, behind the pacemaker certainly withdraw a large part of the thirty pounds pressure that would otherwise oppose the horse. The dirt shield pacemaker shields the horse behind in the same way that the Reliance in the windward position effectually blanketed the Shamrock, though the two were more than twenty lengths apart, and yet some horsemen claim that only when the pace follower is less than one length behind is he assisted to any extent.

When the champions of the past year go their miles unshielded this coming season we will better appreciate the damaging effect of atmospheric pressure on their wonderful records.—*Hugh E. McLaughlin in New York Sun.*

Cup Awards at Denver.

Historian J. R. Stevens presented his report to the Denver Gentlemen's Driving and Riding Club at the meeting held January 2d. The club held twenty-seven matinees in 1903, in which ninety-one trotters and pacers competed, and thirty-seven heavy harness horses competed for ribbons.

June 24th the state track record for road wagon was lowered to 2:12 $\frac{1}{2}$ by Martha B., owned and driven by J. W. Miller. August 1st the mile racing City Park track record was lowered to 2:14 $\frac{1}{2}$ by Miss Williams, owned and driven by George E. Ady. August 29th the pole team track half-mile record was lowered to 1:07 $\frac{1}{2}$ by Daisy Field and Primrose, owned and driven by J. Fred Roberts. October 10th the pacing track record, half-mile, was lowered to 1:03 $\frac{1}{2}$ by Primrose, owned and driven by J. Fred Roberts. October 24th the trotting track record, half-mile, was lowered to 1:06 $\frac{1}{2}$ by Jim Ferry, owned by Wright & Stoddard, driven by E. J. Stoddard.

The following are the five highest making entries in light harness events: J. Fred Roberts, 29 races; George E. Ady, 20; George M. Black, 18; J. K. Stuart, 17; Ed Matthews, 15.

The following are the five highest winners in light

harness events: Daisy Field, 13 races; Primrose, 7; Little Fellow, 6; Little Ruby, 6; Daniel J., 5. Cup is awarded for most races in light harness events to J. Fred Roberts, account Daisy Field.

Daisy Field and Primrose being a tie for fastest heat in a race, both having won the heat in 1:04, the cups awarded to J. Fred Roberts, account of them jointly.

Heretofore not more than one cup has been won in one season by any member and Mr. Roberts was heartily congratulated upon breaking the prize-winning record.

One cup was awarded Mr. Roberts for the fastest heat, one for the most entries in races and the third for winning the most races. A cup was awarded to D. Hogan for winning the most events in the saddle horse class and one to N. Fitzell for making the most entries in saddle horse classes.

The officers for 1904 are: J. A. Burnett, President; C. H. Reynolds, Vice-President; J. K. Stuart, Secretary and Treasurer; E. D. Davis, Historian. Board of Directors—J. Fred Roberts, J. A. Osner, M. J. Dunleavy, A. S. Donaldson, H. Randolph Guggenheimer and F. C. Came. All the officers were elected unanimously.

A Good Story of "Uncle" George Fuller.

"Uncle" George Fuller, known from one end of the United States to the other and in "furrin parts" as well, is dead. He had been practically confined to his room for many weeks prior to his demise, which occurred at Hermitage, Tenn., on January 7th. Few men had more individuality than George Fuller, and there was never a season, during his long career on the harness turf, that he did not do something to add to the history of harness racing. He grew up in the "old" school, which developed the "generals" who made the killings. About ten years, or less, ago he was racing something along "for educational purposes" and got into a race in Ohio, which the judges thought he could win, if he tried. They called him into the stand in the course of the race to give him a lecture. As he climbed into the sacred enclosure the chief judge said to him: "Mr. Fuller, the people over there (waving his hand in the direction of the grandstand) do not think you are trying to win this race." Quick as a flash Fuller retorted: "Gentlemen, I don't care a cuss what the people over there think. I want to know what you think." The kinks were all taken out of the men in authority; they gave Uncle George a mild reproof and that ended the incident. The editor of the *Kentucky Stock Farm* is in better position to recount the good ones Fuller developed and raced, and a list of them would prove highly interesting. The writer, joining with a host of friends, wishes the veteran reinsman peace and happiness beyond the grave, and regrets that he could not have been spared to enjoy his old age in quiet in his Tennessee home.—*Kentucky Stock Farm.*

Some Pertinent Suggestions.

R. I. Lee, former owner of Robert McGregor, has some very pertinent suggestions to offer for the benefit of our turf law makers. He says:

"The fairest method of betting on harness races is through the French mutual system. Here the hettors themselves make the odds. Let the associations own and operate the mutual machines, and have a sufficient number to accommodate large and small hettors. The French mutual system can just as well be applied to the result of the race as to the result of a heat, and I would have machines operated both ways, which would give all manner of hettors an opportunity of laying their money as they thought best. At all Western meetings may be found scores of men who care to bet only a small amount at one time, and prefer playing heats to results of races. These men frequently care to bet no more than \$2, and, if afforded an opportunity of betting by the bookmakers, find themselves squarely against a one-sided game, and have but little chance of winning. Frequenters of race meetings will wager more or less money. It is practically impossible to conduct a harness meeting without some form of betting. This being an assured fact, why not give hettors some show in the game?"

"I have also advocated for many years that no more horses should be started in a race than can score in one tier, selecting the first two or three horses in the finish of the first heats for the finals, as they do in athletic contests. For instance, supposing that fifteen horses answered the call for a 2:30 trot. Divide this number into three fields, and after each field had trotted one heat let the horses finishing first in the trial heats trot another mile for the first, second and third moneys. This method would make each race of the kind referred to a four-heat event, but only three horses would be compelled to trot more than one mile. By this method trotters and pacers could easily go two or three races in a week. In order to still further make it possible to race a

horse more than once a week, I would have all entries to purse races close the night before the race, with a straight 5 per cent entrance fee, and nothing additional from money winners. This would enable a man to start a horse two or three times a week and avoid getting him in company each time that was too fast for him. With an over-night entrance owners should be compelled to pay the 5 per cent fee when they made the entry, and this would do away with so many suspensions for non-payment of entrance money and place associations in shape to race off their programs.

"Another matter that I have had under consideration for many years is a supreme court for all cases coming before the board of appeals, wherein parties feeling themselves aggrieved at the decisions of the turf courts may have an opportunity of carrying the matter to a higher tribunal. This supreme court could try appeals from both associations, and should be supported by the American and National Trotting Associations. I understand that quite large sinking funds are being held in trust (for whom it is not known) by each association, and the cost of a supreme court would not cause a deficit in the treasury of either. Let some such eminent jurist as General Tracy be named as one of the judges of this court, and with such a choice place other men equally well versed in the law and matters pertaining to harness racing, pay the judges a salary that would enable them to devote six months of the year to the business referred to, and let the court hold annual sessions at various points throughout the United States, thus making it convenient for those having cases before the court to attend."

Emperor William's Saddle Horse.

Following up his delicate and diplomatic compliment to Yankee yacht builders in ordering the Meteor here, Emperor William of Germany has paid a graceful tribute to American saddle horse breeders by placing an order for the finest animal of this type obtainable in the United States.

Through Lord Lonsdale of England, who is a personal friend of the Kaiser and also of W. D. Grand, the latter has been commissioned carte blanche to purchase a horse good enough for the Emperor to ride at the head of the German army.

Appreciating the responsibility, as well as the confidence reposed in him, Mr. Grand is determined to send the Kaiser an ideal saddle horse or none at all. And he does not hesitate to say he is somewhat doubtful about obtaining one that can meet all the requirements demanded.

The animal must be of the color and somewhat of the stamp of Napoleon's famous white horse, as depicted by Meissonier, De Neuville and Detaille, and he must be not under 15.1 hands and not exceed 15.2 hands in height, with conformation, quality and manners as nearly perfect as possible.

Mr. Grand hopes to obtain a Kentucky saddle horse that will fill the bill. They are conceded to be the finest riding horses in the world. One difficulty is in the way, however. Very few of them are white or gray, the prevailing colors being bay, brown and chestnut. In speaking of the type of horse required, Mr. Grand said that a crossbred Kentucky-Arabian animal might be of the right stamp. Nearly all Arabians seen in this country are gray or white and very bloodlike and beautiful. It is Mr. Grand's idea that Arabians crossed with the Kentucky saddle bred horse would approach perfection for the purposes of an Emperor's charger.—*Chicago Horseman.*

Gombault's Caustic Balsam

The Great French
Veterinary Remedy.

A Safe, Speedy and Positive cure
for ailments of
HORSES and CATTLE.

As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, etc., it is invaluable.
Every bottle of Caustic Balsam sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address
THE LAWRENCE-WILLIAMS COMPANY, Cleveland, Ohio.

ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

San Francisco Kennel Club.

The club members and officials are actively engaged in the preliminary work for the April show in this city. Indications point to a large entry; the fact that premium lists and entry blanks are already in demand by a number of fanciers who will make their initial entry is an encouraging sign. The list and blanks will be issued early and forwarded to every possible address obtainable; individual requests for the same will be answered promptly.

The office work will be conducted by experienced attaches and in a manner that will be satisfactory to all concerned.

Rumor has it that Mr. James Mortimer will be invited to judge. Mr. Mortimer was here in 1896 and 1900, he will also be remembered by veteran fanciers as the judge of several earlier shows. Mr. Mortimer's engagements have always been satisfactory here. He has been identified in doggy affairs for a quarter of a century and is recognized as one of the best posted bench show officials and all round judges in the United States. He is a writer of authority as well. Our premise in the selection, however, is founded on current rumor; we will add that it is the opinion of conservative and leading fanciers that the selection could hardly be a better one.

Referring again to current rumor, we will state authoritatively that statements going the rounds to the effect that the club has arranged with Messrs. Frank Dole, Ben Lewis and George Thomas to each bring out a string of Eastern dogs is entirely without foundation. If such action had ever been contemplated by one or more of the club officials the matter has been passed in a positively negative manner.

Again listening to the chirrup of the song sparrow, the story has been circulated that the three high lights of the fancy mentioned were coming out here this spring. We have tried to trace the story down, but cannot get any corroboration. At all events the visit will not receive official encouragement in the substantial or discriminating manner intimated.

Fanciers who might feel a bit discouraged at prospective Eastern competition may now rest easy on that score.

Reliable information received during the week is to the effect positively that there will be a big A. K. C. show in this city annually henceforth, and that each succeeding show will be better than its predecessor, if application, enthusiasm and efforts for the general interest of dogdom will cut any figure in reaching such a result.

P. K. L. Meeting in Seattle.

At a conference of Pacific Kennel League delegates, held in Seattle, Wash., January 24th, and participated in by representatives of every show-giving P. K. L. club on the Pacific Coast, the American Kennel Club, from which the league seceded seven years ago, was extended a final opportunity to grant self-government to Western clubs as a condition precedent to their return to that organization. Delegates representing the Victoria, Vancouver, Seattle, Tacoma, Portland, California Collie, Old English Sheep Dog, Pacific Collie and Santa Clara County Kennel Clubs were present.

The demands of the league formulated at the meeting, in substance contemplate self-government in all essential particulars, through the medium of a Pacific Advisory Board, which the American Kennel Club now maintains on this Coast, but which, it was claimed, is a mere figurehead, with no authority to modify existing rules to conform to Pacific Coast conditions. The delegates expressed slight hope that the New York club will grant the concessions demanded. It was determined that, in the event of the American Kennel Club rejecting the demands made upon it, all Northwestern clubs combine to aid the California members of the league, both with entries and, if need be, with money, to the end that it may successfully combat with the American Kennel Club in that State.

The matter of the establishment of a studbook for the registration of Pacific Coast dogs was discussed, but action was deferred in deference to the wishes of the California clubs who desire to investigate the advisability of this step before casting their votes in favor of the move.

The Birmingham dog show, the oldest in the world, has passed and gone, and was a successful fixture. Instituted in 1859, when a small show of sporting dogs was organized, it has been held continuously ever since, and has maintained its sporting dog feature to this day. Its first president was Viscount Curzon, and either a duke or an earl has been its figurehead each year since the society's foundation. The show is run by a syndicate who own the locale, the Curzon Hall (so named in honor of the society's first president), which has become quite inadequate to contain the quantity of dogs now benched annually at the show. The entries this year reached the record of 1731, the quality being quite up to the average.

On a hot day drink Jackson's Napa Soda lemonade and be refreshed.

W. K. C. Show.

About \$10,000 in cash prizes in addition to many valuable cups and other trophies offered by clubs and individuals comprise the premium list of the twenty-eighth annual show of the Westminster Kennel Club, which will be held at Madison Square Garden from February 10 to 13, inclusive. The premiums will be distributed among 427 classes, and the prizes will be awarded on the basis of \$15 to the winning dog, \$10 to the second, and \$5 to the third. In winners' classes rosettes will be given as first prize, while puppies and novices will receive a silver medal.

In the list of special prizes offered by members of the Westminster Kennel Club, W. K. Vanderbilt, Jr., gives a silver cup for the best Old English Sheep Dog. A cup from Harry Payne Whitney will go to the best Beagle. George De Forest Grant offers a cup for the best Pointer. Andrew Miller, a cup for the best Clumber Spaniel; and James McGovern, a cup for the best Irish Terrier. A number of medals are offered by the St. Petersburg Dog Society for Bloodhounds, Deerhounds, Greyhounds, Foxhounds, Pointers, and Setters and the Westminster Kennel Club offers \$150 or plate for the best pack of Foxhounds, the property of a recognized hunt club, and shown by the M. F. H. in hunting costume, and \$150 plate for the best pack of Beagles.

St. Bernards will have the Ruppert, Waters, and Gould Challenge Cups to contest for, and the Great Dane Club of America offers the Presidents' Cup, presented by J. Blackburn Miller for the best American Great Dane under fifteen months old, and the Grand Challenge Trophy for the best team of four Great Danes.

Collies are well provided for, the Collie Club of America Trophy, valued at \$300, going to the best American-bred Collie, and the Van Schaick Cup, valued at \$300, to the best Collie at the show. Besides the many specials to be given by the Bulldog Club of America, the Bulldog Club of Canada and the Long Island Kennel Club have offered cups or medals in the various classes.

In the class for Toy Spaniels the Champion Rollo Challenge Cup, presented by Mrs. A. M. Raymond Mallock, will be given to the best American-bred orange and white English Toy Spaniel, but it must be captured five times before becoming the permanent property of the owner of the winning Spaniel. The Crestwood Challenge Cup, presented by Mrs. F. J. Sternberg, will be awarded to the best Japanese Spaniel, and the Breeders' Cup to the best Toy Spaniel.

The Ladies' Kennel Club of Massachusetts will be prominent in the distribution of special prizes, which includes the Grand Challenge Trophy, presented by Mrs. J. W. M. Cardeza, for the best Great Dane under fifteen months old; the Misses M. L. Harris Trophy, for the best Boston Terrier under fifteen pounds, and the Officers' Puppy Bowl, for the best puppy of any breed bred and owned by a member.

Premium lists and entry forms can be obtained of Jam's Mortimer, Secretary and Superintendent, Townsend Building, 1123 Broadway, New York.

J. W. R. Dickson.

[By One Who Knew Him.]

On the 19th inst., the coursing world of the Pacific Coast lost one of its best authorities and most energetic enthusiasts in the person of John W. Roneyne-Dickson, who passed away at St. Joseph's Hospital, in this city, after a lingering illness.

Born in Ireland in February, 1830, he was brought, when about six months old, by his mother to his father at Newburyport, Mass. At the age of twelve years he was sent to learn the printing trade. After two years of hard struggle with the art that makes the world, he bade it farewell, and took a berth aboard the United States ship-of-war Brandywine as mess boy to some of the officers.

For several years he continued with the Brandywine, visiting many of the Atlantic and Gulf ports of the United States as well as Central and South America.

After being paid off from the Brandywine, he returned to Newburyport and entered the printing business to finish the trade.

His voyage in the Brandywine had, however, made him discontented with the humdrum village life of Newburyport, so when he was about twenty-two years of age and the whole world was excited over the fabulous gold discoveries of California and Australia, the young man, with nearly three-quarters of the men of Newburyport, caught the intoxicating gold fever, and determined to be one of its patients.

At Boston two American vessels were fitting out for the Eldorado—one for Melbourne, Australia, and the other for California. Unable to decide in which place to cast his lot, young Dickson tossed a coin, heads being for the Antipodes, and tails for California.

Heads won, and a few days later the young seeker after wealth, with several companions, were sailing to the Southern Hemisphere.

His adventures in the gold fields of Australia were exciting enough to satisfy the most adventurous of spirit. Three times he held fabulously rich claims, and three times threw them up to chase "rainbows," for as he did not immediately strike rich color he believed the claims were "duffers." But those who came after and got down to the bed-rock reaped riches unthought of.

Becoming dissatisfied with digging for "rainbows," he tried his hand at cattle and sheep raising, and it was on the cattle and sheep farms of Victoria he got his first and thorough experience of coursing, or rather hunting, the kangaroo with bounds especially bred and trained for the sport of all sports.

It was on the immense plains that he learned to be a thorough cross-country rider, as only a young Australian "back-blocks" rider can be, for in hunting the kangaroo unless a man is a superb horseman and has finest of nerve, the keenest of eyes, coolest brain and quick, good judgment, then look for disaster. After coming many a "cropper," young Dickson learned that there was no finer sport in the world than kangaroo coursing.

It was while rounding up cattle and sheep that he learned of the new Eldorado of New Zealand, and although offered a quarter share in what has since become one of the finest sheep and cattle farms in the world, Mr. Dickson would not remain, the gold fever being too strong on him, and had to run its course.

On the voyage to New Zealand he became acquainted with the lady who afterwards became his wife, who with her parents and rest of the family were going to try their fortunes in the "land of all climates."

His success in New Zealand was not much better than in Australia, and as the newspapers of that colony were offering premiums for printers, Dickson again laid down the pick and shovel and handled the type once more. For several years he continued steady at the business, and marrying settled down as a man of affairs. He soon accumulated wealth, and founded several newspapers in the colony, all of which are prominent and thriving at this day.

In the great depression of the seventies, which taxed the strength of the richest corporations in the colonies, he lost all of his wealth. With but a few pounds saved out of the wreck of his great fortune he came to California in the early eighties.

For years in New Zealand he was a prominent patron of all sport, but coursing was his greatest delight. He owned several very fine and well known Greyhounds, which all earned substantial prizes.

Here in San Francisco he was about the first to advocate and introduce enclosed coursing, and when about eight years ago he purchased the *California Turf* and devoted a portion of its columns to the sport, the coursing fraternity was backed up to the upper notch. So hard and well and long did he labor for his favorite pastime that he lived to see it become the leading sport it is at present in California.

For years he contributed articles on coursing in California to local and Eastern newspapers under the nom de plume of "Gazebo"; and these articles were quoted in sporting newspapers throughout the world. Many of the opinions he promulgated in these articles to-day stand as authority, showing that his judgment did not err. Within the last few years, however, he was wont to allow the more youthful and energetic scribes to exercise their ideas and opinions, and then would commend, or pleasantly show the errors in their remarks. Although he could at times be an extremely bitter writer, yet very, very seldom did he permit his cool judgment to be overcome by the heat of the argument.

He was an extremely pleasant man to talk to, with always a kind, sympathetic word for everyone. Thousands have received from him money which he could not in the least afford. The writer recalls walking with him along Montgomery street one evening when one of that thoroughfare's numerous "pan-handlers" stopped him for alms. The old man looked at the fellow for a moment, put his fingers in his right vest pocket and immediately withdrawing it, handed a coin to the man, saying: "There, may it do you good!" As we passed on, I asked: "What have you left yourself?" "Oh, that does not matter; I'll see David," referring to his son. David happened to be in the country, but the "good Lord did provide."

The late Mr. Dickson was a great reader, and with his extensive travels, was a very entertaining companion. He had a great many sterling friends in San Francisco, and was always wont to speak and write of them in the highest terms. For the last two years his mind was failing rapidly, and at times he could not remember the simplest incident. He was remarkably fond of flowers and the beauties of nature. His favorite walk was generally through Golden Gate Park, which he considered to be the most beautiful of the many parks he had visited.

In New Zealand a widow and grown family mourn his death, while in San Francisco his son David lives an invalid. In one of his notebooks are these farewell lines:

... Songs have power to quiet
The restless pulse of care,
And come like benediction
That follows after prayer.

Mr. Lew Pierce, of this city, has recently received from the East a Boston Terrier dog and a French Bull bitch. Coquette is a handsome brindle and won 3d novice of the L. K. A. show last fall in New York—a good win in warm company. The Boston is a Ch. Remlik Bonnie young dog, 19 months old and it is claimed was among the ribbons at the Ladies' and also the Boston Terrier show at Boston. Both dogs will be entered at our spring show.

Matt Coffey, the popular secretary of the Sacramento Kennel Club, has been appointed Chief of Police of the capital city. We wish him success in his new vocation. Chief Coffey's fancy runs to Collies; he had a kennel of four on the bench at the December show.

Origin of Some Names of Dogs.

The Setter originally was a dog used by game hunters who captured the birds with a net. The dog would locate the birds; the netters would then spread their net over the ground where the birds were. The dog was trained to set on its haunches while the net was being laid.

The Spaniel is so called because the original breed of this beautiful and intelligent type came from Spain, and the first arrivals in England were called Spanish dogs.

The Spitz dog got its name from its sharp pointed nose. "Spitz" means "sharp point" in German, and the Spitz was a favorite German breed before he became known in England and America. The Spitz is known also as Dalmatian dog, because his native home is Dalmatia.

The Dachshund is another German breed, and his funny name—almost as long and funny as the dog himself—is a German name, meaning "badger dog." The original Dachshund was used for drawing badgers, and the dogs still are great favorites among German hunters, although the breed has now become a little too delicate for fighting such a gray old warrior as the badger.

The Fox Terrier earned his name, not from any fancied resemblance to the fox, but because long ago, in the days of "merrie England," these terriers, much larger and stronger then, were used everywhere by sportsmen for drawing and killing the fox, they being sent down into his burrow. It is said that no good Fox Terrier ever backed out of a burrow without his fox. If he came out he had the dead fox gripped. If he didn't get the fox he didn't come out, but died there.

The Bulldog used to drive cattle, and as he was trained to meet the rushes of the bull by seizing him by his most sensitive point—the nose—the sturdy, brave dog came to be known in time as Bulldog. In some countries he is known as bull biter.

The beautiful Blenheim Spaniel is named after Blenheim Castle, where this dog first was made fashionable in the time of the great Marlborough. The King Charles Spaniel owes its name to the merry monarch.

The various breeds of hounds to-day are called hounds because they are the present survivors of the time when all hunting dogs were used to hound game. In the early hunting days of England every dog that was used to accompany the hunt was selected mainly for his speed and endurance. There were hounds that were supposed to follow the game by scent, and others who were supposed to sight it a long way off, but all were expected to be able to run the game down. Consequently, while the name of hound, or "hund" in the ancient Saxon, was first used for all kinds of dogs, it finally came to denote hunting dogs only; that is why we call our running dogs hounds to-day, such as Greyhounds, Rabbitsounds, Bloodhounds, Wolfhounds, Boarhounds, Deerhounds, etc.

Frank F. Dole states that four of his dogs died at his kennels in New Haven from distemper during the last month, at a loss of over \$1000. The dogs lost included three noted prize winners, the Boston Terrier Edgewood White; Bull Terrier Gold Dollar II; and the Bull Terrier Edgewood Justine.

The Late M. C. Allen.

Merton C. Allen, for many years a well known newspaper man of this city, and more recently a deputy in the office of the City and County Treasurer, passed away Sunday morning at the Lane Hospital. He had been ailing the past four months from tuberculous peritonitis. Two weeks ago his condition became so serious that he was compelled to take to his bed. He was subsequently removed to the hospital, where an operation was performed last Friday morning.

He was several years ago an enthusiastic devotee of trap shooting, and was a prominent member of the Olympic Gun Club and of the California Inanimate Trap Shooting Association.

Egg Diet for Sportmen.

The streams of California are to be enriched by a wealth of fish unprecedented in the history of the State. Many thousands of these small fry will be sent to the different counties for planting in the local streams. The California Fish Commission has upward of 30,000,000 salmon eggs in process of hatching at the Sisson hatchery, and 6,000,000 at the Eel river station. Over 28,000,000 young salmon have been liberated in the headwaters of the Sacramento river within the past two months, making a total of over 60,000,000 salmon eggs which are handled jointly by the United States and California Fish Commissions. The largest number ever handled before in this State, in 1897-98, was 48,000,000, a gain of 12,000,000 eggs for the year, and represents the largest number of salmon eggs ever handled in any State in one season. They were collected by the United States Fish Commission at Baird, on the McCloud river, and on Battle and Mill creeks. The United States Fish Commission is making a shipment of 500,000 eggs to New Zealand. With the exception of about 2,000,000 eggs hatched at Baird, the remainder is being handled by the California Fish Commission.

Strike!—if they don't give you Jackson's Napa Soda when you ask for it.

Wild Game Reservations.

An important meeting was held in Fresno, says the *Republican* of the 24th inst., with reference to the establishment of game refuges in the forest reserve. President H. T. Payne of the California Fish and Game Protective association was here and with him were the members of the special committee for the Sierra reserve appointed by him, consisting of George W. Stewart and J. Suh Johnson of Visalia and S. C. St. John and Andrew D. Ferguson of this county. Joseph Barcroft, of Madera, who is the fifth member of the committee, was unable to be present.

"There is a bill pending in Congress," said President Payne last night, in explaining the objects of the meeting and what has been done, "authorizing the Department of the Interior to set apart certain districts of the forest reserves as game breeding refuges, where there shall never be any shooting and no game shall ever be killed. At the last meeting of our association, in discussing the matter, it was pointed out the Department of the Interior could by no possibility possess any agent so familiar with the localities as to be able to make intelligent selections of land for such refuges. So I was instructed to appoint a committee in each of the districts that would be affected to be composed of men thoroughly acquainted with the country, who would select the favored ground and recommend such selections to the department. The meeting today was the second that has been held, the first having been held at Santa Barbara last week, when two locations were selected, one of three townships and the other of about two in the Pine Mountain and Zaca lake reserve.

"The committee to-day went into the subject very thoroughly and while the recommendations are in a measure in abeyance awaiting the submission of the suggestions to Mr. Barcroft for his approval, it was agreed that there should be three locations recommended to be set apart for game refuges—one of five townships in Tulare county, one of six or seven townships in this county and the other in Madera county.

"These refuges will be shut to the hunter for all time and the game will resort to them to live there. In the winter, as the cold forces them into the lower country, they will be protected by the State law. In the meantime the refuges will be breeding grounds, and as the game of all kinds shall multiply, the increase will find the way to the outside and the shooting will be better for all the people of the country. It is the one way to save wild game from annihilation."

Colonel Payne will go to Del Rey to-day to visit friends there and will go home to San Francisco tomorrow.

It is getting along to the end of the month and salary day is nigh, for Colonel Payne, as he is known in some places, is by vocation a paid State deputy fish commissioner.

Game refuges are without doubt a very good thing and will do much to save "a valuable food supply for the people." In the pending bill there is surely some provision for the selection of the game refuges and any contingent expense necessary. The Department of the Interior could possibly make a good selection also.

Just why the California Fish and Game Protective Association can have this work done at the expense of the State is a puzzle that many sportsmen would like to have solved. Particularly so, as one of the principal reasons urged for inability to patrol fishing waters and hunting districts, it has been claimed, is the inadequate annual appropriations and correspondingly small force of held deputies. "We can't be everywhere you know, and we do the best we can on a small appropriation." Possibly the "Colonel" was on a vacation and the work was performed gratuitously, for the "Colonel" is a persistent and enthusiastic worker and has the courage of his convictions. Several years ago, he deemed it his special province to purge local and Coast dogdom of many, to him, objectionable features that did not meet the approval of his critical eye. He wrought vigorously and kept at it until he was disqualified by the American Kennel Club, dogdom was in the throes of dissolution and the Pacific Kennel League was hatched, phoenix like, in the ashes of the weekly conflagration attributed to the Colonel's fiery pen.

Now he has gone to the other extreme, for after nearly killing off the dogs, he now wants to save all of the game and fish; every continental fin, fur and feather. If he keeps on it may, in the near future, be a crime to kill a duck. He has succeeded in making it a crime to sell a quail, but, we will stay with him on that proposition, that has accomplished some good—but it was bad for the Crows.

Deputy Fish Commissioner Payne is an adept in getting notices from the interior press. The question arises with sportsmen and taxpayers as well, why is it that he is invariably mentioned as President Payne of the California Fish and Game Protective Association, or as Colonel Payne, never as a paid state deputy fish commissioner.

If we are not decidedly mistaken the State pays his traveling expenses and salary—in fact we once heard the Colonel state at a meeting of the association in this city, that he would do the necessary proselyting work free of expense to the association, which was a very magnanimous offer.

Why is the state hoard continually sidetracked and placed in the undignified position of footing the bills and allowing the credit to go to an association that could not muster a larger attendance than was present at the last annual meeting of the much vaunted state association of sportsmen at Paso Robles. As a representative organization the attendance of sportsmen was sadly lacking.

We have heard the Colonel described as a "cuckoo," but of course, in a spirit of jocular admiration for his great executive and argumentative abilities. The steering committee of the "Apostles of game protection" seems to be hatching eggs right along in the state incubator.

Why Game Birds are so High.

"Game dealers and shippers have found a new enemy who is robbing them," says the *Kansas City Times*. "Not only are they harassed by the game wardens of the different localities, out of which they attempt to ship game birds, unlawfully, but many packages are being tampered with by railroad and express company employees while en route to their destination. It is said on good authority that two express messengers running between Texas and Kansas points, make a practice of robbing the hunters who ship game north, surreptitiously. They have boxes of their own and when they take on parcels which contain game they take out as many birds as they can without implicating themselves. These they consign to game dealers in New York and Chicago. The birds sell for high prices. Quail sell for \$4 and \$5 a dozen and prairie chicken for \$10 and \$12 a dozen. One messenger is known to have taken 371 quail and 92 prairie chickens from a parcel received in Oklahoma. Another package shipped from South Canadian, Ok., was short 60 prairie chickens and 280 quail when it reached its destination. It is unlawful for the railroad and express companies to carry game illegally killed or bought. Dealers and shippers resort to many schemes for shipping birds. They place them in all sorts of packages and disguise shipments as much as possible. Trunks are frequently used. At Weatherford, Texas, the dealers attempted to ship birds in coffin boxes. They had difficulty in securing the necessary death certificates and were obliged to use other means.

The hunters and shippers who forward game to market do so at their own risk. The combination of watchful wardens and pilfering messengers has discouraged many old-time hunters. Indirectly, it has made prices for quail and prairie chicken almost prohibitive."

When an individual is engaged, profitably, in an illegal business, there can always be found hungry cormorants who are watching for the chance to get a rake-off, no matter by what means, for the "quiet license" collector knows his victim dare not "equal." Of the two the fellow who does the skinning is the worst.

Kansas City can not be the only place in the United States where game and fish are for sale illegally. For the little bird says again that quail have been openly sold in our local markets recently and that the stalls in the fish markets have had, scarcely hidden from ordinary observation, boxes of underweight striped bass. We don't believe it, however, for the Fish Commission has made a spurt or two recently and several arrests, convictions and fines followed.

Chief Deputy Vogelsang and Deputy A. F. Lee recently made a trip to Trinity county and were successful in arresting and subsequently convicting four men for killing does. This conviction was made after 1900 miles of traveling by rail and stage, back and forth in gathering evidence and trailing the suspects. The arrested were F. and H. Chadbourne, G. Nelson and F. Rathbone of Suisun. They were taken before a Weaverville justice, two trips being necessary, it seems, to make the arrests. The Chadbournes were fined \$50 each and the other two \$25 each.

Bravo! a 1900 mile trip is a task that not every officer would have the temerity to tackle when there is a possible chance of rounding up "big fish" in this city.

In the arrest and conviction of Mr. and Mrs. Crow a fortnight or so ago, "it is believed that the mystery of the arrival of quail in the local market, to the consternation of the deputy game commissioners, has been solved. For a long time the deputies have been baffled in their attempts to learn who it was that was bringing quail and selling the birds to commission merchants contrary to the law which prohibits sales being made," said a morning contemporary in publishing the usual game violation guff.

Mrs. Crow was arrested at a commission house while in the act of selling a basket full of game. Deputy J. C. Ingalls made the arrest and he says he saw the negotiations for the sale being conducted. He took charge of the woman and booked her at the City Prison on a charge of violating the gamelaw.

He tracked Mrs. Crow from the ferry building to the commission house. Ingalls says that with her husband and, he thinks, another couple, Mrs. Crow lives in camps which are moved about in Alameda county to meet the exigencies of the occasion. The men make a business of hunting and Mrs. Crow brings the birds across the bay, concealing them in a basket which would not arouse any suspicions."

The Crows were fined \$25 apiece for cause. Nevertheless will the wondrous basket bring enough quail to market to supply the hotels, clubs, restaurants and retail dealers with the quantity necessary to fill the local demand for the toothsome quail. The Crows' goose is cooked.

From the reports, which we now believe were unreliable, it was thought that there must have been many hunters engaged in many districts in the illegal traffic. This idea grew out of an old story resurrected from the past, when it was legitimate to sell quail in market, that the commission dealers would daily or twice a week send out a circular of prices for game, or that they would send special requests for so many dozen to be used in filling particular orders, etc. But all this must be over now and naught is left of the practice save a memory.

Salmon fishing in Monterey bay was, early this week, first class, there being an immense run of fish on. Several large salmon were taken, one fish weighed over 40 pounds.

Jackson's Napa Soda does not tangle the feet

GOSSIP FOR SPORTSMEN.

The open season for quail in San Mateo county will close on February 15th. The season has not been favorable to good sport. Limit bags have been the exception. The scarcity of water and feed has kept the birds generally in the most inaccessible regions. The hatching of young birds, too, was far below the average.

Two sportsmen (?) of Redlands, San Bernardino county, recently killed 150 quail in a day's hunt. So proud were they of the exploit that they had the bunch of birds photographed. A copy fell into the hands of the Fish Commission, and as a result, each hunter was arrested for exceeding the limit, and paid a fine of \$25.

Los Angeles sportsmen have had generally a good duck shooting season. Last Sunday excellent bags were the rule on the marshes, and the shooters returned at night satisfied with the day's sport. John Hauerwaas, Gen. C. F. A. Last and a party of local sportsmen shot over the Green Wing marshes and were fairly successful. Limits were brought in from one of the Ballona grounds, the killing being mostly sprig and widgeon.

The Canadian blue ribbon trap shoot, the Grand Canadian Handicap, live birds, came off at Hamilton, Can., on the 14th inst. The principal event, 20 birds, 27 to 32 yards rise was participated in by 43 shooters. In this race, eight high guns served 19 birds each, there was an exceedingly lively lot of pigeons trapped this year. Each of the eight shooters used a Parker gun (the "Old Reliable"). In the shoot-off H. M. Mayhew was first and Harry Kirkover was second.

The target events took place on the 12th and 13th insts. J. R. Graham (one of the live bird high guns) was second high gun at the inanimate target traps. The meeting was the 14th annual tournament of the Hamilton Gun Club.

Duck shooting, according to the *Solano Republican*, had improved on the marshes near Solano county recently. A fortnight ago the storms of the previous week had the effect of driving ducks from the bay to the marshes, and most hunters who were out on the 17th inst. secured good bags.

A hunting party consisting of Mr. and Mrs. Lewis Pierce of Suisun, Mr. and Mrs. D. C. Ford of San Francisco and Mr. Gus Bloom of Chicago, enjoyed a good day's shoot at Mr. Pierce's Boynton ponds. Over 80 ducks were bagged.

Mayor W. H. Bryan and District Attorney T. T. C. Gregory killed over twenty ducks each at one of the Stewart ponds.

There was a full attendance at the Suisun Gun Club, ten hunters killing over 250 ducks. Those who enjoyed the shooting were: J. C. Klein, editor of the *Oakland Herald*, Wickham and Harold Havens, J. R. Burnham, Walter Woods and C. H. Wetherby of Oakland, Joseph Peltier, Attorney Allen L. Chickering, Doctor Proctor and Arthur Goodfellow of San Francisco. Mr. Wetherby remained at the club house until Thursday morning.

The following bags were made on the "Bunco" ponds a week ago: Meyer Dinkelspiel 25, Milton Emigh 14, Ben Reams 20.

Dr. A. G. Bailey and Geo. C. Gordon bagged 26 ducks on the "Bunco" ponds.

Otto Feudner, Walter Cooper and two friends of the former bagged 160 ducks on the Stewart ponds.

H. Coffin, of the firm of Baker & Hamilton, San Francisco, was the guest of Clare Morrill on a hunt. They killed 40 canvashacks and mallards.

Attorney Louis Titus and J. Juster of Berkeley had a successful shoot on Joyce Island, Sunday, the former securing 35 and the latter 16.

On Monday of last week Geo. K. Harding and L. H. Pimentel bagged 60 ducks on the slough.

Supervisor D. M. Fleming and Dr. C. E. Turner, of Vallejo, accompanied by Sheriff James A. Keys and J. A. Wilson, spent two days of last week in a hunt on the Ahe Crump place on the Sacramento river near Rio Vista and succeeded in bagging 135 ducks, 108 of which were mallards.

J. A. Wilson and J. W. Harper killed 26 snipe on the ground between Union avenue and the railroad in the northern suburbs of Suisun last Friday evening.

Rev. James Hall and J. C. Musser bagged a good string of ducks on the slough last Saturday.

James W. Boa, the Winchester representative, won high average on targets at the Hamilton Gun Club tournament on the 12th and 13th insts.

Harvey McMurchy, the genial representative of the Hunter Arms Company, is due in the city about the end of February. "Prince Mac" will get here just too late for duck shooting, a sport he used to enjoy immensely on the ponds near Alvarado.

A great many San Jose sportsmen are taking advantage of the few remaining days of the open season for the killing of ducks and quail. There has been a great exodus of hunters to the marshes and mountains during the week and all report excellent sport, so states the *Mercury*.

Duck hunters have especially been well rewarded for their efforts. The birds are now more plentiful on the local marshes than they have been at any time during the open season. There are thousands of teal and canvashacks with a good sprinkling of several other varieties, especially widgeon and mallard.

The late storm has had a tendency to drive the birds from the open waters of the bay, and they have sought shelter in the inland sloughs where they fall an easy prey to the skillful hunter. Duck hunting will now continue good, it is claimed, until the end of the season, in fact canvashacks will continue to become more plentiful as they are still arriving in large numbers from the north, they being the last birds to seek shelter in the warm waters of the south.

Robin and quail hunters have found good sport throughout the county during the week, and several have secured large bags of the birds. Numerous flocks of pigeons have been driven from the high mountains by the cold weather and they are to be found in the hills back of Los Gatos and back of Evergreen.

Frank Coykendall left last week for the San Joaquin country in his yacht on a duck hunting expedition. He did not find very good shooting until he came to "Old River," situated between Stockton and Tracy, where he states that there are thousands of ducks and that he had the best shooting he had had in years. Mallard predominate, and it was an easy matter for him to secure the bag limit every day without any great effort. His brother, Rache Coykendall, left on Thursday to join in the sport.

Ed Draper and Tom Taggart of San Jose recently returned from a two weeks' duck hunt near Pescadero. They report that the tide water at the mouth of Pescadero Creek was closed and that a big lagoon had formed and the water was backing up very rapidly, and if the bar formed is not soon opened the water threatens to flood the town of Pescadero. On this lagoon were thousands of ducks and shooting was at its best. Sportsmen from Santa Cruz and other neighboring towns went there and a great amount of game is being killed. Any hunter can easily secure the bag limit of fifty birds in a day. Hunters who cannot gratify their wishes at other places will surely be able to meet with success in that locality. Besides being an excellent spot for duck shooting, there is also excellent quail and wild pigeon shooting back in the hills.

Willis Laine and Louis Wanderer of Santa Clara went to Murphy on Wednesday where a large flock of pigeons had made their appearance. They succeeded in bagging all they could carry.

John Decost bagged a long string of ducks and snipe in the fields north of Milpitas during the week.

B. F. Van Horn of Santa Clara returned from a week's quail hunt in the Bayou country back of Mount Hamilton. He says there was plenty of snow and that it was an easy matter to bag game. He killed many quail, two large wild cats and a beautiful red fox.

Emile Houssoy was one of the successful duck hunters at Alviso the past week. He returned to San Jose with a bag of 33 "cans" and teal.

Van L. Sugge bagged 25 quail last Sunday between the Guadalupe and Los Gatos. The birds are quite tame since the storm.

Thos. S. Burnight is about again after a severe illness and has gone to Carmel in Monterey county for an extended quail hunt. He will hunt on the ranch of Joseph Stewart, which is one of the best quail grounds in Monterey county.

George Keesling found excellent shooting on the Alviso marshes Friday. He reports ducks plentiful since the rain and that shooting will now improve until the end of the season.

Dr. W. E. Wadams of Santa Clara continues to make his weekly pilgrimages to his favorite hunting grounds at Alviso. His last string secured consisted of 46 fat birds. Dr. Wadams is one of the best shots in the county and is always sure of a good string of game if there is any to be had.

Louis Maggini bagged a number of "cans" at Warm Springs the other day.

Manfred Quimby, the crack shot of Agnews, bagged a number of teal along the ditches near the asylum the other day. Snipe are also very plentiful in that vicinity.

H. M. Jamison, J. S. Parker and R. L. Jamison have returned from the San Joaquin, where they hunted ducks and geese for a week. They came home by way of Pacheco Pass. Duck shooting at Los Banos was a disappointment, although they managed to kill a few birds.

Otto Feudner with C. G. H. Machride and Dan Flannery of San Jose shot a combined bag of over 100 mallard, teal and sprig on the Stewart ponds last Sunday.

L. H. Kimmel, one of the coming shots of the West, broke 124 out of 125 clay birds at Bosco, Ill., on Jan. 9th. This is remarkable shooting on the part of an amateur; it was done with U. M. C. factory loaded shells. The Sunny South Handicap held at Brenham, Texas, January 18th to 23d, was won with U. M. C. shot shells. Turner E. Hubby, Waco, Texas, won the live bird event with a straight score for three days. W. H. Heer, Concordia, Kans., took the handicap for targets. Perfect scores show the quality of U. M. C. ammunition.

The U. M. C. party of shooters is organizing gun clubs throughout the South, which in a very short time will be organized into state leagues. The shooting interests of the South have in a large measure been neglected, and the party is endeavoring to revive the interest. Mayor Tom Marshall reports that it is quite a popular fad to organize ladies' clubs. Whatever Tom says goes among the ladies.

Members of a recent hunting party who were on the Osage reservation, Indian Territory, state they saw wild pigeons in flights in the hills north of the Arkansas river.

The disappearance of the wild pigeon from the United States, where once it abounded in vast numbers, was a remarkable event, and the sportsmen have never been able to learn the cause. The persons who saw wild pigeons in the Osage country were familiar with their appearance years ago, and are positive that the birds are pigeons. The pigeons were seen at different places. One hunter saw a single pigeon in full flight southward and two other hunters saw two pigeons, also flying south. It is alleged that a few wild pigeons have been seen this fall in the Illinois marsh land east of St. Louis.

Western sportsmen are interested in knowing whether the pigeons in the Osage country were natives that have remained undisturbed in the remote hills since early days, or whether they are strays

from South America, where the pigeons are supposed popularly to have gone. One of the largest roosts in the United States was in the Cherokee nation, southeast of Tahlequah.

Salt water fishing in the southern Coast waters has been excellent recently. Last Sunday there was another big run of pompano and kingfish at San Pedro and East San Pedro. From early morning until darkness came the wharf on the Terminal Island side was crowded with fishermen, and in front of the wharf small boats were packed in until it was almost impossible to move. And everybody got fish. Up to 11 o'clock in the morning the pompano were in evidence all along the wharves. The school appeared to leave about that time, but they returned at 4 o'clock, and after that the anglers had great sport. The schools of fish remained right around the East San Pedro wharves, and it was a poor fisherman who did not pull up at least three fish at one haul several times during the day. It was no uncommon sight to see a fisherman have four or five fish on his hooks at one haul, and this was repeated every few minutes.

This fish is not the pompano of the Gulf waters and is generally known as the hutter-fish, being a native of Japanese waters.

Any number of hooks may be employed in catching the kingfish. Half a dozen is not an uncommon number, and to have the majority of them filled when the line is pulled up is not considered much of a feat in angling. The kingfish is despised when other kinds are plentiful, but are excellent eating during the winter, as their flesh is hard and of a fairly good flavor then.

Carl Schmidt of the firm of Graef & Schmidt, 107 Chambers street, New York, importers of fine cutlery and American representatives of J. A. Henckels, died Sunday night, January 17th, at a private sanitarium in New York, where he had been undergoing treatment for an abscess since January 6th. Mr. Schmidt gave his attention only to the large trade between Chicago and the Pacific Coast, coming to the New York house usually twice a year to overhaul his samples, his wife, son and stepdaughter living in Pasadena, California.

Mr. Schmidt was born in Berlin, Germany, in December, 1843, coming to the United States as a boy and working his way unassisted to an honorable and influential place in the trade solely by his own unassisted efforts. He was of a genial and sunny disposition and it is said of him that his customers were also warm friends. The firm of which he was a partner was established by Wm. R. Graef and himself in January, 1884. The funeral services were held at the Stephen Merritt Chapel, New York, and the remains cremated at Fresh Pond, Long Island. The business will be continued along the same lines as heretofore.—*Iron Age*.

Save the Birds.

The Audubon Societies, through their organ, *Bird-Lore*, makes an urgent appeal to the women of America to abstain from using aigrettes. It is claimed that the herons from which these aigrette plumes are taken are rapidly approaching extinction. The dealers' offer of \$32 per ounce for raw plumes tempts hunters to defy the law, and it is believed that if woman does not abandon the use of aigrettes the white herons throughout the world will be exterminated.

Bird-Lore publishes a detailed statement of the facts in the case by William Dutcher, which can be obtained in leaflet form from the National Committee of Audubon Societies, 525 Manhattan avenue, New York city.

Coming Events.

Rod.

April 1-Sept. 10. Oct. 16-Feb. 1—Open season for taking steelhead in tidewater.

Nov. 1-April 1—Trout season closed.

July 1-Jan. 1—Open season for black bass.

Aug. 15-April 1—Open season for lobsters and crawfish.

Nov. 1-Sept. 1—Open season for crabs.

Sept. 1-May 1—Open season for shrimp.

Sept. 10-Oct. 16—Close season in tidewater for steelhead.

Nov. 15-Sept. 10—Season open for taking salmon above tide water.

Gun.

July 1-Feb. 15—Dove season open.

Nov. 1-July 15—Deer season closed.

Sept. 1-Feb. 15—Open season for mountain quail, grouse and sage hen.

Oct. 15-Feb. 15—Open season for quail, ducks, etc.

Bench Shows.

Jan. 20, 23—Toledo Fanciers' Association. Toledo, O. A. W. Lee, Secretary, Toledo, O.

Jan. 27, 30—National Fanciers' and Breeders' Association. Chicago.

Feb. 2, 7—Ohio State Poultry Association. Columbus, O. W. A. Lott, Secretary, Wooster, O.

Feb. 9, 12—Fanciers' Association of Indiana. Indianapolis, Ind. C. R. Milhous, Secretary.

Feb. 10, 13—Westminster Kennel Club, Madison Square Garden, New York. James Mortimer, Superintendent.

Feb. 18, 20—Johnstown Poultry and Kennel Club, Johnstown, Pa. J. R. Flinn, Superintendent.

Feb. 23, 25—New England Kennel Club. Boston, Mass. Wm. B. Emery, Secretary.

March 1, 2—Merrimack Valley Kennel Club. Lawrence, Mass. Albert Mitchell, Secretary.

March 2, 5—Duquesne Kennel Club of Western Pennsylvania. Pittsburgh, Pa. Fred S. Stedman, Secretary.

March 9, 12—Rochester Kennel Club. Rochester, N. Y. H. H. Kingston, Secretary.

March 10, 12—Chicago Kennel Club. Chicago, Ill. H. J. Cassidy, Secretary.

March 22, 25—Buffalo Kennel Club. Buffalo, N. Y. E. P. Sharp, Secretary.

March 28, 30—Brantford Kennel Club. Brantford, Can. Thos. H. Terry, Secretary.

March 30, April 2—Atlantic City Kennel Club. Atlantic City, N. J. Thomas H. Terry, Secretary.

April 7, 9—Victoria Kennel Club. Victoria, B. C. Thos. H. Terry, Secretary, Victoria, B. C.

THE FARM.

Baby Mutton.

Baby mutton is a production raised by farmers and stock growers which, if put upon the market at the earliest, would give quick returns and higher prices to the owner. The majority of marketers prefer to buy yearling lambs, rather than run the risk of encountering the flesh of a wool-bearing sheep, which is never fit for food, writes O. Irwin in *Epitomist*. Southdown, Leicester and Cotswold are the best breeds raised for their flesh especially, as they yield a tender, juicy, highly flavored mutton which is entirely different from the flesh of a wool grower.

The fat of baby mutton is clear, hard and white, while the lean is firm, juicy, finely grained and a darkish red in color. Baby mutton can be marketed when the lambs are ten and sixteen weeks old, and some as young as eight weeks. Their weight at these ages should be forty-five pounds. The condition of weight is determined somewhat accurately by feeling the brisket and the tail near the body.

A high degree of fatness is more important than weight, as they sell by the carcass rather than by weight. The weight of two lambs being the same the younger one will bring the highest price. The evidence of age is the fleece and the degree of ossification oil in the bones. Growers of mutton who wish to market their lambs for baby mutton should feed early and push the lambs, as the first 100 pounds cost much less and bring more than the second 100 pounds. By selling at the earliest and at the highest prices the owner can save enough in time and feed in the first ten or twelve weeks to more than pay for the price he will receive when a year old.

It is not always the weight of stock that brings the largest profit to the owner when sold, but it is the quickest time in which he secures the most for his stock at the least cost for feed. This is a question that should be studied more by sheep growers, the same as the question of "baby beef," about which much has been said in the farm papers.

Green Bone.

My experience with cut bone as a food for fowls extends over two years only with a flock of 100 hens, writes W. F. Adams in *Farmer's Voice*. Prior to that time I had not used cut bone.

I get a soup bone of the butcher, shave off the meat (a little meat won't hurt if you intend feeding as soon as cut) and I feed the same day it is cut.

Some people make the mistake of using bones that have been boiled or lain out sun bleached. Some of the most essential feeding value of the bone has thus been lost, especially as feed for growing chicks. For growing chickens, after two weeks old, I mix the bone meal with corn chops dampened with cold milk (water will do), so that each bird gets from a half to one teaspoonful of the bone meal, according to age.

Extra large and quick growth bone in fowls means more meat, and more meat means 7 to 10 cents per pound.

For laying hens I feed as above, only that each hen gets one tablespoonful twice or three times a week, according as I think she may need an extra allowance. Hens need more when they are laying or molting.

Taking every advantage gained by feeding bone—i. e., general health of flock, quick growth of broilers, increase in amount of eggs, etc., over the two years bone was not fed—I figure it (and I keep close account) that the profit derived is 15 per cent over the profits of the two preceding years. This 15 per cent is attributed to the bone feed, and the other increase in profits was credited to the source from which they came.

Now, don't feel any overdose at first, or at any time for that matter; feed regularly.

Correcting a Setting Hen.

AGNEW, CAL., Jan. 25, 1904.

EDITOR BREEDER AND SPORTSMAN: I naturally read with interest anything pertaining to poultry, and when I see what I think a better way for doing a thing I like to present my plans for comparison. In the BREEDER AND SPORTSMAN for December 19th I saw a plan for correcting broody hens by confinement in coop. With us we simply turn the hen into another yard among a lot of hens she is not acquainted with, and her desire to get back again so occupies her she forgets to hunt a nest, and in three days regains her composure, so to speak. If any of your readers have these conditions to contend with they should try my scheme. It is a good one and sure. Very truly yours,

W. S. SULLIVAN,
Garden Valley Poultry Yards.

The *Tulare Register* is enthusiastic over alfalfa. Its says: "The more you cut alfalfa the more it thrives. One twenty-five acre field in this State in one year yielded \$2000 worth of hay. It will hunt its own water from below if you will give it a start. Its roots go down far and rapidly into the earth. A mining tunnel was excavated in Nevada 120 feet below an alfalfa field and roots of alfalfa were in the roof of the tunnel. It has been known to grow for twenty-five years, but generally needs plowing up at ten years."

FOR SALE.

The Green Meadow Farm

CONSISTING OF FIFTY ACRES OF THE most productive land in Santa Clara County, located within one-half mile of the Santa Clara railroad depot and 100 yards of the city limits. Handsome modern 9-room house, commodious stables, 50 box stalls, barns, granaries and every improvement that goes to make a first-class breeding farm. Fine artesian well and abundance of water piped to all parts of the place. Sewer connections, gas, electricity, etc.; fruit, gardens, high alfalfa fields. In every respect an ideal place, and one that will increase in value with each year until it becomes high-priced city property. Will be sold at a bargain if sold without delay.

HAMBLETIAN WILKES (sire of 9 with records from 2:08 1/4 to 2:13) and several high class colts and road horses for sale.

Horse Feeding.

By Dr. H. A. Spencer of San Jose at the University Farmers' Institute at Pasadena.

I have selected for my theme "Feeding and Care of Stock," meaning to discuss the most advantageous methods of feeding and caring for stock, both from an economic and sanitary point of view, and my remarks will more particularly apply to horses.

In no branch of veterinary science is it more important to possess an accurate knowledge of the conditions which are present in a state of health, as well as disease, than in the care and treatment of the teeth. It is always by a thorough knowledge of the appearance of an organ during health that we are enabled to distinguish any deviation from that condition.

The Horse's Teeth—Horses of all ages suffer more or less from long, sharp and projecting points which are found on the molar teeth. They are located on the inside of lower and outside of the upper grinders, and occasionally also on the inside of the upper ones; they vary in size and shape, some being small and blunt, while others are long, thin and very sharp. The injuries they inflict are lacerations of the cheeks and tongue, and a limitation of the lateral motion of the jaws, unless this motion is extensive enough to permit the whole crown of the tooth to come in contact with the food to be ground, much of it will not be reduced to a proper consistency. Other difficulties also arise, such as decay, ulceration and malformation.

Having thus briefly accounted some of the difficulties to be overcome before we can reasonably expect food to be of the most benefit, it would seem superfluous to caution you as to who should be employed to rectify the defects. Doubtless many of your number are painfully reminded that the country is overrun with a class of people who designate themselves veterinary dentists. Possibly, however, you are not aware of the fact that there is not in the world a place of instruction where veterinary dentistry is taught, if we except the veterinary colleges, where it forms a part of the curriculum, and is never given as a sole study.

As well set a hod carrier to mend a piano or a typewriter as to expect a person unfamiliar with anatomy and physiology to correct the irregularities of so delicate a structure as the mouth.

A horse should be fed with reference to what he is to do. The horse doing slow but hard and exhausting labor, should be generously fed on grain three times a day, with as much clean, sweet hay at night as he will entirely consume, hearing in mind that the hay in this country, unlike the grass product of the prairie states, is rich in grain, therefore much more nutritious, and a less quantity is requisite to satisfy a natural appetite. There is an inclination on the part of most horse owners and hired help to feed vastly more hay than is required, under the mistaken idea that they are being generous to the stock; but horses, if they are permitted to do so, will develop abnormal appetites, besides often wasting more than they will consume. We have seen that the stomach of that animal is relatively smaller than that of most other animals. This being the case, it is obvious that if permitted the horse will, even after filling it to repletion, and distending it to an extent that materially limits muscular contraction, continue to force more into it, thus compelling the pyloric orifice to open for the passage of aliment only partially prepared for future adaptation and final assimilation. In addition to this, the distention of the stomach limits by pressure the action of the lungs, thereby curtailing a proper amount of oxygen being absorbed for the clarification of the blood, besides causing a retention of poisonous carbonic acid gas in the system. Neither should a horse be permitted to drink immediately after feeding, as by this course the stomach is filled with a fluid that dilutes the saliva, gastric and other digestive fluids, and

washes the contents of the stomach into the intestines, producing looseness and scouring; while on the contrary if compelled to take of water before feeding, he has no abnormal thirst, and takes only such quantities as is necessary to give proper fluidity to the tissues of the body.

Under the subject of hay we have in this country four principal varieties, viz: Wheat, barley, oat and alfalfa. Of these I am constrained to believe that the former, if well cured and clean, is by far the most suitable for horses used exclusively for draft purposes. It is rich in fat-producing qualities, and while succulent and wholesome, if cured carefully, and not too green, seems to assimilate nicely, but the consumption of it by driving horses does not seem fruitful of a condition of fitness for road purposes, as does that of either oat or barley hay. Oat hay of a good character appears to be the most satisfactory provender we possess for road horses; the chief objections to barley hay is the annoyance that the beards produce in making the mouth sore, and that it is so rich in fibrin-producing elements, that some individuals become afflicted with skin affections which prove very refractory and troublesome. Alfalfa hay, I think, is of more value for broodmares, colts and unused horses than for other purposes. It has good milk and fat-producing qualities.

How to Save—Economy sometimes dictates a carefulness akin to stinginess in feeding. In cases where one's finances compel extreme caution, it were best to expend what money we have to spare for the best products we can procure, and then cut and moisten the hay, which, by the addition of a little bran and middlings well stirred, makes a cheap, effective food, a measurably small quantity of which, fed fresh and unfermented, makes strength and satisfies the appetite; but some uncut hay should be used in conjunction, however, very materially less than if the cut mass had not been administered. By this mode of procedure, from one-third to one-fourth of the ordinary expenses of the "keep" of the animals may be saved, and their health remain unimpaired.

Of grain I should say that for driving horses, oats are by far the most satisfactory. They seem to have the needed material for bone and muscle building, and do not produce excessive fat, which, in a gentleman's driver, renders him loggy, dispirited and easy to fatigue.

Barley is admissible in the winter months where fat and its consequent warmth is desirable, but under any circumstances during enforced idleness and over Sunday, both hay and grain should be materially reduced. In fact, it were better if the latter were taken away entirely, and a well made mash of bran substituted.

By observing these last instructions you will undoubtedly save your horses many an attack of colic, azoturia, lymphangitis and other complaints that are frequently fatal and always call for the expense attending the visit of a veterinarian, to say nothing of the drugs and nostrums you may administer.

It becomes more manifest to me every year that we feed our stock more hay than they require to keep them in a condition of health and fettle commensurate with their comfort and our requirements, and while it is impossible to lay down any rule that will apply collectively to the horse family, I am led to believe that the ordinary horse that consumes more than fifteen pounds of hay, at either one or two meals in twenty four hours, is eating and destroying more than is good for either him or his owner.

In England a man by the name of Tisdall bought twelve of the best heifers that he could get and continued to breed from the best for twenty years. The average yield of milk the first year was 3648 pounds, and the tenth year it was 4800, and the twentieth year it was 6944 pounds.

Sober up on Jackson's Napa Soda.

KENDALL'S

Dr. B. J. Kendall Co.,
418 1/2 St. Louis, Mo., Dec. 12, 1902.
Gentlemen—I have spoken highly of your medicine in this neighborhood. I think your Kendall's Spavin Cure is excellent. I highly recommend it wherever I go. Enclosed please find a ten-cent stamp for which please send me your book "A Treatise on the Horse and His Diseases."
Yours truly,
C. D. JOHNSON.

SPAVIN CURE

Dunlop Hill, Sydney, N. S. W., Australia.
422 New Canterbury Road, Oct. 25, '02.
Dr. B. J. Kendall Co.
Gentlemen—Will you kindly send me one of your "Treatise on the Horse and His Diseases"? I have used your Kendall's Spavin Cure, and I can safely say it is the best that I have ever had, and I recommend it to other horse trainers.
Very truly yours,
HARRY SMITH.

Is Known the World Over

as being the oldest and only really reliable cure for Spavins, Ringbone, Splints, Curbs and all other forms of Lameness. It has met with the unqualified endorsement of horsemen everywhere, in all localities and under all conditions. It never fails, but cures quickly and permanently.

In addition to being the best stable remedy known, it is unequalled as a liniment for household and family use. Sold generally by all druggists. Price \$1; six bottles for \$5. We send valuable book, "A Treatise on the Horse," profusely illustrated, free upon request.

DR. B. J. KENDALL CO.,

Enosburg Falls, Vermont.

Speed, Breeding and Individuality FOR SALE.

RITA H. 2:11 1-4

Pacing Mare by McKinney 2:11 1-4

ELECTRO MCKINNEY

Brown Colt, Four-Year-Old Trotter by McKinney 2:11 1-4

RITA H. is a dark brown mare who stands nearly 16 hands high, and will weigh in racing trim about 1050 lbs. This mare has had this year a very remarkable record. She started in the Northwestern Circuit in the States of Oregon and Washington, and out of eight starts won her first seven races and only lost four heats during the entire circuit, and has a pacing record of 2:11 1/4. The mare is five years old and is excellent on the road. She does not pull or lug, and a lady can drive her anywhere. Last spring she trotted a workout mile in 2:18 1/4 and repeated in 2:16 1/4, after only seven weeks' work. Her owner has driven her in 2:12 1/4 in the Los Angeles Driving Club races, she having won all of them in which she started. This mare can step two heats below 2:10.

ELECTRO MCKINNEY is a brown stallion foaled in 1900, and stands 15 hands 1 inch in height. He trotted a full mile as a two-year-old in 2:31 1/4, last quarter in 35 seconds, and when a three-year-old a full mile in 2:14 1/4, last quarter in 33 seconds. He is perfectly gaited and a grand individual in every respect. Weighs about 950 lbs. ELECTRO MCKINNEY is bred in the purple, and is one of the best sons of McKinney alive to-day. McKinney is undoubtedly the greatest sire for his age, living or dead. ELECTRO MCKINNEY was not raced last year, being only a three-year-old and not entered in any stakes it was decided to hold him over.

These horses are all right and there is not a thing the matter with them, but my business demands are such that I cannot afford to devote any time to racing them. For prices and further particulars address

BYRON ERKENBRECHER,

301 CURRIER BUILDING, LOS ANGELES, CAL.

Troy Chemical Co., Troy, N. Y.

In regard to "Save-the-Horse" I have used it with much success. The running horse "Col. Rosevelt" that had broken down in training for two or three years past is now in good shape and will certainly be able to race as well as ever before. Have also used "Save-the-Horse" on the horse "Greyfield" with satisfactory results. Will also add that I have seen "Save-the-Horse" remove a deep seated ringbone from a Director trotting horse in Monroe Salisbury's Stable. I am pleased to be able to recommend "Save-the-Horse" from actual experience.
Yours truly
GEO. A. DAVIS.

Shelbyville, Tenn., Jan. 2, 1904
I enclose P. O. Order for five dollars, for which send me bottle of "Save-the-Horse". The first bottle has saved me the worth of at least one horse.
J. A. BARRETT.

Columbus Grove, Ohio, Dec. 27, 1903.
One-third of a bottle of "Save-the-Horse" cured my horse of a spavin that had been filled and blistered several times in the past two years.
M. M. OSBORN.

On broken down, weak and injured tendons, ruptured ligaments and all strains its power is unfailing: permanently cures all broken down conditions of the ankle, hock tendons or ligaments without scar, bluish or loss of hair. No man need see his horse suffer and become incapacitated. "SAVE-THE-HORSE" POSITIVELY AND PERMANENTLY CURES BONE AND BOG SPAIN, THOROUGHPIN, RINGBONE (except low ringbone), CURB, SPLINT, CAPPED HOCK, WINDPUFF, SHOE BOIL, WEAK AND SPRAINED TENDONS, AND ALL LAMENESS. Apply to all extremes of weather. Horses may work as usual with boots, as no harm can result from destruction of hair or scalding of limb.

\$5.00 a bottle. Written guarantee with every bottle. Constructed solely to protect you. Need of second bottle improbable, except in rare cases. Copy of booklet and guarantee sent upon application. \$5.00, at druggists and dealers, or sent express paid by TROY CHEMICAL CO., TROY, N.Y.

D. E. NEWELL, 519 Mission St., San Francisco, Cal., Pacific Coast Agent

A Sidney Stallion With Earning Capacity

FOR SALE.

In pursuance of my intention to retire from the business of breeding horses, and having disposed of all my broodmares at auction, I now offer at private sale the stallion

WILLIAM HAROLD 2:13 1-4.

His sire is the great Sidney 2:19 1/4, grandsire of the champion trotter of the world, Lou Dillon 1:58 1/4, and his dam the great race and broodmare Cricket 2:10 (dam of four in the list) by Steinway, the greatest son of Strathmore.

WILLIAM HAROLD is a producer. The only two of his get to start are that wonderfully fast trotter Janice 2:08 1/4 and the pacer Dan Burns 2:15. WILLIAM HAROLD'S services in the stud were very limited up to three years ago, as he was raced. His weanlings, yearlings and two-year-olds are very promising and have size, good looks and great natural speed, besides being uniform in color, nearly all bays. He is a sure foal getter, is in the very best condition, sound and healthy, and with ordinary good business management can earn in the stud in 1904 the price asked for him.

For tabulated pedigree and full particulars, address

McKinney Mare For Sale.

SOLID BAY MARE WITH BLACK POINTS: 8 years old; sired by McKinney 2:11 1/4, dam by Sidney, second dam a producing mare by Chieftain. This mare with little training has worked miles in 2:22 1/4, quarters in 3 1/4 and eighths in 16 seconds. She is now in foal to Monterey. James Berryman and Grant Lapham both declare that she is one of the most promising prospects they have ever seen. She is absolutely sound, kind and gentle, and will be driven for speed for the benefit of prospective purchasers. Entered in Breeders \$500 Futurity Stake for foals of 1904. Address EDWARD NEWLANDS, 1676 Webster Street, between 23d and 24th streets, Oakland. Telephone: Cedar 701.

FOR SALE.

MY ENTIRE STOCK OF STANDARD-BRED Trotting and Pacing Horses. Single drivers and double teams. Some excellent prospects for stake winners entered in the Occident, Stanford and Breeders Futurity stakes. The great brood mare Daisy S. (dam of Tom Smith 2:13 1/4, General Vallejo 2:30 1/4, Sweet Rose 2:28 (trial 2:21) and Little Mac (3) 2:27). The driving horses and colts can be seen at my stable in Vallejo, and in the broodmares, etc., at the race track. Apply to or address THOMAS SMITH, Vallejo, Cal.

Dictatus Medium 32499

Will make the coming season at

Race Track, Hollister, Cal.

Jos. Sanchez in charge

\$40 FOR THE SEASON.

Payable at time of service, with usual return privilege. Every care taken to prevent accidents, but no responsibility should any occur. Prompt and careful attention in all cases. Pasture furnished to mares sent from a distance at \$2.50 a month.

A DICTATUS MEDIUM PURSE OF \$100.

I will give a purse of \$100, with entrance money added for a race, best two in three, open to any and all colts from the Hollister Race Track in 354 seconds, a 2:33 gait. This colt has great promise.

DESCRIPTION.

DICTATUS MEDIUM is 6 years old, weighs 1220 pounds. A beautiful turned hay horse with heavy mane and tail, kind and gentle, with a perfect disposition. Good flat heavy bone. He has great power and speed. Has a record of 2:24, but has worked out in 2:12. He is a horse that will go out any day and do his best. His colts are models of grace and beauty. Only one so far has been worked. This one, A1 Willson's yearling LITTLE MEDIUM, paced an exhibition 1/4 mile on the Hollister Race Track in 354 seconds, a 2:33 gait. DICTATUS MEDIUM is by Dictatus 2:17 one of the best bred and fastest horses ever brought to California. The dam of Dictatus Medium is Belle Medium (dam of Stam B. 2:11 1/4), by Happy Medium, grandsire of the dam of Lou Dillon 1:58 1/4. His second dam is Argenta by Almont Lightning, sire of the dam of Zomro 2:11. There is no doubt but Dictatus Medium will prove to be a sire of speed as well as good size, style and disposition.

BAYSWATER WILKES 2:25 1/4

Sire of KELLY BRIGGS 2:10 1/4

WILL MAKE THE SEASON OF 1904 AT

WOODLAND, CAL.

Son of Sable Wilkes 2:18
and
Fanny Bayswater
Dam of 2 in 2:30

Fee \$40.

BAYSWATER WILKES is a sire of speed, size, good looks, soundness and gameness. Every one of his produce that has been trained can show standard speed. His sire, Sable Wilkes, also sired Nushagak, sire of Aristo, winner of the Occident and Stanford stakes. His dam, Fanny Bayswater, is the dam of Senator L., holder of the champion four-mile trotting record of 10:12.

Breed to BAYSWATER WILKES and you will get colts that will sell at good prices.

For cards containing full Pedigree and all particulars address

S. H. HOY, Winters, Cal.

SIDNEY DILLON 23157

Sire of LOU DILLON 1:58 1/4 (the Fastest Trotter and Greatest Record Breaker in the world), Dolly Dillon 2:06 1/4 (the fastest mare of 1901), B. S. Dillon 2:16 1/4 and Captivity 2:28 1/4.

SANTA ROSA STOCK FARM
SANTA ROSA, CAL.

SIDNEY DILLON was sired by Sidney 2:19 1/4; dam Venus (dam of Adonis 2:11 1/4, Leah 2:24 1/4, Cupid 2:18 and Juno, the dam of Mercury 2:31 and Ida 2:39) by Venture 2:27 1/4, sire of dam of Directum 2:05 1/4. SIDNEY DILLON is a model of symmetry and imparts his grand individuality, inherent speed and excellent disposition to all his progeny.

Terms for the Season, \$100.

Only a limited number of approved mares taken. Usual return privilege. In case horse is sold service fee will be returned if mares have not proven in foal. Season ends July 1, 1904. Pasture \$4 per month. Best of care taken of mares, but no responsibility assumed for accidents or escapes. For particulars regarding shipment of mares, etc., address

Fast Pacer For Sale.

THE PACING GELDING, AL SANDY 2:19 1/4 by Wayland W., dam Rapid Ann by Overland. Can pace three heats better than 2:17. Can brush very fast on the road. Excellent prospect to race. He is one of the best road horses in the city. Gentle and intelligent. Safe for lady to drive. For price and further particulars address S. WATSON, 235 Douglas street, San Francisco.

FOR SALE.

BLACK TROTTERING MARE, RECORD 2:18 1/4; standard bred; sound; nearly 16 hands high; weighs about 1100 pounds. Gentle and a high-class road mare. Can be bought cheap. To see the mare and for particulars call or address Telephone: Pine 1736 J. W. ZIBBELL, 345 Twentieth Ave., San Francisco.

The Fastest Trotting Son of McKinney KINNEY LOU 2:07 3/4

(Winner of \$11,450 in 1903) Will Make the Season of 1904, Limited to One Dozen Approved Mares, at

AGRICULTURAL PARK, SAN JOSE.

Service Fee, \$100.

SEASON ENDS MAY 1, 1904.

KINNEY LOU was one of the great race winners of 1903 on the Grand Circuit, and is a high-class race horse, game as a pebble and perfectly gaited. He is from race-winning and producing families on both sides, his dam, Mary Lou 2:17, being a great race mare and own sister to the well-known race horses Shylcock 2:15 1/4 and Ned Winslow 2:12 1/4. Mary Lou is by Tom Benton out of Brown Jenny (dam of 3 in list) by Dave Hill Jr., next dam by Black Hawk 766. Kinney Lou's oldest colts are two-year-olds and all have size, good color, and are natural trotters with good dispositions.

For further particulars and card containing tabulated pedigrees address

BUDD DOBLE, 1030 Pacific Ave. Alameda, Cal.
or San Jose, Cal.

BALLISTITE

The Standard Dense Powder of the World.

STILL LEADS AT THE TRAPS OR IN THE FIELD.

Ballistite wins from the limit marks in distance handicaps, at either live birds or flying targets as it always gives the highest velocities with the closest and most even patterns at all ranges. Ballistite is absolutely unvarying in results, being waterproof, smokeless, odorless, without residue, resurges lower than black powder, unaffected by age or climatic changes, and never pits, rusts or corrodes the barrels. Ballistite is sold with above guarantee.

WINCHESTER

REPEATING SHOT GUNS

A CHANCE FOR A DOUBLE

A QUESTION often asked about Repeating Shotguns is, "How quick can a second shot be fired with them?" Shooters that have used Repeaters answer with one accord: "Doubles" are just as easy to make with a WINCHESTER REPEATING SHOTGUN as they are with a double barreled gun. The third shot that a Winchester Repeater gives often hags a badly crippled bird which otherwise would get away. Winchester Repeating Shotguns are made in "Take Down" styles in 12 and 16 gauge.

Autumn Meeting, 1904, begins Thursday, November 17th, to include Saturday, December 3d—15 days.

The Benning Spring Handicaps and the Grand Consolation will Close and Name at Midnight of Tuesday, February 16, 1904.

The Benning Spring Handicaps.

To be run on the first and last days of the Spring Meeting.

Handicaps for three-year-olds and upwards. By subscription of \$10 each, which shall entitle the entry to start in the First and Second Handicaps, on payment of the additional starting fee of \$20 in each. To close and name at midnight of Tuesday, February 16, 1904, (the third Tuesday in February). Weights to be announced March 1, 1904.

CONDITIONS OF THE FIRST BENNING SPRING HANDICAP. Starters to pay \$20 additional, with \$1000 added, of which \$200 to the second, \$100 to the third. The winner to receive one-half of the subscription money, all of the starting money, and the balance of the added money, \$700.

Winners after the publication of the weights to carry 3 lbs. extra; of two races of any value, or one of the value of \$1000, 5 lbs. extra; of three of any value or one of the value of \$1500, 8 lbs. extra. In case of horses handicapped at 118 lbs. or over, these penalties shall apply to the extent of one-half only. Six furlongs Columbia Course.

CONDITIONS OF THE SECOND BENNING SPRING HANDICAP. Starters to pay \$20 additional, with \$1500 added, of which \$250 to the second, \$150 to the third. The winner to receive the remaining one-half of the subscription money, all of the starting money, and the balance of the added money, \$1100.

Winners after the publication of the weights of a race of any value to carry 3 lbs. extra; of two races of any value, or one of the value of \$1000, 5 lbs. extra; of three races of any value, or one of the value of \$1500, 8 lbs. extra. In case of horses handicapped at 118 lbs. or over, these penalties shall apply to the extent of one-half only, except for the winner of the First Handicap, which shall carry 10 lbs. more than he carried in that race. Seven furlongs Columbia Course.

AUTUMN MEETING, 1904.

THE GRAND CONSOLATION—\$3000 Added.

THE GRAND CONSOLATION, for two-year-olds, foals of 1902. Non-winners of \$10,000 at time of starting. To close and name February 16, 1904, at \$10 each. If not declared by September 1, 1904, to pay \$50 each. If not declared by November 1, 1904, to pay \$100 each. Starters to pay \$100 additional. The Washington Jockey Club to add \$3000, of which \$500 to the second, \$300 to the third. Colts to carry 122 lbs.; fillies and geldings, 118 lbs. Non-winners of \$5000 allowed 12 lbs.; of \$3500 allowed 7 lbs.; of two races of \$2000 allowed 10 lbs.; of three races of \$1500 allowed 12 lbs. Maidens that have not started to receive no allowance.

The winning of \$10,000 or more, shall be equivalent to a declaration. Seven furlongs Columbia Course.

NOTICE.

The Chevy Chase Hunt Handicap Steeplechase, the Spring Hunters Steeplechase, the Easter Monday Steeplechase will be duly announced to close on Tuesday, March 1, 1904. The Dixie and Vestal for three-year-olds, to be run in 1905, will not close for now two-year-olds as heretofore, but will close for then three-year-olds in the Spring or early Summer of 1905, the conditions of which will be duly announced.

The entries for the above are received only under the conditions as printed, and in all respects subject to and in accordance with the Rules of The Jockey Club and the Washington Jockey Club. The Steeplechases in accordance with Rules of the National Steeplechase and Hunt Association.

For entry blanks address the BREEDER AND SPORTSMAN, 36 Geary Street, San Francisco, Cal.

CAMPBELL'S EMOLLIO IODOFORM GALL CURE

For GALL BACKS and SHOULDERS, CRUPPER SORES and SADDLE GALLS there is none superior.

The horse CAN BE WORKED AS USUAL. For BARBED WIRE CUTS, CALKS, SCRATCHES, BLOOD POISONED SORES and ABRASIONS OF THE SKIN it has no equal.

It is very adhesive and easily applied to a watery as well as a dry sore.

Its use will absolutely prevent BLOOD POISONING. In this respect there is no Gall Cure offered which can justly even claim to be a competitor. We placed it on the market, relying wholly on its merit for success, and notwithstanding the fact that comparatively little has been done in the way of advertising the sales of 1900 were 100 per cent greater than the aggregate sales of Gall Cure preceding that year. This increase was entirely due to its MERITS, and from it we feel justified in saying that it is THE GALL CURE OF THE 20TH CENTURY.

It is a quick and sure cure for those troublesome skin cracks under the fetlock which injure and often lay up race horses.

All Trainers Should Have It in Their Stables

PRICE:—3 OZ. BOX, 25c.; 1 LB. BOX, \$1.00.

Read our "ad." on Campbell's Horse Foot Remedy in next issue of this paper.

JAS. B. CAMPBELL & CO., Mfrs., 412 W. Madison St., Chicago, Ill.
Sold by all Dealers in Harness and Turt Goods. If not in stock ask them to write any Jobber for it.

PALACE HOTEL, SAN FRANCISCO, CALIFORNIA.

TOURISTS and TRAVELERS will, now, with difficulty recognize the famous COURT into which for twenty-five years carriages have driven. This space of over a quarter of an acre has recently, by the addition of very handsome furniture, rugs, chandeliers and tropical plants, been converted into a lounging room—the FINEST IN THE WORLD.

The EMPIRE PARLOR—the PALM ROOM, furnished in Cerise, with Billiard and Pool tables for the ladies—the LOUIS XV PARLOR the LADIES WRITING ROOM and numerous other modern improvements, together with the unexcelled Cuisine and the Most Convenient Location in the City—all add much to the ever increasing popularity of this most famous HOTEL.

PERCHERON AND BELGIAN STALLIONS

The Farmer's Supply of the Middle West. Cedar Rapids (Iowa) Jack Farm

Three importations this season of prize-winning Percherons, Belgians and German Coachers and Catalan Spanish and Majorca Jacks. I have the largest Draft and Coach Horses in America and will sell more quality for the money than you can find anywhere.

Remember, the largest sale of Imported and High-Bred Jacks ever held in America will take place at the Cedar Rapids Jack Farm some time during the first half of April, 1904. Watch for date.

THOROUGHBRED.

HEYWOOD.....F. T. Hoffman, San Jose
RAMESSES.....Monte White, Stockton

THE FIRST TWO official announcements of harness meetings to be given in California this year will be found in our advertising columns this week. Nearly twenty thousand dollars in purses and stakes are offered by the associations making these announcements, the Breeders giving \$13,700 and the Pleasanton association \$6000. This is excellent for a starter and two or three more meetings will give us a circuit that will be worth while. Mr. Thomas Smith of Vallejo assures us that his program will soon be ready to announce and that he will give three \$1000 stakes. Mr. Smith gave a meeting last year and had two \$1000 stakes on the program and found that it paid. The smaller towns in California cannot afford to give an entire program of thousand dollar events, but that much money hung up for a slow class trotting race and also for a slow class pacing event will secure enough entries to make the stakes self supporting. The State Agricultural Society will give a few of these big stakes for harness horses this year, so that the outlook is good for owners of good horses that have records no better than 2:20 at either gait. The greatest drawback to a successful circuit in California is that few of the associations have any regular and active organization. In the district boards it is often hard to get a quorum as a majority of the directors take but little interest in the fairs, and the secretary is not paid enough salary to pay him to devote much time to the association's business, except during the time the fair is held. To make an annual race meeting successful the secretary should devote nearly his entire time to it throughout the year. In many districts the secretary is not paid over \$150 per year for his services and no man can afford to put in very much work for that. There is now an excellent opportunity in a dozen towns in California for the formation of harness racing associations, which should be organized for profit and not consist of more than three or four active men who are interested in the sport and desire to see it honestly conducted. A profit of from \$1000 to three or four times that amount can be made by a hustling active organization of this kind that has the support of its towns people. All that is needed is a good, live secretary that will be enabled by his salary to devote his time to it. He need not be a person that is thoroughly conversant with the game as any man of average ability can learn the duties of secretary by a few weeks' study and application. There are splendid opportunities in California for the formation of several organizations whose purpose will be the giving of annual race meetings. If Vallejo and Pleasanton can give profitable meetings, surely places like Petaluma, Santa Rosa, Napa, Woodland, San Jose, Fresno, Stockton, Red Bluff, Chico, Colusa and many others can do as well.

THE STATE DAIRY BUREAU has just completed the compilation of statistics of the butter and cheese output of California during the last year. It is shown that the increase over the output of the pre-

ceding season was 3,075,213 pounds. The total output for 1902-03 was 34,676,311 pounds. That of the preceding season was 31,528,763. The increase amounted to about 10 per cent. Altogether the dairy output amounted in value to \$20,436,152 for the last season. Secretary Saylor of the State Dairy Bureau claims that the dairy interest is the largest income producer of any single line of industry in California. The gold mines of California have always been considered the State's greatest wealth producers, but the figures show that gold mining must take second place to dairying. The products of the California dairies brought three million dollars more in 1903 than the mines produced. As the dairy industry is only just beginning in California, many of the counties best adapted to it having no dairies and making no butter for export beyond their borders, it is evident that the future will see marvelous development in the output of California dairy products. The Orient and the isles of the Pacific will be a great field for their consumption, and the California cow will bring in more gold to the State than her mines and vineyards.

THE SULTAN OF MOROCCO has sent to President Roosevelt and family six thoroughbred Arabian steeds. The horse intended for the President is a white stallion, and two or three mares are among the remaining five intended for distribution among the President's family. The BREEDER AND SPORTSMAN suggests that Mr. John Gilmer Speed, the magazine writer who has been hawailing the fact that there is no distinct type of American horse, and never will be unless the Arabian blood be used, have the position of Stud Master for the American Nation created for him and that he be directed to take charge of these horses and proceed to found a family of American horses that will be of that distinct type which Mr. Speed and Mr. Randolph Huntington have agreed upon as the only perfect and useful one. General Grant was sent a couple of pure blooded Arabian stallions while he was President, but did not do much with them as he could find a trotting bred stallion in nearly every county in the country that was a superior animal, but perhaps Mr. Speed can evolve a breed of horses from this Arabian consignment that will make the fabled winged Pegasus look like the proverbial thirty cents.

MR. ROBERT LEIGHTON, Secretary of the North Pacific Fair Association, reached San Francisco last week, having been engaged by the California Polo and Pony Racing Association to manage its meets that will be held this month at Del Monte and Burlingame. Mr. Leighton is thoroughly posted on the rules and regulations of the class of sport and under his management the meets at Del Monte and Burlingame will be successful beyond a doubt. Mr. Leighton tells us that the North Pacific circuit of racing was a most successful one last year but that the directors expect to make it still more so this season. Some little difficulty was had in selecting dates that were agreeable to all concerned, but when the schedule was finally adopted there was a general acquiescence and every association on that circuit is now working to make the season an entire success. Mr. Leighton will not return home until after the first of March.

Traders Must Make Good in Russia.

There is nothing so distressing to the average horseman as an unsound horse, and nothing so embitters the feelings as to come into possession of one through a trick. It is the one thing which a man will never forgive or forget. A misfit in clothes or the purchase of inferior articles in the vegetable or meat market may be overlooked and the patronage continued, but no man will return a second time to the person who has deceived him in a horse trade. Deception in this department cuts respect and friendship like a knife. In Russia every person who has a horse is obliged to furnish a certificate of ownership. If a horse is sold this certificate must be produced and transferred to the name of the purchaser. The one who sells a horse is to be responsible for its good condition, and he must return the purchase money and pay a fine if he deceives the buyer in his representations of its health or age. If a diseased animal is sold and infects the purchaser's stock, the seller must pay all damages and be tried before a criminal court. American horsemen compare favorably, perhaps, with any other class of commercial people, and the reputable dealer is always willing and anxious to right a wrong when it is made to appear to his satisfaction that the horse was not right when sold. Sometimes when this is not apparent the dealer will make a sacrifice rather than be suspected of wrong doing.—Horseman.

A royally bred McKinney stallion, good size, handsome lofty carriage and a fast horse as well, is offered for sale for \$500. He was foaled in 1898. See advertisement of Russell Mc. in this issue.

Lou Dillon's Grand Sire Today.

"Marque," the well known correspondent of the *Horse Review* writes as follows:

During my travels last week I visited Springvale Farm, Oregon, Ill., owned by Judge J. H. Cartwright, of the Illinois Supreme Court. Judge Cartwright, it will be remembered, purchased Sidney 2:19½ last May and placed him at the head of the farm's stud. After Sidney's brilliant showing in California in 1889 to 1891, he was brought East, sold and taken to Michigan, where for nine years he was practically buried. His decade spent in Michigan is to be deeply regretted, for I am advised that he was hred to hut a few mares while there. The old adage that "You can't keep a good horse down" has again proven true, for now that Lou Dillon has brought her grandsire into prominence again he is well situated to take advantage of it.

It was my first sight of Sidney and, of course, I was anxious to see if there was any resemblance between the two-minute mare and her grandsire. No two men see horses precisely alike, but I believe that any one familiar with Lou Dillon would agree with me in the statement that she is a Sidney from her withers forward—but behind is as unlike him as is possible. Sidney has the most peculiar back I ever saw on a horse. From his coupling to his tail he is almost perfectly horizontal, having scarcely any slope to his rump. This conformation is said to come from the Volunteer family—Volunteer sired Sweetness 2:21½, Sidney's dam. Lou Dillon, on the contrary, is quite high at her coupling and her rump has a pronounced slope, being very similar in this respect to that of Nancy Hanks. Her shoulders, like her grandsire's are full made and highly developed, as are also her forearms. Like Sidney, Lou Dillon has the thoroughbred type of neck, it being flat, sharply defined and beautifully crested. The mare's head is, of course, finer than her grandsire's, but the general outline and expression is the same, likewise the markings, both having a star and a white snip on the nose.

Sidney, although twenty-three years old, is remarkably well preserved and retains his speed as well as vitality. He is driven every day and was recently brushed very fast on the streets of Oregon, much to the delight of the townspeople. He is a little horse, but has the ways and bearing of a gamecock, in which he also reminds me of Lou Dillon.

Judge Cartwright owns twenty-five well bred mares and Sidney will be hred to these as well as outside mares the coming season. With one or two exceptions, all the mares hred to him in 1903 seem to be in foal.

Some Promising Horses.

Mr. J. W. Zihble has seventeen trotters and pacers in his stables at the corner of 20th and Point Lobos avenues in this city. He is jogging them over the park roads, but expects to move to San Jose or Tanforan within a few weeks. Tom Smith 2:13½ is looking like a champion and Allesandro, 2:40 that won so impressively as a two year old in Colorado last year, owned by Mr. George Warlow of Fresno, is growing into a magnificent horse. A light sorrel pacer owned by Mrs. Hamilton of Marin county is one of the best green prospects Mr. Zihble has had for some time. He was sired by Meridian 2:12½.

At the annual meeting of the shareholders of the Kentucky Association of Trotting Horse Breeders Horace W. Wilson was elected secretary to fill the position made vacant by the death of the late E. W. Shanklin. Mr. Wilson succeeded Ed. A. Tipton as secretary of this association a good many years ago and took up the reins when the society was in the most flourishing shape, with a big surplus in the bank and no debts worth mentioning. Under his management prosperity continued, but a most flattering offer from the Empire City folks in New York induced him to resign. He went to Gotham and remained there some time but later disagreement with the owners of the track led him once more to seek a new field, which he found as the secretary of the Charter Oak track and the Oakley track in Cincinnati, both the property of Jones & Welch. The management of these two courses Mr. Wilson still retains, and he has therefore assuredly made a record in his line for no man ever before was the secretary of three of the Grand Circuit associations in three different cities as widely separated as Lexington, Hartford and Cincinnati.

Knap McCarthy made a good suggestion at Chicago recently where a group of trainers were discussing matters of interest to horsemen. He said: "The associations, especially the National, have accumulated a large sum of money which should be used for purchasing a home for old and disabled trainers. The trainers have furnished all that money and there is no legitimate use it can be put to by the associations. The trainers should commence to agitate this subject and I believe they would have the support of the breeders, owners of campaigning stables and the public. There is plenty of money at hand to purchase a good farm somewhere and properly equip it and if extra funds were needed a few benefits during the season would do the trick. There is not a track manager in the country but would willingly set aside one day for such a meeting and the public would respond in a liberal manner."

JOTTINGS.

A GOOD TROTTER that has no record but is capable of stepping three heats around 2:15 will be able to earn more money in California this year than could have been won in the same class last year. The offering of \$1000 for 2:24 class trotters by the Pleasanton Association, and of \$2000 for the same class by the Braeders will be followed by a purse of \$1000 for slow class trotters by Vallejo, and the California State Fair will doubtless offer a \$2000 stake for trotters of about the same class. If a horse comes out this summer that will be able to win all these stakes his net earnings over and above entrance fees will be \$2400—quite a nice profit for one horse to earn in four races held within a radius of one hundred miles. If Petaluma, Woodland and Napa should give meetings, additional stakes would very likely be offered for the slow class class trotters and thus the earning capacity of a good green trotter would be increased materially. If the managers of the many good mile tracks in California could only get together and organize a circuit on up-to-date lines, a prosperous season of racing could be held every year. The Breeders association has clearly demonstrated that good harness meetings can be made to pay without any other attraction than the regular racing program and owners and lessees of tracks should be able to do as well. It seems almost useless to try to get the district agricultural boards to organize a circuit. Since the appropriations were taken away, the majority of these associations are not even keeping up their organization. Some few are holding meetings each year, however, and in nearly every instance these fairs and race meetings are successful financially and otherwise.

With Pleasanton stalls all filled and over two hundred horses working on the track horsemen who have not yet begun regular work on their strings and are only "jogging on the roads around home," are casting about for a place to go to, and San Jose track is being considered by many. Those who have already located there claim it is as good as any track in California and during rainy days no section has finer roads to jog over. San Jose should be able to give a first class harness meeting every year, and all that is needed is a live man to take hold of the project and push it to a successful issue.

Few sections of the United States have a better lot of stallions standing for public service than will be found in California this year. The list advertised in the BREEDER AND SPORTSMAN shows a particularly well bred lot and is getting quite large although the season will not be fairly open for two or three weeks yet. The majority of breeders aim to have the colts dropped in March or April as by that time the nights are seldom frosty in this section of the State, and feed is usually abundant. California has stallions and mares enough now in her borders to found a great family of trotters without going abroad for any new blood, but our breeders are progressive and not a year passes but young mares and stallions are brought here from the East to add to our breeding ranks. Owners of mares should look over the list of stallions advertised in this journal before looking, as the very line of blood wanted might otherwise be overlooked.

Quite a large number of the trainers who are working horses on the California tracks at the present time are making calculations on going East in May or June to compete for the big purses that will be hung up for the trotters and pacers on the Grand Circuit. Of course all will not go who are now talking about it, but the probabilities are that there will be a larger representation of California horses on the Grand Circuit this year than in 1903. It is a matter and proper that this should be the case and it is to be hoped that the number of California stables that race on the Eastern tracks this year will be larger than ever. It will not reduce the entry lists on California tracks in the least as none but horses that have shown speed will be sent, and for every fast one that is lost to the home circuit two or three slower ones will have a better chance to be started and win part of the money. Pacers that can show three heats better than 2:10 and trotters that can trot in 2:15 and repeat the performance should be able to win money over East if they are steady and consistent horses at those rates of speed.

Fourteen trotters won over five thousand dollars each on the Grand Circuit last year and every aged horse but one of the fourteen had to trot heats better than 2:10 to win. They are Billy Buck 2:07½, Hawthorne 2:06½, Jay McGregor 2:08, Caspian 2:07½, Kinney Lou 2:07½, Monte Carlo 2:07½, Masetto 2:08½, Dr.

Strong 2:09½, Dillon Boy 2:09½ and Dan T. 2:07½. Ethel's Pride 2:13½ and Sadie Mac 2:11½, three-year-olds, and Judge Graan 2:10½, a four-year-old, were in the list of those winning over \$5000.

Sixty-six trotters won from \$475 to \$1,000 on the Grand Circuit and of these but few paid expenses as entrance money and transportation expenses are heavy where the purses are large and the distance great between racing points. Of these sixty-six trotters that could not be classed as good money winners, only a very few closed the year with a record slower than 2:15 and the majority had marks better than 2:12.

It was about the same thing with the pacing brigade. But ten of the vast army of pacers won upwards of \$5000, and these were Star Hal 2:06½, Elastic Pointer 2:06½, Nervolo 2:04½, Tom Keene 2:04½, King Direct 2:09½, Al Bock 2:08½, Frank Yoakum 2:05½, Dr. Madara 2:08, Pan Michael 2:07½ and Joe Pointer 2:05½. It takes a good horse to win enough on the Grand Circuit to pay the expenses of the trip from Detroit to Memphis. Dan R. 2:01½, one of the fastest of the fast brigade started in ten races and won but \$3175, while Foxie Curd, one of the fastest of the brigade that started out in the spring without a mark, raced to a record of 2:07, started in seven races and won but \$1850.

It is very evident from these statements to see that a horse must be a good one to win any money at all on the big ring and that he must be not only good but lucky to return his owner a profit at the end of the season.

The California Circuit was the smallest in 1903 for many years yet George G. won three races out of four starts and placed \$1750 to his credit. He was a green horse at the start, took a trotting record of 2:12½ and could be sold to-day for a good figure. Ben F. that won all his starts and had a pacing record of 2:10 at the close of the circuit, won four races and his winnings were \$2000. Both these horses started at but three meetings—Vallejo, Petaluma and Sacramento. A profit can be made with a good horse in California even though the circuit here is not a large one.

Horses at Woodland Track.

The well known Woodland track where the horses always go so fast during the racing season is not a lonesome place just now.

H. S. Hogoboom has nine head, among them Arthur W. 2:11½. This stallion is looking fine. Mr. Hogoboom has a three-year-old colt by McKinney that he is mighty sweet on. He is owned by Mr. C. L. Jones of Modesto. The others are finally bred and all show well.

Mr. Nason has a few nice ones—one a Diablo colt that is as fine as they make them. His green Falrose mare has speed to burn and what a road mare she should make.

Petar Fryat has two—one a green pacer by Falrose that shows 2:20 speed with little work.

A. B. Rodman has a few at the track. There are two McKinneys in his string that are nice lookers. He is going easy with them.

Mr. Harrington is gaiting several nice colts, one of them by Alta Vela 2:11½ being a very attractive youngster.

Walter Tryon has a small string, but some good ones among them. One is a filly by Dagon out of Swiftbird, the dam of Swift B. She can step some, too.

The stallions are plentiful—Azmoor 2:20 and Baywater Wilkes 2:24½ will get the best mares and they are two pretty good horses, too. Arthur W. 2:11½, his brother John A. 2:12½, Tuberoso, Gossiper Jr., Mickey Free, Tomonco and perhaps one or two more represent the trotting stallions, while Mr. Schwartz's thoroughbred Joa Terry is a good representative of his breed. So, you see, we are pretty well supplied with stallions.

Dan O'Keefe does the shoeing for the track horses, and he can shoe with the best of them.

They say here that Woodland will be on the circuit this year. We all hope so as we all take a pride in racing at home.

Yours, FANFARRON.

The Kenney Manufacturing Company, 531 Valencia street, San Francisco, has a second-hand Toomey cart with wood wheels, extra heavy carriage tie, cushion, etc., that is as good as new, having been used but little, which will be sold for \$90, regular price \$135. Harness, blankets, etc., goes with it. They also have a fine surrey for sale cheap and manufacture sulky wheels and attachments to order. Pneumatic tires, solid cushions put on all kinds of vehicles.

For all kinds of weather there is no drink like Jackson's Napa Soda—plain or in a lemonade.

A Son of Seymour Wilkes in Australia.

By the last mail from Australia, Mr. J. W. Gregory, of the St. George Stables, this city, received a letter from Mr. Teddy of Ohaupo, Waikato, Australia, who purchased and shipped from here last June, the stallion Salisbury and a handsome colt by Mr. Gregory's stallion Seymour Wilkes 2:08½. Mr. Teddy states that Salisbury has made a good season in the stud and will be raced during the coming circuit there. The Seymour Wilkes colt has filled out and is a splendid looking three-year-old, although he will not be that age until June this year. Mr. Teddy says he has paced an easy mile in 2:20, which he considers as good as 2:10 over a good California track. Now that Seymour Wilkes is recognized as one of the coming great speed sires of California, it is pleasing to note that a good son of this horse has reached Australia and that he will not only be trained and raced to a low record, but will be used in the stud. Few stallions can show as uniform and handsome foals as the yearlings, two-year-olds and three year-olds by Seymour Wilkes. They are large, good boned, good gaited and are nearly all bays or browns, showing him to be a most prepotent sire. The big trotting gelding Monroe 2:12½, that took his record on the Grand Circuit last year and will be raced again by Mr. Salisbury during the coming season, is a typical son of Seymour Wilkes and is known as the lightest going and best gaited big horse at Pleasanton.

Year's Great Winnings.

How great a laud the Wilkes family has over all other trotting families is shown when the winnings of the horses on the turf last year are tabulated and divided into family divisions. In the Grand Circuit last season 175 trotters and pacers descended in the male line from George Wilkes won \$266,359. The Electioneer family or the forty descendants of that horse which won money in the big chain of races secured \$39,560. The Dictator family is third with seventeen performers that won \$39,460; the Tom Hal pacing family, with thirteen performers, won \$38,080. Only three of the descendants of Happy Medium won money, but their total was \$19,695. Seven descendants of Woodford Mambrino won \$14,595; nine of the descendants of Nutwood won \$11,025 and the same number of Strathmore's descendants won \$10,390. The only other family that won an amount large enough to entitle it to consideration was the Almont family, seven of that tribe winning \$9855. Five of the Wilkes group won over \$10,000 each, namely, Billy Buck, with \$33,000; Hawthorne, with \$18,750; Jay McGregor, with \$17,750; Kinney Lou, with \$11,500, and John Taylor, with \$10,950. Only four horses outside the Wilkes family won as much as \$10,000, they being Sadie Mac, in the Happy Medium, with \$19,000; Caspian, in the Woodford Mambrino group, with \$11,975; Star Hal, with \$10,650, and Elastic Pointer, with \$10,000, both in the Tom Hal group.

The Haywards Horse Show.

Haywards will have its annual horse and live stock show this year one week earlier than usual, Saturday afternoon, February 27th, being the date selected for the opening.

The following officers have been elected to take charge of the show: President, George Gray; Vice-President, J. E. Gaary; Secretary, G. A. Oakes; Treasurer, R. Reed. President Gray has appointed the following board of directors and committees: Board of Directors—George Grindell, A. Ramage, W. J. Ramage, G. S. Langan, M. Henry, C. M. Buck, D. S. Smalley, C. W. Heyer, C. Branin and A. Allen. Finance Committee—C. Heyer, D. Chisholm, R. Reed, J. W. McCoy, S. Simons; Mount Edan, H. Gansberger, A. W. Schafer; San Lorenzo, J. McCauley, C. Branin; Castro Valley, P. H. Hoare. Music Committee—R. Reed, Dr. Browning and A. I. Graham.

How to Keep a Careful Record.

Every stallion keeper knows that much of the success of a season depends upon the careful recording of services, making all accounts collectible and bankable. The best way to do this is to secure a blankbook printed for the purpose. The book need not be expensive nor large, and if it prevents the loss of only one service fee it will have paid for itself many times over.

A book that will fit the pocket is best, then it is always ready when you need it.

All facts should be recorded that you want and none that you don't want.

Then there should be an index in the book so that every service could be referred to in a minute.

A book that exactly meets all these requirements is published by F. H. Eno, 510 Mulberry street, Des Moines, Ia.

The book is also provided with a legal note to be signed by the owner of mare for each service.

This one feature of the book is worth many times its price (only 50 cents each) and saves horsemen many dollars every year. If you will ask Mr. Eno for free sample pages you will readily see how nicely the book is arranged to meet your needs.

Daniel Sullivan, of Leadville, Colorado, is now the owner of Foxy Quiller 2:25, own brother to Cresceus.

THOROUGHBREDS AND PONIES.

Considerable interest is already evinced in the forthcoming meetings of the California Polo and Pony Racing Association. The first meeting of the association will be held at Del Monte from Thursday, February 18th to Monday, February 22nd inclusive. Two days of that meet will be devoted exclusively to racing. The program consists of six events daily at distances ranging from three-sixteenths up to one mile and the weight conditions are so varied that the possessor of a pony with any pretensions to speed will surely find one or more events to his liking. The association has made arrangements for the free transportation of ponies to and from Riverside, Santa Barbara, Burlingame, San Francisco and San Mateo. Due notice as to date and time of departure, etc., can be obtained from the secretary. More ponies are now in training than ever before and large fields will be witnessed in all the events. The entries for both the polo matches and races close positively on February 14th, and as the association desires to facilitate owners' arrangements as much as possible, an early application for stabling is requested. It is not necessary to become a member in the association in order to enter a pony, the only requisite to entry being that owners shall obtain the association's certificate as to height, etc., and that their ponies' pilot is a qualified gentleman rider. All the purses and cups are of considerable value and as no entry fees are demanded, the association's liberality ought to be largely appreciated and we predict a most successful inaugural meeting for the new association.

The program of pony races to be run at the Del Monte meet is as follows:

First race, one-fourth mile, for ponies—Entrance fee \$5. Top weight 165 lbs.; 4 lbs. allowed on each 1/2 inch under 14h 2". Purse value to winner \$75, entrance fee to go to second.

Second race, three-eighths mile, for ponies that ran but did not win a race on first day—Top weight 160 lbs.; 4 lbs. allowed on each 1/2 inch under 14h 2". Purse \$65; value to the winner \$50, second \$15.

Third race, one-fourth mile, for maiden ponies—Top weight 165 lbs.; 4 lbs. allowed on each 1/2 inch under 14h 2". Cup value to winner \$75, second \$25.

Fourth race, one mile, for ponies—Top weight 155 lbs.; 4 lbs. allowed on each 1/2 inch under 14h 2". Purse \$125; value to winner \$85, second \$25, third \$15.

Fifth race, three-sixteenths mile, for ponies that ran but did not win the fourth race on first day—Top weight 165 lbs.; 4 lbs. allowed on each 1/2 inch under 14h 2". Purse \$65; value to winner \$50, second \$15.

Sixth race, five-eighths mile, for ponies—Top weight 165 lbs.; 4 lbs. allowed on each 1/2 inch under 14h 2". Cup value to winner \$65, second \$25, third \$10.

Washington Park Club, Chicago, presents its stake announcement in our business columns this week. As usual this popular club has arranged a most attractive lot of stakes for the great summer meeting to be held beginning Saturday, June 18th, and ending Saturday, July 16th. The stakes are headed by the American Derby, which has \$25,000 added and is known all over the world as the greatest three-year-old event in America. At this meeting no selling purse is less than \$600, and the other purses are \$700 and upward. The overnight handicaps are \$1200 and upward. There are seven stakes for two-year-olds, six of which have \$2000 added money, and the other, the Hyde Park Stakes, \$7500 added. Besides the Derby there are three stakes for three-year-olds, with from \$2000 to \$4000 added. Six rich stakes ranging from \$2000 to \$7500 added money are given for three-year-olds and upward. The Washington Park Club gives one of the leading race meetings held in America and leads all other associations in the West in daily attendance. Address James Howard, Secretary, for entry blanks.

The Fixtures opened by the Westchester Racing Association for the spring and autumn meetings of 1904 will be found in this issue of the BREEDER AND SPORTSMAN. For the spring meeting there are the Gaiety, the Bouquet and the Laureate for two-year-olds; the Larchmont, the Baychester, the Van Nest and the Potanico are for three-year-olds, while the Metropolitan, the Harlem, the Toboggan, the New Rochelle and the Spring Serial Handicaps are for horses three-year-olds and upwards. A weight for age race is also given. For the fall meeting there are the Nursery Handicap, the Champagne and the White Plains Handicap for two-year-olds. The Jerome Handicap is for three-year-olds and the horses three-year-olds and upwards have the Municipal Handicap and the Morris Park Autumn Weight for Age Race which is two miles and a quarter and the celebrated Woodlawn vase is added under certain conditions. Owners should remember that the races for jumpers do not close until March 1st, and the races for Hunters and Amateur cup do not close until April 16th. Entry blanks can be had at this office.

The Benning Spring meeting held by the Washington Jockey Club will begin Thursday, March 24th, this year and close April 14th. The Autumn meeting will open Thursday, November 17th, and close Saturday, December 3d. In this issue of the BREEDER AND SPORTSMAN are advertised the Benning Spring Handicaps to be run on the first and last days of the spring meeting, and the Grand Consolation \$3000 added, to be run on the last day of the autumn meeting. The Dixie Land and Vestal stakes to be run at Benning do not close until the spring of 1905 for then three year olds. Heretofore, they have closed for two year olds. Mr. S. S. Howland, President of the Washington Jockey Club, Treasurer of the National Steeplechase and Hunt Association, and member of the Jockey Club, is now enroute for San Francisco.

He is coming by the southern route and will stop off at New Orleans, Los Angeles and probably Del Monte before reaching this city.

The thoroughbred stallion Rameses, son of Goldfinch and Fleurette, own sister to the great Firenze, will be in the stud at Stockton this season and owners of thoroughbred mares should patronize him as he is one of the best bred and grandest looking stallions in California. His service fees \$25, which is very low for a horse of his qualifications. Rameses was bred at Rancho del Paso and sold as a yearling at auction for \$6500. He showed remarkable speed as a two-year-old, but met with an accident and broke down. He was started after that, however, and won in his class, beating a good field of horses. Messrs. White & Longers of Stockton then purchased him and in May, last year, bred him to five mares, all of which are in foal. The sire of Rameses is imp. Goldfinch, son of Ormonde and Thistle by Scottish Chief. Goldfinch is one of Rancho del Paso's greatest sires. Although the oldest of his get are but seven years old, he is the sire of over forty winners, among them the great mare Chelandry, Old England, Cunard, Gold Cure, Killashandra, Sweet Lavender and many other big money winners. Fleurette, the dam of Rameses, is one of the greatest of broodmares. She is an own sister to the peerless Firenze, one of the greatest race mares of turf history. Fleurette has produced the winners Flower of Gold, Maxine, Flurry, Col. Dan, Silver II, Rameses and Convamore, the latter a good winner in England for three seasons. Rameses is bred very much like the celebrated Flying Fox that stands this year for \$3000. He is dark chestnut, five years old, stands sixteen hands and an inch high, weighs 1125 pounds, and is a splendid individual.

Dick Wells will not be entered in the quartet of great spring handicaps. He will be raced at Washington Park, Chicago, after which he will be shipped direct to Saratoga. His first engagement at the Spa will be in the Saratoga Handicap. He will be nominated for other stakes at Saratoga and many of the big events at the Sheephead Bay, Gravesend and Morris Park fall meetings.

The Eastern racing dates are as follows: Washington Jockey Club, March 24th to April 14th, November 17th to December 3d; Queens County Jockey Club, April 15th to 28th, November 3d to 15th; Metropolitan Jockey Club, Monday, April 25th, to Wednesday, May 4th, October 17th to November 2d; Westchester Racing Association, Thursday, May 5th, to Wednesday, May 25th, October 3d to 15th; Brooklyn Jockey Club, Thursday, May 25th, to Wednesday, June 15th, September 19th to October 1st; Coney Island Jockey Club, Thursday, June 16th, to Tuesday, July 5th, August 27th to September 10th; Brighton Beach Racing Association, July 6th to 30th, September 12th to 17th; Saratoga Association, August 1st to 26th; Buffalo Racing Association, June 6th to 25th, September 3d to 17th.

A son of the great Hanover will make the season of 1904 at San Jose. This is the chestnut horse Heywood, owned by Mr. F. T. Hoffman, of Boise city, who has brought his stallion here for the purpose of standing him for public service. Hanover was probably as good a race horse as was ever foaled in America and headed the list of winning sires for four years and is now gaining additional reputation through his sons. Heywood is considered one of the best bred of the sons of Hanover. His dam is The Niece, the dam of Nephew, La Colonia and Mantanza, all good winners. See was by Alarm, the first horse to run a mile below 1:43, and sire of the great race horse and stallion Himyar, sire of that great colt Domino. Jaconet, second dam of Heywood was an own sister to Iroquois, that was taken to England and won the Derby and St. Leger in 1881. Jaconet also produced Sir Dixon, Belvedere, Hindoonet and Magna Charta. She was by imp. Leamington out of Maggie B. B. by imp. Australian, the horse that sired Joe Daniels and Springbok. Heywood traces 16 times to Eclipse, 15 to Herod, and once to Matchem. He is a handsome individual, standing 15.3 and weighing 1100 pounds. He is the only son of Hanover that will stand for public service on this Coast. See advertisement in this issue.

Gold Heels, the famous thoroughbred of 1902, has been entered in the \$50,000 World's Fair Handicap that will be run at St. Louis.

In speaking about how great horses are shipped nowadays between the east and the west, or vice versa, with the horse in a palace car attached to a "limited," by special permission, and the owner in a private car, with possibly his trainer and jockey, a turfman recalled the trip which the great Miss Woodford made to Louisville in the autumn of 1883. She was engaged in the Champion Selling Stakes, and left Jersey City in an ordinary express car, in which were also Philip J. Dwyer and M. F. Dwyer, her owners; James Rowe, her trainer; James McLaughlin, the jockey, and one attendant. Wandering accompanied the mare as a traveling attendant. The Messrs. Dwyer slept in the car with the mare, and though they were met by representatives of the association and asked to breakfast, they excused themselves, and after seeing the mare done up in the stable, went to a kitchen on the track and had their morning meal. Miss Woodford won the race by a half furlong, with Green Morris' Slocum second, Wandering third and E. Berry Wall's Wallflower fourth. One hour after the race Miss Woodford was again on the train, homeward bound. In fact, she was scarcely cooled out when she was shipped, and again into the box car went the famous owners, their trainer and jockey, and they were off for Jersey City. Miss Woodford, after she had been given a mash, lay down, and with rare intervals did not get up until she reached Philadelphia. On the same

train, in the coaches, was the Philadelphia Baseball Club, which that year had won the pennant. The champions were received with the blare of drums and the firing of guns, and the tumult awoke the mare, who became nervous, not getting over it thoroughly until she reached Jersey City. That same evening she was walked to Jerome Park, and on the following day Miss Woodford won the Hunter Stakes at a mile and three-quarters by six lengths, a dead heat for the place being run by Appleby & Co.'s Carnation and J. E. Kelly's Bella, to whom the Dwyer mare was conceding seven pounds.—Horseman.

Horses for Women.

A few years ago anything in the shape of a horse was considered suitable for a woman to ride. Whispers were heard of the way a woman ruined any horse with her side-dragging weight, due to the side-saddle; the hard mouth resulting from her "riding on the bit;" the way she insisted on treating it like a pet child, making it do everything at most inopportune times; anything for momentary display, urging and curbing in twenty yards, while, as to gaits, there was utter demoralization. In fact, an added punishment to the inferno catalogue was supposed to be the eternal riding of a "ladies' horse."

This has all changed. Woman has to a certain extent taken the reins into her own hands. Always great on mere appearances and the eternal fitness of things—which at times are an odd fit—she now wants a horse with good appearance. Either country life and closer association with horses has given the more or less correct idea she now holds or she has picked it up at horse shows, and in that general channel of intuition which, after all, is the sheet-anchor of a smart woman's opinion in most things. She does not know why, but she gets pretty near the correct line in most things in which she is vitally interested. Thus to-day she throws aside the old time, no account steed, and insists on a horse that is good looking, which means that the horse must have that definite harmony of parts and proportion which gives the capacity for the work desired, and, also, to some extent, presages the even temper and good disposition natural to the well bred, well cared for equine. It is sound common sense. One would not choose a club-footed man to win a sprint race.

An average woman of to day either wants an out-and-out hunter, or she leans to a distinct hunter type, even for park work. Such a horse should be temperate—that is to say, easily handled and not easily excited, strong, safe, clever at fences, and fast enough for whatever the country may be. It is a vital feature that he be up to his weight, more than in the case of a man's horse, simply because a man rides "to his weight," but a woman on a side-saddle inevitably rides "over," nearly twenty pounds over it.

The animal should to some extent conform to the height of the rider; a tall woman should have a horse about sixteen hands, and so down in proportion; but it must be remembered that the larger horses take more holding together than do the smaller ones. Witness the full-sized hunter and the polo pony. He should be longer in the back than is a man's horse, this because the sidesaddle covers more area; the seat of a woman, with habit, spreads over greater space, and with a short back or with a short-coupled horse, everything looks cramped and squeezed up, which is to be avoided for several reasons, a chief one being that the long back gives greater elasticity of motion.

He should above all things be able to walk fast, an accomplishment only too rare these days. He should trot freely, with an even and level movement, and be broken to canter, right foot first, at the touch of the heel. He should have good, flat, oblique shoulders, and a fairly high forehead, as a sidesaddle is a great deal of trouble on a high-crouped horse—it will slip. He should be easy to control and patient, by reason of long "waits" at a gate, a gap, or other inconvenience, and, if not temperate in this respect, he is likely to become very restive at control and then rear, which is the unpardonable vice of a woman's mount.

Any horse that rears with a woman should be at once relegated to other divisions of the riding family. This is beyond appeal! Neither should a woman ever ride a roarer or a kicker, although a fairly large experience in several countries shows that more kickers are ridden by woman than man, and several high authorities have justly included woman and her horse as one of the three evils to avoid contact with when riding. This, however, was more applicable to past days, and the great number of woman's horses to-day are very good specimens and well behaved.—Exchange.

A California trainer remarked the other day that about the only difference between a matinee and a regular record is that in the first instance the fraction is left off by the timers while in the other it is added on.

Notes and News.

Read the advertisement of the Pleasanton Racing Association.

Joe Cuicello has taken his string of horses to the San Jose track.

Ed. Benyon thinks Fereno 2:05½ will be the queen of the turf if she lives.

The Fresno people are asking the P. C. T. H. B. A. to give another meeting there this year.

The elegantly bred young mare Adette by Advertiser 2:15½ out of Arion's dam is in foal to McKinney 2:11½.

Peter the Great 2:07½ will not go to England as reported, but will head the Patchen Wilkes Farm famous stud.

Three \$1000 stakes to be given at Vallejo will cause all the trainers to put the navy yard town in their itinerary this year.

The trotting stallion Black Beaver 2:25 stands seventeen hands high and weighs 1450 pounds. He is a son of Summit 2:29½, grandson of Harold.

The coming of the two-minute trotter has made things so lively on the stove circuit over East that demands are being made for official measurements of the circumference of hase burners.

Geo. Ketcham, who returned last Monday from a trip to England, announced that while absent he sold to Louis Winans of Brighton, England, The Hangman, a full brother to Cresceus 1:59½ for \$23,000.

Word comes from Carthage, N. Y., that two weeks ago the trotting mare Corinna finished a mile on the ice in 2:15, lowering the race-record on ice and equaling that made last winter by Cresceus against time.

Katrinka G. 2:14½, the brown trotting mare by Steinway that took her record over East last year, was sold at the Fasig-Tipton auction in New York last week for \$1650. She is a full sister to Chas. Derby.

Bayswater Wilkes will have quite a number of additions to his 2:30 list this year. The sons and daughters of this horse are attracting much attention from breeders who want the best qualities of the trotting families.

Chico 2:14½, owned by Lou Childs of Portland, Oregon, has been consigned to the McCarthy sale which takes place in that city, March 1st, 2d and 3d. McBriar 2:14 by McKinney has also been consigned to this sale.

One of the best looking foals at Pleasanton is a young Stam B. that belongs to Mr. R. E. deB. Lopez. It is out of a mare by James Madison, next dam Missie Medium that is by Rampart out of Belle Medium, the dam of Stam B.

George H. Estabrook of Denver has just purchased in Missouri the five year old trotting stallion Happy Walnut by Happy Heir, with a record of 2:24½ and credited with a trial in 2:13½. He may be entered in the M. and M. stake next June.

Chas. E. Cutler of 102 Clay street, this city, owns a three-year-old colt by Seymour Wilkes that is very promising. This colt is a full brother to the colt shipped to Australia last summer, mention of which is made on another page of this issue.

The Committee on Rules of the National Trotting Association will meet in New York on the 8th inst., two days before the meeting of the Board of Review. President P. P. Johnston has appointed Mr. J. C. Simpson of Oakland as one of the committee.

The citizens of Sacramento have decided to hold no Spring Street Fair this year. The last one was a losing venture and the books of the Southern Pacific Railroad Company show that it failed to draw the crowd of visitors from the outside that was expected.

It is announced that a first-class mile trotting track is to be built at Atlantic City, N. J., equipped with stable accommodations for 400 horses, a beautiful clubhouse, and fine up-to-date grandstand. The estimated cost of the whole, including 80 acres of land, is \$300,000.

The bay gelding El Milagro 2:10½ by McKinney, bred by Mr. Rudolph Jordan of this city and sold at auction for \$700 as a yearling, again passed through the salesring in New York last week. He brought \$3100 and was purchased by Mr. A. Johnson of Brockton, Mass.

W. L. Snyder is the new secretary at Detroit. Mr. Snyder was trotting editor of the *New York Telegraph* for several years, and is a son of the well known trainer, W. H. Snyder, who raced Col. Kuser 2:11½, Quartermarch 2:11½, and others in that section years ago.

Arner, the full brother to Diablo, should receive a good patronage this year. He will make the season at San Lorenzo. The family founded by his dam Bertha is destined to be one of the greatest of the many great ones that have descended from Hambletonian 10.

If the drouth continues in Southern California, it is probable that a very large proportion of the horses in training there will be sent to this part of the State to be worked. There are several tracks in this section where excellent accommodations can be had and where feed is abundant.

Four stables are now being gathered in Denver to go down the line next year. These are the stables of Edwin Gaylord, George H. Estabrook, E. A. Colburn and Wright & Stoddard. In addition Thomas Burns, Ollie Dillon, Frank Locmis and other drivers will take out an animal or two.

Mose Hart, the well known horseman of this city, is not confining his operations entirely to buying and selling fast trotters and pacers. He now has a big high stepper at Pleasanton that gazes at the stars and lifts his knees to his chin, putting on as much style as a blue blooded hackney.

H. R. Ward is handling a bay gelding by Antrim at Pleasanton that is improving very fast and bids fair to be a 2:20 trotter within the next few weeks, although he was almost unbroken when Ward began on him this winter. He has shown a mile in 2:27 already and seems to improve every time he is taken out.

According to statistics the 101,200 horses received in the Chicago market during 1903 were worth \$5 more per head on the average than the horses received in 1902. The gain over 1901 ran from \$9 to \$55 per head according to quality. Carriage pairs averaged \$455, drivers \$150, saddlers \$156 and general purpose \$122.

Dan Lawrence has a big gelding at the Pleasanton track by James Madison that is an excellent prospect for a fast trotter. It is a pity James Madison died, as his death was a loss to the breeding interests of the State. It is a greater pity that he was not patronized more by breeders as his blood will be more valuable as the years go by.

Secretary Horace Wilson, of the Kentucky Trotting Horse Breeders Association, announces that the Stoll sweepstakes for foals of 1902, to trot as two year olds, for which the association had agreed to act as stakeholder, has been declared off. There were only five nominators for the event, and they readily consented to the arrangement.

Mr. S. Christenson of this city met with a severe loss last week. His very handsome and fast mare Simone by Simmons lost twin foals by Stam B. 2:11½. Simone was nominated in the Breeders Futurity and several of the big eastern stakes, and Mr. Christenson naturally expected a fast foal from her to compete for first money in them three years hence.

Strathline, who got a record of 2:07½ last season, is out of Olivia, also dam of Black Line 2:22 and Dr. S. 2:22½, both records made last season. Olivia is by Strathmore, out of Ozoria, by Smuggler 2:15½; second dam Odd Stockings (dam of Springlock 2:19½, and two others), by Happy Medium; third dam, County House Mare by American Star 14.

Major J. J. B. DuBois of Denver has purchased from A. V. Hunter of Leadville a stable of nine pacers. The string includes the famous stallion Carbonate 2:09; his brother A. V. H. six years old; the aged broodmare Beulah, with a mark of 2:14½ as a three-year-old; Rose Quartz, seven years old, and Carbonetta a two-year-old filly by Carbonate.

W. J. Kenney, of 531 Valencia street, has just received three handsome new matinee carts and a No. 15 sulky all of the popular McMurray make. The carts are just the thing for matinee racing. The sulky is finished in white enamel and striped in blue and gold. It is a beauty. Mr. Kenney sold this week to W. T. Harris of Oakland one of the new 1904 McMurray road carts.

Budd Doble will not have any trouble filling Kinney Lou's book this season. He is receiving letters from all parts of California in regard to hooking mares, and they are in nearly every instance from men who have made a success in breeding. As Kinney Lou is limited to a dozen mares his book will be full early. The colts by him now in Tehama county are a very handsome lot of two-year-olds.

A bill has been introduced into the Kentucky Legislature making it a felony to buy or sell pools or make books in that State. If the bill becomes a law it will close the gates of every race track in Kentucky. It is alleged that there is something more behind the introduction of the bill than would appear at first sight, for the reason that of late there has been no sort of agitation for such action from or in any representative section of the population.

A feature of the sleighing carnival in Minneapolis last week was the appearance of an elegant but old-fashioned two-seated sleigh, once the property of Napoleon Bonaparte. This sleigh was purchased by a Boston millionaire in France and imported to this country many years ago; but at a recent dispersal sale of his effects by the executors of the estate the sleigh was sold and just came into the possession of J. D. Vivian, of Minneapolis.

The handsome mare Nellie R. 2:19½, whose picture appeared on the front page of the BREEDER AND SPORTSMAN of January 16th, is owned by Messrs. Frank and Joseph Long of Eureka, Humboldt county, who are prominent liquor men of that place. Nellie R. is very speedy as she showed last year when she was out for the first time. Five heats under 2:20, winning against tried campaigners with faster records, is proof that the Longs are in possession of an animal whose future will be worth watching.

Budd Doble and Homer P. Saxe have bought of Tom Gannon, of Stockton, the four year old McKinney stud colt Parker McKinney. This colt is out of a Dexter Prince mare that can show a 2:20 gait any time she is called upon to do it and she is a pure gaited trotter. The second dam of the colt is by Elect, third dam by a son of Clark Chief. They expect to make a very valuable colt of this son of McKinney and Mr. Doble will handle him a while at San Jose this spring.

A great deal of time will be saved at the race meetings if the weight rule is abolished. Since the huke sulky was invented the weight of a driver has made very little difference, if any, to the speed of a trotter or pacer, and the time consumed in weighing a dozen men at the end of each heat has done much to prolong the program until sundown. A race is seldom trotted where there are not several drivers who are overweight from ten to thirty pounds, and these heavy weights seem to win about as often as the fellows who are compelled to carry a lot of lead in their sulky cushions.

The bay gelding Birdcatcher by Direct that Monroe Salisbury campaigned on the California circuit in 1899, but failed to win with, is now one of the fast roadsters seen on the speedway in Golden Gate Park, San Francisco. Birdcatcher spent two years at Cape Nome, Alaska, and was brought back last fall by his owner, Mr. Silion, who thinks the old fellow is a better horse now than he ever was. He had a brush the other day with Mr. S. Christenson who was driving his fast trotting mare Fay Templeton, and they made the last half of the speedway in 1:06 with the mare a length or two ahead at the finish.

Theodore Coleman, formerly manager of the harness races held in connection with the New York State Fair, is authority for the statement that the Empire State district county and other fairs receive money enough from the racing tax to pay all their premiums and leave a good big balance in the treasury. Mr. Coleman says there are around fifty of these fairs and that each receives from \$1500 to \$4000 each per year without exhausting the fund. Mr. Coleman adds that he has been mixed up with these New York fairs for many years and that he never knew them so prosperous as they are to-day.

Andy McDowell writes to the *Trotter and Pacer* from Vienna, that, after a rough sea trip, he has his New York purchases of last fall all in shape to begin training. Belle Kuser 2:08, is working well, and will race successfully, like her sire, over seas. The other trainers at Vienna include the former Readville handler, Eddie Switzer, who is now with Mr. Hauser, owner of the largest stock farm in Vienna, and owner of McVera 2:10½. Ben Tappan, Dan Keefe, George Bordenman, James Brown are there in addition to Andy McDowell. The little stallion, Waincott 2:10½, is doing well in Diefenbacher's string, and should race well. The season opens March 2, over there, three weeks earlier than in former years.

In a letter written to the BREEDER AND SPORTSMAN by Mr. T. W. Barstow, owner of Nearest 2:22 full brother to John A. McKerron 2:04½, he says: "My bay filly Just It by Nearest stepped an eighth in 17 seconds last week and I think she can step one in just 16 seconds. How do you like that? There are three or four more right close by that are knocking at the door." This don't surprise us. That Nearest will be a great sire of speed is absolutely certain. He just can't help it. He is bred to be a sire. When Alone 2:09½ came out some of the knockers said that she came by chance and Nearest would never get another, but there is one at San Jose now that is just as good as Alone and will not stop at 2:09½. Alone will knock several seconds from her mark the first chance she gets. Nobody ever saw a really poor one sired by Nearest. They all show speed.

James Butler, of New York, who owns East View Farm, the home of Direct 2:05½, and whose racing string is managed by Monroe Salisbury of California, has adopted a course exactly opposite to that of most breeders for disposing of his surplus stock. Most breeders sell the untrained products of their farms, preferring to keep those which training has shown to be good race horses, but Mr. Butler has decided to offer at public sale each fall the record horses in his stable, believing this course will suit buyers better and he himself will take the chance of getting another racing stable from the green youngsters on the farm. Mr. Butler now has one of the largest hands of broodmares in the country and it is necessary for him to dispose of a part of his young horses each year. It is just possible that his decision to sell his record horses instead of his untrained youngsters, will turn out to be an excellent thing for him.

An interesting incident in connection with the meeting of the joint committee which rendered the absurd decision regarding Lou Dillon's record to high wheel sulky, was the opinion given by the veteran bicycle rider, Thomas Eck, regarding the probable benefit a trotter or pacer would derive by being preceded by a pacemaker, as Lou Dillon was in her fast miles last fall. Eck is considered an expert on matters pertaining to pace used in bicycle races against time, and he stated that so long as the rider kept right up against the motor or the object in front setting the pace, he will be greatly benefited by it, but the instance he gets over five feet behind the pacemaker he is out of the vacuum and unable to get up again. When shown two photographs taken at Readville, Mass., the day Lou Dillon first trotted in two minutes, which showed, at the two different points in the mile at which the photographers were stationed, the runner to be from 15 to 20 feet in front of the trotter, he stated that the pacemaker, as far as wind resistance was concerned, was of no benefit whatever.

Thoroughbreds as Pacers.

Frederick Watson has an interesting article in the last number of the *American Horse Breeder*, from which we make the following extracts:

Some two or three weeks ago I mentioned the fact that we should almost certainly see one or more strictly thoroughbred horses out the coming season, as pacers, with "the straps" on. This piece of news, together with my comments on the possibility of teaching thoroughbreds to pace, rather startled some people, especially our old friend "Raymond," and really, I am not surprised that it did, for the idea is certainly rather startling anyway. There have been students of breeding and of the horse in general who have asserted the fact that no thoroughbred horse was ever known to pace, but this idea is disproven by actual eye witnesses. Lots of times I have seen thoroughbreds pace when exercising on the Ocean Boulevard in Brooklyn, and also at the tracks, both in their work and even in actual races. Two years ago, the exact date I have forgotten, I saw a thoroughbred actually win a race on a pace. The facts of the case were these: The horse was winning "going away," as they say, and it was evident that the jockey was trying not to show up the horse any more than he could help, so he was taking him back as much as possible, and did so to such an extent that he pulled the horse into a pace, and he went under the wire in that way. Hard to believe, I know, but I saw it, and believe that I can tell whether a horse is pacing or running.

Last year, to be exact, on July 14th, at the Brighton Beach track, there was a horse called Minotaur, a bay gelding by Eon, dam Mermaid, that cooled out on a pace. He paced, walked on a pace in the paddock just as many a hopped pacer has been seen to do from regular habit. There was no question about this, for the case attracted my attention so much that I stood and watched him make five or six circles of the paddock, and he walked on a pace all the time. This peculiarity I marked on my score card, which accounts for the fact of being able to quote the day and name, etc., of the horse. If this horse walked on a pace without being taught by the help of the straps, why could he not be taught with the straps to pace at a faster gait than a walk?

The purpose of my original article regarding putting the hobbles on thoroughbreds was to show that as hopped pacers are artificially gaited, it would be just as well to start in with all the actual speed that could be obtained and teach that to pace, so that instead of taking a horse that could not go a mile at any kind of a gait, trot, pace or run, in two minutes, and by putting the hobbles on him make a fast pacer out of him, why not start in with better than two minute speed at once and put the hobbles on a thoroughbred and teach him to pace. I have always contended that a hopped pacer was an artificially gaited animal and was made so by force not by education. Without the "controlling influence" of the straps some of these pacers are apt to change their gait back to the original fastest gait of the natural horse, the run, quite a strong argument in favor of my theory that the original pacers carried quite a lot of running blood. I have always been an anti-hoppleman and so argued that, if we are to have horses on the track that are compelled to pace because their legs are tied together in such a manner that it was impossible for them to move them at any other gait than a pace, why take a slow horse and force him to pace when you can get a faster one and force him to pace by tying his legs together so that he must move them at the pacing gait.

Until the introduction of instantaneous photography it was generally believed that when a horse ran (galloped) he gathered his two front legs under him at the same time and made a series of jumps, but a series of pictures of horses in the act of running shows that this is not the action of a running horse at all; in fact he hardly ever gets into such a position. Sometimes he has only one leg on the ground at a time, sometimes two, not always two front or two hind, as the action of jumping suggests, but sometimes one front and one hind leg, and sometimes he has three legs on the ground at the same time. This shows that the action of running is not actually putting down the two front feet on the ground together and then putting down the two hind feet, as was generally accepted as the action of a running horse. In some of the pictures it is seen that the horse has one front foot and the corresponding hind foot, on the same side, on the ground at the same time, only, instead of their positions being both extended to the front or rear, as is the case with a pacer, the front foot is extended to the front and the hind foot is extended to the rear. Many of these pictures of runners in action show the same positions as can be noted in pictures of pacers in action, and in the latter it can often be noted that the pacer's feet are not on the

ground exactly in the manner that it has been generally supposed that they were.

I contend that the pacer is running at one side at a time, and that he gets his gait from trying to break from the trot to a run, but "splits the difference," and only breaks at one side at a time. This is due to two causes. In the case of the pacing bred pacer, his inherited idea to go on a trot, which he gets from the coarser and slower side of his family blood, makes him try to perform on a trot, while the inclination to run which he gets from the thoroughbred strain that he inherits prompts him to run, and both inclinations being equal he does half of each, and the result is that while he picks up his feet with the action of a trotter he picks up the two together that he would if he was going to run, and the result is a pace.

Take a runner that can run a mile in 1:40 and ask him to pace in two minutes, and you are only asking him to travel within 80 per cent of his actual speed capacity; but take a trotter that can trot in 2:20 and ask him to pace in 2:05 and you are calling upon him for a much higher percentage of his speed capabilities, possibly even his limit, as few, if any, horses that are trotting bred can run a mile as fast as they can pace one, although when pressed to the limit of their speed when on a pace they will try to go faster by breaking into a run, and for a little way can go faster. I am firmly of the belief that thoroughbreds can be taught to pace, and as artificially gaited horses, such as hopped pacers, are allowed on the tracks and are even encouraged, it would seem like good judgment to get the very fastest material possible 'to manufacture them from,' and, therefore, why not take the horse that you know can go faster by far than the trotting bred one?

If thoroughbreds can be taught to go in harness and to go on a trot while in harness, and they are so taught, why cannot they be taught to go on a still faster gait, the pace. When this is done it will be the most convincing evidence that the hopped pacer is a manufactured article, and should not be permitted to compete in the same classes as the pacer that has been educated to pace, and not forced to by tying his legs together in such a manner that he is not able to do anything else but pace. I do not want to see the thoroughbred degraded into a hopped pacer, but I believe that if a few were so sacrificed it would result in the final and permanent abolition of what I have always considered a disgrace to the sport of harness racing, the hobbles, and this opinion is shared by a good many who are not influenced by the ownership of one or more pacers that have to wear the straps.

Admiral Dewey 2:14 1-4 Brings \$5900.

Admiral Dewey, the six-year-old son of Bingen 2:06½ and Nancy Hanks 2:04 brought the top figure at the Fasig-Tipton Midwinter sale at New York last month. The *Trotter and Pacer* says:

"The opening day's star lot was, of course, the wonderfully fast Admiral Dewey 2:14½, at three, from J. Malcom Forbes' select stud at Ponkapog, Mass. He is a son of Bingen 2:06½, that as a two-year-old trotted a public exhibition at Portland in 2:12½, the nearest to Arion's incomparable 2:10½ yet trotted, while his dam was the old turf queen, Nancy Hanks 2:04. For weeks everyone has been registering guesses as to the last bid when his time came to change owners, and it was not generally expected that he would command over \$3500 despite the extreme speed inheritance and possession of a low race record at three. Although he is an untried stallion, his superb breeding will entitle him to the consideration of every student who knows a good pedigree, and his success in the stud is conceded.

Three men wanted the big bay, Hon. J. M. Johnson, breeder of Sadie Mac 2:11½, of Calais, Me.; Andrew J. Welch and Warren A. Bacon, Paris, Ky. Someone started the bidding at \$2500 and it rapidly run to double the figure. The last instalment found the trio mentioned fighting it out at \$100 bids. The gentleman from Kentucky stopped at \$5700; the Maine breeder went his limit at \$5800 and Orlando Jones, who represented Mr. Welch, got the prize at \$5900 cheered to the echo.

He will go to the stud probably at Charter Oak Park, and should sire early and extreme speed. Mr. Welch has heretofore been singularly unlucky with stallions as Wild Rake 2:22½ and Bow Bells 2:19½, both of which he was interested in, died early and sudden deaths. With Atlantic 2:21½, he had some luck in the palmy days of racing long ago. The Admiral must prove a good investment."

A finesurrey, one of the best made, and handsomely finished is for sale at about half its value by the Kenney Manufacturing Company, 531 Valencia street, San Francisco.

Strike!—if they don't give you Jackson's Napa Soda when you ask for it.

Ready Reference Table.

The following table gives the time by eighths of miles that are covered at any rate of speed from three to two minutes:

1/8	1/4	3/8	1/2	5/8	3/4	7/8	ONE MILE
22 1/2	45	1 07 1/2	1 30	1 52 1/2	2 15	2 37 1/2	3.00
22 3/4	44 1/4	1 07 1/4	1 29 1/4	1 51 1/4	2 14 1/4	2 36 1/4	2 59
22 1/2	44 1/4	1 06 1/4	1 29	1 51 1/4	2 13 1/4	2 35 1/4	2 58

Warranted to give satisfaction.

GOMBALTS' CAUSTIC BALSAM

A safe, speedy and positive cure for

Curb, Splint, Swollen, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, etc., it is invaluable.

Every bottle of Gombal's Balsam sold is warranted to give satisfaction. Price \$1.00 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circular, 10 testimonials, etc. Address THE LAWRENCE-WILLIAMS COMPANY, Cleveland, Ohio.

ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

The World's Fair Dog Show.

The kennel show at the World's Fair in St. Louis will be held Tuesday to Friday, November 8-11. In order to conform to the international character of the Universal Exposition it will be held under its own rules in which, however, full recognition will be given to the kennel clubs of the respective countries which may be represented. A certificate showing registration in the studbook of the country from which the animal is exhibited will be required. Thus any applications for the entries of dogs of recognized breeds owned in the United States must be accompanied by a certificate on a prescribed form showing registration in the American Kennel Club. Such certificate from secretaries of kennel clubs in other countries must be attested by the chairman of that country's commission to the World's Fair. According to the preliminary plan entries will close September 20. The classification is intended to include only established breeds of record, and work upon it and other details relative to the Universal Exposition kennel show are now well in hand under the direction of the Chief of the Department of Live Stock, Mr. F. D. Coburn.

The Universal Exposition kennel show of 1904 will be held for the promotion of the special interests of dog fanciers in all parts of the world, and on this account judges will be chosen for their especial qualifications and their intimate knowledge of the characteristics and qualities making valuable the respective breeds upon which they are to give judgment. The rules provide for reckoning of ages from date of birth to September 1, 1904.

In some ways the World's Fair kennel show rules will make for new standards, but only on such lines as are worthy of a universal exposition and creditable to the industry concerned. The plan for holding the dog show at the World's Fair and a preliminary sketch of the classification and rules have been submitted to the officials of the American Kennel Club and the Canadian Kennel Club and approved by them.

The foregoing has been commented upon in a very pertinent manner by the *American Stock-Keeper* which gives the following timely suggestions:

"We do not know who is advising the World's Fair people at St. Louis on the coming great dog show they are announced as going to assemble, but it strikes us that they are in need of a little wholesome advice in the way of preliminary and recognized arrangements. The trouble with these affairs is that every one wants to have a finger in the good thing. That is what knocked the Chicago Fair show. The Pan-American was more of a private affair under established procedure, but it is evidently the intention of the St. Louis Chief of the Live Stock Department that the show be run under rules and regulations that apply more or less to the general departments of the Fair, but not to dogs as now prescribed by the teachings and experience of years.

The Fair managers should bear in mind that very few if any dogs would come over to America from any country expressly for this show, if the experience of the Pan-American goes for anything, although dogs might be imported at the time for this and other shows in the same way that they are being imported now for the W. K. C. show this month, but probably half a dozen would be the limit. The idea, therefore, that the international phase will cut any figure is without grounds, and to compel each entry to be registered in the stud book of the country it comes from and show a certificate to this effect, is not only an imposition on American dogs, but will be the needless foundation of needless difficulties, for the American Kennel Club, under whose national rules the show should be governed, are ample for the purpose, and to require this international registration only serves to show the ignorance on the subject that is father to the above quoted remarks.

The show ought to be a representative one for all breeds, with a classification and prize list that would draw out the best in each breed, so that at future fair shows one could mark the progress of each breed as we do with a New York show, only a show like this should be more national in scope. This part of the great fair ought to be put in the hands of some practical manager, with sense enough to be diplomatically mindful of the international and world wide auspices under which he labors. But the American Kennel Club should have jurisprudence over the undertaking so far as the rules go. Next thing we presume we shall hear of the Jury list that will make the awards, in the same manner that the manufactures are passed upon! But what's the good of kicking? If there are a thousand entries of dogs, and each dog has to be registered in the A. K. C., our worthy secretary will wear the smile that won't evaporate, and in his mind's eye will rise up that cherished plan of an abode up town where the weary will be at rest and the rent man cease from troubling."

If Johnnie Jones has seven dogs,
And every dog is white;
And fourteen cats came chasing round,
Each one as black as night;
And each two cats have eighteen lives,
Less three destroyed by rats,
How many lives must three dogs take
Before they kill eight cats?

Jackson's Napa Soda does not tangle the feet

Northern Show Notes.

Under the caption "Kennel Clubs Disagree" the situation on the northern circuit is commented upon as follows by the *Portland Oregonian*:

The six leading kennel clubs of the Pacific Coast have crossed their wires on dates for the approaching bench shows, and, unless the clubs at the northern end of the circuit consent to hold their shows after San Francisco, Portland, Seattle and Tacoma, the Portland and San Francisco shows will be held at the same time that the Tacoma and Seattle shows are being held. This will mean that San Francisco and Portland will be in a circuit by themselves while the British Columbia and Sound cities will be alone and no Oregon dogs will show in the North, while few northern dogs will be benched at the San Francisco and Portland shows.

President James A. Taylor of the Portland Kennel Club has received a letter from E. F. Willis, vice-president of the local club, who is now in Seattle, stating that the Vancouver Kennel Club wishes to open the circuit on March 31st, the show to close on Saturday, April 2d. Victoria wants the week following Vancouver, ending April 9th; Seattle the next week ending April 16th, and Tacoma the week ending April 23d.

This arrangement would suit Portland very well, were it not for the fact that the San Francisco show is scheduled for April 13 to 16, inclusive, the only time that the 'Frisco club can secure the Mechanics' Pavilion, the only available place to hold the show. San Francisco and Portland have secured the services of James Mortimer, of New York City, to judge the 'Frisco and Portland shows, the Portland show to follow that in the South, and, unless the Northern clubs agree to hold their shows after those of 'Frisco and Portland they will be entirely cut out of the circuit.

Who would be the losers by this is a matter of opinion. There is no doubt that many of the British Columbia dogs would come to Portland and to San Francisco, which would mean a great loss to Seattle and Tacoma. None of the Portland or San Francisco dogs could go North, as they would miss the shows held in their own cities, and the fact must be recognized that the dogs from this end of the circuit have always been a strong point in the Northern shows.

The officers of the Portland Kennel Club, as well as the many fanciers who are following the matter, fail to see why it would not be a great advantage to the other clubs to follow up the San Francisco and Portland shows, since it would mean many more fine dogs on the Northern benches, and they would prosper by the later dates on account of the more settled state of the weather.

Grant Scott departed recently for Seattle, where he will meet E. F. Willis, who, with Mr. Scott, was appointed by President Taylor to represent the local club at the meeting to be held in Seattle of delegates of all the clubs of the Pacific Kennel League, which consists of Vancouver and Victoria, B. C., Seattle, Tacoma, Portland, San Francisco, Salem and Sacramento. The two latter clubs, however, will not be represented at the meeting, since the Salem Club is a new organization and will abide by the decision of the other clubs in the circuit, while Sacramento has been recently organized and has never held a show.

The circuit schedule will be discussed, as well as the much agitated question of affiliating with the American Kennel Club. A new constitution and by laws for the Pacific Kennel League will be drawn up and much other business of importance will be transacted.

It is not expected that the question of joining the American Kennel Club will be definitely decided at this meeting, but a committee will in all probability be appointed to thresh the matter out with the A. K. C. Heretofore, the A. K. C. has refused to make any concessions to the P. K. L. clubs, and, unless a reasonable offer is made, the Pacific Kennel League will remain the governing organization of the Coast circuit.

The value of the American Kennel Club studbook is appreciated by the clubs in the P. K. L. circuit, and this has been the source of practically all the disagreement. The American Field studbook is recognized to be the equal of the A. K. C. book as far as it has been opened for entries, but many of the toy and pet classes are not included. Should this be promised in the near future, there is no doubt that the Pacific Kennel League would adopt the Field book.

It has been repeatedly demonstrated that shows can be successfully held under rules other than those of A. K. C. making. The Pacific Kennel League, as well as all the clubs, is in a thriving condition. Two new clubs have been added to the list during the past year, Salem having been granted admission and having held a successful show, while Sacramento has applied for membership. Tacoma enthusiasts are reorganizing the club in that city and greatly improved shows may be looked for at the Northern end of the circuit this year, in case an agreement can be reached in regard to dates.

J. J. Bostock of Victoria, B. C., has recently imported from Mr. Vlcary of Newton Abbot, England, the smooth Fnx Terrier Vall, brother to Veronetz by Velocipede. Vall is inbred to Ch. Veracity on both sides, with one cross of Despoller.

Victoria Show.

A successful one night show was held by the Victoria Kennel Club on Thursday evening, January 28th at Victoria, B. C. Dr. G. L. Milne judged Cockers Mr. Wm. Hodgson passed on the various terrier hreeds and Mr. F. Turner placed the ribbons for Collies, St. Bernards and the miscellaneous class.

The winners of silver medals were:
C. A. Goodwin, for best Cocker Spaniel, won by the black Cocker Little Dorrit.

Mr. J. J. Bostock, for best Fox Terrier, won by Remson.

J. McIntosh, for best Collie, won by Prince.

Miss E. Turner, for best in miscellaneous terriers, won by Bedlington Terrier Dave.

S. Creech, for best in open miscellaneous class, won by Irish Setter Nellie.

R. E. Hanson, for best Irish Terrier, won by Nailer.

R. Tubb, for best St. Bernard, won by Beauty.

The regular awards in the various breeds and classes were:

COCKER SPANIELS (Black)—Puppy dogs—1 Dr. A. J. Garesche's Jack; 2 Mrs. J. W. Creighton's Jesmond Rollo; 3 Miss H. Clifford's Pat. Open dogs—1 Dr. A. J. Garesche's Jack; 2 J. W. Creighton's Jesmond Eclipse; 3 Dr. Hannington's Waver. Puppy bitches—1 Mr. McEnnery's Hatley Gyp; 2 Dr. Garesche's Victoria Tot. Open bitches—1 G. A. Goodwin's Little Dorrit; 2 Mr. McEnnery's Hatley Gyp; 3 Dr. Garesche's Victoria Tot; res. Messrs. Litchfield & Daniel's Hampton Duchess. Winners—Dogs and bitches—1 Little Dorrit, res Jack.

COCKER SPANIELS (other than black)—Puppy dogs—1 Mrs. H. P. Johnson's Rex, 2 C. A. Goodwin's Victoria Obo, 3 Miss Gladys Creighton's Jesmond Sparta. Open dogs—1 C. A. Goodwin's Victoria Bud, 2 Miss E. Skinner's Bonnie Charlie, 3 Mr. Leeson's California. Puppy bitches—1 Mrs. Smith's Lona, 2 Mr. Leeson's Dutchess. Open bitches—1 D. A. Upper's Rose of Corrheen, 2 C. A. Goodwin's Pippin, 3 Messrs. Litchfield and Daniels' Lady Marples. Winners, dogs and bitches—1 Rose of Corrheen, res Rex.

FOX TERRIERS (smooth)—Puppy dogs—1 Mrs. J. J. Bostock's Remson, 2 J. K. Angus' Foxy, 3 Mrs. R. Machin's Remington. Open dogs—1 J. K. Angus' Foxy, 2 E. T. Brooks' Joe, 3 F. L. McGregor's Nip. Winners, dogs—1 Remson, res Foxy. Puppy bitches—1 J. R. Saunderson's Vex, 2 J. K. Angus' Vic, 3 W. Craig's Minnie. Open bitches—1 J. R. Saunderson's Vex, 2 W. E. Oliver's Betty, 3 F. Francis' Rita. Winners, bitches—1 Rex, res Betty.

IRISH TERRIERS—Open dogs—1 R. E. Hanson's Nailer, 2 Mr. Carlow's Punch, 3 C. C. Johnson's Muggins.

SCOTTISH TERRIERS—Open dogs—1 Mrs. W. A. Ward's Tatters, 2 W. E. Oliver's Georgie.

BULL TERRIERS—Open dogs and bitches—1 J. W. Robinson's Lady Smith; 2 E. T. Brook's Max.

MISCELLANEOUS TERRIERS—Open dogs and bitches—1 Miss E. Turner's Bedlington Dave; 2 Mr. McAnnally's Biddy; 3 C. Berryman's Scottie.

COLLIES—Puppy dogs—1 J. McIntosh's Prince; 2 Mrs. L. Russell's Pilot's Widow; 3 F. D. Hodgson's Buller. Open dogs—1 J. W. Clark's Nip. Winners dogs—1 Prince; res. Pilot's Laddie. Puppy bitches—1 W. Rosa's Queenie. Open bitches—1 Mrs. J. H. Meldram's Beauty. Winners bitches—1 Queenie; res. Beauty.

ST. BERNARDS—Puppies—1 R. Tubb's Beauty; 2 Mrs. J. R. Moore's Rena. Winners—1 Beauty; res. Rena.

MISCELLANEOUS CLASS—Open dogs and bitches—1 S. Creech's Irish Setter Nellie; 2 W. Levy's Spot.

DOINGS IN DOGDOM.

Borzoi are coming to the front rapidly in the East. The recent interest shown in the breed is taking on a broader scope. There is a demand for these dogs here and experience has proven that they do remarkably well on the Coast.

Express rates are creating much discussion among Eastern fanciers. A difference in express charges by various lines makes it very burdensome for shippers. This "obstacle" has been an iron in the soul of Coast fanciers also, with the added handicap that there is but one express company to ship by and they do business on a liberal scale—to themselves.

The judges for the Pittsburg show are: Major J. M. Taylor, Foxhounds, Pointers, Setters and Beagles; Mr. W. C. Codman, Bulldogs, French Bulldogs, Scotties, Poodles, Yorkshires, Black and Tans, Pugs, Poms, Japs and English Toy Spaniels; Mr. James Mortimer will have all other breeds; Mr. E. M. Oldham will act as superintendent.

The good wire hair Aldon Master is now in a Vancouver, B. C., kennel.

The New England Kennel Club premium list is full of enough good things to bring out a rousing entry.

James Mortimer will judge at Buffalo all breeds excepting Fox Terriers, which come under Mr. Caldwell, and Setters and Pointers which will be looked after by John Davidson.

Since Ch. Woodcote Wonder has been in the stud of Bonnyhred Kennels he has been in steady demand at \$50 per. American Belle whelped on January 15th thirteen puppies (7 dogs) to the old Trojan. Both Wonder and Belle were turned down here last spring in favor of a bitch that was offered for sale a few weeks prior to the show for \$40. This bitch was owned by a Bull Terrier breeder who has bred and shown the breed here for many years. Either he did not know what he had or the judge left his glasses at home. If we are not mistaken, Wonder was lost in

a large class of a New York show, by the same judge, shortly after his appearance in the ring on this side. His treatment here showed consistency, at least, if nothing more. Eastern lovers of the breed evidently know something about good Bull Terriers.

Western Belle (Ch. Woodcote Wonder-Ch. Yorkville Belle) whelped January 4th nine puppies (5 dogs) to Bonnybred Kennels' Ch. Bloomsbury Burge out of Greenhead Viola. He is a young sire imported from Mr. Monk's Bloomsbury Kennels as an outcross on the Woodcote Wonder-Fire Chief families. Ten hours after the whelping above noted Western Belle was delivered of two more bitch puppies. Woodcote Wonder stock is prepotent as well as producing.

Mr. Thos. S. Griffiths informs us that the string of brood bitches at Glen Tana Collie Kennels have been increased by the recent purchase of the good one Marion (Ch. Alton Monty-Brandane Marionsea). The dam will be remembered as a winner at the December show in this city. Marion is better in head and ears than her dam; she was bred January 8th to "the best working Collie in the world" and a prize winner as well.

Mr. Griffiths has recently sold three imp. Lenzis Prince dog puppies—to Mr. Day, Anaconda, Mont.; R. E. Miller, Caldwell, Idaho and to G. Alberts, Dillon, Mont. He states further that he will show a kennel of four Collies at Victoria, Seattle, Tacoma, Portland and, if dates are right at Frisco.

Dates won't be right and Mr. Griffith is only one of many enthusiastic fanciers we have heard from who will be unable to make the circuit.

J. B. Thomas, Jr., secretary of the Russian Wolfhound Club of America, writes us as follows:

"I take pleasure in announcing that the Executive Committee of the Russian Wolfhound Club of America have offered special prizes for the coming shows at Boston, Pittsburg, Chicago, Buffalo, Rochester, Atlantic City and Franklin.

Your attention is called to the entry list of eighty-nine in the Russian Wolfhound classes at the Westminster Kennel Club show, nearly twice the previous record of entries.

The final organization meeting of the club will be held during the show, on Wednesday, February 10th, at 9 P. M., at Madison Square Garden. Constitution and standard will then be adopted."

The Bull Terriers' Breeders' Association held a meeting at the Ashland House, New York, on Wednesday evening, Jan. 20. The members present were: Messrs. F. F. Dole, president, John W. Britton, Clair Foster, secretary, Dr. A. P. Northridge, treasurer, G. Edward Erscher, Clifford Drake and F. Freeman Lloyd.

The following new members were elected: Dr. Robert L. James, Blue Island, Ill.; Sidney Britcher, Montreal; James Cole, Kansas City; Frederick Warren, Buffalo, N. Y.; R. H. Elliott, Ottawa, Canada; H. C. Kittredge, Dayton, Ohio; A. G. Ford, New York city; J. W. McCauliffe, Scranton, Pa.; H. C. Hitch, Winnipeg, Manitoba; Lawrence Buckley, Chelsea, Mass.; F. J. Moreton, Le Mars, Ia.; Frank L. Watkins, Portland, Ore.; John L. Price, West New York, N. J.; John C. Zimmerman, New York city; W. A. Starrett, Washington, D. C.

The total number of members is now twenty-nine, with many more applications to be passed upon. The membership includes about all the prominent breeders and exhibitors, and is a select list.

At this meeting it was decided that after the annual meeting to be held on the third day of the New York show, in February, that a stiff membership fee be applied and entry from that time on into this club will be kept select and qualifications will be strictly scrutinized.

Another proposition was carried through, viz., the offering, or rather, the guaranteeing, of classes at the New York show for American-bred Bull Terriers. The classes will be for heavyweight dog and heavyweight bitch, and also for lightweight dog and lightweight bitch. This must be considered quite an outlay for a young club, but the guarantee was soon made up.

Ireland Doc is by Ireland, Yet out of Irish Lass and was bred by Mr. C. A. Verrin of Belfast, Ireland. He was whelped in August, 1892.

William Davis and Peter Petersen, Eel river fishermen, are now under arrest at Eureka for illegally maintaining a set net at the mouth of Eel river. Deputy State Fish Commissioner W. P. Huestis arrested the men January 24th when he caught them in the act. The case is triable in the Superior Court and a penalty of not less than a fine of \$100 and the confiscation of the nets can be exacted in case conviction is secured.

County game warden George Neale, of Sacramento, and deputy state fish commissioner Welch recently went to Blue Canyon where they succeeded in arresting two men for violation of the game law. The culprits were J. C. N. Iversen and his son, who were caught with venison in their possession. They were taken to Auburn and after a hearing before a J. P., they were adjudged guilty and were fined \$25 each, which they paid.

The long, stiff tail-feathers of a woodpecker enable the bird to cling to the trunk of a tree in an upright position for a long time and hore away for food. The bill of a woodpecker is often as strong as that of a bird of prey, and in the woodpecker of northern Maine the bill is found at its greatest development. The tongue much resembles an angle worm, and is very long and admirably adapted for sucking sap. Sometimes the tongue is not only long and hrush-like, but barbed at the point, so that it can impale its prey. The feet are adapted for swimming in various ways.

Save the Birds.

The Millinery Merchants' Protective Association, at a special meeting held recently in New York, decided to abandon all agitation against the so-called bird laws and to accept the prohibition against the use of the plumage of most domestic birds. Even the contemplated attack on the constitutionality of the Lacy law has been abandoned, although the merchants' feulsure, in the light of recent court decisions, that such an attack would be successful.

The reason for this change of attitude, says the *New York Times*, is that the merchants have become convinced that public sentiment is substantially with the laws and that the further agitation of the subject will only tend to injure the trade without bringing any corresponding benefit. This will not prevent the fight being continued against individual instances of "graft" in the enforcement of the laws, particularly in some of the western states, where the enforcement of the laws is in the hands of irresponsible game wardens, whose compensation is derived from a share of the penalties collected.

As a matter of fact, the use of the plumage of most wild birds has been almost entirely discontinued during the last year or two, and their place has been taken by the feathers of the domestic fowls, which are now dyed and otherwise prepared so cleverly to simulate the plumage of the most highly colored wild birds as to deceive any but the most expert ornithologists.

Germany is the great source of supply of this artificial plumage, and immense quantities of it are now being imported. "Coque" feathers from the ordinary harnyard fowl are the feathers chiefly used. The increasing use of "self trimmed" hats, or hats in which the trimming is an imitation feather, made of the same material as the hat itself, are also displacing the use of feathers very largely.

The bird laws, which have given rise to so much agitation, are the result of the work of the Audubon societies and the ornithologists' unions. They are with minor differences practically the same in all the States, and, broadly speaking, provide for the protection of song birds, insectivorous birds, and birds which serve any useful purpose or are ornamental.

One of the notable changes is the abandonment of the use of sea gulls' wings, which a few years ago formed one of the most popular of trimmings. The use of the wings was abandoned voluntarily by the trade when it was shown that the gulls, which are useful as scavengers on the sea coast, were threatened with extermination. It is alleged that since the use of the birds for millinery purposes has been abandoned the gulls have increased in numbers so rapidly that they have become a nuisance in many sections. It is said that they even follow the fishing smacks into the wharves, roosting on the spars of the vessels. The place of their wings for millinery purposes has been taken by the wings of the domestic pigeon.

The Lacy law, about which there has been so much agitation, is a Federal law providing that plumage of the class prohibited in any State, no matter what its origin, becomes subject to the police laws of that State as soon as it enters its borders. This law has been interpreted to apply even to imported plumage, when it is of the same species as that protected in the State in which it is found.

The importers and dealers have held that when the United States Government has recognized the traffic, by levying and collecting duty on the plumage, it has no right to make any law which will interfere with the free traffic in the article. The recent decision of Judge Kellogg in the New York Court of Appeals, denying the application of the game laws to game imported from Canada, even in the close season, is held to be a blow at the Lacy law, but rather than continue an agitation, which seems to be unpopular, the millinery trade has decided to accept the law and cease the traffic in plumage, whether imported or domestic, to which objection is made.

This decision, of course, will have no bearing on the sale of ostrich and other fancy feathers, against which there is no prohibition, and which are the plumage of tropical birds, of species which are unknown in this country.

Charles W. Farmer, Secretary of the Millinery Merchants' Protective Association states:

"We have adopted this attitude solely in deference to popular opinion. We are tired of being abused as destroyers of the country's song birds and insectivorous birds. We know that the millinery trade is not responsible for one-half the destruction of the birds as are the pot hunters, who operate in such large numbers in the neighborhood of our large cities. There is not a piece of railroad construction or other big work where large numbers of Italian laborers are employed that does not furnish hundreds of these pot hunters, who kill everything that comes their way ruthlessly.

"The millinery trade has not for several years used any appreciable quantity of domestic birds. Indeed, so strong has been the feeling against it that no reputable merchant would buy anything that he was not absolutely sure was imported.

"The public agitation has been so strong, however, that the retailers complain that women who buy even the plainest feathers seem to feel that they are doing something wrong. We decided, therefore, that the best plan all around was to abandon the use of the feathers objected to, no matter what their origin, so that the public can feel assured that it is not running counter to either law or sentiment in wearing the feathers that are offered.

"We are convinced that the Lacy law is unconstitutional, but we will let it alone. We will, however, keep up the fight against the blackmailing enforcement of the bird laws in some of the states. We have no objection to the state laws themselves as a whole, but the method by which they are enforced in some states, and particularly in Illinois, has degenerated into plain blackmail."

Pendleton Tournament.

The second annual inanimate target tournament of the Pendleton Sportsmen's Association at Pendleton, Or., terminated on January 23d. Over 100 shooters from various points in Oregon, Washington and Idaho participated in the two days' shooting. Weather conditions were favorable and good average scores were the result, the meeting being successful in every particular.

H. J. Stillman, of Pendleton, made the highest average, 90.75%, winning a gold medal. T. B. Wars, of Spokane, was second, with 90.25%.

This squad scoring the highest general average was that of Spokane, with 87.50%; Pendleton squad second, with 87.50%. W. Ayers, of Pendleton, made the lowest average, 69.25%, and was given the consolation prize, an Indian blanket. The winning guns in the various events were as follows:

Event 1, 10 targets, purse \$40—First money, Waite, Palmer, Jaeger with 10 breaks; second, Tannahill, Peck, Watkins, Breck, Hallohan with 9; third, Shelton, Caldwell, Baker, Blake, Maper, P. J. Stillman, A. D. Stillman, Beck, Clark, Taliaferro, Minor, Forbes with 8.

Event 2, 10 targets, purse \$40—First, Winters, Tannahill, Sewell, Cowins, Ware, Forbes with 10; second, P. J. Stillman, Hock, Clark, Peck, Watkins, Kincaid, Minor with 9; third, Shelton, Caldwell, Baker, Blake, Thompson, Brady, A. Stillman, Waite, Kershaw, Irwin, Ganes, Hallohan with 8.

Event 3, 15 targets, purse \$61—First, Sewell, E. H. Stillman, Hock, Waite, Forbes with 14; second, H. Palmer, Maper, Clark, Jaeger, Roberts with 13; third, Kershaw, Peck, Matlock, Ware with 12.

Event 4, 15 targets, purse \$61—First, H. Palmer, Sewell, Hock, Irwin, Ware, Forbes with 15; second, Tannahill, Maper, H. Stillman, Kershaw, Roberts with 14; third, Shelton, Winters, D. Palmer, Baker, Blake, A. Stillman, Waite, Watkins, Kincaid, Matlock, Ganes with 13.

Event 5, 20 targets, purse \$83—First, Waite, Forbes with 20; second, Hock, Ware, Tannahill with 19; third, H. Stillman with 18.

Event 6, 25 targets, purse \$102—First, Forbes with 25; second, Blake, Maper, Matlock, Cowins with 24; third, Caldwell, Thompson, A. Stillman, Hock, Clark, Roberts, Beck with 23.

Event 7, 10 targets, purse \$39—First, Blake, Taliaferro, Irwin with 10; second, Shelton, Sewell, Hock, Clark, Waite, Peck, Roberts, Cowins, Ganes, Hallohan, Ware, Forbes with 9; third, Tannahill, Nettle, Spencer, Ayers, Maper, Brady, H. Stillman, A. Stillman, Watkins, Jaeger, Matlock, Beck with 8.

Event 8, 15 targets, purse \$60—First, Sewell, Maper, Watkins, Cowins, with 15; second, Shelton, Winters, Tannahill, H. Stillman, Waite, Roberts, Matlock, Ganes, Beck, Ware with 14; third, Nettle, Spencer, Thompson, Shields, Hallohan, Forbes with 13.

Event 9, 15 targets, purse \$58—First, Tannahill, H. Stillman, A. Stillman, Matlock, Ware with 15; second, Shelton, Nettle, Sewell, Waite, Irwin, Ganes, Hallohan, Forbes with 14; third, G. Palmer, Blake, Maper, Hock, Watkins, Shields with 13.

Event 10, 15 targets, purse \$57—First, Caldwell, Palmer, Baker, H. Stillman, Matlock with 15; second, Tannahill, Thompson, Kershaw, Peck, Roberts, Irwin, Beck with 14; third, Shelton, Winters, Nettle, Sewell, Waite, Watkins, Jaeger, Taliaferro, Shields, Hallohan, Ware, Forbes with 13.

Event 11, 25 targets, purse \$95—First, Clark with 25; second, Caldwell with 24; third, Nettle, Peck, Watkins, Ware with 23.

Event 13, 10 targets, purse \$35—First, H. Palmer, Peck, Watkins, Forbes with 10; second, Winters, Caldwell, G. Palmer, Tannahill, Baker, Blake, Sewell, H. J. Stillman, Ware with 9; third, A. Stillman, Hock, Blake, Kincaid, Irwin, Cowins, Ganes, Hallohan with 8.

Event 14, 15 targets, purse \$53—First, G. Palmer, Peck, Clark, Beck with 15; second, H. Palmer, Blake, Miner, Matlock, Hallohan, Ware with 14; third, Shelton, Knettle, Baker, H. J. Stillman, Hock, Waite, Jaeger, Roberts, Irwin, Ganes, Forbes with 13.

Event 15, 15 targets, purse \$54—First, Beck, Ware with 15; second, Caldwell, G. Palmer, Brady, A. D. Stillman, Clark, Taliaferro, Hallohan with 14; third, H. Palmer, Tannahill, Maper, Peck, Watkins, H. J. Stillman, Waite, Cowins, Forbes with 13.

Event 16, 15 targets, purse \$54—First, Sewell, Brady, H. J. Stillman, Hallohan with 15; second, Tannahill, Baker, Blake, Clark, Waite, Kincaid, Irwin, Ganes, Ware with 14; third, H. Palmer, Beck, Watkins, A. L. Stillman, Hock, Taliaferro, Matlock, Forbes with 13.

Event 17, 25 targets, purse \$90—First, Watkins with 23; second, Shelton, Peck, Hallohan with 23; third, H. J. Stillman, Beck with 22.

Event 18, 25 targets, purse \$92—First, Caldwell, G. Palmer, H. Palmer, Thompson, Brady with 24; second, Waite, H. J. Stillman, A. D. Stillman, Clark, Taliaferro, Irwin, Ganes with 23; third, Shelton, Winters, Hock, Hallohan with 22.

Event 19, 15 targets, purse \$55—First, Blake, Beck, Hallohan with 14; second, H. Palmer, Baker, H. J. Stillman, Ganes with 13; third, Winters, Caldwell, Ayers, Watkins, Irwin, Shields, Forbes with 12.

Event 20, 15 targets, purse \$55—First, Blake, H. J. Stillman, Hallohan, Ware with 15; second, G. Palmer, Brady, Peck, Watkins, Forbes with 14; H. Palmer, Baker, Story, Maper, Hock, Clark, Taliaferro, Shields, Irwin, Cowins, Ganes with 13.

Event 21, 15 targets, purse \$55—First, Sewell, Ferguson, Hock, Ganes, Forbes with 14; second, Watkins, H. J. Stillman, Waite, Kincaid, Hallohan, Ware with 13; third, Caldwell, Baker, Story, Kershaw, A. Stillman, Clark, Roberts, Irwin, Cowins with 12.

Event 22, 25 targets, purse \$93—First, Brady, H. J. Stillman with 25; second, H. Palmer, Maper, Ware with 24; third, Shelton, Caldwell, G. Palmer, Baker, Thompson, Matlock, Hallohan with 23.

Event 23, 25 targets, purse \$90—First, Ware with 24; second, Caldwell, A. D. Stillman, Beck with 23; third, G. Palmer, Tannahill, Watkins, H. J. Stillman, Hock, Shields with 22.

THE THOROUGHBRED STALLION

RAMESES { Sire Imp. **GOLDFINCH** by Imp. Ormonde.
Dam **FLEURETTE** by Imp. Glenelg, sister to
Firezou and dam of 9 winners.

FOR THREE-YEAR-OLDS.

THE AMERICAN DERBY—\$25,000 ADDED.

A sweepstakes for Three-Year-Olds; \$25 to accompany the nomination, \$25 additional to start; \$25,000 added, of which \$3000 to the second and \$2000 to the third horse. A winner of a three-year-old stakes of the value of \$3000 to carry 3 lbs.; of two such stakes, or one of \$3000, 5 lbs.; of three or more three-year-old stakes of the value of \$3000 each, 7 lbs. extra. Maidens allowed 7 lbs. To be run the first day of the meeting. *One Mile and a Half.*

THE SHERIDAN STAKES—\$4000 ADDED.

A sweepstakes for Three-Year-Olds, \$10 to accompany the nomination, \$75 additional to start; \$4000 added, of which \$1000 to the second and \$500 to the third horse. A winner of a three-year-old stakes of the value of \$1500 to carry 3 lbs.; of two such stakes, or one of \$4000, 5 lbs.; of three or more three-year-old stakes of the value of \$1500 (selling stakes excepted), or of one of the value of \$7000, 7 lbs. extra. Maidens allowed 7 lbs. *One Mile and a Quarter.*

THE ENGLEWOOD STAKES—\$2000 ADDED.

A sweepstakes for Fillies, three years old; \$10 to accompany the nomination, \$50 additional to start; \$2000 added, of which \$400 to the second and \$200 to the third horse. A winner of a three-year-old stakes of the value of \$1500 to carry 3 lbs.; of two such stakes, 5 lbs.; of three or more such stakes, or of one of the value of \$5000, 7 lbs. extra. Maidens allowed 7 lbs. *One Mile.*

THE DREXEL STAKES—\$2000 ADDED.

A sweepstakes for Three-Year-Olds; \$10 to accompany the nomination, \$50 additional to start; \$2000 added, of which \$400 to the second and \$200 to the third horse. A winner of a three-year-old stakes of the value of \$5000, or of three or more such stakes of the value of \$1500 each, allowed 3 lbs.; of one such race, 5 lbs.; of one of \$1000, 8 lbs.; of one of \$500, 12 lbs. Maidens allowed 17 lbs. *One Mile.*

FOR THREE-YEAR-OLDS AND UPWARD.

THE MIDWAY STAKES—\$2000 ADDED.

A selling sweepstakes for Three-Year-Olds and upward; \$10 to accompany the nomination, \$25 additional for naming to start; \$2000 added, of which \$400 to the second and \$200 to the third horse. Weights, 5 lbs. above the scale. The winner to be sold at auction. Those entered to be sold for \$5000 to carry full weights; if for \$4000, allowed 5 lbs.; then 3 lbs. for each \$500 to \$3000; then 1 lb. for each \$100 to \$2000. Winners of a stakes this year, after the closing of entries, and prior to June 5th when carrying weight, 6 lbs. or more, not to be entered for less than \$1000; after June 5th, \$500. Starters, with selling prices, to be named through the entry box at the usual hour of closing, the day prior to the race. More than

two can be named by the same owner, but only two in the same interest can start; but the starting fees must be paid for all named. *One Mile and a Furlong.*

FOR THREE-YEAR-OLDS AND UPWARD.

THE AUBURN STAKES—\$2000 ADDED.

A selling sweepstakes for Three-Year-Olds and upward; \$10 to accompany the nomination, \$25 additional for naming to start; \$2000 added, of which \$400 to the second and \$200 to the third horse. The winner to be sold at auction. Those entered to be sold for \$4000 to carry weight for age; for \$3000, allowed 5 pounds; then 2 lbs. for each \$500 to \$2000; then 1 lb. for each \$100 to \$1000. Winners of a stakes this year, after the closing of entries, and prior to June 5th, when carrying weight for age, or more, not to be entered for less than \$3000; after June 5th, \$1000. Starters, with selling prices, to be named through the entry box at the usual hour of closing, the day prior to the race. More than two can be named by the same owner, but only two in the same interest can start; but the starting fees must be paid for all named. *One Mile and Half a Furlong.*

THE OAKWOOD HANDICAP—\$2500 ADDED.

A sweepstakes for Three-Year-Olds and upward; \$10 to accompany the nomination, \$50 additional to start; \$2500 added, of which \$400 to the second and \$200 to the third horse. Weights to be announced three days before the race. A winner of any race after the weights are posted to carry 5 lbs. extra. *One Mile and a Furlong.*

THE GREAT WESTERN HANDICAP—\$3000 ADDED.

A sweepstakes for Three-Year-Olds and upward; \$10 to accompany the nomination, \$50 additional to start; \$3000 added, of which \$750 to the second and \$250 to the third horse. Weights to be announced three days before the race. A winner of any race after the weights are posted to carry 5 lbs. extra. *One Mile and a Half.*

THE YOUNG HANDICAP—\$5000 ADDED.

For Three-Year-Olds and upward; \$10 to accompany the nomination, \$75 additional to start; \$5000 added, of which \$750 to the second and \$250 to the third horse. Weights to be announced three days before the race. A winner of any race after the weights are posted to carry 5 lbs. extra. *One Mile, One and One-half Furlongs.*

THE WHEELER HANDICAP—\$7500 ADDED.

A sweepstakes for Three-Year-Olds and upward; \$10 to accompany the nomination, \$125 additional to start; \$7500 added, of which \$1000 to the second and \$500 to the third horse. Weights to be announced three days before the race. A winner of any race after the weights are posted to carry 5 lbs. extra. *One Mile and a Quarter.*

FOR TWO-YEAR-OLDS.

THE LAKESIDE STAKES—\$2000 ADDED.

A sweepstakes for Fillies, Two Years Old; \$10 to accompany the nomination, \$50 additional to start; \$2000 added, of which \$400 to the second and \$200 to the third horse. A winner of a stakes of the value of \$1000 to carry 3 lbs.; of two such stakes, 5 lbs.; of three or more such stakes, 7 lbs. extra. Maidens allowed 5 lbs. *Five Furlongs.*

THE KENWOOD STAKES—\$2000 ADDED.

A sweepstakes for Colts, Two Years Old; \$10 to accompany the nomination, \$50 additional to start; \$2000 added, of which \$400 to the second and \$200 to the third horse. A winner of a stakes of the value of \$1000 to carry 3 lbs.; of two such stakes, 5 lbs.; of three or more such stakes, 7 lbs. extra. Maidens allowed 5 lbs. *Five Furlongs.*

THE MAYWOOD STAKES—\$2000 ADDED.

A sweepstakes for Two-Year-Olds; \$10 to accompany the nomination, \$50 additional to start; \$2000 added, of which \$400 to the second and \$200 to the third horse. A winner of a stakes of the value of \$1000 to carry 3 lbs.; of two such stakes, 5 lbs.; of three or more such stakes, 7 lbs. extra. Maidens allowed 5 lbs. *Five Furlongs.*

THE EDGEWATER STAKES—\$2000 ADDED.

A sweepstakes for Two-Year-Olds; \$10 to accompany the nomination, \$50 additional to start; \$2000 added, of which \$400 to the second and \$200 to the third horse. A winner of a stakes of the value of \$1000 to carry 3 lbs.; of two such stakes, 5 lbs.; of three or more such stakes, 7 lbs. extra. Maidens allowed 5 lbs. *Five and a Half Furlongs.*

THE QUICKSTEP STAKES—\$2000 ADDED.

FOR SALE.

Three Standard-Bred Trotting Stallions
WILKES STOCK.

One Seal Brown, 16 bands, foaled May 2, 1898; first dam Fearless by Fallis 4781 (record 2:23); second dam Jean Perant by Signal 3327.
One Golden Bay, 16.1 bands, foaled March 5, 1898; first dam Signal by Dal Sur 1058 (record 2:24); dam of Gay Line 2:29; second dam Lady Signal by Signal 3327.
One Brown, white points, 16.1 bands, foaled April 1899; full brother to the bay.

These colts are all sired by Prince Airlea 28045, son of Gay Wilkes 2537 (record 2:15 1/4), and bred by Wm. Corbitt, San Mateo, Cal. They are pure gaited and show wonderful speed for this little work they have done.

QUINN'S OINTMENT FOR HORSES

stands at the head of all veterinary remedies. Such troubles as Spavins, Curbs, Windpuffs, Splints, Bunches have no terrors for a horse if the master keeps and applies Quinn's Ointment. All well known horsemen speak of it in the highest terms:

Miller & Sibley of Franklin, Pa., owners of St. Bel, brother of late Bel Boy, write, "We have used Quinn's Ointment with great success and believe it fulfills all claimed for it. We cheerfully recommend it to our friends." For Curbs, Splints, Spavins or Bunches it has no equal.

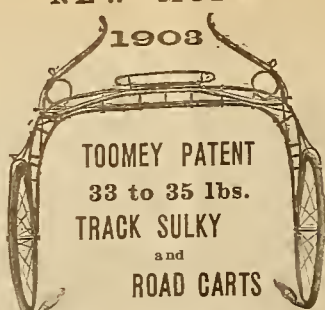

Price \$1.00 per package. Sold by all druggists, or sent by mail.

Dictatus Medium 32499

Will make the coming season at

Race Track, Hollister, Cal.

Joe Sanchez in charge

\$40 FOR THE SEASON.

Payable at time of service, with usual return privilege. Every care taken to prevent accidents, but no responsibility should any occur. Prompt and careful attention in all cases. Pasturage furnished to mares sent from a distance at \$2.50 a month.

A DICTATUS MEDIUM PURSE OF \$100.

I will give a purse of \$100, with entrance money added for a race, best two in three, open to any and all colts from three to start and race to come off on Hollister track, Fair week, 1907 (Exact date to be hereafter announced.) \$5 entrance money, payable June 1, 1905. \$5 thirty days before the race. Three moneys: 60 per cent to first horse; 30 per cent to second and 10 per cent to third. For further particulars, address

R. P. LATROP, Hollister.

DESCRIPTION.

DICTATUS MEDIUM is 6 years old, weighs 1220 pounds. A beautiful turned bay horse with heavy mane and tail, kind and gentle, with a perfect disposition. Good flat heavy bone. He has great power and speed. Has a record of 2:24, but has worked out in 2:12. He is a horse that will go out any day and do his best. His colts are models of grace and beauty. Only one so far has been worked. This one, Al Wilson's yearling LITTLE MEDIUM, paced an exhibition 1/4 mile on the Hollister Race Track in 38 1/2 seconds, a 2:33 gait. This colt has great promise.

DICTATUS MEDIUM is by Dictatus 2:17, one of the best bred and fastest horses ever brought to California. The dam of Dictatus Medium is Belle Medium (dam of Stam B. 2:11 1/2), by Happy Medium, grandsire of the dam of Lou Dillon 1:58 1/2. His second dam is Argenta by Almont Lightning, sire of the dam of Zombro 2:11. There is no doubt but Dictatus Medium will prove to be a sire of speed as well as good size, style and disposition.

BAYSWATER WILKES 2:25 1/4

Sire of KELLY BRIGGS 2:10 1/4

WILL MAKE THE SEASON OF 1904 AT

WOODLAND, CAL.

Son of Sable Wilkes 2:18
and
Fanny Bayswater
Dam of 2 in 2:30

Fee \$40.

BAYSWATER WILKES is a sire of speed, size, good looks, soundness and gameness. Every one of his produce that has been trained can show standard speed. His sire, Sable Wilkes, also sired Nushagak, sire of Aristo, winner of the Occident and Stanford stakes. His dam, Fanny Bayswater, is the dam of Senator L., holder of the champion four-mile trotting record of 10:12.

Breed to BAYSWATER WILKES and you will get colts that will sell at good prices.

For cards containing full Pedigree and all particulars address

S. H. HOY, Winters, Cal.

SIDNEY DILLON 23157

Sire of LOU DILLON 1:58 1/2 (the Fastest Trotter and Greatest Record Breaker in the world), Dolly Dillon 2:06 1/2 (the fastest mare of 1901), B. S. Dillon 2:16 1/2 and Captivity 2:28 1/2.

SANTA ROSA STOCK FARM
SANTA ROSA, CAL.

SIDNEY DILLON was sired by Sidney 2:19 1/2; dam Venus (dam of Adonis 2:11 1/2, Leah 2:24 1/2, Cupid 2:18 and Juno, the dam of Mercury 2:31 and Ida 2:30) by Venture 2:27 1/2, sire of dam of Directum 2:05 1/4. SIDNEY DILLON is a model of symmetry and imparts his grand individuality, inherent speed and excellent disposition to all his progeny.

Terms for the Season, \$100.

Only a limited number of approved mares taken. Usual return privilege. In case horse is sold service fee will be returned if mares have not proven in foal. Season ends July 1, 1904. Pasturage \$4 per month. Best of care taken of mares, but no responsibility assumed for accidents or escapes. For particulars regarding shipment of mares, etc., address

FRANK TURNER,

Supt. Santa Rosa Stock Farm,

Santa Rosa, Cal.

Or IRA PIERCE, 728 Montgomery St., S. F.

THOS. A. DRISCOLL, Secretary,

ROOM 39, FIFTH FLOOR, MILLS BUILDING, SAN FRANCISCO, CAL.

LIMONERO

RECORD (3) 2:15 3/4

REG. No. 33389

(A Great Sire of Beauty and Early Speed)

By **PIEDMONT 904** (sire of 6 in 2:20 list and of dams of Fanny Wilcox 2:10 1/4, Alta Vela 2:11 1/4, etc., etc.); dam **LULANEER** (dam of Limonero 2:15 1/4, Blon 2:19 1/4) by Electioneer 125

LIMONERO 2:15 1/4, bred at the Palo Alto Stock Farm, is one of the best Stallions standing for service in California. He is a magnificent dark bay horse with no marks, and in breeding, class and individuality ranks with any of them. He gets big bays and browns that are sure to be good race horses and high class roadsters. A number of his youngsters are to be seen at the Los Angeles track. LIMONERO 2:15 1/4 got his record as a three-year-old in the fourth heat of a six heat race for a \$500 purse which he won at Lexington, beating the great Expressive, B. B. P., Baron Dillon, Axinite and Futurity. LIMONERO 2:15 1/4 will make the Season of 1904 at the

AGRICULTURAL PARK, LOS ANGELES.

Fee \$25 FOR A LIMITED NUMBER OF GOOD MARES. Excellent pasturage and the best of care taken of mares at reasonable rates, but no responsibility assumed for accidents or escapes. Mares should be shipped to University Station, Los Angeles, Cal., in care of

HARRISON G. ARMS,
Owner.

J. H. WILLIAMS,
University Station, Los Angeles, Cal.

The Fastest Trotting Son of McKinney KINNEY LOU 2:07 3/4

(Winner of \$11,450 in 1903) Will Make the Season of 1904, Limited to One Dozen Approved Mares, at

AGRICULTURAL PARK, SAN JOSE.

Service Fee, \$100.

SEASON ENDS MAY 1, 1904.

KINNEY LOU was one of the great race winners of 1903 on the Grand Circuit, and is a high-class race horse, game as a pebble and perfectly gaited. He is from race-winning and producing families on both sides, his dam, Mary Lou 2:17, being a great race mare and own sister to the well-known race horses Shyluck 2:15 1/2 and Ned Winslow 2:12 1/2. Mary Lou is by Tom Brown out of Brown Jenny (dam of 3 in list) by Dave Hill Jr., next dam by Black Hawk 766. Kinney Lou's oldest colts are two-year-olds and all have size, good color, and are natural trotters with good dispositions.

For further particulars and card containing tabulated pedigree address

BUDD DOBLE, 1030 Pacific Ave. Alameda, Cal.
or San Jose, Cal.

NUTWOOD-DIRECTOR AND WILKES STALLION NEAREST

Reg. No. 35562. Record 2:22 1-2.

Sire of ALONE 2:09 1/4, champion 4 y. o. of 1903 (half mile 1:59 1/4), OUR LADY (trial 2:20 1/4), and full brother to JOHN A. McKERRON 2:04 1/4 (the fastest trotter of the Wilkes family).

Season of 1904 at Stables of T. W. Barstow on the Alameda near Race Track San Jose, Cal.

By NUTWOOD WILKES 2:16 1/2, sire of John A. McKerron 2:04 1/4, Who Is It 2:10 1/4, Stanton Wilkes 2:10 1/4, Claudius 2:13 1/4, Georgie B. 2:12 1/4, Bob Ingersoll 2:14 1/4, Tidal Wave 2:13 1/4 and 21 other standard performers.

Dam INGAR, the greatest producing daughter of Director (dam of John A. McKerron 2:04 1/4, Nearest 2:22 1/2 and Thursday 2:24) by the old champion Director 2:17, sire of Directum 2:05 1/4, Direct 2:05 1/4, Direction 2:10 1/4, etc.; second dam Annie Titus (dam of Annie C. 2:25) by Echo 462, sire of Echora 2:23 1/4 (dam of Direct 2:05 1/2) and 16 others in list; third dam Tiffany mare (dam of Gibraltar 2:22 1/4, sire of Our Dick 2:10 1/4, Homestake 2:14 1/4 and others) by Owen Dale, son of Williamson's Belmont.

NEAREST is a dark bay, 15.3 hands and weighs 1200 pounds; well formed and of kind disposition. In his blood lines are represented the greatest strains of the American trotter.

Terms, \$40 for the Season. Usual return privilege. Excellent pasturage at \$4 per month. No wire fences. Every precaution taken to prevent accidents or escapes, but no liability assumed. All bills to be settled before mares are removed. For further particulars address

Telephone: Red 1431.

T. W. BARSTOW, San Jose, Cal.

RITA H. 2:11 1-4

Pacing Mare by McKinney 2:11 1-4

ELECTRO MCKINNEY

Brown Colt, Four-Year-Old Trotter by McKinney 2:11 1-4

RITA H. is a dark brown mare who stands nearly 16 hands high, and will weigh in racing trim about 1050 lbs. This mare has had this year a very remarkable record. She started in the North-western Circuit in the States of Oregon and Washington, and out of eight starts won her first seven races and only lost four heats during the entire circuit, and has a pacing record of 2:11 1/4. The mare is five years old and is excellent on the road. She does not pull or lug, and a lady can drive her anywhere. Last spring she trotted a workout mile in 2:18 1/2 and repeated in 2:16 1/2, after only seven weeks' work. Her owner has driven her in 2:12 1/2 in the Los Angeles Driving Club races, she having won all of them in which she started. This mare can step two heats below 2:10.

ELECTRO MCKINNEY is a brown stallion foaled in 1900, and stands 15 hands 1 inch in height. He trotted a full mile as a two-year-old in 2:31 1/4, last quarter in 35 seconds, and when a three-year-old a full mile in 2:21 1/4, last quarter in 32 seconds. He is perfectly gaited and a grand individual in every respect. Weighs about 950 lbs. ELECTRO MCKINNEY is bred in the purple, and is one of the best sons of McKinney alive to-day. McKinney is undoubtedly the greatest sire for his age, living or dead. ELECTRO MCKINNEY was not raced last year, being only a three-year-old and not entered in any stakes it was decided to hold him over.

These horses are all right and there is not a thing the matter with them, but my business demands are such that I cannot afford to devote any time to racing them. For prices and further particulars address

"SAVE-THE-HORSE" Registered Trade Mark SPAVIN CURE

Cured horses are absolute certainties as to the possibility of the remedy for your own case.

Marysville, Ont., Dec. 14, 1903.

The Troy Chemical Co., Troy, N. Y.

Gentlemen—My horse was affected with a thoroughpin which rendered her almost useless, although a valuable animal being one of a matched pair of roadsters. It was about the size of a goose-egg both inside and outside of the leg. I tried some of our best veterinary skill as well as different blistering medicines with no effect. I worked with it for about one year. Being a subscriber to the "Country Gentleman" I saw your advertisement in it and determined to try it as a last resort as I was discouraged with everything else. When I had used the first bottle I saw a change. This encouraged me and I kept at it and completed a cure. I have no hesitation in saying that I believe "Save-the-Horse" is the best, and would advise all who have a horse so affected to use nothing but "Save-the-Horse". I give you permission to use my name.

Yours truly,
J. G. ALLISON.

Calton, N. J.

Less than two bottles "Save-the-Horse" made a perfect cure on my horse that was affected with hip joint lameness.

I enclose acknowledgement for the bottle I bought at Madison Square Garden, which I intend to use on lameness below hind ankle—may be a ringbone coming.

ADAM LANCE,
Weston, W. Va., Dec. 23, 1903.

I enclose check for \$5.00 to cover amt. bill Dec. 14, 1903, less express charges. Kindly acknowledge receipt of same.

I am using the first bottle ordered on a horse of my own that had a spavin. The bottle is not half used and the lameness is cured and the enlargement almost gone. I feel sure the remedy is all you claim for it and valuable to horse owners. Hope to sell many bottles of "Save-the-Horse" in 1904.

Very respectfully,
J. W. STEINBECK, Prop'r.

On broken down, weak and injured tendons, ruptured ligaments and all strains its power is unfailing; permanently cures all broken down conditions of the ankle, hock tendons or ligaments without scar, blemish or loss of hair. No man need see his horse suffer and become incapacitated. "SAVE-THE-HORSE" POSITIVELY AND PERMANENTLY CURES DOWNS AND DOG SPAVIN, THOROUGHPIN, RINGBONE (except low ringbone), CURE SPLINT, CAPPED HOCK, WINDPUFF, SILENT BOIL, WEAK AND SPRAINED TENDONS AND ALL LAMENESS. Apply in all extremes of weather. Horses may work as usual with boots, as no harm can result from destruction of hair or scalding of limb.

\$5.00 a bottle. Written guarantee with every bottle. Constructed solely to protect you. Need of second bottle improbable, except in rarest cases. Copy of booklet and guarantee sent upon application.

\$5.00, at druggists and dealers, or sent express paid by TROY CHEMICAL CO., TROY, N.Y.

D. E. NEWELL, 519 Mission St., San Francisco, Cal., Pacific Coast Agent

A Sidney Stallion With Earning Capacity

FOR SALE.

In pursuance of my intention to retire from the business of breeding horses, and having disposed of all my broodmares at auction, I now offer at private sale the stallion

WILLIAM HAROLD 2:13 1-4.

His sire is the great Sidney 2:19 1/4, grandsire of the champion trotter of the world, Lou Dillon 1:58 1/2, and his dam the great race and broodmare Cricket 2:10 (dam of four in the list) by Steinway, the greatest son of Strathmore.

WILLIAM HAROLD is a producer. The only two of his get to start are that wonderfully fast trotter Janice 2:08 1/4 and the pacer Dan Burns 2:15. WILLIAM HAROLD'S services in the stud were very limited up to three years ago, as he was raced. His weanlings, yearlings and two-year-olds are very promising and have size, good looks and great natural speed, besides being uniform in color, nearly all bays. He is a sure foal getter, is in the very best condition, sound and healthy, and with ordinary good business management can earn in the stud in 1904 the price asked for him.

For tabulated pedigree and full particulars, address

WINCHESTER

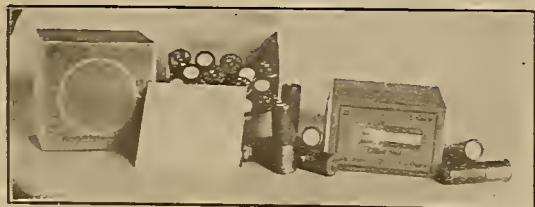

REPEATING SHOT GUNS

A CHANCE FOR A DOUBLE

A QUESTION often asked about Repeating Shotguns is, "How quick can a second shot be fired with them?" Shooters that have used Repeaters answer with one accord: "Doubles" are just as easy to make with a WINCHESTER REPEATING SHOTGUN as they are with a double barreled gun. The third shot that a Winchester Repeater gives often bags a badly crippled bird which otherwise would get away. Winchester Repeating Shotguns are made in "Take Down" styles in 12 and 16 gauge.

AN INSULT, unjust and uncalled for, was extended to one of the foremost citizens of California and one of the greatest friends of the trotting horse interests of America by the Board of Review of the National Trotting Association at its meeting held in New York this week, when it removed from the Pacific District Board of Appeals its honored chairman Prof. E. P. Heald of this city. The appointment of Mr. John A. McKerron, also of this city, to the place was done without his knowledge or consent, and will not change the high standard of the Board, nor lessen the confidence and respect in which it is universally held by all honorable people, as Mr. McKerron stands high in the community as a business man and a gentleman, but it does not change the fact that the Board of Review at its New York meeting acted against the best interests of the National Association on this Coast, as well as against the well being of the harness horse breeding and racing industry. That the members of the Board of Review are entirely innocent of any bad motive in the matter we do not for one moment doubt. They have been misled and misinformed by some person or persons who do not represent the members here, and who had not dared to let their designs be known. Prof. Heald is one of the leading citizens of California and one who stands and has always stood for everything that is right and just and respectable. He is the founder and the active head of one of this State's leading institutions of learning, a Director in many great enterprises, the President of the Pacific Coast Trotting Horse Breeders Association and a fruit grower and horse breeder who has interests in many parts of the State. Probably there is no man in California who has a more extended acquaintance throughout the Coast or a higher standing in its business circles than he. Modest and retiring in disposition, a gentleman always, Prof. Heald represents the very highest type of American manhood. He has invested thousands of dollars in the breeding of the trotting horse, has been one of the best patrons of the sport in California for years, and has given his valuable time and his money freely to further the best interests of harness horse affairs. He has been an active and an honorable member of the Board of Appeals for the past six years. He attends every meeting, and his calm and naturally judicial mind has been of great value in the deliberations of that body. There was no thought of his removal or that of any other member of the Board, in fact there was a general request from the members of the National Association all over this Coast that all the members of the Board be re-appointed. No idea was entertained that the

Board of Review would give any thought to a change, or that it would ever be suggested. The meagre telegraphic report of the meeting does not state any particulars of the affair, but simply gives the news that the change was made. Until full reports are received by mail we shall not discuss this gross outrage further, but the BREEDER AND SPORTSMAN will not let such an insult to an honored citizen of this Coast to pass unchallenged and will not spare its criticism on the man or men who have by the basest intrigue and dishonest actions induced the Board of Review of the National Trotting Association to put this indignity on the very head of the harness horse interests on this Coast.

JUDGING FROM THE LARGE NUMBER of applications for membership and inquiries already received as to transportation, stabling, track facilities, etc., the inaugural meeting of the California Polo and Pony Racing Association, which takes place at Del Monte, from Thursday, February 18th and extends until Monday, February 22nd inclusive, will be a huge success. The polo matches will bring out on the field the very cream of the crack players who have been especially training themselves and ponies for several months past. The pony races, which perhaps appeal to and interest more keenly the average spectator, are scheduled for the 18th and 20th. There will be six or more events daily at varying distances, and with such weight and other conditions as will suit all classes of ponies. The prizes offered are most liberal and consist of purses and handsome silver cups and as the events are open to all, and there are no entry fees exacted, large fields will doubtless contest for each event. Among the probable competitors we may include such well known miniature racing machines as Mr. Frank Carolan's Fusillade, Bonnie and Floradora; Mr. Walter Hobart's well known speed marvel Silver Dick; Mr. Clayton's Miss Miller, a new importation here and one with a great northern reputation; Mr. Rudolph Spreckels has a large string in training, including his favorite Becky and Peghome; and the stables of Messrs. Tobin, Dunphy, Bettner and a very strong contingent from the southern portions of the State will be represented. Extensive alterations and improvements are being made to the race course at Del Monte. The polo field has been especially prepared and is in fine order for fast play. A new stand and pavilion have been erected, the judge's box rebuilt and numerous other improvements effected. Thanks to the courtesy of Colonel Ward, the full band of the 15th Infantry will be in daily attendance, and with a large exodus of society people to Del Monte already assured, the function cannot help but be a most sporting and brilliant one. The succeeding week the association moves to Burlingame where polo matches and one afternoon's racing on Mr. Frank Carolan's private track are programmed. Mr. Thomas Driscoll is the secretary of the association and he will be pleased to answer any inquiries addressed to him at room 39, Mills Building.

WILLIAM C. WHITNEY, one of the foremost Americans of his time and the most prominent turfman in the country, died in New York, February 1st, after a short illness during which he was operated upon for appendicitis. Mr. Whitney was Secretary of the Navy during Cleveland's first term, and his master mind laid the foundation and started the superstructure of our present splendid navy. As a man of affairs since retiring from public life he has been one of the most successful and he made money by the millions. While a very wealthy man, however, he did not hoard money for its own sake but spent it lavishly, and found in the breeding and racing of thoroughbred horses one of his greatest pleasures. His expenditures in this line must have reached into the millions, but he had the satisfaction of owning one of the greatest breeding farms ever founded and his horses have performed successfully on the turf—heading the winning stables one season. Mr. Whitney's death inflicts a severe loss upon the country and upon the very best interests of racing affairs.

What effect the death of William C. Whitney may have on the vast number of stake entries made in his name for the great array of valuable prizes to be run for in 1904 and in future years is not known, but fears are expressed in well informed quarters that no transfer of those engagements was made. Should that prove the case they will become void. Many well versed racing authorities fear that when the end drew near he had neither the time nor inclination to think of the future of his racing stable. If his illness had been a prolonged one there might have been suggested to him the desirability of forming a partnership, which would have saved all his nominations. As it is, however, the fear is expressed that Mr. Whitney's death, like that of the late August Belmont in 1890, will throw upon the market a great breeding and racing establishment. The following is a list of his stable, valued at \$390,000:

Hamburg, stallion, \$60,000; Nasturtium, stallion,

\$50,000; Meddler, stallion, \$40,000; Yankee, stallion, \$40,000; Endurance by Right, \$30,000; Blue Girl, \$25,000; St. Simon filly, \$16,000; Judith Campbell, \$15,000; Gunfire, \$15,000; Armenia, \$10,000; Leonidas, \$30,000; Inflexible, \$20,000; Hippocrates, \$10,000; Reliance, \$10,000; fifty yearlings, \$150,000; forty two-year-olds, \$100,000; eighty broodmares, \$160,000; other horses in training, \$100,000.

RACING AT BENNINGS, where the first and the last of the Eastern meetings are held, is popular with horsemen. The Washington Jockey Club announces in this issue its stakes for the spring and autumn meetings at Bennings. Entries for these events will close and name at midnight of Tuesday, February 16, 1904. The fixed events of the Washington Jockey Club, the first and second Bennings Spring Handicaps, with \$1000 added money to the first and \$1500 added money to the latter, one entrance fee entitles an entry to start in both events, on payment of the additional starting fee of \$20 in each. For the autumn meeting, the Grand Consolation, is the principal event for two-year-olds. This stake has \$3000 added money and is the richest stakes offered by this association. The conditions provide penalties and allowances and is for non-winners of \$10,000 at time of starting. The winning of \$10,000 or more is equivalent to a declaration. These events will be run over the new Columbia Course for the first time. A great many improvements have been made and horsemen will be well cared for.

WASHINGTON PARK CLUB, the famous Chicago racing association offers nearly \$50,000 in seventeen events, for its meeting beginning June 18th and ending July 16th. There are four stakes offered for three-year-olds, including the popular American Derby, the most sought for and richest race run for in the West and on this race there is more money wagered during the winter months than on any race run in this country. Three-year-olds and upwards will contest for six attractive events. Especially have the two-year-olds been taken care of in seven liberal added money stakes, one of which, the Hyde Park Stakes, has \$7500 added. Besides the stakes there will be overnight handicaps with \$1250 and upward, no selling purse with less than \$600, other purses \$700 and upward. With the liberal added money offered and the high class racing this popular association always conducts, it is safe to say their stakes, which close February 25th, will be well patronized. See the advertisement in this issue.

THE DOCTORS' DAUGHTERS, a charitable organization composed of society ladies in San Francisco, have decided that the annual benefit which they annually arrange shall this year take the form of a horse show. The new building and roomy ring of the San Francisco Riding Club is to be the place of exhibition and there will be some very entertaining programs. The contributors to these programs will be some of the best amateur riders and drivers in the city and there will be a fine turnout of saddle and carriage horses, polo ponies and possibly also an exhibition of some of the crack runners and trotting horses. During the run of the horse show there will be a special circus matinee for children and the Doctors' Daughters believe that the entire undertaking will bring to their charity-dispensing coffers much money. The new riding club building was built last year and is located at Seventh avenue and C street in the Richmond district.

AN EASTERN PAPER, referring to the fact that four hundred and fifty-five harness horses were recently sold at auction in New York for \$146,360, an average of \$321.75 per head, states that "the average was not high." Perhaps, if some of the big sales in recent years are taken as a criterion the average was not high, but when that number of horses, only a few of which were more than ordinary roadsters, can be sold for an average of \$321.75 we think the figure is good enough to be called high. While the majority of buyers object to paying over three hundred dollars for an average horse, twenty-one dollars above that figure is high for an average lot.

TWENTY-ONE STAKES are announced by the Westchester Racing Association. There are three stakes offered for two-year-olds, to be run for at the spring meeting, four for three-year-olds and eight for three-year-olds and upward. The Metropolitan Handicap, the first of the big handicaps to be run for has \$10,000 added. The subscription and forfeit fee for this event is only one-half as much as the other big handicaps and is worth nearly as much. The Metropolitan is the most attractive race of the early spring handicaps, and always draws high class horses. A complete list of the stakes will be found in advertising columns.

JOTTINGS.

"RETURN PRIVILEGE allowed should horse not change ownership," is a statement one often sees made in stallion advertisements in this State and in the East, but sometimes it is misunderstood. This condition was originally devised to prevent damage suits being brought against a stallion owner who happened to sell his horse. The usual and fair thing in such a case is for the service fee to be returned to owners whose mares failed to get in foal, but there have been instances where owners have refused the tender of the money and insisted on a service fee or a sum of money many times larger than the amount originally paid. I was talking with Budd Doble in regard to this matter a day or two ago. He has this clause in the announcement of Kinney Lou 2:07½ that he has been sending out. "I have no idea of selling Kinney Lou" said the great driver, "as I purchased him for a permanent investment, and he is not on the market. That is not saying that I would refuse any offer for him, however, as that would not be true, but I do not expect to sell him. Should I do so, however, I would want the privilege of returning the service fee paid me by any one whose mare failed to produce a foal. This would be the fair thing to all concerned. My horse is limited to a dozen mares, and I do not anticipate I will have any disagreement with parties who breed mares to him as I want to treat everybody fairly and squarely. Should I sell Kinney Lou, however, and there be any of the mares bred to him that failed to get in foal I will return the service fee. I want that privilege, however, and on that account I put that clause in the circular I issued in regard to my horse." There are many things in the horse business as in all other business affairs, that cause differences of opinion because the original terms of the contract are misunderstood by one side or the other. The best way to avoid difficulties and disputes is to have a thorough understanding of any contract entered upon, and to put it in writing if possible.

The words of the old song, "If this is the Riley they speak of so highly, then I say to you, Riley: You're doing quite well," do not apply to a man by the name of Riley who recently drove his horse across the Pajaro river bridge near Watsonville faster than a walk, which a big notice on the bridge stated was punishable by a fine. It seems that Riley was met in Santa Cruz county by a constable, who escorted him to the office of a Justice of the Peace, where Mr. Riley was fined \$5 in accordance with an ordinance provided by the Board of Supervisors. There is said to be some rivalry between the counties of Monterey and Santa Cruz, which the Pajaro river divides, and when Mr. Riley went back to Monterey another constable collared him and a fine of \$30 was demanded as a penalty for exceeding the speed limit on the Monterey end of the bridge. Mr. Riley thereupon demurred. He and his lawyer held that the laws and the constitution properly interpreted would not permit a person to be fined twice for one offense, and as he had only speeded his horse over one bridge they concluded that two fines were therefore contrary to law and an appeal was had to the Superior Court of Monterey county, which held, however, that the two fines were legally made. Mr. Riley's lawyer then took out a writ of habeas corpus and argued it before the Supreme Court of the State, which august body affirmed the ruling of the lower court. So Mr. Riley now knows there are two sides to every case and two ends to every bridge and that it is unlawful to drive a horse at a racing gait over either end.

There is a strong probability that the horsemen of San Francisco will soon have a half or three-quarter oval track in Golden Gate Park where they can speed their horses. The present speedway is a very pretty place to drive, but is unsuited for actual speed work as it is an up and down hill straightaway, and there is no place where spectators can enjoy the sport, as but a short stretch of track can be seen from any given point. The Golden Gate Park Driving Association some time ago began agitating the question of a half-mile track in the park and when the Park Commissioners hold their next meeting plans will be presented to them and a request made that they be adopted. At a meeting held at the Palace Hotel, Thursday evening, committees from the Golden Gate Park Driving Association, the San Francisco Driving Club, the Pacific Athletic Association, the Carriage Owners Association, and the Pacific Coast Trotting Horse Breeders Association met and agreed upon a plan for submission to the Park Commissioners. Should the plans be accepted, (and it is thought the Commissioners will be favorable to the project) the

track will be a half-mile oval about eighty feet in width all around, and in the infield will be grounds where all sorts of athletic games like polo, football, baseball, etc., can be played. The road drivers of San Francisco are entitled to a place in the park where they can drive their horses at speed. Other cities have spent large sums on speedways and found them very popular with the people. The present speedway is one of the main drives to the beach and was never suited for the speeding and racing which so many people enjoy as participants or onlookers. There is no doubt that an oval track will be about the most popular place in the park as soon as it is completed, as seating accommodations will be made for large crowds. Of course nothing but amateur contests will be permitted and no admission fees will be charged, so that it will be entirely free to the public. The horsemen and road drivers of San Francisco are largely recruited from the heaviest taxpayers who have not begrudged one cent that has been expended for tennis courts, baseball grounds, bridle paths, lakes for model yacht racing or the many other places of amusement that have been provided for the public, but on the contrary have endorsed and approved all them. They rather expect, therefore, that the request for a speed track and athletic ground will meet with little or no opposition, and that the Park Commissioners will see the way clear to a prompt granting of the request and an early completion of the project.

There is a request from "all over the house," as the auctioneers say, for purses for three year old pacers. The Pleasanton association offers \$600 for three year old trotters and the owners of pacers of that age are asking that they be recognized by associations that make announcements in the future. A gentleman who breeds and races a few harness horses each year recently wrote us as follows:

"I wish you would suggest that racing associations offer a suitable purse for the pacers as well as the trotters that are three years old. There will be a big list of three year old pacers to start this fall for the Breeders Futurity stake, and all or nearly all of these would be nominated gladly by their owners in other races. We fellows who fortunately (?) raise a pacer have to start for less money than the man with the trotter, but usually furnish as good a contest and afford as much amusement."

The suggestion offered by our correspondent is a good one, and as it really costs little to offer a purse for the three year old side wheelers we hope that associations that have not yet arranged their programs will consider the matter and hang up purses for the three year olds that pace. It may be that such a race will fill beyond expectations and in any event a good contest should result as the three year olds that take to the lateral gait are usually a very promising lot of youngsters. Give the three year old pacers a chance.

Sunol has lost her third and last foal. Since Mr. Schultz purchased her for \$4000 the daughter of Electioneer and Waxana has had nothing but bad luck and there is not one of her foals alive. This reference to Sunol brings to mind the fact that she, instead of Maud S., is the holder of the high wheel sulky record and that her claim to it is recognized by the Year Book. There has always been among horsemen, however, a generally accepted opinion that the kite track, especially for the old high wheel sulky, is several seconds faster than the regulation oval, consequently the 2:08½ made by Maud S. at Cleveland was considered a much better performance than the 2:08½ made by Sunol when she drew a high wheel sulky over the Stockton kite track. In the many attempts that have been made to lower the record of Maud S., a high wheel sulky and a regulation track were part of the conditions and none have ever claimed that Sunol's record, although a reduction of the time made by a trotter for one mile, wiped out the performance made by Maud S. The California mare Lou Dillon, however, to a high wheel sulky and over the same track, lowered the record of Maud S. three and three-quarter seconds, and she is honestly entitled to the honor.

Two hundred and fifty-two nominators named four hundred and four mares in the Breeders Futurity \$6000 Stake No. 4, which closed on the first of last November. These mares were bred in 1903, and are due to foal soon. Some of them have already foaled. It only cost \$2 to name these mares in this big stake, and the second payment of \$5 will be due March 1st. The substitution clause in the stake should lead every original nominator to make the second payment. If the mare should prove barren or have a dead foal or twins, another mare can be substituted without regard to ownership. This will enable a nominator to get all his money back if he makes this second payment, as there are a large number of owners who failed to originally enter in the stake who want to get in now, and they will pay the \$7 for a transfer of entry to

them from owners whose mares or foals have died. So the wise man will not forfeit but pay up in this stake.

While the big pacer Mush cannot be considered one of the great green pacers of last year, he did a great deal more than a majority of the heavily touted ones that come out of the brush and joined the procession down the Grand Circuit. He won two races and \$1890, which probably paid his entrance fees and expenses, and got a record of 2:08½. There were over a hundred pacers that raced on the Grand Circuit that won less than he did and started as often. The big gelding hy Lottery Ticket is going so nicely since he has been shifted to the trot that there are strong hopes he will get a record at the diagonal gait as fast as his pacing record, and if he can trot that fast he will be able to win a larger sum this year than he did in 1903. Last week he worked the last half of the Pleasanton track in 1:05, and came the last quarter in 32 seconds. He should be a good one in the slow trotting-classes this year.

There are some three-year-olds in the Salisbury string at Pleasanton that are doing more than any three-year-olds ever did this early in the season. This may seem pretty strong language but it is true. A three-year-old filly by Directum Kelly has trotted a half in 1:05 already, and I don't think there was ever before one that was able to trot as fast as that in the last week in January. Mr. Salisbury has without doubt the greatest string of young horses ever seen on a track in California.

An Eastern paper says that the Fasig-Tipton sale in New York week before last was a decided success. At the mid-winter sale at Madison Square Garden last season, 409 horses sold for an average price of \$410. This year 445 head sold for an average of \$321.75 per head. Last year there were a number of sensational trotters and pacers, like the Prince of Orange, that sold for \$8200, and the pacer Tom Keene, that sold for \$4000. After a careful review and comparison of the two mid-winter sales of the same company, and a comparison of the quality offered, there is scarcely a loss of seven per cent. in the prices realized in 1904, as compared with 1903. This indicates the thoroughly healthy condition of the horse breeding industry as compared with all other industries in the commercial world.

About the best thing in regard to the development theory is the following from the *Buffalo Horse World*: "It is true that it is the qualities which sires and dams have inherited that enable them, when mated, to transmit speed ability, but if it were not for development, how long would it be before the qualities desired would not be possessed? If the practice of development should be abandoned the trotting bred horse would degenerate into a horse having no more speed than the hackney has. Of course, this degeneration would not be noticeable at once, but it would gradually become apparent. It is safe to say that if no trotters or pacers were trained for fifty years and then training should be resumed, that the speed rate would be no further in advance of what it was fifty years before the present time than could be accounted for by the improved appliances and methods. Acquired habits and characteristics are strengthened by development and every generation of developed animals strengthens that link in the breeding chain. True, many undeveloped stallions and mares prove even more successful as speed producers than some developed ones, but that does not lessen the importance of development. Those successful undeveloped sires and dams inherited their power to transmit speed from ancestors which were developed and it would be a weak sort of inheritance which could not transmit qualities which were allowed to lie dormant for only one or two generations."

Left a Large Estate.

Reports from Tennessee are to the effect that the estate of the deceased driver George J. Fuller exceeded expectations. The great driver left \$75,000 to be divided up among his heirs. It seems while in Russia Fuller accumulated a big bunch of money that he invested in railroad bonds and other gilt-edged securities, and at his death his holdings in this sort of property was known, but very much underestimated. During his life Fuller fixed a number of relatives in independent circumstances. Financially, the Tennessee reinsman can go on record as the most successful trotting horse trainer of his time. Fuller was for several years at the head of the Russian training school at Krenovoi and his salary was \$10,000 per year and expenses. Krenovoi is the seat of the Russian trotting stud, and the school for horse trainers, for which Fuller was chief instructor, is carried on there. To this position he owed much of his independent financial condition at the time of his death.

A Very High Class Stallion.

Horsemen who have visited the training tracks and driven on the speedways in California and the Eastern States have all observed that the get of Charles Derhy 2:20, not only rank high among the fast trotters and pacers, but they are uniformly horses that have size and good looks. It is a very fortunate thing for breeders that the services of such a stallion can be obtained for \$50, which is the price fixed this year for Chas. Derhy's services by the Oakwood Park Stock Farm.

Chas. Derhy was a race horse himself and took his record at the trot in the sixth heat of a race. He was bred at Oakwood Park, his sire that very successful horse Steinway that was at one time the champion three-year-old trotter of America, and his dam that great broodmare Katie G. (dam of seven in the list) by the great Electioneer. If there is anything in breeding Chas. Derhy has the producing quality in his veins and cannot help being one of the greatest of the great ones. The showing he has already made is wonderful even in this age of great producers. Fourteen of his get have records below 2:15. Derhy Princess 2:08½, Owyhee 2:11, Dr. Hammond 2:12½ and Derhy Lass 2:14 are trotters that earned their records in races where they had to meet the best of their years and all were good winners in long drawn contests. Of the pacing members of his list Don Derhy 2:04½ is known as the fastest horse on the New York speedway. Diablo 2:09½, another son, is famous as a race horse and as a sire, being the sire of no less than eleven 2:15 performers, among them Sir Albert S. 2:03½, Clipper 2:06, Diablito 2:08½ and others.

Chas. Derhy is an own brother to Klatawah 2:05½ that still holds the world's record for a three year old pacer. He is also an own brother to Katrinka G. the trotting mare that took a record of 2:14½ over east last year, and also to Saraway the sire of that phenomenally fast pacer Winfield Stratton 2:06½.

The combination of Strathmore, Electioneer and thoroughbred blood in Chas. Derhy's veins is pretty near the acme of breeding for speed, good looks and staying qualities and these it is producing.

Breeders who want the best, those who expect size and style as well as speed, will make a great mistake if they overlook Chas. Derhy this season.

Four Good Stallions at Santa Paula.

At the Ferndale Stock Farm, Santa Paula, Ventura county, California, Mr. A. C. Dietz, one of the veteran and successful horse breeders of this State, has placed four stallions for public service this year. The premier stallion is Longworth 2:19, a son of Sidney that is bred much like Sidney Dillon, sire of the champion trotter of the world. Longworth's dam is Grey Dale, a daughter of American Boy Jr., he by American Boy that sired Williamson's Belmont. Venus, the dam of Sidney Dillon, was by a son of Williamson's Belmont, so the relationship of the two stallions is close. Longworth is not an untried horse. With very limited opportunities he has produced Alfred C. 2:12½, El Moro 2:13½, A. C. 2:15½, Esmeralda 2:19, etc. He himself has a race record of 2:19. Another stallion on the Ferndale Farm is Ringwood, a son of Sidney out of a mare by a son of Williamson's Belmont, therefore almost a brother in blood to Sidney Dillon.

One of the best bred Wilkes' stallions in the State is Sable Czar, a son of Sable Wilkes. His dam is by Whipple's Hambletonian, his grandam by Easton's David Hill, and his great grandam by a grandson of American Eclipse. Sable Czar is a black horse. The stallion Mahomet, a white horse, whose picture recently appeared in the BREEDER AND SPORTSMAN, will also be in the stud at Ferndale Farm. He is by Longworth and his dam is a mare by an Arabian stallion. He is nearly all white, but beautifully marked with bay and blue spots. He is a perfect beauty and gets many pure white and spotted colts. For further information in regard to these stallions read the advertisements in this issue, or address Mr. A. C. Dietz, Santa Paula.

Small bags of sand were distributed among drivers last week by the New York Society for the Prevention of Cruelty to Animals. Though each bag contained but two quarts of sand, there was enough to give a horse footing to rise if he fell and to help him in hacking many times. A few handfuls are a great help to a horse in such an emergency.

Cured Bone Spavin.

Oslin, Ills., Sept. 20, 1902.
The Lawrence-Williams Co., Cleveland, O.
Some time ago I wrote you asking your special advice on bone spavin. I used your remedy with perfect satisfaction in that case, and have been using quite a good deal of it for other blemishes and afflictions ever since.
FRANK H. SEIB.

No three in five races will figure in the July meeting at Columbus. Two in three heats and dashes will make up the card.

A Handsome Son of Mendocino.

At the sale of Palo Alto bred colts held at Fred Chase's salesyards in this city one year ago last month Mr. James Coffin purchased the colt Cassian, said by the horsemen present to be the best colt in the consignment. The price paid was \$1300, the top price of the sale. Cassian is now a three-year-old and has grown and developed into a very handsome young stallion. Last year, at the California State Fair, he took first premium for the best two-year-old, a prize that he won easily over all competitors. He is a natural trotter, with speed and splendid action.

His sire, Mendocino, was a colt trotter, getting a three-year-old mark of 2:19½ and is by Electioneer. He is the sire of Monte Carlo 2:07½, Idolita 2:09½ and several more fast ones. The dam of Cassian is the mare Cressida that took a three-year-old record of 2:18½, by Palo Alto 2:08½; the second dam is Clarahel (that produced three in the list) by Abdallah Star; the third dam is by Hambletonian 10, and fourth dam by American Star 14. Cassian is a royally bred colt and bred in speed producing lines. He will be allowed to serve a few mares this year at \$50 the season. He is in charge of Joe Cuicello at the San Jose track.

Electioneer and Piedmont Blood.

It was the blood of Electioneer and Piedmont that produced the stallion Mendocino 2:19½, sire of Monte Carlo 2:07½, one of the most talked about horses in America from the time Monroe Salisbury took him East two years ago until he was sold for \$20,000 at New York last December. The same blood, the combination being just reversed, produced Limonero, as handsome a horse as has been seen on the California race tracks, and one that took his record of 2:15½ as a three-year-old in the fourth heat of a sixth heat race which he won and defeated such high class ones as Expressive 2:12½, Baron Dillon, B. B. P., Axinite and others.

Limonero will make the season of 1904 at Agricultural Park, Los Angeles, at the low fee of \$25. He is undoubtedly one of the handsomest of the many handsome stallions that were bred at the famous Palo Alto farm. His sire was Piedmont 2:17½, and his dam a great broodmare by Electioneer. He is a magnificent hay with no white and all his get are hays or browns and high fine looking young horses that have speed enough for the track and style enough for park driving. Read Limonero's advertisement in another part of this paper.

A Great String of Horses.

Charles Tanner, who handles the majority of horses owned by C. K. G. Billings, and is the manager of the clever amateur's horses, has forty horses in his charge at the Glenville track, just outside of Cleveland. Mr. Tanner and his assistants jog every one of the lot every day if the weather will permit. Among the lot in his charge are Sir Albert S. 2:03½, Mazette 2:04½, Fred S. Wedgewood 2:05½, Dr. Monica 2:09½, Greenline 2:07½, Bahe Allerton 2:17½, matinee record 2:09½, also winner of two cups during the matinee season at Cleveland including the Inter-City Cup, Glih 2:15½, The Admiral 2:06½, Hontas Crooke 2:07½, and Willard T. 2:24½. All these horses are pacers. The trotters in the stable are The Monk 2:05½, Prince of Orange 2:06½, Equity 2:12½ pole record 2:08, Imogene 2:12½, Fanny Foley 2:19½ matinee record 2:11, Charlie Mac 2:07½, Louise Jefferson 2:09½, Clarita W. matinee record 2:12, Pat Henry 2:14½, The Dean 2:19½, Casma 2:22½, Hugh Wynne 2:13½, Bugle 2:12½, Homer 2:16½, Wauhan 2:09½, Darwin 2:13, Italia 2:23½, matinee record 2:11½, Jack Wilkes 2:21½, Peko 2:11½, Walter Smith 2:14½ and many others.—Horseman.

For all kinds of weather there is no drink like Jackson's Napa Soda—plain or in a lemonade.

Pulled a Sulky With Roller Bearings.

That high wheel sulky which Maud S. was hitched to when she trotted in 2:08½ was not one of the old plain axle vehicles after all. "Hawley" in the Kentucky Stock Farm writes as follows:

In a letter dated January 23, Mr. H. K. Devereux of Cleveland addresses the editor of the *Western Horseman* on the subject of the Lou Dillon-Maud S. controversy, and lays bare some important facts that should be considered before approving either the finding of the board or the action of the Messrs. Bonner. Mr. Devereux calls attention to the fact that the sulky drawn by Maud S. was built by Charles Caffrey, who testified that it was fitted with roller bearings; that the sulky now known as "Maud S.'s sulky" was identified by a man who "worked on the farm;" that the sulky used by Lou Dillon was ordered over a month before the mare became the property of her present owner, and that it was intended for The Monk, and having been ordered to be "like the one made for Maud S." was built by Charles Caffrey as nearly as possible like the old one, with the exception that it was somewhat heavier.

I think a knowledge of the above facts, (and who can deny that everything written in Mr. Devereux's letter is absolutely a fact), would prevent the possibility of any writer giving expression to the belief that Lou Dillon trotted under more advantageous circumstances than did Maud S., as far as the style of sulky was concerned, and any imputation on the fairness of those interested in Lou Dillon is exceedingly unbecoming, and not borne out by the facts in the case. In view of the fact that a Caffrey sulky was built for Maud S. and the builder testifies that it was fitted with roller bearings, it is somewhat strange that the bare statement on the part of the Messrs. Bonner that they have in their possession the sulky used when the mare trotted her fast mile, and that it is a plain friction action sulky should be taken without question, and the mere fact that Caffrey built both sulkies and testifies as to the bearings in each will convince a majority of fair-minded men that there was no advantage to be had from the vehicle when Lou Dillon trotted her mile, and it will also make many people believe that should Mr. Billings accept the offer of the Messrs. Bonner and use the sulky that they insist is the one drawn by Maud S., Lou Dillon will be put to a disadvantage. There is no doubt that a trivial matter has become a tempest in a teapot, and there is also no doubt that a very great performance has been discredited in a manner not in keeping with the ethics of good sportsmanship, and that the adherents of old-fashioned methods in their anxiety to prevent old traditions and old institutions from being forgotten, have failed to find the true facts in the case and have formed their opinions through testimony that is not competent.

The Percheron at Home.

The system of raising the Percheron in his native land is a peculiar one. One section of the province produces, while another raises what the other has produced. No matter what may be the class to which she belongs, light or heavy, or partaking of both, the mare is expected to breed every year. If barren she is sold, and this fault continuing, she passes into public use. During her period of gestation she works constantly. A few days of rest before and after foaling is the only time lost. The remainder of the time her work pays abundantly for her keep and the interest on her cost. At the age of five or six months the colt is abruptly weaned and sold. Its price varies from 500 to 600 francs—sometimes more, but this is the exception—and so far it has cost nothing. Taken into the interior and pastured upon the fertile meadows, it remains one year unproductive. In winter it is fed upon hay, in the stable, and during the fine season turned into the fields to graze. It reaches in this manner the age of fifteen or eighteen months. At this age it is put to work. Naturally docile, and in the hands of a man patient and mild, its training is easy.

The Kenney Manufacturing Company, 531 Valencia street, San Francisco, has a second-hand Toomey cart with wood wheels, extra heavy carriage tie, cushion, etc., that is as good as new, having been used but little, which will be sold for \$90, regular price \$135. Harness, blankets, etc., goes with it. They also have a fine surrey for sale cheap and manufacture sulky wheels and attachments to order. Pneumatic tires, solid cushions put on all kinds of vehicles.

Topsfield, Mass., Aug. 9, 1901.
DR. S. A. TUTTLE, Dear Sir:—Last spring I bought a small lot of your Elixir, and since then I have sold several dozen, as it has given good satisfaction in every case where it has been tried and my patrons all speak highly of it. Now, what I should like to know is, will this Elixir do to rub on the throat for this distemper or horse gripe that is going around? I have been asked this question and refer to you for an answer. Should like to have one of your books. Yours truly,
JACOB J. HARDY, Harnessmaker

A Successful Sire.

One of the most fascinating branches of horse breeding lies in the production of high-stepping park and carriage horses, and the breeder who finds a demand for all the single horses and pairs he can produce can be counted successful. On the streets, in the parks, and along the fashionable drives as well as at the horse shows, the high-stepping horse attracts the attention and admiration of the public, and those that have beauty of conformation and good manners as well as the high-stepping quality are in greater demand than supply and bring very high prices. It is so difficult to secure high-class horses for the carriage or the pleasure vehicle that price cuts but little figure with wealthy people who want them. The breeder who has the goods can command his own price in any large city, so strong is the demand. On this coast but very few breeders have as yet paid much attention to the breeding of high-steppers, one of the pioneers and leading farms being the Baywood Stud at San Mateo, the property of Mr. John Parrott. This gentleman imported the hackney stallion Green's Rufus some years ago, and has achieved great results with him, using trotting bred mares of hackney conformation. Not a season passes but the Baywood Stud sells two or three carriage pairs for from \$1500 to \$2500 and single horses at prices ranging as high as \$2000. While the number of mares bred each year is not large the proportion of high-class horses produced has been great and Mr. Parrott's venture can be termed an unqualified success. Green's Rufus is a very successful sire of high steppers that have substance, quality and good looks. He will be limited to a few outside mares this year at \$75 for the season and we do not know a surer way of getting a handsome carriage or park horse than by breeding a well bred trotting mare of proper conformation to the this stallion.

National Trotting Association.

The Board of Review of the National Trotting Association met in New York last Wednesday. The following meagre account of the proceedings was sent out to the daily papers by the Associated Press:

NEW YORK, February 10.—Important changes were made in the directorate of the National Trotting Association at the twenty second annual congress of the association held to-day at the Murray Hill Hotel. Interest centered in the efforts of wealthy owners of light harness horses and trotting tracks, constituting the so-called younger element in the sport, to obtain control of the organization.

Representatives of this class have been in session for several days, preparing for the contest before the congress. It became known to-day that they had decided to incorporate the Grand Circuit under the laws of the State of Michigan.

It was decided, at the same time, that the new Grand Circuit should appoint stewards of racing meetings, who should be competent to make findings independent of the Board of Review. This raised the question of jurisdiction between the National Association and the new Grand Circuit, which was settled by a compromise, reached at a conference held between President Johnston and Messrs. Campar, Butler and Taylor, which was ratified at the congress to-day.

The following officers were unanimously elected: President, P. P. Johnston of Lexington, Ky.; First Vice-President, Morgan G. Bullock of Connecticut; Second Vice-President, N. T. Smith of San Francisco; Treasurer, Lewis J. Powers of Springfield, Mass.; Secretary, W. H. Gocher of Hartford.

For the Western district, John A. McKerron of San Francisco succeeded E. P. Heald of the same city. A. B. Spreckels and J. C. Kirkpatrick were also continued.

On the question of matinee performances it was decided that a horse shall not take his mark from any performance of this sort. Such contests are to be regarded as "contests of speed."

After a discussion of the amendment of the rules providing for the announcement of the sale of a horse previous to a race in which he was entered, it was decided that the owner must give notice to the secretary of the track, and through him to the judges, of the changing hands of any horse, or the leasing of him after 7 o'clock on the evening preceding any race in which the animal had been entered.

President Heald of the Pacific Coast Trotting Horse Breeders Association has appointed Messrs. I. L. Borden, James Coffin and John A. McKerron as members of a committee to act with committees from the Pacific Athletic League, the Golden Gate and San Francisco Driving Clubs, and the Carriage Owners Association, to present plans to the Park Commissioners for the proposed new athletic grounds and speed track at Golden Gate Park, San Francisco.

One of the McGregor Family.

One of the fastest two-year-olds seen in California in 1893 was the colt Silver Bee, bred and owned by W. O. (Joe) Bowers, proprietor of the Capitol Hotel at Sacramento. It was at Oakland that his record was made, in a race where he defeated Marchioness and John Bury in straight heats, the second heat being the fastest, 2:27½. Silver Bee is a very handsome chestnut stallion sired by that game racehorse, Silver Bow 2:16, son of Robert McGregor, the sire of Cresceus 1:59½. The dam of Silver Bee is Belle Mc, that is also the dam of Worthwood, a colt that trotted in 2:50 as a yearling. Belle Mc was by Ensign Goldust Jr., a grandly bred member of the famous Goldust family, thought by many competent judges to be the handsomest of all the trotting families. The

Glide by Silver Bee

second dam of Silver Bee was Little Belle by Belmont 64, sire of the great Nutwood and many other great producers. The third dam was a thoroughbred mare by imported Trustees owned at Rancho del Paso. Silver Bee, it will be seen, is one of the best bred stallions in California, and those who are breeding for handsome horses, as well as speedy ones, should not overlook him. He has had but a limited opportunity in the stud, but his colts are all grandly formed and fine individuals. The only one ever trained at all is the trotter Glide that has turned the Sacramento track in 2:22, and can probably take a record of 2:15 if raced. Silver Bee is to make the season of 1904 at Vorden, Sacramento county, at the low fee of \$30. See advertisement for full particulars.

Good Words for the Zombros.

George T. Beckers, owner of Zombro 2:11, received the other day a letter from Mr. W. P. Murray of Cleveland, the owner of Italia, a daughter of Zombro, from which we make the following extract:

"I notice by the BREEDER AND SPORTSMAN that Zombro will be shipped on to Cleveland in the spring and will make a season here until September 1st. What arrangements have you made for keeping him here and at what farm can he be found? I am glad to know that Zombro is coming here, as I look upon him as one of the coming sires, for it seems as if every colt that he gets has speed. I am more than pleased with the showing that Italia made last year, although I did not start her in any races for money. She still has a record of 2:23½ and is eligible to the 2:24 class. However, she started seven times in matinees, trotting matinee record to wagon in 1:11½, and stepping the last half of this mile in 1:02½, which shows a pretty fair prospect for the 2:24 class next year. I do not know as yet who will have her, but she is certainly good enough to go into the hands of a good man, and should get a very low mark the coming year. It has taken two years to acclimate her, as she came over from California in about the worst condition possible. Italia is now looking fine and is in as fine form as she ever was. She shows her abilities to race, and all she needed was to get acclimated and get the impurities out of her blood, which it has taken us a long time to eradicate, and I look for her to be in the front ranks next year as a race mare."

Horses Lead in Value.

The acting statistician of the Department of Agriculture has completed his estimates of the number and value of farm animals in the United States on January 1, 1904. The totals for the country are shown in the following table.

Farm Animals.	Number.	Value.
Horses.....	17,736,079	\$1,136,940,298
Mules.....	2,572,517	217,520,832
Milk Cows.....	17,419,817	509,840,498
Other cattle.....	43,629,298	712,578,134
Sheep.....	51,630,144	133,520,099
Swine.....	47,009,367	289,224,627

Jackson's Napa Soda does not tangle the feet

Answers to Correspondents.

C. H., Riverside, Fresno Co.—The stallion New York was a registered horse. His number is 524. He was a brown horse, foaled 1867. Sired by Hambletonian 10, dam Lady Finch by Harry Clay 45, second dam Mirinda by Prince Duroc, third dam a running mare. He was bred by Gabriel Seeley, Orange county, New York, and owned by Major H. P. Wade of Maplewood Stock Farm, Jefferson, Ohio. We do not know whether the party you mention ever owned him, nor at what price the horse ever changed hands.

R. L. G., City—Please give the record and breeding of Beauty Mc, the horse that William Fieldwick trained in 1892.

Answer—Beauty Mc 2:14½, bay gelding foaled 1886, by Nephew 1220, dam Nellie by Gen. McClellan 144, grandam Esperanza by Ringgold.

BUYER, San Francisco—Kindly let me know in the next BREEDER AND SPORTSMAN the breeding of Dictatus and also a mare called Mary C. with a record of about 2:11 or 2:17.

Answer—Dictatus 2:17 is by Red Wilkes, dam Miss Lollie by Dictator, second dam Gold Pen by Mambrino Patchen. There are seven or eight mares by the name of Mary C. that have records. The only one with a record below 2:18 is a chestnut pacing mare said to be by Idol King. She took a record of 2:16½ in New Hampshire in 1901.

Several Reversals of Form.

Now that Lou Dillon's 2:02½ at Brighton Beach and 2:00 at Readville, says Trotter and Pacer, have been so variously construed, let us hark back to other days and still other very brilliant performers and weigh well their several changes of public form. Partly from memory we write, and a few instances, where friends have at times related turf yarns at my elbow when writing for dailies, were jotted down for future reference.

As great a trotter as Maud S. dropped from 2:12 to 2:08½ within a week. It was at one time doubtful, too, as to Mr. Fasig securing that memorable trial, even after contracting for it as his star Grand Circuit attraction of 1885. You all know that not even a P. T. Barnum could teach him how to advertise a meeting. He sent a tidal wave of hillboarding through Ohio, and had a great house that July day to see Maud S. and Bair attempt to lower their 1884 record of 2:09½, made at Lexington.

Bair had not been faster than about 2:12 with the mare in her Cleveland preliminaries—she was shipped there some days in advance to receive a special preparation—and, too, the Harold mare had pulled up lame, necessitating the dispatching of Mr. Frederick Bonner west to shoe her. As she did not come out of her last workout satisfactorily, Bair was discouraged. Even with the crowds arriving he wanted to substitute a "speed exhibition" through the stretch quarter for the advertised mile trial.

Splan will surely remember that day and his end Mr. Fasig's interviews with Bair ere he consented to start. The driver knew his mare could not trot in 2:10, knew she was short of work for world's record-hitting, and, naturally, wished to shield her from a disappointed public. We have always considered that Splan carried the day for her, for Bair, the Cleveland track, and every contingent interest, as it was his perfect rating, together with his taking direct supervision of both pacemaker and contestant, so far as voice and whip went, that led to success. He never let up and was always master of ceremony, leaving Bair but to keep the mare together at the very end. It was the best job he ever did. Thousands who saw that mile never mistrusted that Maud S. was considered by her party below her previous season's highest form, yet it was so.

Good Jockeys Are Scarce.

Good jockeys never were so scarce in the United States as they are at the beginning of this season and the salaries commanded by even boys of but mediocre ability in the saddle run away up into the thousands of dollars for first call. The exodus of good riders to England, France and other countries of continental Europe is said to be responsible for the present scarcity of riding talent. Furthermore, the boys find that they can do better in the old country, inasmuch as they do not have to waste so much to keep down to the featherweights so popular among most owners here.

Charles C. Lloyd, who now lives at White Plains, has decided to let Chain Shot 2:06½, have another try at the 2:07 class flyers. The son of Red Heart and Pique is now at Alta P. McDonald's stable, in Albany, and jogging over the canal track, preparatory to a keying up for his Grand Circuit engagements that may be made. At Memphis, in 1901, on the day he took his record not a few predicted a mark of 2:04 or faster for the crack trotter from Manhattan.

Notes and News.

Pleasanton and Breeders entries close March 1st.

Owyhee 2:11 was bred to about ninety mares in Australia last year.

Tulare is arranging for a good meeting this year with three \$1000 stakes.

John Phippen is working fourteen trotters and pacers at the San Jose track.

Second payment on entries in Breeders Futurity No. 4 must be made March 1st.

Nearly three hundred horses are in training at Pleasanton and all the barns in town are in use.

Grass is growing all over northern and central California and the prospects are good for a fine season.

It has been discovered that every secretary of a Grand Circuit track was formerly a newspaper writer.

Monroe S. 2:12½ by Seymour Wilkes is an improved horse over his last year's form and will lower his record as sure as fate.

Monhells 2:23½ reached Lexington, Friday, January 29th, and is located temporarily at the John Davis barn at the fair grounds.

James Hickok, a brother to the late Orrin Hickok and himself an old time horseman of note, is dead at his home in Muncie, Ind.

Dr. J. C. McCoy, Kirkwood, Del., has bought of Welch & Jones the stallion Admiral Dewey 2:14½, for which that firm paid \$5900 at the Fasig-Tipton sale last week.

Barney Simpson has a chestnut filly by Nutwood Wilkes that is a very bright pupil of the speed school he is teaching at the Pleasanton track. Her dam is by Fairmount.

David A. Snell, New Bedford, Mass., will train Jupe 2:07½ and four of his colts this season. Mr. Snell is 76 years old but he will do the training himself. He drove Jupe to his record.

Zehamhra, a mare by Charles Derby 2:20 that was sold along with Owyhee 2:11 to Australian parties in 1902, has gained the wagon record of that country by trotting a mile in a race in 2:40.

The New York State Fish Commissioners have refused to accept the dates assigned by the stewards of the Grand Circuit and the fair at Syracuse will conflict with the meeting at Hartford.

Sonoma Girl owned by Judge Dougherty of Santa Rosa has been sent to Ed. Mills at Pleasanton. She is one of the best gaited trotters in California and showed a mile around 2:16 last year.

When in foal mares must be well cared for. Their feed should be liberal, and they ought not be left in large hunches, at pasture, for they will run and kick and this causes many mares to abort.

Effie Logan, dam of Sir Albert S. 2:03½ will be bred to Cbas. Derby this year and is already booked. Her yearling by Diablo, full brother to Sir Albert S., is one of the handsomest yearlings on this coast.

One pneumatic speed buggy for sale. This is a bargain at \$125; has side bars, end springs, 28 inch wheels and arched axles. Also a surrey at a bargain at Kenney Manufacturing Company 531 Valencia street.

Charlie Spencer, who has fourteen or fifteen head from the Walnut Grove Stock Farm at Pleasanton track, is credited with having about the best looking string on the grounds. Aristo 2:17½ is a race horse right now.

It is stated that Mr. C. K. G. Billings will breed six mares to John A. McKerron 2:04½ this spring. The list includes Mazette 2:04½, Lucille 2:07, Louise Jefferson 2:10, Imogene 2:11½, Bugle (4) 2:12½ and Fanny Foley 2:19½.

Budd Dohle, who is now located at San Jose with Kinney Lou 2:07½, will probably have Search Me in his string. This colt is now four years old and belongs to Mrs. F. H. Burke. He is by Searchlight out of Wanda 2:14½.

It looks as if Stam B. would get many of the best mares in California this year. The way the young Stam Bs are showing confirms all the arguments that have been used in his favor in the past. Stam B. is making good.

Mr. L. C. Gates, of Modesto, purchased last week from A. L. Roberts, of Tulare, the green pacing stallion Almont Boy. He is by Juanito, sire of Almont Patchen 2:15 and Stanford R. 2:23½. Almont Boy's dam is by Oakland Boy, he by Winthrop, son of Hiram Drew. Mr. Gates will give his horse road work for a month or so and then send him to Sutherland & Chadbourne at Pleasanton to be developed for speed.

Robert Sparks is located at Dickey's road house on Fifth avenue, San Francisco, with five colts from Mr. Lewis Pierce's farm near Suisun. A three-year-old bay gelding by Diablo out of a mare by Director is a very promising trotter.

Jasper Paulsen of Palo Alto has given the name Fred Chase to a three-year-old by Welcome 2:10½ out of a mare by James Lick, second dam by Owen Dale. This three-year-old is a pacer and a good prospect. John Phippen is training him.

Myron McHenry is quoted as saying that Dan Patch will pace in 1:52 this season, and this report closely followed one which said that McHenry had determined to go with the runners. He will find many thoroughbreds that cannot run a mile in 1:52.

Ben Chahoya is getting lots of inquiries about Guy McKinney, "the best bred McKinney in California," as many term him. Guy McKinney is doing nicely in Ben's charge, and is showing 2:20 speed and better. There will be some high class mares bred to this stallion this year.

L. Mativia, who has rented the stalls at the Dixon track and is training a string of horses there, met with an accident one day last week, being thrown from a cart and nearly knocked out by striking on his chin, receiving a nasty cut and some bruises, but was otherwise not seriously hurt.

H. D. Brown, who was confined to his home in Oakland for several weeks this winter with an attack of pneumonia, has recovered and gone to Pleasanton with a half dozen green prospects he has in training. His five-year-old gelding by Diablo out of Lilly Langtry, dam of Ed B. Young 2:11½, Dudley 2:14, etc., is one of the best prospects at the track.

Ed. Lafferty is now at Pleasanton with a string of fine horses headed by that good pacing stallion Daedalion 2:11 now owned by A. Ottinger, the well known ticket broker of this city. Daedalion, as will be seen by his picture on our front page this week, is a grand looking horse, and in Ed's experienced hands should lower his record this year.

An experienced feeder for high-steppers for market gives the following ration: One part of cracked corn, one part oats, two parts wheat bran and one-half part whole flaxseed—all steam cooked. Feed all they will eat with bay. This ration, he says, will transform a thin horse into a fat, sleek high-lifter quicker than anything else he ever saw.

L. V. Harkness, proprietor of the Walnut Hall Farm, Doverall, Ky., has decided to change his method of campaigning. Instead of having his horses start late in the season they will be given an early preparation and be ready for the opening of the Grand Circuit at Detroit. With this idea in view thirty head have been shipped to Memphis in charge of Ed Benyon.

Edward A. Lord, former owner of Tommy Britton 2:06½, Fanfaron 2:11½, Classis 2:16, and others of note on the Illinois Circuit and raced by the late George West of Chicago, died at his residence in Evanston on Wednesday, aged seventy-five. For over a year Mr. Lord had been hopelessly ill and the great horses that he owned and so delighted to watch at their work had one and all been sold.

Senator C. M. Jewett of the New England Horse Breeders Association is quoted as saying that his association has decided to discontinue the practice of holding two big trotting meetings a year, as it has in the past. "Our second meeting will," he said, "be largely given up to the amateurs with steeplechase, trotting and running races, with a horse show in connection. We will make no effort whatever to get the fast ones."

Mattie B. 2:15½ by Alex Button is certainly with foal to Searchlight 2:03½ and is due about the last of May or first of June. Her owner, police officer W. Van Keuren of this city, has heretofore failed to get a foal from this mare and is highly pleased over the prospect. Mattie never looked as well as she does now. Her foal should be ready to enter in the free for all class about as soon as it is able to stand up.

Five of Zombro's get that are not yet quite two years old have been stepped over the Los Angeles track this winter and the slowest quarter showed by any of the five was 39 seconds. William Coleman of Los Angeles owns a three-year-old filly by Zombro that Walter Mahen has jogged a quarter in 35 seconds and she is entered in nearly all the stakes in California. Bulletneck a three-year-old by the same sire out of Belle Raymond, owned in Phoenix, Arizona, is a lightning pacer for a colt and has stepped an eighth in 15 seconds. There will be something doing among the Zombros this year.

With the thermometer 15 degrees below zero, four of the young society ladies of Janesville, Wis., held an informal race meet at the speedway built on the Rock river, a half mile from the city, January 30th. Three heats of a half mile each were trotted in exceptionally fast time, and Mrs. J. T. Nichols won two of them straight, and was declared the winner. Miss Schicker was second, Mrs. Sager third and Miss Fifield fourth. All of the ladies are experienced drivers, and all own the horses they raced. The judges, timers and starters were women, and the majority of those who witnessed the race were society matrons of prominence. The race was arranged at a time when the gentlemen who drive each afternoon would be at a mass meeting, and the track was clear of the usual speeders. The race was the result of a wager made at an afternoon card party recently.

A movement is on foot, headed by the trotting horse trainers of New York and New Jersey, to form a horse trainers' alliance for the purpose of having representation on the Board of Review and in the deliberations of the National Trotting Association.

At the Jewett covered track near Buffalo there is a colt called Lord Direct which a fortnight ago showed half a mile in 1:07 and was not hurried much at that. This youngster has one of the greatest speed inheritances ever transmitted to a pacer, for he is by Direct Hal 2:04½, dam Lady of the Manor 2:04½, long champion pacing mare of the world.

Imports of horses into Great Britain from the United States in 1903 reached only 3160 head, valued at £119,951, as against 7146 head in 1902 and 19,360 in 1901, the respective values for these two years being £264,529 and £659,299. From Canada the horses imported to Great Britain in 1903 numbered only 421, against 1869 in 1902 and 1500 in 1900.

It is not of record that those who are so emphatically insisting that the conditions under which Lou Dillon trotted a mile to high wheel sulky in 2:05 were not the same as those under which Maud S. trotted in 2:08½, ever made any such fuss about the difference in conditions between Maud S.'s performance and the one when St. Julien trotted the Hartford track in 2:11½. And while these sticklers for "similar conditions" are about it, why don't they claim that no horse has yet beaten Lady Suffolk's mile in 2:29½ over the old Beacon course at Hoboken in 1845. Probably no other horse ever trotted a mile in 2:29½ under the same conditions in the past and certainly no one ever will in the future. So why not claim championship for high wheels for "the old gray" mare?

Arrangements are being made for another driving matinee to be given by the Los Angeles Driving Club Monday afternoon, February 22, at Agricultural Park says the *Express*. This matinee is being figured on as being the best in the history of the club. This is saying a great deal, as the club has been highly successful in the past, but the board of directors want to make the program for Washington's birthday particularly attractive. In order to bring out new features and cause the members to take part it has been decided to offer a trophy for each race. One or two of the best races will be for valuable cups. Whips, harness, reins and other serviceable merchandise prizes will be offered. Owners of horses who have not been out in months to a matinee have promised to take part this time. All the men who have driven winners in the past will be out and drive either for themselves or others.

Perhaps a meeting will be given this year over the mile kite track at Tulare. The track and grounds are owned by five gentlemen of that city, who are now getting the track in good shape for training and will soon have it in apple pie order. This Tulare track is very fast and is the only kite track left on this side of the Rocky mountains. Horsemen say that it is two or three seconds faster than any track in California when it is in perfect order. The probability is that forty or fifty horses will be working there within the next sixty days. L. Morse of Hanford is now at Tulare with quite a string of horses, among them a green pacer that has stepped a half in 1:08 with the last quarter in 32 seconds. He also has a green trotting mare that will make some of them think they have been to the races when they beat her. Mr. W. F. Ingwersen of Tulare who sends us this information, says that five gentlemen of Tulare, of whom he is one, own the track there and it is out of debt. Some talk has already been had of giving a harness meeting this fall to continue three days with one \$1000 purse and one \$500 purse each day, and colt stakes of from \$250 to \$350 to make up the rest of the program. Such a meeting would draw all the best stables in training in California and should be a great success.

"Volunteer" writes from Memphis to the *Horse Review* as follows about Lou Dillon: "Lou is wintering in the best possible health and spirits. Almost as soon as she reached Memphis, early in December, her shoes were pulled off and she has ever since enjoyed a complete let up. She spends a good part of every day in the paddock which was built for her, adjoining Mr. Billings' private stable and her chief delight in her freedom there is found in rolling luxuriously in the nearest approach to a mud-hole which she can find. She has thickened up a great deal, but as she is always on the move the flesh she has put on is none of it flabby. Her muscular development since last season is pronounced and her quarters now resemble those of a thoroughbred sprinter. When she enters active training again in the spring she will be every respect a more powerful mare than she was a year before. Her docility seems to grow greater constantly. She is very fond of company and always comes to the gate of her paddock to receive the visitors who call there to pay their respects to her majesty. Despite the fact that she is so completely out of training, the watchful eye of Millard Sanders or the faithful Tommy Vaughn are always upon her. She is one of those things impossible to duplicate, priceless, and therefore to be guarded as 'in value far above the rubies.' She will not be hurried in her preparation this year. In 1903 she was trotting quarters in 0:29½ early in April, at Pleasanton, Cal. This was done because she was to be sold at Cleveland early in May, and the day before the sale she trotted a public quarter over the Glenville track in 29½ seconds. This season, with no necessity for such a course, she will be carried along more slowly and it is very doubtful if she will be asked to break any records in June as she did in 1903."

Adopt Proper Standards.

All agricultural shows or fairs are ostensibly run for educational purposes, writes N. J. Harris of Des Moines, Iowa, the various horse shows included. In any or all of these horse shows there are at least three distinct interests, the exhibitor, the management and the general public.

In preparing the premium list and catalogue, each particular class should be accompanied by a distinct standard and minute description of the animals that are expected. Then if entries are not made in accordance with this standard, let them be ruled out when they come into the ring. Let these standards be prepared by competent authority and with great care. These standards and descriptions would be great educators within themselves. The auditors could not only become well informed and able to intelligently criticize if the judging was not up to the standard, but could much more enjoy the show, because there is no real enjoyment of an exhibition without a fair knowledge of the things shown.

Professor Grange, of Michigan Agricultural college, says: "Our interests in things about us invariably increase in direct ratio with our knowledge of them." These standards to meet the popular demand must be up-to-date, and thoroughly American. Just because someone else says so, don't go. This statement was fully verified in the late New York horse show when the English judge was passing on the saddlers. One critic says: "The judge got what was coming to him in this class—a round hissing. This storm has been gathering for two years, and its outbreak indicated an end of patience." This comes from the fact that the English idea of a saddle horse and the manner of mounting him differs from that of America. The same is true of the carriage horse. The Englishman and the "smart set" do not care if a horse can pace all day in the "shade of a sugar tree," provided he only goes high enough, while the American wants him to go along some.

One critic of the Madison Square garden show reflects the American idea of the thing quite clearly. He says:

"The high-stepping craze at Madison Square seems to increase rather than to diminish, as we hoped it would. It seems that a horse to win in most of the harness classes at the garden requires but one qualification—that he can go high. Conformation, style, symmetry, bone, muscle, action—everything, in fact, that goes to make up an all-round horse—seems to be sacrificed to one ruling passion—high-stepping. High-stepping and high action are horses of different colors. A hysterical, excited animal when his feet are loaded with iron may lift his fore feet high while he drags his hocks or not, as the case may be.

Action, on the contrary, while it may be assisted somewhat by shoeing, comes from the nature of the animal's conformation. To be perfect it should be moderately high and all-around, and hocks and knees should be carried with a smooth circular motion like the crank-pin of a revolving wheel. Both fore and hind feet should leave the ground in unison and complete the stride with a smooth uniform circular action or motion. There should be no dwelling of the foot, no pointing of the toe, no paddling, dipping or dishing; if should be straight, true, smooth and uniform in speed. When a horse does this alike with fore feet and hind feet—the latter as high in proportion as the former—that is perfect action.

High-stepping is a lower order of action altogether in most cases, as was painfully evident to the most casual observer at Madison Square. The highest high-steppers had anything but smooth uniform action; in fact it was in some cases nothing short of hysterical stepping principally with the fore legs. Some of the winners did not go alike with any two legs. They rolled and jerked their legs in anything but unison, but they were stepping high. Instead of being of a forward circular motion it was principally characterized by an up and down movement, thoroughly inconsistent with perfect action.

The lamentable thing about this one-idea-Madison-garden craze is that this horse show is of such national reputation that it is looked upon as the leader and it is greatly to be feared the style of judging there will be reproduced elsewhere.

The trouble that brings out so much adverse criticism comes from two sources: First, the fair or horse show managers and the judges frequently fail to keep pace with the progress of the age. Secondly, and probably the greatest source of confusion, is allowing the judges to be both law makers and judge. The thing to do is to have our standards and rules plainly laid down in advance by competent and practical authority and then require the judge to judge in strict accordance with them.

We have at most agricultural fairs a class called sweep-stakes for draft horses. Now every well informed draft horse breeder knows that there are two distinct types of draft horses viz: The low, long and broad kind with low heads, steep shoulders and corresponding steep pasterns, with ability to throw a full ton weight into the collar and whose sole use in life is to move immense loads at a walking gait. The other type is a more rangy or coachy type of draft horse. This latter horse has about the same lineal development, but lacks the weight and thickness. His head sets higher, his shoulders and pasterns more

sloping and his tail sets higher. He is not in any sense a misfit, but is a clearly defined type, and his uses are more numerous than the former and he sells at equally high prices. His height is 16½ to 17 hands and his weight from 1600 to 1800 pounds of bone and muscle, not fat.

Now if the shrewd exhibitor knows who is going to judge, he knows which type of horse to enter for exhibition, because he knows which type the judge prefers. But if he does not know the judge he makes an entry of both types, because as he says, he does not know which type the judge is partial too. The proper thing to do would be to have both types recognized by the fair association and require the judge to lay his choice to one side and judge according to type or standard.

Again, in case of the standard bred trotter. Every well informed horseman knows that from a light harness speed standpoint he has no equal, but from any other view point he is decidedly promiscuous. And it is farther observed that the American trotting horse is differentiating into several distinct types. There are the trotters and pacers of extreme speed. Then we have another type that differs from the speed way proper, in that it has less speed, but more fine finish, elegance, quality and manners. They are park horses used by gentlemen who do not care to drive at breakneck speed, but want a free straight line mover but not necessarily of the high action kind, which by the way is another type of the trotter well to the front. He is known as the high action trotter or American carriage horse. He is more round of form and has all the beauty, grace, manners it is thought possible for a horse to have. He is a horse whose value often is estimated in four or five figures. Lastly, we have the every day roadster or business horse.

Here we have a half dozen recognized types of the standard breed as he is called. All of the fairs both great and small have a class provided for this horse. A class is called and the judge and his assistants go into the ring. About all the types above referred to are present. The judge looks wisely around among the stock for a few minutes and then directs the assistant where to place the ribbons. Can any person tell from what type or standard the ruling was made? Could the judge himself answer this question intelligently?

This farce is gone through with, every season all over the country and not a scintilla of information is imparted from this source.

Suppose instead of premiums at random on the so-called breed, the premiums were offered for the distinctly defined types, with clearly defined standards as to size, conformation and purpose, what a wonderful change would be noticed. It is not breed that people want, it is type. What does the practical man want of a breed if it does not produce the animal that suits his purpose.

Let us go farther and give one and only one appropriate name for each class or type of horse and not a half dozen meaningless expressions for the same class. If we mean American carriage horse, say so and do not say "carriage horse" for "the gig horse," "the park or boulevard horse," "heavy leather" for "heavy harness," "high stepper," or the "pile driver."

First of all let us have a clearly defined type best suited to the work to be performed. Give this type a name, not a half dozen, that expresses as near as possible the character of the services rendered. Then a clearly defined standard of size, conformation and general characteristics of an ideal horse of this type, and lastly require the show or exposition managers, exhibitors and judges to stay close to the standard. Then expositions and fairs will mean something and be truly educational instead of a burlesque as now.

Will Be a Good Year.

Harness racing was more largely patronized in 1903 than during any year of the past. This, notwithstanding the increased variety of outdoor sports, including polo, golf, baseball, auto races, football and the numerous innovations of the bang tails on tracks hitherto solely devoted to the harness horse. And there is no reason why 1904 should not be as good a year as 1903, says the *American Sportsman*. There is a feeling in the air that the presidential year may absorb the attention of the public, but with the country in the calm of peace, there is nothing in continental politics to either entertain or amuse the average citizen whose mind craves alluring recreation and whose tired body needs it. The future of harness racing is secure.

A fine surrey, one of the best made, and handsomely finished is for sale at about half its value by the Kenney Manufacturing Company, 531 Valencia street, San Francisco.

New Association Proposed.

A preliminary meeting of the light harness professional drivers was held last week at the Bingham House, Philadelphia, for the purpose of organizing an association, the object of which will be to elevate the standing of the profession in general, for mutual protection and relief of disabled members, provide a sinking fund for the same; have representation in the deliberations of the National Trotting Association and Board of Review; favoring local organization in every state to control their own funds and work under recognized rules formed by a parent association, controlled by delegates representing each minor body.

Harry W. Davis, of Camden, N. J., was selected as temporary chairman, and J. B. Miller, secretary. The object of the association was read and also responses from prominent track drivers who favored the movement.

A long discussion over the treatment that drivers received from the average judges of races throughout the country was held. The most important grievances being incompetent judges and no redress at the board of review meeting and from the rulings generally of the members of the National Trotting Association and judges at the race meetings.

It was proposed to trot under the title of the "Professional Drivers' Beneficial Association of America," subject, however, to change at any subsequent meeting. A committee of seven was appointed to prepare a set of by-laws to govern the association, consisting of N. W. Davis, Camden, N. J.; Walter S. Garrison, Woodstown, N. J.; C. W. Merkle, H. Luzenberg, C. N. Payne and M. E. Stid.

Larabee Purchases King Red.

John Splan has purchased for C. X. Larabee, of Montana, the trotting stallion King Red 2:20½. Mr. Larabee has a ranch of about 15,000 acres and a band of 250 broodmares. In this connection Mr. Splan says: "These mares have been selected by him with great care and as much attention paid to their individual merit as to their pedigree. He will place this horse at the head of his stud, hoping not only to raise some good trotters but to raise some high-class family and carriage horses. Individually this is a grand horse, sired by Red Wilkes, out of a producing daughter of Mambrino King, gives him a racing character and a pedigree hard to beat. He weighs 1250 pounds, has shown his ability to trot close to 2:10. The best description that can be given of him is that he is a Tichenor horse in the full sense of the word. I am leaving for Montana the last of the week, where I go as the guest of Mr. Larabee, to look over his breeding plant and perhaps to give him some suggestions as to what class of horses ought to be raised for the public market. Records and pedigrees do not satisfy the public any more; they want the individual horse, and he must be of real merit. That class is scarce; they are getting scarcer every day, and consequently are bringing greater prices whether offered at public or private sale."

Speedways Help the Business.

Thousands of business men who cannot be called rich in the accepted sense of the word own and drive trotters or pacers for recreation, and this very fact has been the moving power in promoting the status of harness racing during the past two years. From the speed path to the course is but a short step. A business man buys a horse for his pleasure. The horse shows a greater degree of speed than it was expected he would and the next thing is the trainer and the race. In thousands and thousands of instances this migration may be traced and while the connection with the track may not in most cases last very long, at the same time the horse is generally much the better for his term of education, and even if he does not develop speed enough to win much money he is assuredly at the end of his schooling better fitted to go out in company on the speedway and do well in his brushes than before he had received the benefit of the trainer's art. Many people knowing that their friends own and use fast trotters or pacers view the sport in a totally different light to that in which it before appeared to them and attendances grow apace. The added demand for the speed path makes for the good of the breeder the added incentive for the improvement of the harness race horse.

This Will Hold You for a While.

34 Duke St., Lancaster, Pa., July 3, 1902.

W. F. YOUNG, Springfield, Mass.
Dear Sir: I would as soon try to keep horses without hay or oats as without "Absorbine" and your "Kidney and Nerve Tonic." They are the best general condition powders for stomach troubles or any ailments arising therefrom I have ever known.

Yours very truly,
L. ELLMAKER.
Absorbine, \$2 per bottle, express prepaid.
Address W. F. YOUNG, P. O. Box 1, Springfield, Mass.

THOROUGHBREDS AND PONIES.

An entirely new codification and a number of additions in the playing rules will be adopted at the next meeting of the Hurlingham Club Polo Committee, says *Rider and Driver*. This committee is the supreme council in the game in Great Britain, and is made up of nine from that club, three delegates from the County Polo Association, two from the Army Polo Association and one from the Roehampton Club. The Hurlingham rules are accepted by the Pacific Coast Polo and Pony Racing Association in this country, and, except in permitting crooked mallets and harring off-side play, the Hurlingham precedents are usually followed closely by the Polo Association.

The rules as prepared will number thirty-nine, reading tersely and with less ambiguity than before, the arrangement gaining in brevity through the bunching of the penalties and their definitions in the appendix and the reference to them by numbers in the body of the text, which does away with the former repetitions. The only change in the equipment for play made in the revision is that hereafter the size of the balls shall not exceed 3½ inches in diameter and their weight shall not exceed 5½ ounces. The former rule only stated: "The balls to be 3 inches in diameter." The Polo Association rule is: "The ball shall be of wood, with no other covering than white paint, 3½ inches in diameter and not exceeding 5 ounces in weight." The Hurlingham code does not specify the material—an important omission in these days of patents in balls used in games.

A change of importance is in the permission to pass mallets, added in the following: Rule 29—"Should a player's stick be broken, he must borrow one from one of his own side, or ride to the place where the sticks are kept and take one. In the event of a stick being dropped, he must either pick it up himself, borrow one from one of his own side or ride to the place where the sticks are kept and take one. On no account may a stick be brought on the ground."

It is stated specifically (21) that "no player shall ride dangerously," and (22) "no player shall use his stick dangerously." The tenor of the revision is to further strengthen the enactments against rough play and unsafe riding. This is notably evident in the rule regarding crooking mallets (25), which now reads: "No player shall crook an adversary's stick unless he is on the same side of an adversary's pony as the ball, or in a direct line behind, and his stick is neither over nor under the body nor across the legs of an adversary's pony. The stick may not be crooked unless an adversary is in the act of striking at the ball. When two players are riding abreast, no player shall strike at the ball over or under the body or across the legs of an adversary's pony. A player who deliberately rides his pony up to an adversary, who is in possession of and striking at the ball, or who deliberately rides his pony over the ball to prevent an adversary striking at it, does so at his own risk."

The colony of poloists at Burlingame Country Club has been materially strengthened during the past week by the addition of the English players who have been in Southern California—Messrs. Garland, F. J. Mackey and Neil Haig. The latter ranks second to W. S. Buckmaster of England, who is considered the world's greatest poloist. Mr. Haig weighs 230 pounds and how fourteen and a half hand ponies carry him in a fast game is difficult to understand.

When the far-seeing Boer leaders realized that it was only a question of time when Majuba Hill would have to be fought over again, the first step they took was to send emissaries to England and France to procure, not a few, but hundreds of second-rate thoroughbred sires. The wisdom of this course was apparent in the late war, for it was the descendants of these English racers crossed with native Basuto ponies which mainly contributed to the marvelous mobility of the Boer battalions.

The speed and endurance of descendants of her cast-off racers having thus cost England hundreds of millions, she has now determined to take a hand herself, so a scheme is on foot to provide suitable mates for the semi-tame pony mares which still abound on the wild Devonshire moors, the steep Welsh hillsides, and the dreary Yorkshire wolds. The reason experts are demanding pony moorland mares and thoroughbred sires is that recent events show the war horse of the future must no longer be the clumsy cart horse formerly necessary to carry a heavy cavalryman and his cumbersome equipment, but a light, wiry animal between fourteen and fifteen hands high, easy to keep on meager rations, and equally easy to mount and dismount.

Is it not almost time our Government was awaking to the necessity of following the sagacious French lead and the tardy example of the English in this respect? Leaving our great western park out of the question, our reservations furnish ten times the area of the English moorlands that experts in that country seem to consider so necessary for the production of a hardy equine race, while in natural features both are similar. As to mares, on the slopes of the Rockies and southwest of them there is an inexhaustible supply. As to sires, breeders would welcome with open arms a buyer commissioned to take 500 suitable animals, and the whole bunch would not cost him more than the British lost in each unsuccessful skirmish with the better mounted Boers.

Even if the National Government is too hampered to act, the executives of our Western States, where the surroundings make cheap horse raising easy, might do much good if they took steps to render suitable thoroughbred sires cheaply available. Last summer Baden Powell, than whom a better judge of the requirements of the future war horse could not be quoted, spent some time in this country and Canada examining their facilities for supplying remounts should a universal war create an unprecedented demand. He was not impressed with what he saw, especially in the regions on both sides of the border which pride themselves most highly on their agricultural progress. No wonder. Thirty years ago he would have found our prairie States filled with just the useful general purpose animals he required; but since then, owing to mating with clumsy Shires or Clydesdales and pampered Percherons, the descendants of the animals which could turn over two acres in front of a walking plow one day and trot to town at a pretty lively gait in front of a lumber wagon the next, have almost entirely disappeared, their places being taken by ungainly, slab-sided brutes, which would be as much use in a battle as a gun hored out of a log.—*Coach and Saddle*.

Fred Taral, the well-known jockey, who is spending the winter in New York, has received a list of the winning jockeys in Austria, where he rode last year. He carries off the honors himself, with 345 mounts, 98 winners and 53 losers. H. Lewis, another American boy, is second with 312 mounts, 50 winners and 55 losers. F. Bonta, the Austrian rider, who led in 1902, stands third with 239 mounts, 48 winners and 40 losers. Year before last Bonta had a seven-pound apprentice allowance. Henry Spencer, "the iceman," is eighth on the list with 160 mounts, 27 winners and 20 losers. Van Dusen, another American, is ninth with 207 mounts, 26 winners and 26 losers, while H. L. Russell, also a native of this country, is eleventh with 231 mounts, 23 winners and 31 losers.

That steeplechasing will be one of the features of the racing this season is shown by the list of entries received for the stake events already closed. More interest has been taken in cross-country events than ever before, and not only have several new owners entered the field, but the owners of the big stables that devote their time to events of this kind have gathered in all the horses available. In the steeplechase events this year will be seen horses that last season were in the front rank on the flat, such as Ada Nay, Moon Daisy, Black Huzzab, Sailmaker, Canajoharie, Sir Voorheis, Trinity Bell, Kilogram and other good ones.

The appointment of two starters, C. J. Fitzgerald and Mars Cassidy by the Jockey Club, has caused considerable comment. It is not well understood that in appointing Mr. Cassidy the Jockey Club intends to reflect in any way upon the work of Mr. Fitzgerald, but the idea is to discount any accident or sickness, and ensure expert starting. It is not known how Messrs. Fitzgerald and Cassidy will be worked, but rumor has it that both will be on hand whenever there is no conflict and each may start three races a day, cutting the work in two. It is also said that will be up to the stewards before each race to say which shall go to the barrier. Another story in circulation is to the effect that each starter will work for two weeks and then rest.

English racing men and those who follow the fortunes of the turf on the other side of the pond are just now indulging in a lot of calculation on the past performance and prospects of a three year old colt named Clonmell. This animal is nominated for the Derby, and it is admitted by the critics that he has a splendid chance for an outsider, for outsider he is. Very little is known of the horse, and those who are good at intricate calculation and the fine hair splittings in "form" have only one race to go by. As a two year old Clonmell appeared once in public and beat a big field in a common canter. In this race he beat Santry, by many considered to be the best colt of the year, and at the finish it was apparent that on

that occasion at Sandow Park Clonmell was some fifteen pounds a better horse than the son of Gallinule. During the season Santry showed, a few times, as good form as St. Amant, the present Derby favorite, so it will be seen that the "outsider" is rather an important candidate. Clonmell is a big one over all, has speed and staying power and is just the class of animal to come out well in his winter work. He is by Florizell II and is owned by Richard Croker, of Wantage, Berks, where the horse is now located under the care of Trainer Clements. Great secrecy is maintained as to the horse, and his preparatory training work is surrounded with much mystery.

The surprising angle of the invasion of foreign countries by the American thoroughbred trainers is the prominence attained by men who are little known in their native land. When the name of Phil Greusil appeared as the one American trainer who had won more than \$50,000 in England last season, everyone asked, "Who is Greusil?" To the rank and file of American racing folk he was unknown, and many persons were inclined to discredit the statement that he was an American simply because they had never heard of him as a trainer on this side. At first glance it looks as though there might be a little excuse for this lack of knowledge of an American trainer who had gained greater distinction during the season than any of his colleagues. By some slip evidently the trainer's name has suffered a slight change from that by which he was known here. He was little known in the East, but the West knew him as Phil Greusil, while in England he is known as Phil Greusil. But even with the explanation of the change in name he was recognized by few American racing folk. Greusil, however, got his knowledge of training from a master hand. He was foreman for W. Duke in this country and went with him to England. There he also served in a similar capacity for a time, and then branched out for himself, and is now one of the most popular trainers in the tight little isle. Charley Thorpe, who knew Greusil in this country, said that the young trainer was coming to the front rapidly in England and is a most competent man. "There is a case similar to that of Greusil in France at present," said Thorpe. "There is a young trainer there now who is fast making a name for himself that few Americans will remember. His name is Curtis Jones. I knew him in the West some years ago, where he was connected with various stables, and at times trained a few horses on his own account. He had charge of a stable of some fifty horses last season, and had very good success. I suppose if his name ever comes into great prominence there it will bring about as much of a mystery as the appearance of Greusil's name in the £10,000 class in England."

The stewards of the Western Jockey Club are planning a decided innovation in the rules. This latest idea is to license the valets of jockeys. The new rule reads: "Every person who is employed as a valet by a licensed jockey or apprentice must obtain a license from the stewards of the Western Jockey Club to pursue such employment and no valet without a license shall be allowed access to the jockey room or scales." The fee for a license for a valet is fixed at ten dollars. The new rule becomes operative February 15, 1904.

Strike!—if they don't give you Jackson's Napa Soda when you ask for it.

Horse Owners

Look to your interests and use the safest, speediest and most positive cure for ailments of your horses, for which an external remedy can be used, viz:

GOMBAULT'S CAUSTIC BALSAM

Prepared exclusively by J. E. Gombault, ex-Veterinary Surgeon to the French Government Stud.

SUPERSEDES ALL CAUTERY OR FIRING.

Impossible to produce any scar or bluish. The safest best Blister ever used. Takes the place of all liniments for mild or severe action. Removes all Bunches or Blemishes from Horses or Cattle. Every bottle of Caustic Balsam sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address THE LAWRENCE-WILLIAMS COMPANY, Cleveland, Ohio

ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

The Mexican Quail or Scaled Partridge.

It will be interesting to the sportsmen of this State to know that it is projected to introduce and propagate the Mexican quail. This scheme will be carried out, we are informed, under the auspices and careful campaigning of Deputy Fish Commissioner H. T. Payne. Whether the sinews of war will be supplied from the treasury of the Fish Commissioners or from the coffers of the California State Fish and Game Protective Association, we know not. Nevertheless we consider the project a good one for the permanent investment of whatever the costs of the venture may be. In other words, it will be practically throwing good money after bad. It will give Dustproof Harry golden opportunities, however, for felicitous mention by misled interior journals. By the time the Mexican junketing trip is over it will be in order to look after "fences" for the fall campaign. For the Colonel is a great spellbinder in the country.

Several hundred Mexican quail were turned loose some years ago on the grounds of the Country Club. The attempt at that time to introduce the bird to a new habitat was a dismal failure. The few birds that were noticed at infrequent intervals after their liberation furnished material for stories illustrative of the rapacious qualities of the Cooper hawk. These little quail, let loose in a new and unfamiliar country, were absolutely unequal to the situation. Instead of fleeing to cover, in the fashion of the valley quail, they merely squatted on the ground whenever the hawks appeared in search of prey. This effort of the bird to hide by "blending" with the prevailing color tones of the field did not go with Mr. Cooper. The inevitable result was, between the hawks and ground vermin, the bird from across the line did not tarry long in the Marin hills. Other efforts to make this quail maintain a footing in this State have been equally unsuccessful.

Possibly the expedition "into Sonora, some sixty miles beyond and south of the Arizona line," may be for the purpose of introducing a particularly hardy and wary variety of the Mexican quail. We doubt it however.

At all events, the trip will be an enjoyable and comfortable excursion for the official deputised to engineer the trip.

The money required for this scheme, and the time and application required would be far better employed if devoted to the interests of the valley quail, than which, we doubt, if there could be a better bird of the species protected and propagated in this State.

With but few exceptions, and the Mexican quail is not one of them, efforts to acclimatize and propagate members of the quail family, in habitats other than their own natural geographical ones have been failures. The experiments here with "Bob Whites" and Asiatic quail are too recent and unsuccessful to be forgotten. Possibly the Coast oracle has something up his sleeve that will prevail over past experiences and failures. We doubt it however.

The Mexican quail or scaled partridge is described below by Mr. E. Hough, a writer of authority. Among other things he calls attention to several qualities of the bird that will not win it a very strong following, in this State at least, among sportsmen.

"There are many sportsmen who may not perhaps recognize under the above name a bird which in the Southwest is commonly called 'blue quail,' 'blue partridge' or 'Mexican quail.' If California is entitled to a species of quail for itself, and Arizona to yet another, so perhaps we may give to New Mexico, or more properly Old Mexico, yet another species of these running game birds of the far Southwest. This bird became better known to the Anglo-Saxon gunner after the building of the Santa Fe railroad across New Mexico. The writer has shot these birds, or rather attempted to shoot them, in the high table land country between the great waterways of the Rio Grande and the Pecos. The same bird is found occasionally in parts of Western Texas, and it is reported from San Pedro and also from the Devil's River country in the same State. It was formerly met with in the lower Rio Grande valley, and in different parts of New Mexico it is now and then encountered. Its more common range is perhaps on the south side of the Mexican line, where it is found all over the mesquite country of upper Mexico. It is not noted so far to the west as the grassy Mexican prairies, along the Western coast. It may be called a native of the high and dry plateaus of the rough inter-mountain regions of the Southwest. It is a hardy bird and holds its own through many changes of temperature. Its habits are close akin to those of Gambel's partridge, yet the two do not mix or associate together. The scaled partridge is by nature more shy than the Gambel's partridge, and is more a creature of the wilderness than one accustomed to the haunts of man.

As a sporting bird not much can be said in favor of the scaled partridge. It is perhaps the worst runner ever discovered and it is indeed difficult to cause a bevy of these birds to take wing at all. They run like deer, their necks outstretched and their crests erect, and unless one be very quick he will not often be able to kill one even upon the ground after he first encounters the covey. They disappear in the most mysterious fashion under the first cover, finding their favorite hiding place in the thickest of mesquite, cacti, etc. North of the Mexican line this

bird is not abundant enough to be very familiar to the average sportsman. The loss is no great one to the shooters, for anyone who has run this familiar bird down trying to establish a point upon these pestiferous little scamps, is not apt to feel for them affection. They were at one time fairly abundant in the neighborhood of El Paso and thence north up the dry table lands of Dona Ana and Lincoln counties. Like most of the Southwestern birds, they are most successfully to be hunted in the neighborhood of water tanks.

The scaled partridge is a local bird, or does not emigrate, though found in regions offering extreme heat and cold. It is not pronouncedly gregarious, and is usually found in bunches of a dozen or so, probably the members of one brood. Contrary to the Gambel's partridge it is impossible to domesticate a scaled partridge, which retains always its untractable and suspicious habit. No. 8 shot is the correct size, some may now and again have a chance to try a long shot from a choke bore, though the smooth barrel is proper for the small partridges.

Common names: The scaled partridge; (Callipepla Squamata) the blue quail; Mexican quail.

Description: Grayish blue in color, pale below with some brownish shades. The sides striped with white. Most of the plumage marked with circular black edges upon the feathers, which produces a scaled appearance. The inner edges of the quills white. The crest short, full and soft, with white tips. Head and throat without distinct markings and of a light grayish or plumbeous color, the throat tinged with yellowish brown. Size 9 to 10 inches; wing 5 inches; tail 4 inches.

Range: western and southwestern Texas, central and southern New Mexico, as far north as the upper Rio Grande; southern and southeastern Arizona, and the upper portion of Mexico. Natural range, high broken table lands and mesquite plains.

Habits: The habits of the scaled partridge, including its objectionable one of running ahead of the dog, are, as above stated, similar to those of the Valley quail of California. It feeds on berries at times, but finds its favorite food among the small insects of the dry plains. Its nest is rudely built and the season of incubation usually lasts from June to July. The assembly call of this bird is a sort of chirping, something like that of a young chicken. The nest is a rudely scratched depression in the ground, the bird showing a truly Latin carelessness as to its abode. The young appear in June and July.

To Keep a Gun in Good Condition.

With the closing of the season on the 15th inst. many guns will be put away until dove season comes in and the fall shooting bids the sportsman afield again. Most shooters have a method of their own, more or less efficacious of caring for their fowling pieces during both the hunting and close seasons. Some shooters are either careless or indifferent in this respect. A gun will be laid aside, sometimes without even cleaning the barrels, and left in a corner until the near approach of the shooting season when the piece will be sent to the gunsmith for an overhauling. This is a slovenly way to treat a good gun.

Just because a man has enough coin to buy another gun if he lets one rust out, is no excuse for the failure to look after guns that characterize so many sportsmen, though a number seem to think it is. A good shotgun is a work of the highest art, made by the most skilled artisans in the world, of the best material in the world; it is a thing of beauty and should be a joy forever. It may be safely set down as the correct proportion that twenty guns wear out or rust out for every one that shoots out. In these days one hears much of the destructive effect of nitro powder and acid chilled shot on barrel steel, but this is greatly exaggerated. Trap shots have shot 100,000 rounds of ammunition out of a single gun, often nearly as much out of a single barrel, and reported the arm as effective after as before. In olden days, when gun metal was not what it is now, muzzle loaders were often shot to the thickness of a piece of paper, and even then always shot harder for it.

Sportsmen, take care of your guns. If you are clubmen, don't leave it to keepers, but do it yourself. Your shotgun is your own, and you do, or should, take more interest in it than anyone else. It ought to be a labor of love for any sportsman to clean his own gun and keep it in the best of working order at all times.

The process is so simple. A little heavy grease on the lugs and roller pin; a little clock oil on the locks twice a year; a few drops of oil put on every part that rubs against another part every time the gun is taken afield, will add years to its life; enhance the pleasure and morals of its owner, and make the arm a fitting tribute to the worth of the man who owns it. There is something radically wrong with the fellow who lets a good gun go to ruin through neglect; a "screw loose somewhere." Nothing provokes more profanity than a gun which has worn itself out through lack of oil, and rattles like a broken buggy when used.

The care of barrels is so simple that everyone ought to understand it, but many do not. After shooting, barrels should be brushed as bright as possible with

an ordinary bristle brush such as gunstores sell for 10 or 15 cents. This done, a swab full of oil should be run through the barrel until a good coating has been applied. The Winchester, or "3 in 1" is a good gun grease to keep barrels bright if they be clean when it is applied. Common vaseline is a good substitute. Periodically the lead should be filed out of the barrels with a brass wire cleaner. Steel wire will scratch fine Damascus barrels. Tools work better in an oiled, than in a dry barrel, so a little oil should be applied before using. Lead settles mostly just in front of the shell chamber, and just back of the choke, so particular attention should be paid to these parts of the barrel.

The locks of a gun should not be oiled too much. Twice a year is enough. Too much oil results in gumming, and in "jarring off," which is always a serious, sometimes a dangerous fault. The lugs and underbolt, or crossbolt, of a gun should be wiped clean and recoiled every time the arm is used, to prevent wear. Likewise the hinge-pin, or roll. The inside surface of the fore-end iron where it impinges on the frame should also be liberally greased with vaseline to prevent wear.

One of the long primary feathers of a duck's wing makes a handy tool to convey oil, to the parts of a gun, from a bottle. Most oilers give either too much or too little at a discharge.

The woodwork about a gun should frequently be rubbed up with oil. Good lubricating and rust-repelling oils are varnish savers; brighten up a stock, and give a finish of their own that looks very well in a sportsman's cabinet or club gun rack. They help to prevent, or remedy slight dents. Care must be taken however, that the inside woodwork of the gun should not get saturated with oil. This has a tendency to weaken that portion of the stock; the breaking and cracking of the stock just above the grip, and the splitting of the stock at the breech is due in many cases to too much oil in the wood.

It is a good idea to clean the checkering of a gun stock occasionally with a stiff hairbrush or toothbrush. Dirt and grease get in it otherwise.

Not only the inside but the outside of a gun should have a good coating of oil when not in use. Oil never hurt any part of a gun except the locks. With high-priced guns it is best to let a gunsmith do the lock oiling, as he is not so likely to mar, or break screws in doing it, as an amateur, though many sportsmen are capable gunsmiths from choice; sometimes from necessity. Every man should be sufficiently familiar with his piece to remedy any minor defects that from time to time may appear.

Guns used near the seashore require special care. Salt air plays hob with steel; the better the metal the worse it suffers. Plenty of good oil, and occasional attention, are the only known preventatives of rust.

Guns should never be left with the hammers up. No one would have thought of doing this in the days of the old hammer guns, but in these times of hammerless ejectors one sometimes forgets. Some makes of guns can be snapped; not most. The others can be let down, and the spring tension is thus removed. Springs get tired just like flesh and blood. It is a good idea to go over the screws of a gun occasionally and see that they are all set up tight. The constant jar of duck loads of nitro powder will start screws in the best guns eventually.

With a very fine gun it is often policy to consult a gunsmith once or twice a year, whether anything appears wrong or not. The gun doctor can sometimes prevent trouble by replacing a weak or cracked part, and he can always clean the mechanism to the great betterment of its action.

These hints are the experience of a man who has had guns, and loved guns, and taken care of guns for a good many years. Read them carefully over again, then cut them out and paste them inside the gun case or cabinet. They hold with any kind of firearms.

Advices from Santa Clara county are to the effect that there is much uneasiness among San Jose sportsmen over the lack of rain this season, for they realize that unless there are some heavy showers in the near future to swell the streams that there will be very poor fishing during the coming summer. As yet the fish have had no opportunity whatever to run up the local streams from the tide water and unless there come some freshets in everyone of these streams there will be a dearth of large trout.

Game Warden Koppel is authority for the statement that the streams were quite full of water in their upper courses, due to the heavy rains and the snow in the mountains, but little or none of this water is allowed to reach the bay, as it is all being taken up by the orchardists for irrigation purposes. However, the water in the mountains is sufficient to keep alive the thousands of young trout planted last season and they are growing very fast and may be large enough to furnish sport to devotees of rod and line the coming season.

In all the Coast streams the conditions are far better. There have been some very heavy rains on the western slopes of the mountains and the fish have had an opportunity of running up into the hills. These streams will provide an abundance of fishing during the coming season.

The Grass Valley Sportsmen's Club has decided to organize a sub organization to be known as the Blue Jay Club, for the extermination of the blue jays in that section. The sportsmen of that district declare it necessary to exterminate blue jays in order to preserve the quail, which are becoming scarcer each year. Blue jays not only break up the nests of quail, but crush the eggs and kill the young as well. A bounty of 2½ cents will be offered for each head brought in. Seven years ago a similar club was organized which slaughtered over 2500 jays. For a few years thereafter quail increased greatly in numbers.

On a hot day drink Jackson's Napa Soda lemonade and be refreshed.

Bay and River Pollution.

The first victory in the courts against the contaminants of our waters by oil refuse, in violation of the State laws, was scored last week.

After four months of effort the California Yacht Club secured the conviction of F. C. Dellegar, first officer of the steamer Roacrans, an oil tank vessel. The charge was the violation of the statute of California which prohibits the emptying of crude oil into the waters of the bay or of our streams.

The case was hard fought, but after two days in actual trial, Justice of the Peace James G. Quinn found Dellegar guilty and ordered him to appear for sentence. The maximum fine under the law is \$1000.

Behind the prosecution, in which Commodore George M. Shaw and John Sherry, official measurer and former port captain, took special interest, is a determination on the part of the yacht club to carry its fight against the oil nuisance to cover San Francisco bay as well. For months the club officers had a detective employed to collect evidence against the oil steamer people who have been responsible for the contamination of Oakland harbor by the dumping of refuse crude oil into the waters of the bay by crews of the oil tank steamers that find dockings at Alameda Point.

The yachtmen claim that the waters of Oakland harbor have become so badly coated with the refuse oil that the nuisance is one of the controlling reasons why the California Yacht Club had decided to abandon its headquarters and mooring grounds on the south side of the harbor opposite Broadway wharf.

In the collection of the evidence that was required to convict First Officer Dellegar, who personally is not attacked by the club, the detective employed, with the interested members, uncovered the methods by which the steamship people had been allowing the contraband oil to escape. The watchers saw that the water used for ballast in the tanks after they were emptied would be pumped into the bay and with the fluid was carried a heavy thick residuum, which washed with the ebb and flow of the tide over the harbor. The yachts at their moorings have been smeared, small boats made nasty, boat landings veneered, piling coated, the oil scum has killed the fish, and clams are almost extinct from contact with it.

Such was the bill of complaint made by Commodore Shaw as the cause for the club's determination to fight the oil nuisance in the courts.

"We have been driven out of Oakland harbor by this contamination," said Commodore Shaw in an interview with a representative of the *Call*. "It is not only a nuisance, but a serious menace. If fire should break out among these oil-coated piles and vessels nothing could prevent a disastrous conflagration among the shipping. The trouble has been recognized as an evil by the laws of the State, but we have had great difficulty in getting proper State officials to take hold of the matter."

"Months ago we laid the subject before the State Fish Commissioners on the ground that the fish were being killed, but we are unable to get them to prosecute the offenders. A long time ago an attorney of the commission came over here, but that was the last we heard of that body."

"So we got our own detective, who watched the outlets of oil along the harbor. In time our evidence was in shape and we caused Dellegar's arrest, simply because the refuse oil was being pumped out of the steamer and he happened to be in charge."

"Not alone is Oakland harbor affected. I have sailed through just such a scum along the bay off the seawall. The oil is ruining the fish in the bay. They are becoming so strongly impregnated with the vile stuff that they are unfit to eat. Our boats are being ruined as well, and we feel that the time has come to force the oil men to obey the law. I am more than satisfied with our initial effort."

The officers of the California Yacht Club are: Commodore, George M. Shaw; Vice Commodore, Charles P. Doe; Secretary, Fred Du Brutz; Treasurer, J. Altendorf; Port Captain, Charles Vogel; Directors—A. G. Bixbee, C. E. Clark and G. S. Williams.

This particular style of violating the State law is not confined entirely to the locality above mentioned. The abuse and nuisance has been repeatedly called to the attention of the Fish Commissioners by sportsmen's organization as well as individual sportsmen. Apparently nothing has been done, at least it has not yet been so shown, for the alleviation of the evil.

The oil scum can be seen all along both shores of San Francisco and San Pablo bays. Many complaints have been made against the Point Richmond oil works, but apparently without avail. Possibly if sportsmen or others interested in that locality would adopt the same course as the yachtmen relief might be obtained.

Besides the damaging effect the oil refuse has upon the fish and clams, it is a well known fact that ducks and other wild fowl have at different times become so befouled and clogged with the sticky oil scum that they were unable to fly or swim and fell easy victims, by the hundreds, to many individuals who went after the battered birds with clubs or any old thing that could be used for capturing them.

Stripped bass caught in the estuary and along the east San Pablo shores have been so saturated with the oil flavor as to be unfit for food.

One argument, advanced by the yachtmen, in favor of abating the nuisance, is the danger of fire.

This menace to property, in itself is of more importance than any other reason advanced for the suppression of the oil nuisance. In the face of this danger, the interests of sportsmen, and they are just as equitable, pale into comparative insignificance.

We have not yet heard from the oystermen; there are thousands of acres in San Francisco bay that are devoted to growing and storing of the hivalves and in

this big industry there is a large amount of capital invested. It is only a question of time, if the abuse is not stopped, when the oyster companies will also be compelled to take relief measures.

In the light of recent efforts and events it looks somewhat as if the state officers either have too much authority or none at all.

GOSSIP FOR SPORTSMEN.

Government hatcheries in Oregon and Washington are doing remarkable work in the propagation of fish, and shows that the study and rapid increase in the hatchery work indicates that henceforward there will be no scarcity in the supply of salmon coming to the Columbia river and other streams of Oregon and Washington. According to Deputy Game Warden Van Duzen, artificial propagation is the one thing that is preserving the salmon industry of the Columbia river.

The annual output of Oregon, Washington and the Federal hatcheries on the Columbia and tributaries is 70,000,000 chinook fry. The product of Columbia river fisheries for 1903 shows an increase of 20 per cent over the previous year, adding \$500,000 to the income of canners and dealers, and \$200,000 to the income of fisherman. The total output of the Oregon hatcheries is 49,251,306 chinooks, 300,850 steelheads, and 3,948,940 sockeyes and silversides. Total \$3,531,000. Total operating expenses, \$21,082. Total product of Oregon salmon, 29,925,754 pounds, valued at \$3,012,343.

During the season of 1903-04 the hatcheries of Washington and Oregon will have turned into the Columbia river and its tributaries 70,403,676 chinooks. During the season the hatcheries will turn nearly 7,000,000 sockeyes into the same stream.

While the foregoing is of great commercial importance, it is also of extreme interest to the angler, for salmon fishing, in and about the sound waters, etc., with rod and line is a grand sport.

F. D. Newland and Frank Petray, two Sonoma county orchardists, were fined in the Superior Court at Santa Rosa by Judge Seawall this week for dynamiting fish in Dry creek, a tributary of Russian river, near Healdsburg.

Deputies J. E. Ingalls and A. F. Lee made the arrests. Petray plead guilty and acknowledged placing the dynamite in the stream; he was fined \$250. Newland plead guilty to having received some of the steelhead trout taken and was fined \$30.

At a meeting of the Gridley Gun Club held on January 31st it was decided to again lease the overflowed land lying west of town, for a term of five years. The lease gives the club the option of taking the land for an additional five years when the term of the present lease shall have expired. The price paid for the hunting privilege on nearly 7000 acres of land is to be \$500 per year.

The Gridley Gun Club has had the shooting privileges on this tract for a number of years. The club is composed of local sportsmen, with some members from nearby towns, and they have made it a point to hold the land, knowing that the hunting privilege would be in demand by the rich sportsmen from the cities, and if it passed into their hands the people of that community would be barred from their hunting rights. This move is, therefore, largely supported from motives of local patriotism.

Recently the ducks on the club preserve were bled to get at as they "loaf" in the deep tules and at night go out on the grain fields to feed. Farmers complain loudly that they are expected to observe the game laws against shooting ducks at night and stand quietly by and see their crops eaten up. The occasional boom of a shotgun along in the night in that district is evidence however, that the game laws do not affect all people alike.

Floyd H. Judah, a popular local sportsman who has occupied a responsible position in the Southern Pacific office at 613 Market street, has received merited recognition in promotion to the important billet of traveling passenger agent.

Among the many important winnings at the traps during the past week with Winchester "Leader" shells may be mentioned the following: Havre du Grace, Md., first and second high averages won by J. M. Hawkins and Hood Waters, respectively. Mr. Hawkins also used a Winchester "pump" gun. Rising Sun, Md., first and second high averages won by J. W. Hawkins and Hood Waters, respectively. Gull Lake, Mich., F. H. Lord won the professional high average, and K. C. Shepardson, F. L. Keef and Z. Bush won first, second and third amateur high averages, respectively, all using Winchester "pump" guns. Jerseyville, Ill., J. H. Caldwell, Fred Chappell and B. Dorsett won first, second and third high averages, respectively. Mr. Caldwell also using a Winchester "pump" gun. Geneseo, Ill., first high average won by J. H. Graham with "Leader" shells and a Winchester "pump" gun. Baltimore, Md., first high professional average won by J. M. Hawkins. First, second and third high amateur averages won by L. S. German, Dr. F. Caruthers and Dr. W. Boyd. Mr. Hawkins and Dr. Caruthers also used Winchester "pump" guns.

A coterie of Southern California sportsmen have recently organized a gun club at Los Angeles. The shooting preserves will be located near Santa Monica. The new organization will be the wealthiest and most exclusive organization of the kind in Southern California, as the membership is limited to fifteen and the initiation fee is more than \$1000. The preserves will be on the Anderson Rose ranch, and will comprise 283 acres. The land cost \$25,000 and is about three miles from Santa Monica. The grounds are considered by sportsmen as the choicest duck hunting grounds in that section. The club will be incorporated

and plans for a \$10,000 club house are under consideration. The sportsmen already named as members are Joseph and Hancock Banning, W. T. Gillis, Santa Monica; L. I. Merrill, John C. Cline, Charles Winslip, W. H. Keller, Irving Ingraham, William Bailey and Willard Stimson.

At a recent meeting of the Oregon Fish and Game Commission, Dr. E. F. Tucker, one of the speakers during the evening, spoke on "Field Trials," and told of a visit he made last fall to Whidby Island, where the Pacific Northwest Field Trials were held. He gave an interesting account of them and told of the great interest which was taken in them. Dogs from as far south as California were taken each year to Whidby Island for the purpose of contesting for the prizes which were offered to the best dogs. Dr. Tucker said he thought that field trials could be made a feature in Oregon and dwelt at considerable length upon the splendid opportunities that Yamhill county offered for such sport. From personal observation and from inquiry, Dr. Tucker has learned that the Bob White quail are plentiful and that section of Oregon is peculiarly adapted for holding field trials. Dr. Tucker will start the ball rolling and by next year he hopes to be able to make field trials a feature in this State. In talks he had with dog fanciers at the trials he found them enthusiastic and they promised, in case such a thing was attempted in Oregon, they would bring their dogs and compete for the prizes. Dr. Tucker explained that the entrance fees would more than pay for the prizes given.

DOINGS IN DOGDOM.

J. L. Cunningham had two handsome young harlequin Great Danes with which he hoped to tear off some ribbons at the spring show—but the inducements offered by a purchaser in San Salvador were strong enough to take the dogs down towards the equator.

The annual meeting of the A. K. C. was held at the club's headquarters in New York on Tuesday at 2 P. M. The membership committee will meet to-day.

A P. K. L. show at Vancouver, B. C., will be held March 31, April 1 and 2.

Wandee Kennels string at the W. K. C. show this week comprised, in smooths, the puppy Holmbury Brilliant, voted the best youngster out last year and who is now called Wandee Violet. She has had an enviable career so far, and it is claimed by Eastern journals she must have cost a sum embracing at least four figures. Another is the recently imported dog puppy Raby Result, and the successful smooth bitch Nitram Night Sprite and Golden Treasure. In addition to these Mr. Harley holds an exceptionally strong band in wires. Besides the three winners at the recent Ladies show in New York—Wandee Coastguard, Wandee Manilla, Wandee Mearns—the string has been strengthened by the addition of the new arrivals from the other side, Morden Buck Up and Saltscare Worry, both of these dogs have held their own in the best English going.

The outlook for the spring show at the Mechanic's Pavilion is very encouraging. The down town office of the club will be opened March 1st—probably at the old stand, 630 Market street.

The premium list will be out by that time also. From the list of trophies and prizes already subscribed, forty altogether, we should imagine that the array of specials will be larger and finer than at any previous show held by the club.

Spratts will bench, and that means everything for those most interested.

Rumor has it that "Tom" Blight is at the head of the list of eligibles for the important billet of superintendent. Tom is an enthusiastic and hard worker—his past experience at innumerable Coast shows should enable him to qualify well for the post.

The Montebello Kennels have retired their dogs from the monte circuits. While they were in the going their Great Danes captured the bulk of the honors.

J. W. Flynn's stylish Pointer bitch Nellie Bang was recently sent East to be bred to Dr. Daniels.

Alta Barrie, a dog that Mrs. Lee is expected to bring here, is said to be by an Eastern contemporary "absolutely the finest American bred ever produced."

J. W. Riplinger's English Setter bitch Elloree is in whelp to his Stylish Sergeant. There should be a splendid litter of puppies from this mating.

The expected litter from Ch. Pera by imp. Rumney Racket, we are sorry to note was disappointing—a dog and a bitch, the dog pup died shortly after being whelped. Butter luck next time.

P. D. Linville's good bitch Maggie F. was served by Jos D. Terry's Kilgariff on the 4th inst.

Maggie F., it will be remembered, won the Members' Stake and was third in the Derby at the Coronado meeting of the Pacific Coast Field Trials Club. Kilgariff's performances are too well known for reiteration at present. Lovers of the Setter are much interested in this breeding.

We call attention to the stud announcement of the St. Bernard Alta Chevalier. This young dog was received here about four months ago and comes from Mrs. Lee, owner of the well known Alta Kennels of Toledo—the breeder of many good ones. Chevalier is a grand headed, strong boned, up standing, good fronted dog. He has a very heavy, long, flat coat and has good legs and feet with well arched toes. His color is orange and white, with typical markings. He is by Ch. Alta Bruce (Marse Jeemes-Norah Lee) out of Ch. Queen Empress (Marse Jeemes-Princess

R.), both sire and dam are winners and producers. From this it will be noticed that there is a double cross of Remnant in Chevalier's pedigree.

Arthur Letts, the owner of the Collie Ravenswood, a winner at the December show in this city, is taking the lead in arranging to have a kennel show in Los Angeles in April. A kennel club is being formed and when the meeting is called for organization all the Southern fanciers will be invited to join. The show to be given in April gives promise of being one of the best held in the South, as interest is being shown both by local enthusiasts and outsiders. The promoters of the club are determined to leave nothing undone to make the show an unqualified success. They are sending out letters giving the following reasons why a kennel club should be formed there:

First—By holding shows and field trials to improve the different breeds of dogs and educate the public to the beauty and value of thoroughbred dogs.

Second—By having lectures at regular meetings on the ailments of dogs, to instruct the members how to attend their animals in sickness, and, better still, how to keep them in health.

Third—The club hopes to combine effort to prosecute and bring to quick punishment any person guilty of cruelty to dogs, or any person guilty of the cruel and wholesale poisoning of dogs.

Fourth—The club desires to do everything to alleviate the suffering of man's best friends and encourage and improve the breeding of thoroughbred dogs, to develop those traits in them most necessary for the purpose for which mankind requires them.

This is a move in the right direction and fills in a long felt want in that end of the State.

San Jose fanciers are taking a lively interest in doggy affairs. Preparation for a big show in the Garden city, under the auspices of the Santa Clara Kennel Club, is being actively carried on.

The Pacific Kennel League, of which the local organization is a part, has set aside April 21st, 22d and 23d for the show in that city. The San Francisco show will be held the week before and the Los Angeles the week following.

The members of the local club are determined not to be outdone by the southerners in the coming bench show. A large number of dogs from the north, it is claimed, will be brought to this State to compete in the three shows to be held during April.

A meeting of the Santa Clara Kennel Club was held recently in the parlors of Native Son's Hall and a large number were elected to membership, including Miss Livingston, Miss T. S. Howard, Dr. Grissim, M. F. Marshall, W. H. Carmichael, N. Metcalf, John S. Williams, Henry Bloom, Charles Kenyon and Christie Barker. The club's membership is growing very fast, but the members realize that if they are to accomplish the work they have started out to do they must have the support of every dog fancier in the county.

For the information of the general public as well as fanciers the club has practically adopted the same circular letter system of intelligence as is noted in the Los Angeles paragraph.

The secretary stated further that in order to carry on this work the club needs the support of the people of the community, both morally and financially. The members are determined to be aggressive in their efforts to put the local organization on a very firm footing.

Following is the list of entries for the Westminster Kennel Club's dog show, to be held at Madison Square Garden, New York, beginning February 10:

Collies (rough).....	210	Bloodhounds.....	22
Bulldogs.....	192	Fila Spaniels.....	20
Boston Terriers.....	183	Welsh Terriers.....	20
Cocker Spaniels.....	153	Japanese Spaniels.....	19
Bull Terriers.....	147	Black & Tan Terriers.....	15
Eng. Setters.....	115	Foxhounds (Amer.).....	13
Pointers.....	96	Clumber Spaniels.....	13
Russ. Wolfhounds.....	94	Basset Hounds.....	11
Fox Terriers (smth).....	88	Deerhounds.....	11
Great Danes.....	87	Chow Chows.....	10
Airedale Terriers.....	84	Whippets.....	10
St. Bernards.....	77	Toy Terriers.....	10
Beagles.....	70	Schipperkes.....	8
Fox Terriers (wire).....	69	Yorkshire Terriers.....	8
Eng. Toy Spaniels.....	69	Dalmatians.....	7
French Bulldogs.....	66	Retrievers.....	6
Irish Terriers.....	66	Miscellaneous.....	6
Dachshunde.....	64	Newfoundlands.....	4
Pomeranians.....	63	Irish Water Spaniels.....	4

Besides the above the following masters of Foxhounds have entered packs: Montreal Hunt, Chas. McEachran, M. F. H.; Meadow Brook Club, Foxhall P. Keene, M. F. H. (two packs); Orange County Hunt, Jno. R. Townsend, M. F. H. (two packs); Monmouth County Hunt, A. H. Higginson, M. F. H. Beagle pack; Round Plain Beagles, John Caswell, and Windholme, H. T. Peters.

Kennel Suggestions.

In the case of very large dogs, or those of filthy habits, benches are preferable to sleeping boxes. They should extend the whole width of the kennel, six inches or a foot from the ground, and be movable, contrived by fixing a strong stay or batten each side, and sliding them on to it, fastening with a button. If very wide, some support should be given in the center and a rail three or four inches high added to the outer

edge to keep the straw from shifting. If one-half is hinged to the other, it may be turned back when all the space is not wanted, and thus give more room.

There can hardly be too much light in a kennel, thus one or more windows—other than the original architect provided—may be supplied, the best form, in my opinion, being those of the fanlight persuasion working on a pivot, and shutting up tightly when required. Two or three ventilators of a good make, high up, are also to be recommended. Similar views may, of course, be carried out in any outhouse with a weather-tight roof.

The partitions between the dogs, by an inexpensive addition, can be made movable, a consideration when stock is low, or you wish to give a litter of puppies more space; but they and the fronts, including the doors, should be a good height, the former of wood, the latter strongly wired about two-thirds of their distance from the ground upwards, or sufficiently high to prevent the animals seeing anything outside their own kennel, though you can look at them.

Some, I am aware, will not hold with this, but when the inhabitants of one kennel are permitted to gaze at those of another, rude remarks are apt to fly about, and an excuse is given for disorderly behavior, not to mention vigorous efforts to set at naught locks, bolts, and bars. Also in a small kennel it is often necessary, owing to the exigencies of space, to conduct operations in the passage way of a nature not benefited by an audience, however appreciative. All the interior is to be well white-washed; outside paint or varnish may be applied at discretion.

Although drainage is a most important point and should in any kennel receive adequate attention, under the conditions just described it can be entirely dispensed with, presupposing a plentiful and constant supply of sawdust; but it is just as well to have convenience for an occasional flushing, when the whole area is entirely under cover. Such flushing should take place as rarely as possible, since the whole floor, lacking free contact with the outside air, will keep moist for a much longer time than would otherwise be the case, and the slightest damp about a kennel will knock out a dog, old or young, faster than anything else, and predispose him to a large and varied assortment of ills.

The secret of all cleanliness in dog keeping is regularity. A dog's habits may be trained to the minute almost, and in the knowledge and carrying out of this lies much of the success in dog keeping. Habits of regularity should be encouraged in the puppies, but no dog can be expected to be cleanly if his exercising hours are at the sweet will of the kennelman with no reference to regularity. The cleanliness of the kennels alluded to above may be assured simply enough. The floor should be liberally sprinkled with sawdust which is evenly raked over the whole surface. This allows the dung to be easily collected and the urine absorbed and prevented from spreading. Every morning and at such intervals as may arise, all the attendant has to do is to go around with a bucket and a couple of shovels and remove all waste matter with the sawdust, then distribute a little dry disinfectant powder from a perforated tin and rake over again. If this be done regularly and methodically, the whole being changed once or twice a week when new bedding is supplied, no unpleasant odor will be experienced though the kennels should not be flushed from year's end to year's end. This saves a lot of trouble, too. This will even be found to answer well on a wooden floor with but little more trouble in cleaning up oftener. It is sometimes more convenient to have a wooden floor.

Everybody, however, cannot make use of stables or outbuildings and kennels must be provided, so that kennels of some sort have to be built. There is as much range in this direction as in a man's house, or his stable, or his wife's gown. But presuming that he is willing to lay out a reasonable amount of money to make his dogs comfortable and at the same time have an ornate structure so far as his means and intentions dictate, pretty and serviceable kennels may be economically built. No one on this side has as yet made a specialty of supplying ready made kennels except in a very small way, unless it be Spratt's Co., who used to show some kennels and yards at the New York shows, but I do not remember to have seen any effort in that direction of late. The English firm however advertises largely in this direction. The kennels are substantial and ornate with iron railings and so on, and where one has the idea of keeping but one or two dogs they are very useful. Some of the ready made cottage or camp house manufacturers advertise a movable house that we have seen set up at the Sportsman's Shows that strike us as convenient frames for a small kennel building. The interior fittings may be easily set up by anyone at all familiar with tools required. These houses may be bought for about \$35, and are something like 12x8 feet, with several windows and a door. I should think, though I have never tried them, that as summer quarters that may be changed about from place to place in a field or paddock, they would be very handy. For winter, unless reforested by double sheathing or heavy paper I should imagine they would be too cold, and would necessitate artificial heat, always a dangerous procedure, where an oil lamp or something of that sort, only would be available. Oil lamps are all right when one is around during the day, but at night when the heat is required the most they may become a source of danger and destruction.

The first idea a man has who intends to erect a kennel outfit, is to provide kennel yards in connection with the sleeping place. Kennel yards as a means for exercise are a delusion and a snare. I am confident they lead to more canine ills than anything barring dog shows. They are sources of draughts and cold and in the case of wet weather there is nothing more miserable than to see a dog paddling around in the mud and then running into and out of his kennel, dragging the wet and mud to his bed. This sort of thing leads to no end of kennel ills. Then, too, in winter, when we have all the need of tight buildings,

especially in this frigid weather we have been experiencing lately, the fact is that so many doors communicating with yards, however well made they may be, are sure sooner or later to admit lots of cold air, keeping the kennel much colder than it need be. Even in case the yards are covered in, they are objectionable because of the fact that their virtue—sunlight is thereby kept away from them.

One of the most successful kennel men of the country who has perhaps kept more dogs in a given space than anyone we know of, is a firm believer in the single compartment kennel. That is a range of kennels built to face a center aisle on each side or in the form of a three or four sided court yard. There is just room for one dog to comfortably stretch himself. The door shuts bang up to the dog's bed. Of course this plan makes it a necessity for the kennelman to exercise the dogs, and judging by experience, we are confident they do better than in larger compartments with kennel runs, for it matters not how large the runs may be, the dogs that have access to them all the time will just lie around, and never exert themselves unless something unusual happens to attract their attention. The compartment such as we indicate conduces to cleanliness, for few dogs are guilty of fouling their own beds if they are half way decently treated. Dogs confined in this way must be released at least three times a day. They welcome their run and make good use of it while they may, for they meet their friends from the other compartments and, like boys let out from school, they race around making the best of their time. In this arrangement there is no need of sawdust except for emergence. The bottoms of these compartments are removable or may turn up on hinges at the back to admit of cleaning underneath. Some benches are built tight, others have the boards a sixteenth of an inch apart to allow the dust and small cut hay that accumulates to fall to the floor beneath, where it may be easily swept away.

On the outside of the compartments underneath the kennel doors are swinging doors reaching to the floor. These serve two purposes, to keep draughts away from underneath the dog's bed, and to allow the interior to be washed and swept out without disturbing the dog. These kennels have the added advantage of always being neat in appearance and are absolutely safe. They may of course be made large enough to house two dogs in one compartment. The front of these compartments may be made as ornate as the purse of the owner will allow, but even the very inexpensive layout admits of some ornamentation in the way of brass hinges and bolts. Such a kennel we know of was built to house some twenty dogs at an outlay of about \$20 for material, the owner doing the fixing up himself as a pastime. Of course the building in which the compartments were erected was already on the ground, in fact was previously a poultry house with a glass front facing the south. The wood used was planed spruce, tongued and grooved. This was varnished and looks very neat and pretty. In summer these windows are taken out and the spaces being covered with wire netting, make a very cool kennel even on the hottest day. The dogs are turned out into a large yard three times a day in winter, and if there is no snow they are taken for a run in the fields at least once a day. In summer they get a long run twice a day, early mornings and evenings.—*The American Stock-keeper.*

Coming Events.

Rod.
April 1-Sept. 10. Oct. 16-Feb. 1—Open season for taking steelhead in tidewater.
Nov. 1-April 1—Trout season closed.
July 1-Jan. 1—Open season for black bass.
Aug. 15-April 1—Open season for lobsters and crawfish.
Nov. 1-Sept. 1—Open season for crabs.
Sept. 1-May 1—Open season for shrimp.
Sept. 1-Oct. 16—Close season in tidewater for steelhead.
Nov. 15-Sept. 10—Season open for taking salmon above tide water.

Gun.
Feb. 21, 22—Golden Gate Gun Club. Blue rocks. Ingleside.
March 6—California Wing Club. Live birds. Ingleside.
July 1-Feb. 15—Dove season open.
Nov. 1-July 15—Deer season closed.
Sept. 1-Feb. 15—Open season for mountain quail, grouse and sage hen.
Oct. 15-Feb. 15—Open season for quail, ducks, etc.

Bench Shows.
Feb. 9, 12—Fanciers' Association of Indiana. Indianapolis, Ind. C. R. Milhouse, Secretary.
Feb. 10, 13—Westminster Kennel Club, Madison Square Garden, New York. James Mortimer, Superintendent.
Feb. 18, 20—Johnstown Poultry and Kennel Club, Johnstown, Pa. J. R. Fling, Superintendent.
Feb. 22, 25—New England Kennel Club. Boston, Mass. Wm. B. Emery, Secretary.
March 1, 2—Merrimack Valley Kennel Club. Lawrence, Mass. Albert Mitchell, Secretary.
March 2, 5—Duquesne Kennel Club of Western Pennsylvania. Pittsburgh, Pa. Fred S. Stedman, Secretary.
March 10, 12—Chicago Kennel Club. Chicago, Ill. H. J. Cassidy, Secretary.
March 15, 18—Rochester Kennel Club. Rochester, N. Y. H. H. Kingston, Secretary.
March 22, 25—Buffalo Kennel Club. Buffalo, N. Y. E. P. Sharp, Secretary.
March 28, 30—Brantford Kennel Club. Brantford, Can. Thos. H. Terry, Secretary.
March 30, April 2—Atlantic City Kennel Club. Atlantic City, N. J. Thomas H. Terry, Secretary.
April 7, 9—Victoria Kennel Club. Victoria, B. C. Thos. H. Terry, Secretary, Victoria, B. C. C. K. C.
April 13, 16—San Francisco Kennel Club. Eighth annual show Mechanics' Pavilion. J. L. Cunningham, Secretary-Treasurer.
April 13, 15—Seattle Kennel Club. Seattle, Wash. Charles McAllister, Secretary. P. K. L.
April 20—California Collie Club. Oak Grove, Lawrence, Santa Clara Co. P. K. L.
April 21, 23—Santa Clara Kennel Club. San Jose, Cal. Miss Della Beach, Secretary, San Jose, Cal. P. K. L.
April 21—Portland Kennel Club. Portland, Or. T. E. Daniels, Secretary. P. K. L.
April—Los Angeles Kennel Club. A. K. C.
Oct. 4, 7—Danbury Agricultural Society. Danbury, Conn. Jas. Mortimer, Superintendent.

THE FARM.

The State School of Agriculture.

The Sacramento *Union* of a recent date says: The *Union* is interested to learn that a group of gentlemen concerned both sentimentally and practically in the agriculture of the State is planning a campaign in the interest of the State Agriculture College. This school, as all the world knows, is now established at Berkeley in close affiliation with the State University—so close, indeed, that it has practically lost its identity, and has all but been overwhelmed by the interests of general academic scholarship which make the atmosphere at Berkeley.

It is felt by those who have taken the matter up that California ought to have as a support to her agriculture the same species of scientific help as has in recent years been given by the highly developed schools of Iowa, Minnesota, Wisconsin and one or two other of the Northwestern States. In Wisconsin, for example, the work of the State School of Agriculture under Professor Henry is revolutionizing the methods of agricultural industry everywhere, vastly increasing the wealth of the State, and, better than all, putting the business of farming upon something like a professional basis. In all the great practical lines of agricultural industry in Wisconsin the work of the school goes hand in hand with the work of the soil, and the result is such development of the agricultural spirit as is restoring to farm life something of its old prestige.

That our school of agriculture in California is a much less efficient agency of progress is plain to everybody. It does not lack a basis in agricultural opportunity; it does not lack financial support; it is not deficient in the matter of men. On the contrary, California has a greater variety of agricultural resources and agricultural opportunities than any State in the Union. Our agricultural college has for twenty years had everything it has asked for in the way of help from the Legislature and from the general Government; Professors Hilgard and Wickson and their assistants are men of learning and devotion and of high reputation. But withal, the school has languished. Its classes are limited in number, and it is a very good year when it graduates so many as half a dozen. At Berkeley the "Cow College" is the butt of every stupid joke, and in a thousand ways those who take the agricultural course are made to feel a sense of inferior rank as compared with those directly connected with the academic departments.

The ideal organization of an agricultural college in California would be upon a basis of absolute independence—with its own endowment, its own appropriations, its own buildings and its own general equipment. In Oregon and Washington, for example, where the agricultural schools are separate establishments, they have a kind of rank which seems impossible under affiliation with an academic school. If we could have such an independent establishment of our agricultural college, with fields, gardens, orchards, flocks and herds and all the equipment of the modern school of agriculture, it is not to be questioned that instead of a few students we should have hundreds, and that in many points such a school would in a little while take equal rank with the schools of general scholarship.

Such entire separation of the school of agriculture from the State University is hardly practicable at this time. There can be no doubt about its desirability, but to propose it would be to bring on a conflict of interests and a contention which would weary the public and the Legislature, and in the end be a source of damage both to the school of agriculture and the State University. In Wisconsin,

where such remarkable results have been achieved, the school of agriculture under Professor Henry has a definite alliance with the State University; very much as the affiliated professional schools of San Francisco hold a relationship to the university at Berkeley. But it has an establishment of its own some miles distant from the site of the university, and it is to all practical purposes an institution by itself.

Such an establishment of the State Agricultural School with us is easily practicable; it would not violate any tradition or break down any element of public support, while at the same time it would give to the agricultural school a dignity and an individuality and a chance for practical usefulness which is denied to it in its present subordination to the great school at Berkeley.

The natural location for an agricultural school in California is somewhere in the central basin of the State, for it is in this basin that the characteristic conditions of agricultural industry are found, and where the great development of our agriculture is to be expected. Curiously enough, the largest and best field for agriculture in California is only partially developed. Not the tenth area available even for the higher purposes of agriculture in the Sacramento and San Joaquin valleys has been brought to its best development. Here—in the great interior—is where a great school of agriculture would find its best opportunity and its best inspiration.

Importance of the World's Fair Live Stock Show.

The February number of the *World's Fair Bulletin*, a magazine devoted to the Louisiana Purchase Exposition, published an article reviewing the work of the World's Fair Department of Live Stock to the first of this year. Regarding the importance of the World's Fair Live Stock Show this article says:

"The live stock interests of the world are certain to mark the Universal Exposition of 1904 as a distinct era in the history of improved stock breeding. The cause for this is in the entirely new but eminently fitting basis upon which the Exposition management has placed its recognition of live stock. A result that cannot but follow will be the establishing standards heretofore unattainable which will be recognized for a period beyond the memories of many who will see them achieved in 1904.

"The live stock classification has been given subordinate consideration at former expositions designed to summarize the world's progress. This was true, at least in theory, at the World's Columbian Exposition, where the live stock awards were on a much greater scale than at any international fair that had preceded. The scope of the Louisiana Purchase Exposition of itself called for the placing of the live stock exhibits upon an independent basis, but this was urged forward by the present greatness and the possibilities of the industry in the Louisiana Purchase territory and in all the area of which St. Louis is the geographical center. The reciprocal importance that here prevails is especially significant. Independent nations occupying the territory which we now know as the United States might have built up manufacturing or mining or agriculture in general to prosperous proportions; but improved stock breeding, the summit level of farming, could never have reached its present status in America under such conditions. The live stock interests have a peculiar concern in the commemoration of the Louisiana Purchase."

The first point with pigs after farrowing is to get them started well by good care of the mother, feeding her for a strong flow of milk, looking more to quantity than to quality.

Sober up on Jackson's Napa Soda.

Things to Remember.

That without constitution sheep are worthless.

That money spent in dip is money well spent.

That whatever is worth doing is worth doing well.

That you cannot starve a profit out of a flock.

That it's no disgrace to sleep in the sheep barn.

That you can't deceive a good judge with the shears.

That it's a gentleman that takes defeat gracefully.

That overfeeding is on a par with underfeeding.

That rye makes a good early spring "bite" for sheep.

That sheep of different ages require different treatment.

That Easter lambs must be ripe to command top prices.

That purchasing poor stock is purchasing a poor name.

That excessively fat ewes are liable to bring puny lambs.

That your flocks are a pretty good index to your abilities.

That bloom is another name for perfect condition and health.

That exercise is an important consideration to the pregnant ewe.

That sloppy, muddy yards are more or less responsible for foot-rot.

That blubber and good shepherds should not be found in the same fold.

That you must study the quality of the milk you feed a motherless lamb.

That when a lamb has lost its baby fat it has lost the spice of its life.

That you see your breeding flocks are not a disgrace to your show flocks.

That ventilation is about as necessary as food to the well doing of the flock.

That you should keep a very careful account of the pedigrees of your lambs.

That running a stud flock and running a range flock are two different questions.

That to charge a "green" customer \$50 for a \$20 sheep is a species of robbery.

That it's your duty to stay with your flock all night if it needs your attention.

That castrating and docking should be attended to while the lamb is young.

That the owner of the flock sometimes knows something about his flock and business.

That the proper reducing of show stock is as much a science as preparing it for show.

That the stomach worm does not affect the self fed lamb as it does the ill fed one.

That sheep of different ages and sexes do better separated than when run together.

That ewes which have aborted should be removed from the flock and its foetus burned.

That high feeding of the ewe direct y after the lamb is born is liable to cause trouble.

That the shortest road to either perfection or imperfection in sheep breeding is through the ram.

That the lamb should become acquainted with the fountain of nourishment as soon as possible after birth.

That concentrated foods of a beating nature are not adapted for the best growth of bone and muscle.

That the placenta of the ewe should be removed from the barn as soon as it is deposited by the ewe.

That when a ewe shows signs of lambing you should stay by her to prevent its being smothered in the caul.

That the management of the ram when in service should be somewhat different to that when he is out of service.

That a dollar saved in the purchase price of a ram sometimes means a hundred dollars lost in the selling price of the lamb.

That competition in the show ring will be keen next year and he that sleeps now will awake to find that he's a nonentity at St. Louis.

That a chilled lamb may be revived by

being placed in warm flannel near the stove, or by the warm bath and that a stimulant sometimes aids in restoring animation.—*American Sheep Breeder*.

Shipping Cattle.

The great difference in the nature and disposition of various classes of cattle undergoing shipment is something remarkable. For instance the shipping of corn-fed native stock from Chicago to New York is comparatively easy, for such animals are gentle and stand in the same position without fear during all the time they are on the cars. On the other hand, western steers from Colorado and that section are wild and will fight, hook and pile on top of each other like a lot of politicians and therefore need a great deal of attention. The railroad companies know this and will take proper precautions for keeping the animals up, employing competent men at division points and coaling stations to prod the animals to their feet. Under the present system a shipper goes to town at the unloading point, gets a lunch or cold bottle, always taking care of himself first. If he has any time afterwards he goes over the train, if not he gets on the caboose. If there is any loss he files his claim and the railroad settles with him for half the amount for policy's sake. In the near future all live stock will be shipped by weight; that is it will be weighed in to the railroad company at the shipping point and weighed out at destination. There will be a contract or agreement between the shipper and the company as to the amount of shrink the shipper is to stand for one hundred pounds of weight between shipping point and destination, based on actual tests on corn and grass-fed stock. If the shrink is greater on account of delays the railroad company will make it good, as well as for dead ones and cripples, whether caused by the animals falling between the cars and the platform at unloading stations or any other cause. When the railroads and shippers reach an agreement similar to this they will be doing business on a business basis.

It is necessary to keep constantly accessible to all hogs, both pigs and old hogs, some material that supplies lime and salt to aid in bone-building, as an appetizer, and to remove intestinal parasites. This mixture should be kept in a strong box protected from rain, and the quantity and frequency with which pigs will visit and eat of the mixture will often be surprising. The following is the mixture that we use: Charcoal, one and one-half bushels; common salt, four pounds; hard wood ashes ten pounds. Another thing which is good for the pig is a variety of feeds. Pigs do better on a variety than on any single feed. This fact is scarcely ever disputed by the farmers, but is often enough ignored to give it some emphasis. Just how much better the pig will do if fed a variety, we will let the pig himself testify; for whatever other mean thing a pig will do he will not tell a lie about his feed. Fresh water shade in summer, grain food when on grass, and dry bed free from dust, shelter in winter, and above all, when confined, have the area sufficiently large so that it will not become foul with droppings and mud bugs. These are essentials for successful hog raising.

It will not be a great while until the term "alfalfa hog" means a different type from that grown East. When the railroads master the problem of carrying hogs through without disease, quite a per cent of the pork of the country will be grown west of the corn belt, where alfalfa does better than in the central States. We look for the time when our pigs will be shipped East to cattle feeders and farmers who have more corn than hogs. These shoats, when put on a heavy corn diet, whether on alfalfa or not, make rapid gains and, we believe, will make better use of corn than hogs grown on a corn ration. Everybody in this country knows that hogs grown on alfalfa have much greater resisting power to cholera than those grown on corn and subjected to the same disease under the same conditions.

Pointers from Secretary Wilson.

That Sir Thomas Lipton buys American horses in Chicago, sends them to Ireland, and trains them, subsequently selling them to Englishmen as Irish jumpers, was asserted one day last week by Secretary Wilson of the Department of Agriculture. Mr. Wilson also said the well known yachtsman buys American pigs in Chicago and, canning them, sells them in England as Irish bacon. This, he said, is done in spite of the fact that the United States is deficient in creating new breeds of animals.

The Lipton revelation came out while Mr. Wilson was talking to the House Committee on Agriculture about the breeding of American domestic animals and declaring that something ought to be done about it. He sharply denounced the American lack of enterprise in this respect and thought more attention should be given to breeding.

"We import animals from all countries," said he, "and we maintain them as we get them, without trying to make these importations a foundation of breeding to supply our several localities. As a people, we have done no systematic breeding of domestic animals. We have produced hardly any types except the American trotting horse."

The Secretary said afterward that he did not mean to imply that Lipton stood alone in selling American meats as Irish. "Nearly everybody else does the same thing," said he. "All the meats that go from this country are sold as English meats and Irish meats and Scotch meats."

Secretary Wilson believes that the United States can furnish the mounts for the cavalry of Europe with proper study of the breeding of horses, and says the department is turning its attention to this subject at the present time. The only thing the United States has ever produced in the way of new breeds, he says, is perhaps a few breeds of hens, although we have converted a running horse into a trotter.

Touching on the statistical work of his department, the Secretary refuted vigorously the idea that there was or could be a "leak" regarding cotton or other crop prognostications. He told the committee that he had invited the New York Cotton Exchange to send a man to him and he would appoint him on the staff of the bureau, so that he might learn the methods employed. The man was sent, but the Secretary declared him to be incapable of grasping the system. Mr. Wilson invited the committee to visit the bureau, telling the members that he would lock them in the room with the statistician when the results were being tabulated, so they might observe the whole process.

The object of the bureau was to furnish the producer reliable information regarding the state of the crops of the country. This has been done in the past to a remarkable degree of accuracy, and he believed the cotton statistics of this year would prove nearly as correct.

Many other statements of unusual interest were made to the committee by the Secretary. In discussing the problem of irrigation, he said the experts of his department were studying the problem of how to handle the soil so as to conserve the water already available. In this connection he mentioned the sugar beet crop, which, he said, were steadily on the increase despite the dire predictions made at the time of the passage of the Cuban bill.

"We cannot now raise more than seven and a half tons of sugar beets to the acre," he said, "but with a conservation of the water in the soil by cultivation we can increase this amount, and when we produce fifteen tons to the acre we can repeal all of the sugar tariff laws with impunity."

The forests of the country, the Secretary declared to be disappearing in an alarming manner.

Sober up on Jackson's Napa Soda.

Thoroughbreds the Best.

No sensible excuse can be offered for keeping scrub fowls. No circumstance or condition can be put forward in justification of it.

People frequently are heard to say that they keep fowls only for the purpose of having fresh eggs for their table and a chicken dinner as often as they desire it. But these people would have more eggs if they kept thoroughbreds, and their chicken dinners would be incomparably better. Scrubs are poor eating as compared with full bloods.

The common run of farmers are doubtful as to whether it would be any advantage to them to discard the mongrels and give their place to the bloods. They argue that their surplus stock all goes to market, and fine "points" don't count for anything when sold in that manner. But the farmer is under no compulsion to sell birds of high value in that way. Any farmer of ordinary intelligence can soon learn the standard requirements which apply to any breed of fowls. And when he has done this he is a very foolish farmer if he sells a bird with well rounded out points as market poultry. There is a buyer waiting for every bird of that kind which the farmer can raise, who stands ready to pay as much for it as a whole coop full of scrubs will bring in the market.

It is true the farmer must know how to go about finding this buyer, but surely he is as capable of doing this as other men who regularly dispose of their best birds in this way. The birds which possess no points of value will at least bring as much as market poultry as the scrubs.—*Successful Farming.*

Chicken and Fruits.

The profits of a poultry plant may be greatly increased by planting the yards with fruit.

Small fruits may be planted between plums, peach and cherry trees to secure early results, but it may be necessary to provide a separate run for the fowls at fruiting time.

Poultry of all kinds enjoy and profit by a cultivated run. They like the soft fresh earth and they never tire of hunting for appetizing morsels dislodged by the plow or disc.

The largest crops of fruit I ever harvested have been obtained in this way and the chickens were especially strong and vigorous. It is better than killing two birds with one stone; it is raising the birds and the stones in the fruit at one expense.

There is some waste of fruit on the best managed plantations which is utilized by poultry much to their advantage. This fruit contains worms and some fungus in spite of modern methods. These are of course destroyed to the advantage of of next year's fruit crop.—H. A. Franklin.

An interesting topic of conversation among a group of experienced feeders in one of the offices of the Omaha Exchange Building was the changes that have been made in their business during the past few years. Chief among these is the difference in the age of stock coming to market at the present time and that of a few years ago. The general rule now seems to be to handle stock as short a time as possible. A few years ago it was not an uncommon thing to find four year old steers on the farm and the bulk of the finished native steers coming to market were at least three year olds. Now the steers raised in the corn belt are seldom kept after they are two years old and they are handled so as to be ready to go at this age.

It is the same with hogs. A few years ago it was the rule to keep porkers until they were fifteen months old. Now they are rushed in at the age of nine months and earlier if they are good enough to come. The new order of things has created a big change in the methods of handling young stock. Pigs and calves are forced from the start and kept growing until they are ready to be sent to the packers.—*The Omaha Journal-Stockman.*

The Hay Market.

Somers & Co. say in their circular this week in regard to the hay market: "Shipments of hay show a total considerably under that of last week, 2700 tons in comparison with 3500. Very little of interest can be reported at this time, for the rainy weather has interfered materially with trading, and practically all arrivals have been taken off the market without being offered to the trade. Now that the entire State has had rain some few small lots of hay will be released, and in all probability quite a bit of this will find its way to the San Francisco market. We will need it, for, had the rain not come, the situation would have become very serious with us. Very few new orders have come from the outlying districts since the rain commenced, although we will hear from many of these places later. We get it from good authority that in Los Angeles county there is hardly enough hay to last them more than a month. This is true in other districts, and now that they have had rain to encourage them to continue business there will surely be a scrambling around for hay before the advent of the new crop.

"With the San Francisco market nothing new has developed. Now that there is a certainty of war in the Orient all markets will probably brighten up somewhat. Whether hay will be affected to any great extent or not remains to be seen. If, as is generally expected, either nation in the conflict comes to this Coast for fodder within the next two or three months it is hard to predict the limit to which hay prices may soar."

Progress in Cattle Raising.

The raising of thoroughbred cattle is one of the most noble and important business pursuits open at the present time. We have made substantial progress in the quality of our herds as well as the business management of our associations.

Twenty-five years ago we had three Durham herd books, one in Kentucky one in Ohio and one in New York, and dissensions, jealousies and suspicions grew out of the manner in which these different registers were conducted, but fortunately there were men forthcoming who were big enough to overcome all obstacles. They were instrumental in separating the wheat from the chaff and the records were purified. At the present time pedigrees are accepted without question and the noble breed of shorthorn cattle has been rescued from the dissensions among breeders that threatened the we fare of the breed.

Jackson's Napa Soda is sold in every city, town and hamlet in the State.

Stands at the Head

There is no uncertain sound in what this man has to say about Kendall's Spavin Cure.

Dr. H. J. Kendall Co., Worcester, Mass., Nov. 17, 1902.

Very truly yours, G. W. McHENRY.

Thousands of men report equally good or superior results from its use. Price, \$1, six for \$5. As a liniment for family use it has no equal. Ask your druggist for Kendall's Spavin Cure, also "A Treatise on the Horse," the book free, or address

Thoroughbred Colts FOR SALE.

Bay Filly (two years old March, 1904,) by Wild Idler; second dam, Mary Wade by Woodburn; third dam, Viola by Imp. Knight of St. George; fourth dam, Lucy Wade by Lexington; fifth dam by Whalebone. [For further information see Bruce's American Stud Book]. This filly is handsome and very promising.

Horse Colt by George F. Smith, dam Baby Mina by Sid; second dam Allie Hill by Wild Idler [see pedigree given above]. This colt is two years old March, 1904, and is in every way a desirable animal.

Both of the above are broken to ride. For further particulars apply to or address
H. K. SNOW, Jr., Oxnard, Cal.

McKinney Mare For Sale.

SOLID BAY MARE WITH BLACK POINTS: 8 years old; sired by McKinney 2:11 1/4, dam by Sidney, second dam a producing mare by Chief. This mare with little training has worked miles in 2:34, quarters in 3:34 and alghus in 16 seconds. She is now in foal to Monterey. James Barryman and Grant Lapham both declare that she is one of the most promising prospects they have ever seen. She is absolutely sound, kind and gentle, and will be driven for speed for the benefit of prospective purchasers. Entered in Breeders \$6000 Futurity Stake for foals of 1904. Address EDWARD NEWLANDS, 1676 Webster Street, between 23d and 24th streets, Oakland. Telephone: Cedar 701.

FOR SALE.

MY ENTIRE STOCK OF STANDARD-BRED Trotting and Pacing Horses. Single drivers and double teams. Some excellent prospects for stakes winners entered in the Occident, Stanford and Breeders Futurity stakes. The great brood mare Daisy S. (dam of Tom Smith 2:13 1/4, General Valjeo 2:20 1/4, Sweet Rosa 2:25 (trial 2:21) and Little Mac (3:27). The driving horses and colts can be seen at my stable in Valjeo, and the broodmares, etc., at the race track. Apply to or address

Causes of Poultry Failure.

Not every one who starts in the poultry business succeeds. But there is a specific cause or combination of causes to account for every failure.

The location is bad, the individual gives too little attention to details or applies the attention at the wrong place, the fowls are not vigorous, too little or too much capital is employed, and lack of business ability, are all potent causes of failure.

To start wrong does not necessarily mean failure, because mistakes may be quickly remedied. But a wrong start stupidly, or stubbornly followed in spite of reform admonitions is a sure road to disaster.

Lack of capital is often an advantage, a blessing in disguise, provided additional intelligent exertion is thrown into the work to make up the deficiency. But insufficient capital bolstered up with borrowed money, unless managed by an expert, means almost certain trouble.

The hair of the Angora goat may be of three kinds, straight, wavy or in ringlets. The straight mohair is often very fine and commands the highest price on the market, but the quality of it in a fleece is so much less that it is not the most profitable kind to raise. Where a fleece of straight or wavy mohair might weigh two or three pounds and sell for 40 cents a pound, a fleece of the ringlet mohair would probably weigh seven or eight pounds and sell for 25 cents a pound. Naturally the latter would be more profitable, as the two animals would require practically the same care and feeding throughout the year. In

Turkey many of the goats are of the straight haired type; but it is well known to the trade that the fleeces from Turkey are not nearly so heavy as those from South Africa, where they make a business of breeding for the ringlet fleeces. To show what can be done by careful breeding a three-year-old buck with a ringlet fleece of thirteen months' growth sheared seventeen and a half pounds of assorted mohair, besides about a pound and a half of tags.—*Wool Markets.*

Growing pigs should be fed regularly at stated times, feeding each time what they will eat up clean, and not so much but that they will come when called to their next feed.

Trotting Horses

in being shipped about from place to place on a circuit, subject to all kinds of weather and consequent changes in temperature are very likely to fall sick, *chills, colic, colds, pneumonia, etc.*, may take them at any time, *avoid trouble in this way, having a supply of*

McKINNEY STALLION FOR SALE RUSSELL MC

BY McKINNEY: FIRST DAM CHEERFUL by Larco, he by A. W. Richmond; second dam Ruswood by Lord Russell 4877 by Harold 413; third dam Carlotta by Nutwood 600; fourth dam Lady Mayberry by Chieftain 731. **RUSSELL MC**, foaled in 1898, is a rich seal brown in color, stands over 16 hands weighs about 1100 lbs. Is a horse of lofty carriage and commanding appearance. He has great muscle, bone and substance. His breeding is of the very best, coming from the strains that have produced the record breakers and great sires and dams. He has shown that he is a fast horse, having trotted in his three-year-old form a full mile in 2:21 1/4, quarter in 33 seconds and won second money in the Occident Stake in 1901. A great opportunity to get a well-bred McKinney cheap. Will be sold for \$500. Apply to or address **DR. J. DE BARTH SHORE,** Los Angeles, Cal.

J. G. CUICELLO, San Jose, Cal.

Or JAMES COFFIN, 132 Market Street, San Francisco.

SILVER BEE 2:27 3-4

(RECORD MADE AT TWO YEARS OLD)

Season of 1904 at

VORDEN, SACRAMENTO CO.

FEE: \$30 FOR THE SEASON.

SILVER BEE is a handsome, well developed horse, stands 16 hands high and weighs about 1300 pounds. He is a model of symmetry, has head and neck, short back, legs and feet like iron, perfect disposition and has great intelligence. No more perfectly gaited trotter stands for service and his record is no measure of his speed, as he can show a 2:30 gait at any time. In his blood lines he represents the most fashionable strains. His grandsire Robert McGregor sired that wonderful horse Crescenzo 1:59 1/4, and on his dam's side he carries the blood of the Goldust family, the most beautiful of all trotting tribes, besides that of the sire of Nutwood, the greatest of sires. His only foal to be trained is Glide, one of the handsomest young horses in Sacramento county, that has trotted a trial in 2:22. Good pasturage at \$3 per month. Every care taken to prevent accidents or escapes but no liability assumed. All bills to be settled before mares are removed. Address communications to McKINNON & GREEN, Vorden, Sacramento Co., Cal. or to W. O. (JOE) BOWERS, Capital Hotel, Sacramento.

By SILVER BOW 2:16

(Sire 2 in 2:15, 8 in 2:30)

1st dam BELLE Mc (dam of Worthwood (1) 2:59 and Silver Bee (3) 2:27 1/4) by Ensign Goldust Jr.

2d dam LITTLE BELLE (graddam of 2 in list) by Belmont (sire of Nutwood 2:18 1/4 and 58 more in 2:30).

3d dam Thoroughbred Mare by Imp. Trustee.

Office in New York, 571 Fifth Avenue, "The Windsor Arcade"

SPRING AND AUTUMN MEETINGS, 1904.

Spring Meeting, 1904, begins Thursday, March 24th, to include Thursday, April 14th—19 days.

Autumn Meeting, 1904, begins Thursday, November 17th, to include Saturday, December 3d—15 days.

The Benning Spring Handicaps and the Grand Consolation will close and name at Midnight of Tuesday, February 16, 1904.

The Benning Spring Handicaps.

To be run on the first and last days of the Spring Meeting.

Handicaps for three-year-olds and upward. By subscription of \$10 each, which shall entitle the entry to start in the First and Second Handicaps, on payment of the additional starting fee of \$20 in each. To close and name at midnight of Tuesday, February 16, 1904, (the third Tuesday in February). Weights to be announced March 1, 1904.

CONDITIONS OF THE FIRST BENNING SPRING HANDICAP. Starters to pay \$20 additional, with \$1000 added, of which \$200 to the second, \$300 to the third. The winner to receive one-half of the subscription money, all of the starting money, and the balance of the added money, \$700.

Winners after the publication of the weights to carry 3 lbs. extra; of two races of any value, or one of the value of \$1000, 5 lbs. extra; of three of any value or one of the value of \$1500, 8 lbs. extra. In case of horses handicapped at 118 lbs. or over, these penalties shall apply to the extent of one-half only. Six furlongs Columbia Course.

CONDITIONS OF THE SECOND BENNING SPRING HANDICAP. Starters to pay \$20 additional, with \$1500 added, of which \$250 to the second, \$150 to the third. The winner to receive the remaining one-half of the subscription money, all of the starting money, and the balance of the added money, \$1100.

Winners after the publication of the weights of a race of any value to carry 3 lbs. extra; of two races of any value, or one of the value of \$1000, 5 lbs. extra; of three races of any value, or one of the value of \$1500, 8 lbs. extra. In case of horses handicapped at 118 lbs. or over, these penalties shall apply to the extent of one-half only, except for the winner of the First Handicap, which shall carry 10 lbs. more than he carried in that race. Seven furlongs Columbia Course.

AUTUMN MEETING, 1904.

THE GRAND CONSOLATION—\$3000 Added.

THE GRAND CONSOLATION, for two-year-olds, foals of 1902. Non-winners of \$10,000 at time of starting. To close and name February 16, 1904, at \$10 each. If not declared by June 1, 1904, to pay \$25 each. If not declared by September 1, 1904, to pay \$50 each. If not declared by November 1, 1904, to pay \$100 each. Starters to pay \$100 additional. The Washington Jockey Club to add \$3000, of which \$300 to the second, \$200 to the third. Colts to carry 122 lbs.; fillies and geldings, 119 lbs. Non-winners of \$5000 allowed 5 lbs., of \$3500 allowed 7 lbs., of two races of \$2000 allowed 10 lbs., of three races of \$1500 allowed 12 lbs. Maidens that have not started to receive no allowance.

The winning of \$10,000 or more, shall be equivalent to a declaration. Seven furlongs Columbia Course.

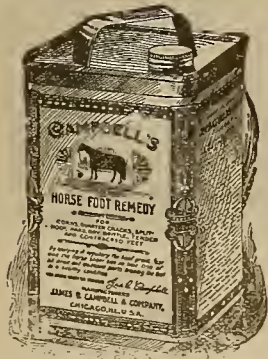

NOTICE.

The Chevy Chase Hunt Handicap Steeplechase, the Spring Hunters Steeplechase, the Easter Monday Steeplechase will be duly announced to close on Tuesday, March 1, 1904. The Dixie and Vestal for three-year-olds, to be run in 1905, will not close for now two-year-olds as heretofore, but will close for then three-year-olds in the Spring or early Summer of 1905, the conditions of which will be duly announced.

The entries for the above are received only under the conditions as printed, and in all respects subject to and in accordance with the Rules of The Jockey Club and the Washington Jockey Club. The Steeplechases in accordance with Rules of the National Steeplechase and Hunt Association.

For entry blanks address the BREEDER AND SPORTSMAN, 36 Geary Street, San Francisco, Cal.

CAMPBELL'S HORSE FOOT REMEDY IS THE BEST REMEDY

EVER USED ON HORSES' FEET.

IT PENETRATES AND DRIES IN quickly and DOES NOT GUM AND FILL UP THE PORES like tar and oil compounds. It is the GREATEST REMEDY ever used to remove SORENESS and FEVER from the foot, and makes it possible to get good services out of a horse working on hard and hot pavements.

It gives natural nourishment to the foot and incites a rapid, healthy growth—ALL DRYNESS AND BRITTLENESS quickly disappears.

QUARTER CRACKS AND SAND CRACKS are rapidly grown out when directions given in our booklet are followed. It is a SURE CURE FOR CORNS, CONTRACTED FEET AND NAIL WOUNDS if directions are followed.

IT PREVENTS SOUND FEET FROM BECOMING UNSOUND AND GROWS A TOUGH, STRONG, ELASTIC WALL AND HEALTHY FROG—A FOOT WHICH WILL STAND WORK on race courses.

Many of the best owners and trainers state that for track work nothing equals it. In many cases horses have reduced their records several seconds, due to its use.

It is a CERTAIN CURE FOR THRUSH AND SCRATCHES

We Guarantee That It Will Do What We Claim and Will Refund Money If It Fails.

PRICES:—Quarts, \$1.00; Half-Gallon, \$1.75; Gallon, \$3.00; 2½-Gallon, \$5.50; Five-Gallon, \$10.00.

Books giving full directions for its use and much valuable information as to shoeing are supplied free.

Don't fail to read "ad." giving information concerning Campbell's Iodoform Gall Cure in next issue of this paper. It is the best and because of its merits is rapidly displacing all others.

JAS. B. CAMPBELL & CO., Manufacturers, 412 W. Madison St., CHICAGO, ILL. Sold by all Dealers in Harness and Tack Goods. If not in stock ask them to write any Jobber for it.

PALACE HOTEL, SAN FRANCISCO, CALIFORNIA.

TOURISTS and TRAVELERS will, now, with difficulty recognize the famous COURT into which for twenty-five years carriages have driven. This space of over a quarter of an acre has recently, by the addition of very handsome furniture, rugs, chandeliers and tropical plants, been converted into a lounging room—the FINEST IN THE WORLD.

The EMPIRE PARLOR—the PALM ROOM, furnished in Corise, with Billiard and Pool tables for the ladies—the LOUIS XV PARLOR the LADIES WRITING ROOM and numerous other modern improvements, together with the unexcelled Cuisine and the Most Convenient Location in the City—all add much to the ever increasing popularity of this most famous HOTEL.

RITA H. 2:11 1-4

Pacing Mare by McKinney 2:11 1-4

ELECTRO MCKINNEY

Brown Colt, Four-Year-Old Trotter by McKinney 2:11 1-4

RITA H. is a dark brown mare who stands nearly 16 hands high, and will weigh in racing trim about 1050 lbs. This mare has had this year a very remarkable record. She started in the Northwestern Circuit in the States of Oregon and Washington, and out of eight starts won her first seven races and only lost four heats during the entire circuit, and has a pacing record of 2:11 1/4. The mare is five years old and is excellent on the road. She does not pull or lug, and a lady can drive her anywhere. Last spring she trotted a workout mile in 2:18 1/4 and repeated in 2:16 1/4, after only seven weeks' work. Her owner has driven her in 2:12 1/4 in the Los Angeles Driving Club races, she having won all of them in which she started. This mare can step two heats below 2:10.

ELECTRO MCKINNEY is a brown stallion foaled in 1900, and stands 15 hands 1 inch in height. He trotted a full mile as a two-year-old in 2:14, last quarter in 35 seconds, and when a three-year-old a full mile in 2:14 1/4, last quarter in 32 seconds. He is perfectly gaited and a grand individual in every respect. Weighs about 950 lbs. ELECTRO MCKINNEY is bred in the purple, and is one of the best sons of McKinney alive to-day. McKinney is undoubtedly the greatest sire for his age, living or dead. ELECTRO MCKINNEY was not raced last year, being only a three-year-old and not entered in any stakes it was decided to hold him over.

These horses are all right and there is not a thing the matter with them, but my business demands are such that I cannot afford to devote any time to racing them. For prices and further particulars address

BYRON ERKENBRECHER,

301 CURRIER BUILDING, LOS ANGELES, CAL.

Or inquire at Office of BREEDER AND SPORTSMAN.

LILIENTHAL & CO.

BEALE AND MISSION STS.

San Francisco, Cal.

Troy Chemical Co., Troy, N. Y.

In regard to "Save-the-Horse" I have used it with much success. The running horse "Col. Roosevelt" that had broken down in training for two or three years past is now in good shape and will certainly be able to race as well as ever before. Have also used "Save-the-Horse" on the horse "Greyfield" with satisfactory results. Will also add that I have seen "Save-the-Horse" remove a deep seated ringbone from a Director trotting horse in Monroe Salisbury's Stable. I am pleased to be able to recommend "Save-the-Horse" from actual experience.

Yours truly

GEO. A. DAVIS.

Shelbyville, Tenn., Jan. 2, 1904

I enclose P. O. Order for five Dollars, for which send me bottle of "Save-the-Horse". The first bottle has saved me the worth of at least one horse.

J. A. BARRETT.

One-third of a bottle of "Save-the-Horse" cured my horse of a spavin that had been fired and blistered several times in the past two years.

M. M. OSBORN.

On broken down, weak and injured tendons, ruptured ligaments and all strains its power is unfailing; permanently cures all broken down conditions of the ankle, hock, tendons or ligaments without scar, blister or loss of hair. No man need see his horse suffer and become incapacitated. "SAVE-THE-HORSE" POSITIVELY AND PERMANENTLY CURES BONE AND JOINT SPAIN, THOROUGHPIN, RINGBONE (except low ringbone), CURE, SPINT, CLAPPED HOCK, WINDPUFF, SHOE BOIL, WEAK AND SPRAINED TENDONS AND ALL LAMENESS. Apply in all extremes of weather. Horses may work as usual with boots, as no harm can result from destruction of hair or scalding of limb.

\$5.00 a bottle. Written guarantee with every bottle. Constructed solely to protect you. Need of second bottle improbable, except in rarest cases. Copy of booklet and guarantee sent upon application, \$5.00, at drugists and dealers, or sent express paid by TROY CHEMICAL CO., TROY, N. Y.

D. E. NEWELL, 519 Mission St., San Francisco, Cal., Pacific Coast Agent

A Sidney Stallion With Earning Capacity

FOR SALE.

In pursuance of my intention to retire from the business of breeding horses, and having disposed of all my broodmares at auction, I now offer at private sale the stallion

WILLIAM HAROLD 2:13 1-4.

His sire is the great Sidney 2:19 1/4, grandsire of the champion trotter of the world, Lou Dillon 1:58 1/4, and his dam the great race and broodmare Cricket 2:10 (dam of four in the list) by Steinway, the greatest son of Strathmore.

WILLIAM HAROLD is a producer. The only two of his get to start are that wonderfully fast trotter Janice 2:08 1/4 and the pacer Dan Burns 2:15. WILLIAM HAROLD'S services in the stud were very limited up to three years ago, as he was raced. His weanlings, yearlings and two-year-olds are very promising and have size, good looks and great natural speed, besides being uniform in color, nearly all bays. He is a sure foal getter, is in the very best condition, sound and healthy, and with ordinary good business management can earn in the stud in 1904 the price asked for him.

WINCHESTER

REPEATING SHOT GUNS
A CHANCE FOR A DOUBLE

A QUESTION often asked about Repeating Shotguns is, "How quick can a second shot be fired with them?" Shooters that have used Repeaters answer with one accord: "Doubles" are just as easy to make with a WINCHESTER REPEATING SHOTGUN as they are with a double barreled gun. The third shot that a Winchester Repeater gives often bags a badly crippled bird which otherwise would get away. Winchester Repeating Shotguns are made in "Take Down" styles in 12 and 16 gauge.

Stakes to Close THURSDAY, February 25, 1904, for the
Summer Meeting, 1904
Beginning Saturday, June 18th.
Ending Saturday, July 16th.

OVERNIGHT HANDICAPS, \$1250 AND UPWARD.

NO SELLING PURSES LESS THAN \$600.

OTHER PURSES \$700 AND UPWARD.

SPECIAL NOTICE.—No entry will be received for any of these Stakes, except upon this condition: That all disputes, claims and objections arising out of the racing, or with respect to the interpretation of the conditions of any Stakes, shall be decided by the Racing Stewards present or those whom they may appoint, and their decisions upon all points shall be final.

FOR THREE-YEAR-OLDS.

THE AMERICAN DERBY—\$25,000 ADDED.

A sweepstakes for Three-Year-Olds; \$25 to accompany the nomination, \$25 additional to start; \$25,000 added, of which \$3000 to the second and \$2000 to the third horse. A winner of a three-year-old stakes of the value of \$3000 to carry 3 lbs. of two such stakes, or one of \$400, 5 lbs.; of three or more three-year-old stakes of the value of \$3000 each, 7 lbs. extra. Maidens allowed 7 lbs. To be run the first day of the meeting. *One Mile and a Half.*

THE SHERIDAN STAKES—\$4000 ADDED.

A sweepstakes for Three-Year-Olds; \$10 to accompany the nomination, \$50 additional to start; \$4000 added, of which \$1000 to the second and \$500 to the third horse. A winner of a three-year-old stakes of the value of \$1500 to carry 3 lbs.; of two such stakes, or one of \$400, 5 lbs.; of three or more three-year-old stakes of the value of \$1500 (selling stakes excepted), or of one of the value of \$400, 7 lbs. extra. Maidens allowed 7 lbs. *One Mile and a Quarter.*

THE ENGLEWOOD STAKES—\$2000 ADDED.

A sweepstakes for Fillies, three years old; \$10 to accompany the nomination, \$50 additional to start; \$2000 added, of which \$400 to the second and \$200 to the third horse. A winner of a three-year-old stakes of the value of \$5000 to carry 3 lbs.; of two such stakes, 5 lbs.; of three or more such stakes, or of one of the value of \$5000, 7 lbs. extra. Maidens allowed 7 lbs. *One Mile.*

THE DREXEL STAKES—\$2000 ADDED.

A sweepstakes for Three-Year-Olds; \$10 to accompany the nomination, \$50 additional to start; \$2000 added, of which \$1000 to the second and \$200 to the third horse. A winner of a three-year-old stakes of the value of \$5000 to carry 3 lbs.; of two such stakes of the value of \$1500 each, to carry 5 lbs. extra. Non-winners of two three-year-old races of the value of \$1500 each, allowed 3 lbs.; of one such race, 5 lbs.; of one of \$1000, 8 lbs.; of one of \$500, 12 lbs. Maidens allowed 7 lbs. *One Mile.*

FOR THREE-YEAR-OLDS AND UPWARD.

THE MIDWAY STAKES—\$2000 ADDED.

A selling sweepstakes for Three Year-Olds and upward; \$10 to accompany the nomination, \$25 additional for naming to start; \$2000 added, of which \$500 to the second and \$250 to the third horse. Weights, 5 lbs. above the scale. The winner to be sold at auction. Those entered to be sold for \$5000 to carry full weights; if for \$4000, allowed 5 lbs.; then 3 lbs. for each \$500 to \$3000; then 1 lb. for each \$100 to \$3000. Winners of a stakes this year, after the closing of entries, and prior to June 5th when carrying weight for age or more, not to be entered for less than \$1000; after June 5th, \$500. Starters, with selling prices, to be named through the entry box at the usual hour of closing, the day prior to the race. More than

Please note that the Entrance Fee must accompany nominations. Torfmen failing to receive Entry Blanks can obtain them by application to the Secretary, to whom all communications should be addressed.

San Francisco, Coast Representative

two can be named by the same owner, but only two in the same interest can start; but the starting fees must be paid for all named. *One Mile and a Furlong.*

FOR THREE-YEAR-OLDS AND UPWARD.

THE AUBURN STAKES—\$2000 ADDED.

A selling sweepstakes for Three-Year-Olds and upward; \$10 to accompany the nomination, \$25 additional for naming to start; \$2000 added, of which \$1000 to the second and \$200 to the third horse. The winner to be sold at auction. Those entered to be sold for \$4000 to carry weight for age; for \$3000, allowed 5 pounds; then 2 lbs. for each \$500 to \$3000; then 1 lb. for each \$100 to \$1000. Winners of a stakes this year, after the closing of entries, and prior to June 5th, when carrying weight for age, or more, not to be entered for less than \$3000; after June 5th, \$400. Starters, with selling prices, to be named through the entry box at the usual hour of closing, the day prior to the race. More than two can be named by the same owner, but only two in the same interest can start; but the starting fees must be paid for all named. *One Mile and a Half a Furlong.*

THE OAKWOOD HANDICAP—\$2500 ADDED.

A sweepstakes for Three-Year Olds and upward; \$10 to accompany the nomination, \$50 additional to start; \$2500 added, of which \$1000 to the second and \$200 to the third horse. Weights to be announced three days before the race. A winner of any race after the weights are posted to carry 5 lbs. extra. *One Mile and a Furlong.*

THE GREAT WESTERN HANDICAP—\$3000 ADDED.

A sweepstakes for Three-Year-Olds and upward; \$10 to accompany the nomination, \$50 additional to start; \$3000 added, of which \$1500 to the second and \$250 to the third horse. Weights to be announced three days before the race. A winner of any race after the weights are posted to carry 5 lbs. extra. *One Mile and a Half.*

THE YOUNG HANDICAP—\$5000 ADDED.

For Three-Year-Olds and upward; \$10 to accompany the nomination, \$75 additional to start; \$5000 added, of which \$750 to the second and \$250 to the third horse. Weights to be announced three days before the race. A winner of any race after the weights are posted to carry 5 lbs. extra. *One Mile, One and One-half Furlongs.*

THE WHEELER HANDICAP—\$7500 ADDED.

A sweepstakes for Three-Year-Olds and upward; \$10 to accompany the nomination, \$125 additional to start; \$7500 added, of which \$1000 to the second and \$500 to the third horse. Weights to be announced three days before the race. A winner of any race after the weights are posted to carry 5 lbs. extra. *One Mile and a Quarter.*

FOR TWO-YEAR-OLDS.

THE LAKESIDE STAKES—\$2000 ADDED.

A sweepstakes for Fillies, Two Years Old; \$10 to accompany the nomination, \$50 additional to start; \$2000 added, of which \$400 to the second and \$200 to the third horse. A winner of a stakes of the value of \$1000 to carry 3 lbs.; of two such stakes, 5 lbs.; of three or more such stakes, 7 lbs. extra. Maidens allowed 5 lbs. *Five Furlongs.*

THE KENWOOD STAKES—\$2000 ADDED.

A sweepstakes for Colts, Two Years Old; \$10 to accompany the nomination, \$50 additional to start; \$2000 added, of which \$400 to the second and \$200 to the third horse. A winner of a stakes of the value of \$1000 to carry 3 lbs.; of two such stakes, 5 lbs.; of three or more such stakes, 7 lbs. extra. Maidens allowed 5 lbs. *Five Furlongs.*

THE MAYWOOD STAKES—\$2000 ADDED.

A sweepstakes for Two-Year-Olds; \$10 to accompany the nomination, \$50 additional to start; \$2000 added, of which \$400 to the second and \$200 to the third horse. A winner of a stakes of the value of \$1000 to carry 3 lbs.; of two such stakes, 5 lbs.; of three or more such stakes, 7 lbs. extra. Maidens allowed 5 lbs. *Five Furlongs.*

THE EDGEWATER STAKES—\$2000 ADDED.

A sweepstakes for Two-Year-Olds; \$10 to accompany the nomination, \$50 additional to start; \$2000 added, of which \$400 to the second and \$200 to the third horse. A winner of a stakes of the value of \$1000 to carry 3 lbs.; of two such stakes, 5 lbs.; of three or more such stakes, 7 lbs. extra. Maidens allowed 5 lbs. *Five and a Half Furlongs.*

THE QUICKSTEP STAKES—\$2000 ADDED.

A sweepstakes for Two-Year-Olds; \$10 to accompany the nomination, \$50 additional to start; \$2000 added, of which \$400 to the second and \$200 to the third horse. A winner of a stakes of the value of \$1000 to carry 3 lbs.; of two such stakes, 5 lbs.; of three or more such stakes, 7 lbs. extra. Maidens allowed 5 lbs. *Four Furlongs.*

THE HYDE PARK STAKES—\$1500 ADDED.

A sweepstakes for Two-Year-Olds; \$10 to accompany the nomination, \$50 additional to start; \$1500 added, of which \$1000 to the second and \$500 to the third horse. A winner of a stakes of the value of \$1000 to carry 3 lbs.; of two such stakes, 5 lbs.; of three or more such stakes, or of the Edgewater Stakes, 8 lbs. extra. Maidens allowed 5 lbs. *Six Furlongs.*

THE LAKE VIEW HANDICAP—\$2000 ADDED.

A sweepstakes for Two-Year-Olds; \$10 to accompany the nomination, \$50 additional to start; \$2000 added, of which \$400 to the second and \$200 to the third horse. Weights to be announced two days before the race. *Six Furlongs.*

BEAUTIFUL BELLS IS DEAD. The greatest of broodmares, the grand old matron that gave to the trotting turf more 2:30 performers than any other mare that ever lived, whose produce sold for over \$300,000 and whose family of sons is one of the most famous in trotting history, passed away at Palo Alto Farm yesterday, aged 32 years. She had lived to see the dispersal of the once great breeding stud of which she was the queen, and it is fitting that her death followed so soon after the last of the Palo Alto horses were sold. Old age was the cause of her demise. She had run her course, fulfilled her mission, and her remains will now be laid in the quaint little cemetery beside those of her king and consort, the famous Electioneer. Beautiful Bells was a black mare, fifteen hands and two inches in height, with star and strip and off hind ankle white. She was bred by the late L. J. Rose of Sunny Slope, California, who raced her to a record of 2:29½ and then sold her when quite a young mare to Senator Stanford, who immediately put her to breeding. Her first foal was the brown filly Hinda Rose by Electioneer, foaled in 1880, when Beautiful Bells was eight years old. Hinda Rose took a yearling record of 2:36½, a two-year-old record of 2:32 and a three-year-old record of 2:19½. The following year Beautiful Bells produced the brown filly Alta Belle, that produced Daghestan 2:29 and the dam of Electabout 2:27. In 1882 she produced the black colt St. Bel that took a record of 2:24½ as a four-year-old, was sold to Eastern parties and was afterwards burned to death. After producing these three foals by Electioneer, Beautiful Bells was bred to Piedmont 2:17½ and the result of that mating was the bay filly Rosemont, that produced Montrose, three-year-old record 2:18½, Sweet Rose, yearling record 2:25½ and Mazatlan 2:26½. The next foal that Beautiful Bells produced was the great Chimes by Electioneer, that took a record of 2:33½ at two years old and was sold to Mr. C. J. Hamlin, proprietor of the Village Farm, New York. Here Chimes became one of the greatest of stallions. He sired The Abbot 2:03½, and seven more in the 2:10 list and has a total of 76 in the list. Her next foal was also by Electioneer—the great but unfortunate Bell Boy, that took a two year old record of 2:26 and a three year old record of 2:19½, and died fourteen years ago leaving fourteen standard performers, five producing sons and four producing daughters. The next year she produced Palo Alto Bell by Electioneer. This filly took a record of 2:22½ as a three year old and was sold. She died leaving but two foals. The

next foal was a bay colt and he was called Bow Bells. He took a record of 2:19½, and is making a name as one of the great sires. He has 40 in the list and among them are three with records better than 2:07. Beautiful Bells' foal of 1888 was Electric Bell by Electioneer, and he has fourteen in the list, one of them a 2:10 performer. Next came the great filly Bellflower by Electioneer. This filly took a two year old record of 2:24½, reduced it to 2:16½ the following year, and as a four year old trotted in 2:12½. In 1890 her foal was again a filly, the great Bell Bird, that took the yearling record of 2:26½ and reduced her mark to 2:22 as a two year old. Then in 1891 came Belsire 2:18, her fastest son, and the last of her foals by Electioneer, who had died December 3, 1890. Belsire is sire of seven standard performers. Beautiful Bells was mated that year with Palo Alto 2:08½, and the produce was the black colt Day Bell that was sold and died soon after. She was next bred to Advertiser 2:15 and in 1893 foaled the brown colt Adbell that took the world's yearling record of 2:23, and sired Rowellan 2:09½ and others. Adbell died in 1901 and his death was one of the greatest losses the trotting turf has suffered. In 1894 Bell's Beauty by Electricity was foaled and in 1895 and 1896 she again produced fillies—Adebel and Vesper Bell—both by Advertiser. In 1896 she was bred to Mendocino 2:19½ and produced her last foal the handsome horse Monbells 2:23½ sold at New York last fall. For eighteen years the great mare never failed to produce a foal. After 1897 she was bred for two or three years but Monbells was the last of her great family. To recapitulate, Beautiful Bells produced eighteen foals. Of these 11 took standard trotting records, eight were stake winners and four were champions. Eight of her sons are producing sires, three of her daughters are producers, and there have been several champions among this produce. For years Beautiful Bells has been the most interesting figure at the famous Palo Alto Farm, and none have visited that once great breeding stud without asking to see the wonderful old matron. She was given the best care and attention and roamed the green pastures at will, generally accompanied by one or two of her aged companions. She has been buried in the plot that has been awaiting her for years, beside the one where rests her great consort. They sleep together, the greatest sire and the greatest dam of standard trotters.

A CORRESPONDENCE SCHOOL is to be established by the University of California for the benefit of the farmers. People all over the State who wish to avail themselves of the University's aid will be sent books and agricultural bulletins, and a regular course of instruction will be mapped out for them. Examinations will be held periodically by a member of the Agricultural College, and diplomas of proficiency will be granted to those who succeed in passing the examinations. The preliminary steps for the launching of this plan are now being prepared by Professor C. W. Woodworth. Warren T. Clarke, assistant superintendent of university extension in agriculture, will have immediate control of this new work. Circulars outlining the work will soon be issued.

THE POSTAL OFFICIALS are after the turf bureaus all over the country and in New Orleans and the East have been withholding mail addressed to the get-rich-quick concerns. The firm of Maxim & Gay of New York was the principal one under investigation and on December 15th the postal authorities issued a "fraud order" against that firm and drove it out of New Orleans. A few months ago the BREEDER AND SPORTSMAN received an application for several hundred dollars worth of advertising space from the Maxim & Gay concern, but declined it as this journal does not care to publish advertising of that sort. The Commercial Union of New York stated in its issue of January 21st that newspapers all over the country that did accept the business are now making a fruitless effort to collect their bills for the same.

THE BOARD OF APPEALS of the Pacific District was to have met on Thursday of this week to hear the application of W. G. Durfee of Los Angeles for reinstatement. It was decided to postpone the meeting one week, however, so that the testimony of Mr. Robert Leighton, who acted as presiding judge at the Salem meeting when Mr. Durfee was expelled, could be secured. Mr. Leighton is the manager of the Polo Pony Racing Association, which is giving a meeting at Del Monte this week.

TULARE'S PROGRAM will be out next week. Secretary Ingwerson writes us that the Tulare association will give a good list of purses for trotters and pacers for a three days' meeting, and will send us the program in time for publication next week. Next

THE QUARTERLY BULLETIN of the California State Veterinary Medical Association, has been issued. This is the first issue of the publication which will appear in January, April, July and October each year. The first number is a very commendable one and contains much matter of interest not only to the profession but to all who are interested in the breeding and the caring for live stock.

TEN STAKES to be run at the Saratoga summer meeting are detailed in our advertising columns and will close March 7th. These stakes range from \$1500 added money to \$5000. One, the Catskill for three years old and upward. There are four stakes for three year olds and five for two year olds. Horsemen should make a note of these stakes and the date of closing.

Polo at Del Monte.

DEL MONTE, Feb. 18th.—The Polo and Pony Racing Association opened its meeting to-day with a large attendance. Two games were played, both of them exciting, but the second furnished the dramatic incidents. Three ponies fell with their riders, but the latter were able to continue in the game after a brief rest.

Basil Williams, the English poloist, was the first to send a thrill through the spectators. While galloping across the field his pony stumbled with him and tossed him off, Williams turning a complete somersault. In the pony's struggles to retain his feet he struck Williams on the right hand and forearm. The hand was forced into the ground and severely bruised.

Walter McCreery and Captain Chaplin were the next sufferers. There was a scrimmage around their opponents' goal and the ball was finally driven outside. These riders galloped off the field in their rush after the ball and ran into some deep sand. The ponies stumbled and Mr. McCreery's rolled over him, stunning him momentarily. Captain Chaplain was more fortunate, escaping unscathed.

Four teams took part in the afternoon's exciting sport and those captained by Neil Haig and Thomas A. Driscoll were victorious. To Captain Haig belongs the honors of the day. With the score a tie and an extra period being ordered he scored the winning goal by a brilliant and difficult stroke. In this game the teams were balanced to a nicety and it was a desperate galloping match throughout. The teams were made up:

Reds (C)—Basil Williams, W. McCreery, R. Chaplin, Captain Neil Haig. Whites (D)—F. J. Carolan, F. J. Mackey, C. Raoul-Duval, L. McCreery. Referee, E. Ezra. Umpire, John Lawson. Timekeeper, J. O. Tobin.

F. J. Mackey, the veteran, scored for the Whites just at the end of the first period after an animated struggle. Captain Chaplin tied the score in the second period. Hecored again for the Reds in the third period. The Whites played a fast game in the fourth period and their efforts were rewarded with a goal, which again tied the score. It was necessary to play an extra period. Captain Haig was the star in this and finally scored the winning goal. The heavy-weight captain pleased the spectators mightily, shouting orders to his men and cheering them on.

In the first game the "B" team wearing the White colors easily defeated the "A" team wearing the Red jackets. The players' lineup:

(B) Whites—Charles Garland, T. A. Driscoll, W. S. Hobart, J. Lawson.

(A) Reds—Paul Clagstone, C. Tobin, R. M. Tobin, E. Ezra.

Referee, L. McCreery; umpire, R. McCreery; timekeeper, J. O. Tobin.

The Whites won by a score of seven goals to one. Tom Driscoll was the first to score, running the ball nearly the length of the field in six strokes. The Whites nearly scored again immediately afterward, but R. M. Tobin saved the goal. Driscoll scored again near the end of the period. The Whites scored rapidly until the end. R. M. Tobin saved them from being shut out by scoring early in the second period after a sharp scrimmage. The matches were witnessed by a large crowd.

The band of the Fifteenth United States Infantry played during the intervals of rest. Many of the infantry and cavalry officers of Ord barracks and the enlisted men took a keen interest in the game. The winning teams will play the deciding match for the cups Friday.

On Saturday a program of six pony races will be given, in which all the best and fastest ponies on the Coast are entered.

It has been definitely announced that after the meeting here the ponies will race at Tanforan for probably two days.

A Grass Valley advertiser wants to exchange his oil belt for a good trotting stallion.

JOTTINGS.

RECIPROCITY is a good thing in the horse business. Associations that come out and announce good stakes early deserve the patronage of owners and trainers, as were it not for the associations that are thus enterprising and energetic there would be few meetings held and the training and racing of trotters and pacers would not occupy the time of a very great number of men. Two associations in California have pioneered the way this year and announced good meetings—the Pleasanton Racing Association and the P. C. T. H. B. A. Both organizations have arranged and announced programs of liberal stakes to close March 1st, and we hope they will be rewarded with large entry lists—larger than have been seen in California for years. The breeders always get a good list of entries. They give the largest stakes given in California and their meeting is recognized as the principal harness meeting held on the Pacific Coast. The Pleasanton Association is a new one, however, and this is its first advent into the circuit of California racing. It is composed of the leading business men of the town of Pleasanton and they are active, energetic and responsible parties. They propose to lead off this year and give the opening meeting of the circuit. They will give a four days' meeting, and have hung up \$6000 for trotters and pacers. Now the horsemen of California should get in and pull together to give Pleasanton a boost and a big entry list. They should fill every race and aid in making the meeting a big success in every particular. The Pleasanton people should have this endorsement. It is due them.

The plan advocated by several prominent Eastern horsemen, of having no more horses start in a race than the width of the track will allow to score in one row, does not look like a good one to me. It is proposed, should ten starters be ready for a race, to divide them into two fields of five each, provided the track can accommodate but five. Each quintette would then trot one heat, and the first and second horses in each heat would trot one heat for the final. This plan looks all right at first glance, but there would be races where the slow horses would get money over the fast ones. Suppose it was a race for horses without records, and that in the drawing for positions five of the best horses entered should be drawn in one division and five slow ones in the other. The first division go out and race in a bunch from wire to wire, not more than two lengths separating the first and last horse at the finish of a mile in 2:15. The second bunch then start and the mile is made in 2:25. According to the proposed plan the first and second horses in this heat would meet the first and second horses in the first heat, to the exclusion of three horses that had trotted the first mile in 2:18 or better, but were not first or second. In other words, two slow horses that could not trot better than 2:25 would be in a position to get part of the purse over horses that were much faster but had no chance to meet them. Some of these new racing schemes look good until one begins to think them over carefully.

Haywards' third annual open-air horse show will be held one week from to-day, and it is to be hoped that good weather will prevail and that the big success of last year will be repeated. This annual horse show is getting to be quite a feature at Haywards, and hundreds of people are beginning to look forward to it, either with the intention of showing their horses or attending simply as lookers-on. This show must not be classed as a regulation horse show where prizes are given and horses exhibited by classes. The Haywards show is more like the Court Day shows in Kentucky. Every horse owner is invited to bring his horses to Haywards on the date mentioned and lead or drive him in the parade. There are no prizes, but an announcer gives the name, breeding and ownership of each animal as it is led by the reviewers' stand. Last year about 100 horses were shown. There was a fine display of trotting bred, draft, carriage, saddle and road horses, as well as ponies. The stallion display in all classes was especially fine, and the crowd was well entertained. Quite a number of sales were made during the day, over forty horses changing hands. The display is not confined to Alameda county horses, but owners from all over the State are invited to exhibit. No better chance to advertise a stallion will be offered, and no better place to sell a horse than at the Haywards show this year.

The call for a purse for three-year-old pacers is getting louder. The mail this week brought in two additional letters from parties who own pacing colts of this age that want to race them and it certainly looks as though a purse of \$500 or more if

offered by any of the associations giving meetings in California will fill. The pacing division of the Breeders Futurity will have a big field of starters in all probability and these colts will be entered at other places if a purse is offered them. I would suggest that the Pleasanton folks offer a purse for the three-year-old pacers, if any of the races now advertised fail to fill, and I believe such a purse should be added if the regular program fills all the way through. The owners of three-year-old pacers should be encouraged.

The breeding season has been a little late in opening this year in California owing to the lateness of the rainy season and the scarcity of feed in the pastures. Owners of mares have been slow to book them until they were sure that they would be turned on good pasture in the localities where they were sent, but now that northern and central California have been visited by generous downpours and feed is coming up in abundance on all the pastures, stallion owners in those sections will soon be busy hooking mares, and the season should be even better than last year. The scarcity of good horses still continues and all the breeding that can be done for the next five years will not enable breeders to catch up with the demand. Since writing the foregoing a big rain has fallen in Southern California and things look bright for the whole State.

"If I were a younger man," said a veteran breeder to me the other day, "I would begin the breeding of trotting horses of the show horse type and am confident that within twenty years I would be able to establish a breed of harness horses that would outclass and outshow the horses that are now exhibited in the horse shows. To begin with, I would select two stallions with fast trotting records and good staying qualities that looked as near alike as possible, had the proper conformation, good brain and great beauty, but were not too closely related. In addition to these qualities, I would want them to be descendants of sires and dams that had these qualities as far as possible. Then I would pick out a few mares of the same general description and breeding, except that they must not be too closely related. The produce of these stallions and these mares I would raise very carefully, feeding them well and making them grow as handsome as good feed and the best of care could make them. They should be trained for speed and to show action in harness. I would pick out the very choicest of the fillies when three years old and breed those by one stallion to the other. I should continue along these lines, inbreeding to some extent, but discarding every stallion and mare that did not reproduce good looks with reasonable uniformity. There would undoubtedly be quite a number to cull out every year as it would take several generations to get the type fixed, but I believe it could be done within twenty years. I would use standard bred trotters to begin with, as that breed has the speed and the staying qualities, though until late years breeding for beauty of conformation has been neglected by most breeders. There has been such a vast improvement, however, in the type of the American trotter during the last ten years that a majority of those now seen starting in races are good looking horses, and it would not take so very many years to establish a family that had a certain type if one should put his attention to it. At any rate, were it not that I have reached the three score years and ten allotted to man and am now living on borrowed time I would embark on just such a project. I am confident it could be accomplished and there is no question out it would pay."

One of the principal causes of horses lacking good looks when grown is under-feeding and lack of care during colthood. Horses will live on the hill pastures of California without attention from one year's end to the other, but they will not thrive during cold and dry winters, and in many cases pastures are overstocked. In most instances the ewe-necked, flat-ribbed, delicate three-year-old is such from lack of food and care instead of from heredity. Breeders should never forget the old adage, as true to-day as it was a hundred years ago, "Half a horse goes down his throat."

Electioneer, over thirteen years dead, is still the champion sire of trotters. Of his 160 in the list (and he really is entitled to 166) there are but two pacers. Electioneer was the first sire to get 100 in the list, and it is remarkable that he is yet, after being over thirteen years in his grave, the leading sire of standard-bred trotters. Onward comes next to him with 135 trotters in the list, Nutwood has 134, Red Wilkes 121, Alcantara 106, and Wilton is next with 100. There are thirteen stallions that have 100 or more standard performers including pacers, but the six mentioned above are the only ones that have sired as many as 100 trotters with standard records. The fact that

Electioneer blood is potent in the breeding of pure-gaited trotters is evident, and breeders who want trotters should not overlook this fact.

The amateur drivers won a partial victory at the recent Congress of the National Trotting Association held in New York, and it will now be possible for the clubs to each hold one meeting a year at which admission fees may be charged at the gate and at the same time the winners given no records. The new rule reads as follows:

RULE 44—WHEN TIME IS NOT A BAR.

Section 1. Time made under the saddle, or on snow or ice, as well as time made when two horses are harnessed together, shall constitute a bar for races of the same character, but shall not be a bar for races of a different character. Time made to wagon shall be a record or bar, as the case may be, in races of every character.

Section 2. Amateur driving clubs in membership with this association shall not be considered as regular members who give public meetings, and their matinees shall be considered as only "trials of speed," but they shall be amenable for any violation of the rules.

Section 3. An amateur is defined as a man who has never accepted wages or hire for his services as a trainer or driver.

Section 4. Records can not be made or bar incurred in trials of speed where there is no pool selling, book making or other public betting on the event, no money competed for, no entrance charged or collected from competing horses, no admission fee charged to the gate or grandstand, and no privileges of any kind sold. Such performances shall not be considered public races. All rules of this association in so far as they conflict with this rule are hereby repealed.

Section 5. Amateur driving clubs in membership with this association and with the League of Amateur Driving Clubs shall be permitted to give one matinee each year, not exceeding three days duration, at which they may charge gate admission, but all other conditions must conform to section 4 of this rule.

While the Congress of the National Trotting Association did not abolish the weight rule as was suggested, a change was made in it that will save much time at harness meetings. Heretofore the rule has required all the drivers to come to the stand and be weighed after each heat, but this clause now reads as follows: "After each heat they shall come to the Judge's stand, and not dismount or leave their vehicles without permission of the Judges, and, if under weight, shall be re-weighed." The words in italic have been added to the old rule, thus relieving the heavy weight drivers from the effort of climbing on the scales after each heat. The amendment will be endorsed by all horsemen.

Section 1 of Rule 2 was amended to read as follows:

"All entries must be made in writing, signed by the owner or his authorized agent, and within the time appointed for closing, they must be addressed and forwarded according to the published conditions, or deposited with the Secretary or other person authorized to receive them. The entry shall give the name and address of the owner, and if signed by an agent, the name and address of said agent, also, the name and color of the horse, whether a stallion, gelding or mare, the name of the sire and the name of the dam, if known; if unknown, it shall be so stated in the entry. If any of these requirements are not complied with, the offending party shall be fined not less than \$5 nor more than \$50 for each offense, and if the facts are falsely stated for the purpose of deception, the guilty party shall be fined, suspended or expelled."

A large number of changes were made in the rules, but those above mentioned were the most important. A rule was made making it fraudulent to administer drugs or stimulants to a horse during a race internally or hypodermically or to use any electric appliance. A rule was also passed in which it is made obligatory on parties who sell, transfer or lease an entered horse to immediately report the same in writing to the Secretary and the same must be publicly announced and posted two hours before the race. Rule 11 was amended so that all engagements including obligations for entrance fees shall be void upon the decease of either party or horse prior to the starting of a race.

An exchange makes these excellent observations: Not every member of the one family crosses well with every member of the other, because the family characteristics of one or both have been modified or changed by the confusing blood of the out-cross. Too much attention is paid to blood lines, and too little attention paid to the mating of individual congeniality. Not only should the anatomical conformation, as to points of excellence and defects of the two animals suggested for mating, be closely scrutinized relatively, but their nervous organization and mental characteristics should be studied and compared.

Walter Mahen is working a green trotter at Los Angeles that is being pretty highly touted as a high class one. The horse is by Knight 2:22½ out of Question by Messenger Almont and was bred at Rancho del Paso. Dan Kevane recently sold this horse to Mr. C. H. Hancock, of Colorado Springs, who intends starting him in the slow classes through the Colorado circuit.

A Percheron Horse.

The original home of the Percheron is France, more particularly the departments of Eure, Orne, Eure-et-Loir, Loir-et-Cher, Sarthe, Seine-Inférieure, and Calvados. These departments are in the north-western part of France, extending north to the English Channel, and lying, for the greater part north of the Loire river.

The immediate cause of the early development of this breed was the demand for "post" horses. These "post" horses were required to haul a moderately heavy load at a rapid gait, which necessitated fair weight and a considerable degree of speed. For this reason, the Percheron of early times was a smaller and more active horse than is the present day type. Arabian blood was used extensively early in the history of the breed and even as late as 1820 a noted Arab stallion, Gallipoli, was imported and used freely on the French stock. Many noted Percherons of today trace to this horse.

With the advent of the steam railway, the demand for "post" horses became less urgent, and the French breeders turned their attention toward producing a heavier horse—one adapted for heavy draft purposes. With this end in view, many mares were imported from Belgium. These mares were large and were of the same origin, the Flanders draft horse, as was the stock which was so extensively used in Great Britain for the improvement of the horse stock of that country. The infusion of this blood has practically done away with the old type of Percheron. Those of the breed which are north of the Seine river are less like the old-time Percheron than are the "interior" horses. This is due to the more extensive crossing with the Flemish stock on account of the fact that the northern districts are closer to the home of the Flemish breeds.

The first Percherons imported to the United States were brought to New Jersey early in the nineteenth century by Dr. Harris. This importation was unsuccessful, as all of the animals, three in number, were lost. Dr. Harris, however, made a second importation, in the same year, but with much better results. This second importation consisted of two stallions, Diligence and Bonaparte, and two mares, Joan and Dapple. All of these horses were gray in color and were very chunky. Diligence was 15 hands high and weighed 1500 pounds. The mares were somewhat smaller. Bonaparte was used in the stud with good results for about a year, after that length of time he became blind and was withdrawn from service. Another noted horse, Louis Napoleon, was imported in 1851 by Messrs. Fullington and Martin. At first he was in bad condition, due to the hardships connected with a twenty-nine weeks trip on a sailing vessel. After a time he recovered and proved to be a great breeder. Good evidence of his success in the stud is seen when we consider that about 400 of his sons have proved to be successful sires. He died in 1871, the property of Dillon Bros. of Normal, Ill. For a number of years subsequent to 1851 various importations of Percherons were made, but quoting Mr. H. A. Sanders, "importation began in earnest about 1872."

Importations of Percherons are very numerous at the present time and evidence of the good work being accomplished by the importers of to-day may be seen at any of the great live stock exhibitions. As a rule only those horses which are of pronounced excellence are brought to this country. A detailed account of recent importations is not necessary in this connection, for the agricultural press presents such information in regard to them as is worthy of note.

In Illinois, Indiana, Ohio, Iowa, Kansas, Wisconsin and Minnesota, the Percherons are more numerous than in any other part of this country. However, they are by no means confined to these states, but on the contrary, are more widely distributed than any other draft breed in the United States. They have been used to quite an extent on the ranges, and the range bred grade Percheron is found to be a good general farm horse; in fact, some of them are good enough for city use as high-class drafters. The Percheron is admirably adapted to the conditions existing in the central states and has done much to improve the horse stock of that section. Various types are found within the breed, but of whichever type he is, the Percheron, in order to be popular, must be large; he then crosses well on the native farm mares for the production of good farm horses and high-class heavy horses for the city trade.

While he is very popular to-day, yet the Percheron bids fair to become even more so in the future. He is well adapted for both city and farm use and has all of the essential qualities of a strictly first-class draft horse; he is durable, active, kind, and comparatively sound, although not so large as the Shire, yet the Percheron has some points of excellence over the larger breed. He is more active and has better feet, they being not so flat and soft. Some claim that the

Percheron is able to stand hard work in a warm climate much better than can the Clydesdale. This would seem reasonable, when we take into consideration the regions in which the two breeds have been developed. Be this as it may, the Percheron horse has been and is still popular, both in the city and on the farm, and it is safe to say that he will continue to be so just so long as there is work for active, kind horses to do.

B. E. CARMICHAEL,
Student at Agricultural College, University of Illinois.

"Hoot Mon" Sanders.

The latest fad among the trainers now located at the Memphis track is the game of golf, says a dispatch from Memphis, Tenn. "Ed" Geers, Millard Sanders and others are very enthusiastic followers of the game. The new devotees of the Scotch pastime have been quite energetic in their efforts to acquire the ability to hit a ball from tee to tee with the least number of strokes, and have taken to the walking exercise, that is "a part of the game," with avidity. But it was not until the news came out that the rule committee were going to advise the absolute abolition of the weight rule that the new aspirants for golf honors really got down to business and worked hard. Here was the chance that they saw to reduce their weight, and ever since the news regarding the weight rule was published the trainers have been devoting all their spare time to walking exercise, through the medium of the game of golf, combining business with pleasure, as it were. It is said that Geers not only has adopted a "Scotch cap" as part of the "stage dressing" of the sport, but that he has acquired an accent, and talks learnedly about brassies, cleeks, lofters, putters and all the other technical names attached to the many clubs which his "caddy" carries as he precedes the noted driver around the links. Between the two well known reinsmen, Geers and Sanders, there is rivalry equal to what would naturally exist between them if competing for first money in the M. & M. or any other big stake, and up to date the reports say that they stand about equal in the number of games that they played against each other. What a boom this repealing of the weight rule will make for the teachers of physical culture and "reduction of weight experts;" with Geers and Sanders to set the fashion in "reducing," there will be a strong demand for the services of men who know how to "take weight off" and so a new industry is established in connection with the horse business.

The Grand Circuit Organized.

Eleven leading Grand Circuit tracks have agreed to a local organization of the Grand Circuit. President Campau, of Detroit, will file the document, now in preparation, in a few days, under the laws of Michigan, making the eleven tracks a corporate body under the name of "The Grand Circuit." The new association will race under the rules of either the National or American Associations, as the managers of any track may elect. A secretary for the circuit will be elected and entries for all races will be made to him. He will have the authority to accept or reject entries. This will do away with conditional entries, and at the same time relieve the local secretaries of much work.

Following the lead of the running associations, the Grand Circuit will have two stewards at each meeting. A salaried judge will also be employed and will be in the stand at each meeting of the circuit. Two non-professional judges will occupy the stand with him.

The power of the stewards is somewhat limited, inasmuch as they can only suggest the proper action to the judges. They cannot fine, suspend or expel, but it is conceded that where they discover violations of rules or fraud their recommendation will be carried into effect.

The incorporators of the Grand Circuit will be D. R. Hanna of Cleveland, John E. Thayer of Readville, D. J. Campau of Detroit, Karl J. Hoster of Columbus, and E. E. Perkins of Providence.

This is the right move and it should have been made years ago. The Grand Circuit will now become a legal organization and will thereby inherit all the legal forces necessary to carry forward the plans and purposes of its members.—*American Sportsman*.

The Kenney Manufacturing Company, 531 Valencia street, San Francisco, has a second-hand 100my cart with wood wheels, extra heavy carriage tie, cushion, etc., that is as good as new, having been used but little, which will be sold for \$90, regular price \$135. Harness, blankets, etc., goes with it. They also have a fine surrey for sale cheap and manufacture sulky wheels and attachments to order. Pneumatic tires, solid cushions put on all kinds of vehicles.

Strike!—if they don't give you Jackson's Napa Soda when you ask for it.

Market in Superb Condition.

None of the winter sales has developed anything in the way of what may correctly be termed sensational consignments, writes "Grattan." In consequence prices, on paper, as shown by the official sales reports, look to be decidedly off, when in fact, they never were better. It is the old story of either lack of supply or indisposition on the part of owners to sell. Few men who have heretofore desired to dispose of their surplus holdings have hesitated to consign to the sales of the progressive firms. But no one has seemed at all anxious to sell during the winter, and while the sale lists have not been small they have lacked materially in the one great element of quality. Reckoning from that fact, which can not be successfully disputed, the winter sales have achieved far more than satisfactory results. There appears to be some one to buy (at some price) everything that is offered, which is the very best evidence of the market's stability and a generally good condition. I know of a number of buyers who have been unable to find what suits them, and who are forced to wait for the spring and early summer auctions for a chance to fill their orders, unless they get what they want at the few remaining late winter sales. At those there are offerings that look as if they would answer the requirements, and if they are as good in the ring as they are in the catalogues the sales will be more than satisfactory. It is doubtful if the market was ever in a more satisfactory condition. Whether there has been the per cent slump which certain good judges claim is a matter of opinion. Horses of all ages that it is believed can go out and do what they were bred to do or can win their classes are as eagerly sought after as ever they were. Which, after all, is the only test that a sensible person would be satisfied with. Breeders who have a supply of good material can find plenty of comfort in the winter auctions if they will but look beneath the surface and, acquainting themselves with the quality of the offerings, reason a short while from cause to effect. It is my opinion, from a fair knowledge of the horses listed, that the sales of the winter demonstrate the horse market to be in superb condition and, despite stock exchange slumps, wars and rumors of wars, facing a very bright future.

Horse Fancy and Horse Sense.

"I favor an indorsement of this house of the wisdom of the Almighty in making horses' tails long." So spoke Representative Grosvenor of Ohio. Then the house passed the bill against docking. It provides that it shall be unlawful to dock the tail of any horse within the District of Columbia. It shall be unlawful to bring into the District of Columbia any horse whose tail has already been docked.

Representatives Perkins, Morrell and Dalzell gave pathetic utterance to the highly sentimental sentiments of the owners of dock-tailed horses. Suppose that a man had a horse of which he was particularly fond. Suppose that he had become so attached to this horse as to cut off his tail. Suppose then that the voters in his part of the country had nevertheless elected to represent them in congress. Wasn't it almost a severance of family ties to compel him to leave his dock-tailed horse behind? Could the house make up its mind to contemplate such bereavements?

The house could. It decided that horse fanciers whose fancies were so perverted would have to be separated from their fanciful atrocities when they came to Washington. It decided that men whose love for horses is shown in giving them pain and in depriving them of their protection against flies are too much like the influential citizens whose love for the public is shown in cutting off the public's sidewalks and in training pedestrians to endure hardships. It decided that there is a certain presumption in emulating Providence to the extent of chastening those whom we love. It decided that people who are brutal toward brute creatures cannot be relied on to be humane toward human creatures, and that they do not deserve much congressional consideration.

The house has done its duty. The senate has its duty marked out before it. The Washington correspondent of a New York paper seems to think that there is some danger of senatorial dissent. The *Tribune* hopes not. Since Cowper wrote in "The Task" that he would not enter on his list of friends, though graced with polished manners and fine sense, yet wanting sensibility, the man who needlessly set foot upon a worm there has been a dubious hue on the reputation of any man who by act or by vote inflicted unnecessary pain upon any fellow creature. Pass the bill. The president, who has known many horses personally, will be glad to sign it. He has horse sense.—*Chicago Tribune*.

It is announced that Diablo 2:09 1/2 will be kept at Salem, Oregon, this year and next, and will not return to California as was supposed when C. D. Crookham secured possession of the horse.

A Son of George Wilkes.

There is but one son of the great George Wilkes in California—Hambletonian Wilkes at Green Meadow Stock Farm, Santa Clara. He is still a sound and vigorous horse, and his 2:15 list is increasing every year. At now numbers no less than nine performers and all have records from 2:13 to 2:08½. Two years ago his son Robert I. was the highest money winner of the lateral gaited division in California, winning eight races and getting second money three times out of a total of eleven starts, earning for the Green Meadow Stock Farm the sum of \$2775. Last year Robert I. went East, won several good races and reduced his record to 2:08½.

Hambletonian Wilkes is not only a grand individual, large, good color, well boned and fine style, but an elegantly bred horse as well, and a speed producer of high class, as he is the sire of nine in the 2:15 list, eight of them having records better than 2:12.

In selecting a stallion breeders should consider the probability of getting foals that will have size and style as well as speed, and Hambletonian Wilkes gets this sort of horses.

His breeding shows a combination of the Hambletonian-American Star families, his sire, George Wilkes, being a son of the old hero of Chester, and his dam, Mag Locke, being by American Star 14, while his grandam was by Hambletonian 10.

Hambletonian Wilkes is noted as a producer of large, well formed horses, and as he is a very vigorous and healthy stallion he is good for several years of service yet in the stud. He has a number of mares already hooked to him.

San Jose Track Is Popular.

SAN JOSE, Feb. 18, 1904.

BREEDER AND SPORTSMAN:—Over one hundred horses are now quartered at the splendid track here at Agricultural Park and many more are coming. The track is in perfect order and horsemen pronounce it superior to any training track in the State at the present time. There seems to be a general desire that the Trotting Horse Breeders hold their big August meeting here this year and a committee will be appointed to see what inducements can be offered to secure it. A good sized bonus and the free use of the track has been suggested. As Pleasanton will open the circuit, the shipment to San Jose would be short and inexpensive provided the Breeders took the following week.

At least fifteen trainers are working horses here on the track. Among them are Budd Dohle, Chas. Duffee, J. O. Holmes, Fred Hoffman, C. E. Downing, Joe Cuicello, J. W. Gordon, Ed Hughes, John Phippen, P. H. McEvoy, W. H. Williams, T. Barstow, and several others. J. W. Zihble will be here in a day or two with twenty head and Martin Carter will send William Cecil down from Nutwood Stock Farm with seven or eight.

San Jose people are getting greatly interested in harness horse affairs and many people visit the track each week.

SIDE WHEELER.

Grattan on the Weight Rule.

In the last issue of the *Kentucky Stock Farm* "Grattan" writes as follows: Amusing, and there is no other word to express it, is the alarm sounded by a very few writers, over the danger that the repeal of the weight rule will sidetrack the overweight drivers. I have already pointed out that the rule, as it stands, ostensibly puts a premium on the driver who scales 150 pounds or less. Yet in practice it does not. The champion trotter of the world was driven to her record by a trainer who is away over weight. So was the leading money winning stallion of 1903. So was the greatest money winning trotter ever raced. So was the champion three-year-old trotting filly of 1903. So was the best money winning pacer. The list could be extended almost indefinitely. Why was it that no light-weight driver happened along with skill sufficient to take advantage of the rule and get the money? The answer is an easy one and is simply and solely that weight in the hike sulky up to the highest point demanded by the weight of any driver of the present day, cuts no figure. In other words, the addition of fifty pounds to the weight of a driver in a hike sulky is not as great as the addition of ten pounds to the weight of a driver in a friction-axle, high-wheel sulky. Weight is weight, as a matter of course, but when friction is reduced to the minimum added weight ceases to be a safe and sure handicap. The present weight rule was intended to equalize drivers as nearly as possible. But under it the heavy-weights get more than the lion's share of the purses and stakes. They will continue to do so when the rule is repealed.

James W. McCord, of Hanford, advertises a high-class jack and a six year old Suffolk Punch stallion for sale.

The Original Justin Morgan.

It does not seem possible that any man who is capable of sifting evidence, and who has read the history of Justin Morgan, founder of the Morgan family of horses, as given by D. C. Lindsley and Joseph Battell, Esq., can believe otherwise than that Justin Morgan's sire was True Britton, also called Beautiful Bay and Traveller. The evidence on that point is direct, clear and conclusive.

True Britton was a direct descendant of the Byerly Turk, through Jigg and Croft's Partner. The latter got Tartar, and Tartar got Herod, the most successful sire in England in his day. Through his dam, True Britton, the sire of Justin Morgan, was inbred to the renowned Godolphin Arabian, and also inherited across of the famous Darley Arabian, through his most noted son, Flying Childers.

Byerly Turk, Darley Arabian and the Godolphin Arabian were the three most noted stallions in England in their day. English equine historians all agree that it was to the influence of these three stallions that the superiority of English thoroughbreds over all other racing stock was due.

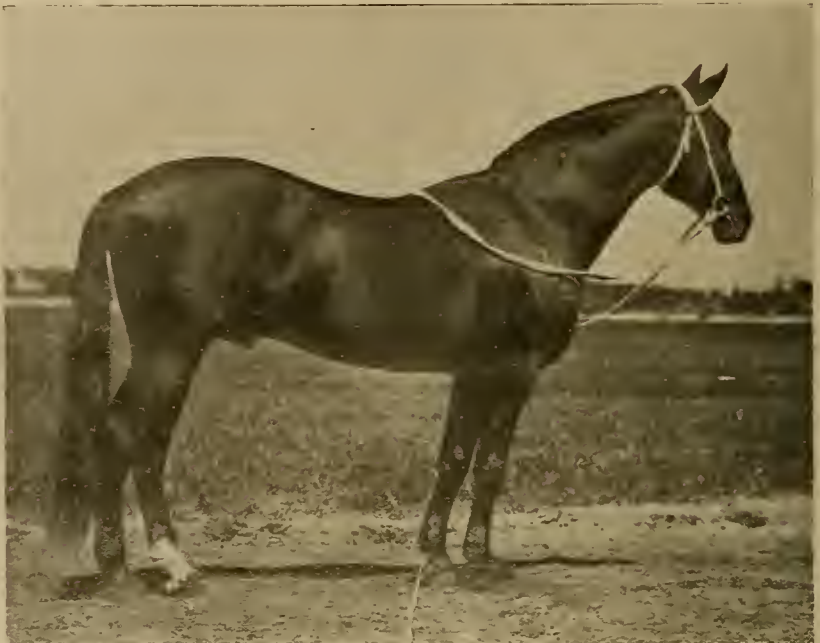

They also state that there is not a prominent race winner on the English turf to-day that is not a direct descendant of one of these three stallions, while most of them are from ancestors that inherited the blood of all three of them combined. The same is true of the best thoroughbred stallions that have ever been

Sires of Six Great Trotting Mares.

A writer in the *Kentucky Stock Farm* asserted that he could name six mares with trotting records, of 2:15 or better, all by one sire, that were greater race mares than any six by any other sire. To support his claim the maker of the assertion in answer to a request to name the six mares said: "Helen Simmons 2:11½, Neva Simmons 2:11½, Edna Simmons 2:12½, Miss Duke 2:13, Sally Simmons 2:13½, Adelaide Simmons 2:14½. That's six, and they were all sired by Simmons 2:28. I have looked into their racing history, and I find that they started in 50 races, of which they won 24; they were second in 11 of the rest, third in 4, fourth in 5, and unplaced in but 6. They got cash in 44 out of 50 races. One of them was the greatest four-year-old race filly of her year. Another won more money than was won by any other trotting mare in her year. They were not dropped into soft spots, but took their medicine where it was handed out in allopathic doses and where a trotter could be a race horse and yet be numbered among those who 'also started.' I have not been clear through the books and will probably never find time to make the trip, yet I am willing to bet a few pennies that I am right when I say that no other six trotting mares, all sired by one horse, ever made such a showing."

To which Raymond of the *Horse World* adds the following comment:

"Without going through the Year Books to look

CHIMES. Oldest Living Son of Beautiful Bells

imported from England to America, including imported Messenger, sire of Mambrino, and of imported Sour Crout, sire of the dam of Mambrino, and also of imported Whirligig, sire of the second dam of Mambrino, as well as imported Wildair, sire of Mambrino's third dam.

Wildair was by Cade, son of the Godolphin Arabian; dam by Steady, a son of Flying Childers by Darley Arabian; second dam by Craft's Partner, by Jigg, son of Byerly. According to Joseph Battell's Morgan Horse and Register, the dam of Justin Morgan, was by Diamond, and he by Church's Wildair, a son of imported Wildair. Justin Morgan proved himself a worthy descendant of such illustrious ancestors.—*American Horse Breeder*.

The annual meeting of the Golden Gate Park Driving Association was held last Tuesday evening at the association room at the Palace Hotel. The following officers were elected for the ensuing term: President, Edward H. Aigeltinger; First Vice-President, I. B. Dalziel; second Vice-President, James de la Montanya; Treasurer, M. M. Donnelly; Secretary, F. W. Thompson; Executive Committee—M. M. Donnelly, W. J. Simpson and Arthur Jacobs. It was decided to hold the first important purse races of the year at Tanforan track on May 30th, when a good program will be presented by the speedway drivers. As the members want to meet socially before that time it was decided to have a smoker or some such entertainment shortly. The following committee has the affair in charge: T. J. Bannon, W. J. Simpson and John Holland.

Topsfield, Mass., Aug. 9, 1901.

DR. S. A. TUTTLE. Dear Sir:—Last spring I bought a small lot of your Elixir, and since then I have sold several dozen, as it has given good satisfaction in every case where it has been tried and my patrons all speak highly of it. Now, what I should like to know is, will this Elixir do to rub on the throat for this distemper or horse gripe that is going around? I have been asked this question and refer to you for an answer. Should like to have one of your books. Yours truly,

JACOB J. HARDY, Harnessmaker.

up the racing careers of Onward's six best daughters—for he has 11 with trotting records of 2:15 or better, it almost seems as though they would compare pretty favorably with the six named by Simmons. They are Beuzetta 2:06½, the fastest four-year-old filly of her year; Cornelia Belle 2:10, certainly one of the great trotting mares of the turf; Cut Glas 2:10½; Phrease 2:12½; Catherine Leyhurn 2:14 and Helen Leyhurn 2:14. These mares all raced well and consistently. Then there are six out of Guy Wilkes' nine 2:15 trotting mares that will show up pretty well: Hulda 2:08½, Lesa Wilkes 2:09, Muta Wilkes 2:11, Hazel Wilkes 2:11½, Mary Best 2:12½ and Una Wilkes 2:15. To those having plenty of time and a liking for such work, the comparison of what these daughters of Onward and Guy Wilkes have done in racing with what the six daughters of Simmons did, and while at it, the six 2:15 trotting mares to Wilton's credit might also be looked up. They are: Bessie Wilton 2:09½, Rubber 2:10, Lady Wilton 2:11½, Town Lady 2:11½, Dainty Daffo 2:13½ and Silcon 2:13½."

Answers to Correspondents.

P. C. B., Grass Valley.—Please decide in your valued paper an argument: What is the name of the first and second horses in the Occidental Stake of 1901 and the amount won by each and time of heats. Also, did The Jester win second money in the same stake in 1903, all other starters being distanced except the winner Tuna and The Jester, is this correct?

Answer.—In the Occident Stake of 1901 Italia, bay filly by Zomhro, won the race in straight heats. Commander Muckle by McKinney was second. Italia won 1536 50 and Commander Muckle 658.50. In the Occident Stake of 1903, Tuna won first money, Swift B. second money and the Jester third money. All the others were distanced.

Jackson's Napa Soda does not tangle the feet

Notes and News.

Enter your horses at Pleasanton.

Do the same thing at the Breeders meeting.

A dozen trotters and pacers are in training at the Hollister track.

San Jose horsemen are talking about bidding for the Breeders meeting.

Other meetings will soon be announced that will help make a good circuit.

Look over the stallion advertisements in this issue. Many high-class horses are advertised.

Mr. C. E. Humbert, of Cloverdale, advertises several young Percheron stallions for sale.

The Los Angeles Driving Club will hold matinee racing on Monday next, Washington's birthday.

J. W. Zibble has engaged 25 stalls at the San Jose track and will move his string down in a few days.

Major Delmar 1:59½ is reported in fine fettle and a better horse than he was last year to all appearances.

The weight rule has not been changed except that overweight drivers will not have to weigh after each beat.

T. A. Nufer advertises for sale the Clydesdale stallion Pollock and a two year old by that horse. See advertising columns.

Mr. Chas. D. Jeffries, who managed the very successful meeting at Spokane last year, is in San Francisco for a few weeks' visit.

There is talk of a two weeks' harness meeting at the Worth track, Chicago, just prior to the opening of the Grand Circuit at Detroit.

Sidney Dillon is having a lot of high-class mares booked to him this year. There are some very fine looking youngsters by him now at the Santa Rosa Stock Farm.

Mr. J. Weber of Sacramento has sent us a picture of his eighteen months old filly Queen Fay by Zomero 2:11, that shows her to be a very handsome and well developed youngster.

A good stable with three years' lease to run, located just at the edge of Golden Gate Park and within a half mile of the speedway, is for sale. For full particulars inquire at this office.

The Haywards Horse Show will be held Saturday, February 27th, and the Livermore Horse Show on the Saturday following. All owners are invited to exhibit their horses at both shows.

Zolock 2:10½ is to be taken to Los Angeles, where he will make the season of 1904. It is Mr. Davies' intention to put Zolock in training after the stud season and race him over the Eastern Grand Circuit.

Frank Ward, who was with both Anaconda 2:01½ and Searchlight 2:03½, when they were in the late Tom Keating's stable of cracks, is now looking after the road string of J. B. Porter, the Buffalo enthusiast.

Tom James has reached his old home at Des Moines, Iowa, with his stallion Barondale 2:11½ and the horse is in fine shape. There are so many fast colts by Barondale in Iowa that he will do a big season this year.

Dr. A. C. Van Ness of Denver has just purchased three carloads of fancy saddle, draft and show ring horses in Iowa and Wisconsin for Denver customers. The animals are of the finest ever taken to Colorado in spite of the fact that such horses are unusually scarce and high.

William Ayers has been awarded the betting privilege for the Oregon State fair of 1904. His bid was \$1050 and he is to have nothing but auction and mutual pools. No books are to be permitted at the Oregon fair. It is reported the Spokane fair will also exclude the books.

About \$2000 has already been subscribed by the business men of Pleasanton for the fair and race meeting that is to open the circuit, and Secretary Adams says the committee will get a thousand more subscribed. Pleasanton will give one of the greatest meetings held on the circuit for years.

A. E. Mastin, of Davisville, announces in the Yolo county papers that he will give \$100 cash to the winner of the Breeders Futurity for foals of 1905, provided the winner is sired by his stallion John A. 2:12½, and if a colt by John A. does not win the stake, then he will give \$50 to the fastest colt by him that competes in the stake.

An authority at Harvard writes in regard to the name of the champion trotting stallion: "The name of the celebrated chariot driver at Rome was Crescens, which, in English, would be pronounced like crescent, substituting s for the final t. The name of the horse is, I think, Cresceus, which is a made-up word, neither Greek nor Latin."

The veteran trainer, Chas. Marvin, has fourteen youngsters in education at Lexington, most of whom are heavily staked. All are the property of Senator Bailey, of Texas. Ten of these are yearlings by Prodigal, out of high-bred mares. He also has the five-year-old green pacer, Bronson Cooper by Electric Bell, dam by Nutwood, that is credited with a trial of 2:07½.

W. B. White, of the Two-Minute Farm, Cleveland, will race a few colts and fillies the coming season by Star Pointer 1:59½ and Guy Wilkes 2:15½. One of the best trotters at the farm is Wilkes Guy by Guy Wilkes, dam Lea 2:18½ by Sidney. There are five youngsters by Star Pointer that will also be fitted for public events. One is out of the dam of Red Seal 2:10; one is out of Javelin 2:08½, and one out of Minnetto 2:10.

Rosebud, the only daughter of the famous Goldsmith Maid 2:14, has joined the select list of mares that have produced as many as four standard performers each. Rosebud's quartette of performers are: Reggy 2:26½; Rose Direct 2:29½; Rose Wortby 2:29½ and Artus 2:29½. The daughter of Goldsmith Maid is likely to get a performer or two this year and as she is a regular breeder, her list eventually should be a long one.

The committees that are working in conjunction with the Park Commission in the matter of a new half-mile speedway and athletic grounds in Golden Gate Park are sanguine of success. The members of various organizations which are interested in the project have come forward with proffers of financial assistance and will raise quite a sum to aid in building the track if the project is favorably considered by the commissioners.

MONBELLS 2:23½, Last of the Foals of Beautiful Bells

Doc Sperry 2:09, the pacing gelding by Altamont that Monroe Salisbury campaigned and gave his record in 1894, dropped dead from heart disease on the snow path at Brockton, Mass., February 2d. The old fellow was being jogged on the snow when he suddenly faltered and fell dead. Doc Sperry won four or five big purses for Mr. Salisbury in 1894. His dam was Kitty Kisbar by Young Kisbar and he was bred by John W. Wentworth of Vancouver, Wash.

The disparity in the best marks made on the Denver track at the different gaits is quite remarkable. Kentucky Union set the trotting mark at 2:11½, where it remained for seven or eight years. The pacing mark was set at 2:05½ by Cbehalis, the great Oregon running-pacer, and was later tied by Searchlight. Porto Rico has trotted a quarter on the Denver track in 28 3-5, although some who watched the performance declared that the horse single-footed the last sixteenth. — *Field and Farm*.

Nutwood Stock Farm has gotten out a handsome card giving a complete tabulation of the pedigree of Nutwood Wilkes 2:16½. Write Martin Carter at Irvington for one of these cards. Nutwood Wilkes puts a good list of new performers into the list every year. Last year three of his three year olds took records from 2:13½ to 2:22½, while his good son John A. McKerron reduced his record to 2:04½. All the get of Nutwood Wilkes are endowed with speed and size and good looks. What more do you want for a \$50 service fee?

A correspondent writing from Ryde, Cal., under date of February 16th, says: "The first baby colt I ever weighed was put on the scales this morning when it was just thirty hours old. It is one owned by D. S. Matthews, owner of the sire Edward B. by Stam B. I found the colt weighed 112 pounds. Its height, 40 inches; from point of shoulder to point of rump, 31 inches; from centre of withers to root of tail, 21 inches; length of neck from center of withers to ears, 16 inches. Its color is bay with a large star in face and left hind foot white to pastern joint. This colt was foaled February 14th, St. Valentine's day, and its name is St. Valentine B. Will some one who reads this tell me through the BREEDER how this compares with other standard bred colts."

The six-year-old green trotting mare Emma Hoyt, trial 2:09, by Czar 2:12½, dam by a son of Volunteer, owned by Clem Beachy Jr., of Lexington, was sold February 10th to James Weherell, Galt, Ont., for \$9000. The mare will be turned over to Harry C. Stinson, the Canadian trainer and driver, and she will be campaigned down the Grand Circuit this season, making her first appearance in the M. & M. stake at Detroit. The purchase is for Miss K. L. Wilkes, a relative of John Jacob Astor, who bought Ora Wilkes in New York last fall.

There will be three weeks of continuous racing in the vicinity of Detroit, Mich., next summer. The new half-mile track known as Recreation Park, will open the sport on July 4th with a four days' meeting, the purses running from \$100 to \$1000. The following week the stables will be at Windsor, Ont., across the river from Detroit, where the annual curtain raiser to the Grand Circuit is held, and on July 18th the Blue Ribbon meeting begins at Grosse Pointe. Throughout the entire summer weekly matinees will be held at Recreation Park and Grosse Pointe.

The Oregon State Fair has changed the classes of the big stakes that proved so popular with horsemen last year. Instead of giving \$2000 for trotters of the 2:20 class this sum is offered for the 2:17 class, and \$2000 is given for the 2:15 class pacers instead of the 2:17 class as last year. The 2:12 class trotters are given \$1000 and the 2:11 class pacers are offered the same amount. The association also offers \$500 for three year old trotters and \$500 for three year old pacers. These comprise the early closing harness stakes, which are to close May 10th.

Mr. George M. Lent, of Isleton, Cal., writes that Pattie Waldstein his mare by Waldstein out of Pattie P. by Richmond is due to foal soon to Prince Ansel. Pattie Waldstein is entered in the Breeders Futurity No. 4. Mr. Lent has recently purchased a mare by Alex Button that is the dam of Jim Marshall, a very fast Diablo colt that was sold to Honolulu parties last year. This mare is the dam of the fastest Falrose colt that ever bit the Woodland track. Walter Martin owned this colt but had the bad luck to lose him. The mare is again in foal to Falrose, and Mr. Lent expects it will be another young whirlwind.

The draft of the bill to legalize the selling of pools on horse races in Ohio has been completed and is ready for introduction in the house of representatives, says a Columbus dispatch. The measure has been drawn after weeks of careful consideration on the part of people interested in the light-harness game. It has been drawn along what the lovers of light-harness racing believe are "sane lines." The bill is not calculated to permit indiscriminate pool selling over the state, but under certain carefully regulated conditions. Under the terms of the measure pools can be sold only by authorized racing associations, and only on the grounds of such associations during racing meetings of five days' duration. Not more than two meetings are to be held, under the terms of the bill, at any one track during the year, and these meetings are not to come within thirty days of each other. In form the bill repeats the present statute regarding pool selling in any room, building, public or private grounds, and, continuing, reads: "Notwithstanding the provisions of this section it shall be lawful for any agricultural or other society, company or association, formed for the purpose of promoting the breeding and development of light-harness horses at annual or semi-annual meetings to conduct trials of speed of light-harness horses upon the tracks of such society or association, and to give premiums, purses and sell pools, provided that no purses shall be given or pools sold at any other place than within the ground inclosing the tracks, or at any other time than during the days when the races are in progress, or by any other persons than by those designated by the association in control."

Action in Horses.

The character of the action is a very important factor in determining the amount of wear and tear a horse will stand. The acquisition of a knowledge of action, or in other words, to become a good judge of action, is not such an easy matter as might be imagined. There are many who have a good eye for a horse, and in fact are in a measure good judges, who cannot intelligently criticize a horse's action from different standpoints.

There are many who are taken with flashy action. Flashiness of action as a rule enhances the market value of a horse that possesses it but it is very apt to be associated with greeter defects from a utilitarian standpoint than that which is less attractive. In estimating the quality of action correctly in different individuals one has to have an ideal. How seldom in sitting behind a horse and closely observing his way of going, at the trot and walk, do we find action that comes up to our ideal. Perfect action, as far as usefulness is concerned, is frictionless and light, and the foot is placed on the ground squarely. There is no loss of time or power in progression, or in other words the frictionless mover does not labor, neither does the light stepper experience the ill-effects of concussion the result of bringing the foot to the ground in a pounding manner. What a saving of wear and tear and power the smooth mover and light stepper experience! One is amazed in instances to observe how much work a weak-footed poor-legged horse will stand and still remain in workable condition; but it can be accounted for in many cases by the defects mentioned being compensated for by light action. It is interesting and instructive to study the numerous and varying conditions that conduce to defective action. Lightness of step appears to be a quality not always dependent upon the conformation of the individual. For instance length and obliquity of the pasterns are usually said to cause lightness and elasticity of the tread, but do not always do so, for we find many heavy-going horses of this formation. Mechanically this formation should conduce to light-stepping, and does in a measure, but the fact that horses with oblique pasterns sometimes pound leads us to look for another explanation. The statement may be advanced in explanation that the elasticity resulting from oblique pasterns may be neutralized by a straight shoulder; but this theory will not hold, as one not infrequently finds straight-shouldered short-pasterned horses that step lightly. Another explanation has to be found. We have to seek elsewhere in the animal economy than in the peculiar arrangement of the bones, muscles, tendons and ligaments of the limbs to account for the light step of some horses.

The endowment with this desirable quality is undoubtedly referable to the nervous system, just as speed is. We cannot determine the degree of a horse's speed by studying his external form. We have to subject him to a test, and so we have in forming a conclusion, as to the degree of lightness or heaviness of his step.

In regard to labored progression the tendency to it is usually determinable by an inspection of a horse's conformation. All deviations from the steadily carried top in the trot, in which there is no rolling, jerking or waddling, and from the straight-flexion extension of the fore legs, in which there is no straddling, dishing or winding-in, and to the equally straight and easy flexion of the back, can as a rule be determined by an examination of an individual's conformation. The horse with thick or loaded shoulders and wide chest is apt to roll; the one that stands with his fore feet placed wide apart straddles, the knock-kneed one, as well as the one that toes-in generally disbes, while the horse that toes-out winds-in. With the hind legs the cow-hocked horse usually swings his legs in a circumductive manner outwards. The horse with his hocks wide apart and feet close together "screws" his hocks outwards and usually "plaits." When the hocks are placed behind instead of under the quarters there is likely to be a dragging movement of the hind legs. Defective conformation of the legs then shows itself with almost unvarying regularity in its effects upon the action.

In order to have the straight undeviating action a horse must flex and extend his legs during progression in a line parallel to the long axis of the body. The knock-kneed, bow-legged or even calf-kneed horse cannot do this, and consequently experiences the ill results of loss of time and power in progression.

Apart altogether from the question of the degree of the lightness or heaviness of the step, the manner in which the feet are placed on the ground has a great influence in determining wear and tear, and is consequently an important point to study. The horse that toes-in usually has the inside quarter of his fore feet defectively developed, which becomes more marked, if he is not rationally shod. The defect of formation

of the inner quarter consists in a slanting off of it from before backwards and outwards and from above downward and toward the center of the foot, causing this quarter to assume a wedge-like form, and literally to act as a wedge between the shoe and the sensitive part of the inner quarter, thus predisposing it to bruising. In addition to this, the horse that disbes usually brings his foot down with force on the inner quarter. This manner of planting the foot not only subjects the ligaments to undue tension but is a fruitful source of troublesome corns.

On the other hand, a horse that toes-out is apt to come down with most force on the outside of his foot. This is a much more defective formation than the former, for it not only causes winding-in and great liability to interfere, but the planting of the foot is usually accomplished in a manner that results in the production of considerable concussion, and also subjects the ligaments to great tension, so that the legs soon begin to show the effects of wear and tear. Some horses come down with most force on their toes, causing them to stub their toes, as it is called. Such a manner of planting the foot is apt to cause stumbling and increases concussion to a marked extent. Short-pasterned, straight-shouldered and short-gaited horses often show this defect.

Just the opposite manner of planting the foot or coming down with the heel first is not at all uncommon. This defect of action is not only likely to cause bruising of the heels, but subjects the tendons and ligaments at the lower and back portion of the fore leg to excessive strain. Ordinarily this imperfection is only observed in long-gaited horses, but some horses that plant their feet in a favorable manner when going at a slow pace, when forced to a faster one lengthen their stride and show this defect, often called pointing, to a pronounced degree. Deep and oblique-shouldered horses with little knee action, like thoroughbreds, often go in this way, but its ill effects are not so great as in those with a considerable amount of knee action.

Tbreeding or plaiting are terms used to designate the swinging of the elevated foot around the one that is placed on the ground in progression. This ungraceful manner of going, which occasions a loss of power, a tendency to brush and liability to trip, is most clearly shown in the walk or slow trot. The horse that plaits is usually either a narrow-chested one or one fairly wide in the chest, that stands with his feet very close together. This conformation is the opposite to that found in the straddler, and of the two evils the latter is the greater, for it gives rise to a stilty way of going and a manner of putting the feet down which is very injurious to the legs.

While it is the intention of this article to endeavor to picture ideally good action by which wear and tear and loss of power are reduced to a minimum, it is no intended to decry the possession by a horse of what is usually called high action for certain purposes. To render horses attractive for show and for pleasure purposes, it is a highly desirable quality, and very much increases their market value. The good horseman would much prefer, however, to sit behind a horse with moderate action that raises his feet, advances them in a straight line with stride enough to insure desirable progress and not so much that the feet cannot be put down squarely, every part bearing its proper proportion of weight and striking the ground lightly, than one with excessive but marked defective action. High action, like other qualities possessed in a high degree, is very apt to be associated with defects that detract from its perfectness and lessen a horse's wearing ability. The ill consequences of these defects are intensified in direct ratio to the excessiveness of the action. The craze for high action at any cost is not so rampant as it used to be some years ago. Horse show promoters became wearied of seeing their premiums for action carried off by acrobatic monstrosities, and it caused them to modify the wording of their prize lists and call for all-around goers with 25 per cent for conformation.

The horse that winds his legs about, straddles, points, rolls, spreads behind, waddles or drags his hind legs, is no longer in favor with the good judge, no matter how excessive his action.—F. C. GRENSIDE, V. S., in *Breeders Gazette*.

Mr. M. W. Savage, owner of the champion pacer, writes the BREEDER AND SPORTSMAN under date of February 11th, as follows: "Dan Patch will make his first appearance at Indianapolis, Ind., on August 11, 1904. This will be known as Dan Patch Day; after that time he will be open for speed exhibitions on mile tracks. It is our intention to give Dan a lower record this year. He has wintered in fine shape and has gained just 100 lbs. He will make a season on my farm up to July 1st, but can have some preparatory work as my mile track is finished and is certainly one of the best in the entire country."

For all kinds of weather there is no drink like Jackson's Napa Soda—plain or in a lemonade.

Arabian Horses at the St. Louis Fair.

Mr. A. C. Cantley of the Live Stock Department of the Louisiana Purchase Exposition writes us as follows about the display of the Arabian and Americo-Arab horses that is to be made at the big fair:

"An exceedingly interesting feature of the horse display will be the imported Arabians or barbs. The Arabian Horse Breeders' Association was recently formed for the purpose of bringing this fiery steed of the Sahara into prominence at the World's Fair, and thereby exploit the Oriental blood and type in America. The Arabian horse is admittedly one of the most perfect of equine types, and many attempts have been made in the last twenty-five years to improve the speed and stamina of the thoroughbred racehorses by fresh infusions of Arab blood, but the result has always demonstrated the undoubted superiority of the modern British and American racer that has been evolved by long scientific breeding. The Arabian steed is the horse of art and romance, around which clusters the mystery of the Orient; but, so far, he is always excelled by other specially bred types, as the thoroughbred can outrun him, the trotting-bred horse can outdistance him, the saddle-bred horse of Kentucky is his superior for riding, the western bronco excels him for polo or military service, and for heavy draft he cannot be compared to the Percheron, Clydesdale or Shire horse.

"Randolph Huntington, Colonel Spencer Borden, J. A. P. Ramsdell and H. K. Bush-Brown, all known in horse circles, are identified with the present Arabic movement. Mr. Huntington, a quarter of a century ago, attempted to regenerate the American trotting horse by uniting the blood of Wadsworth's Henry Clay, himself a remote descendant of the imported Arabian or barb, Grand Basbaw, with that of the modern Arabians. He produced a few very handsome horses, but they were flat failures as trotters and sold at scrub prices under the auctioneer's hammer. But Mr. Huntington and his friends have not given up hope that they can finally produce good results, and it is announced that the new breeders' association will start a stud book for Arabians and Americo-Arabs, the latter being the name given to the breed established by Mr. Huntington. An effort will be made to promote a more general cultivation of Arabians and Americo-Arabs, and in order to foster this movement both types will be represented in a fine exhibition at the World's Fair. It is believed that no stud book for Arabian horses is now in existence in any country. Their pedigrees can be recorded in the English and American stud books for thoroughbred racehorses, but a separate registration bureau has never been maintained in either country."

Good Horses Pay.

Every farmer will concede that it costs no more to feed and care for a good horse, or good animal of any kind, than a cheap and unsalable scrub, yet many will go on breeding and raising such horses as will only sell at plug prices when they could as easily and cheaply raise an animal that will sell readily at any time after maturity and at a profitable price. At the recent American Royal Stock Show at Kansas City a party of agricultural college students requested the well known horse breeder, J. W. Robineau of Towanda, Kan., to permit his exhibits to be scored. In complying he said to them:

"Boys, I suppose a good many of you expect to be farmers. Let me give you some advice from my own experience. When you start farming, no matter if you are a renter, get two fine mares, two fine cows, two fine sows and two of the best hens you can buy. They will cost a good deal more than scrubs, but the difference in a few years will be immense. Sell their male progeny and keep the female. The male progeny will bring you as much as the whole product of cheaper stock, and in a few years the female portion will produce enough to buy you a farm and then another farm.

"That old black mare you have been scoring was supposed to be one of the best mares in France in her time. She was imported fifteen years ago. She made the first man who owned her \$5000. We bought her seven years ago and she has made us \$5000, and she has done the full work of a horse in the field all these years. Don't start your farming with scrubs. If you can't buy as good a mare as this one, buy the best you can. Do your farming with draft mares and if you manage right the colts will be profit, and big profit at that. We have three old mares on the place that have earned us \$5000 each. The old Rosa Bonheur mare I bought in hard times for \$200. She has made us five times that much money every year."

A finesurrey, one of the best made, and handsomely finished is for sale at about half its value by the Kenney Manufacturing Company, 531 Valencia street, San Francisco.

THOROUGHBREDS AND PONIES.

The California Jockey Club will shift its racing back to Oakland on Monday next, and the season will be finished there. Much to the surprise of everybody the attendance is better at the Oakland track than when racing is held at Ingleside in San Francisco. There are several reasons for this. The climate at Oakland is better than it is at the track near the ocean and the fields are therefore usually larger as the horses do better and fewer of them are under veterinary care. Strange as it may seem the trip from the business center of San Francisco to the Oakland track can be made in less time and with less crowding than from the same point to Ingleside. Then again, the Oakland people find the trip to Ingleside requires about two hours of their time, and they do not turn out in very large numbers when racing is on this side of the bay. This season up to this time has been a very prosperous one for the California Jockey Club, about 25 books being on every day, and the attendance averaging at least four thousand. The racing has been better than in former years—more high-class horses participating and the stakes all having large fields. The next stake to be run will be the California Derby which is down for Monday next at Oakland.

An Australian exchange records a remarkable incident which recently occurred at the Moorfields meeting. For a mile and a quarter event Loch Loeche, Highflyer and Barindi finished so close together that the judges could not separate them. The owners refusing to divide, the three came to the post once more after the last race of the day. Again the result was the same, and as darkness was closing in the stewards ordered the stakes to be divided. Dead heats of three are not uncommon in lands where judges do not claim to be so sharp sighted as in America, but memory does not provide an instance to quote in which the same result was achieved a second time. Perhaps the nearest was the famous dead heat for the Cesarewitch of 1857, when Pryoross, El Hakim and Queen Bess finished in a line. It is true the American mare won the decider by a length, but the other two were only a nose apart, and had they not collided, owing to Fordham cutting across them a hundred yards from home, another dead heat might have resulted. As it was, Grimshaw, rider of the third, objected to the other two on the ground of interference, but the objection was not sustained.

The official allotment of weights for the three important spring handicaps in the East—the Brooklyn, the Suburban and the Brighton—holds the attention of horsemen at the present time. Though there is a difference of twenty-odd days between the runnings of the three events, the weights are nearly identical. Walter S. Vosburgh, the official handicapper of the Jockey Club, has assigned Waterboy the top weight in the Brighton Handicap. This means that he awards the four-year-old championship of 1903 to the son of Watercress.

McChesney receives one pound less than Waterboy. These two champions have never met, but the showing of each last year was so good as to leave no question that they were the best four-year-olds of the year. Mr. Vosburgh awards the palm to Waterboy, but he shows that he holds McChesney in high esteem, for he asks the two to meet at a difference of but one pound. The weights assigned are 129 pounds and 128 pounds. The handicapper holds Hermis, too, in much regard, for he asks the son of Hermence to shoulder 126 pounds. Hermis, it will be recalled, incurred a number of defeats early in 1903, but from the meeting at Saratoga until he won the Brighton Cup he showed the excellent form which made him the champion three-year-old of 1902.

Mr. Vosburgh thinks Africander was a better three-year-old than Irish Lad or Dick Welles, for he allots the Star Ruby colt 125 pounds against 124 and 123 for the other two. Dick Welles seems to have full enough weight, for the son of King Eric won fame as a sprinter and has never been asked to go a route. Africander and Dick Welles had hard campaigns last year, while Irish Lad was retired at Saratoga. It is possible, therefore, that the son of Candlemas will be a faster four-year-old than either Africander or Dick Welles.

Golden Maxim gets into the Brighton Handicap with 117 pounds, and looks to have all the best of the weights. In the Lawrence Realization, last year, Africander and Golden Maxim met at even weights, and the former beat the latter such a narrow margin that the result was in doubt until the numbers went up. In asking Africander to give Golden Maxim

eight pounds a great concession is asked, and it remains to be seen whether Africander can do this. The Picket and Savable are asked to pick up 118 pounds. The Picket beat Africander in the September Stakes, but the Star Ruby horse was not good. The pair met at even weights.

Major Daingerfield, which was the rival of Hermis in 1902, but was a great disappointment last year, will have to carry 120 pounds in the Brighton Handicap. This seems to be plenty of weight. Advance Guard, which is seven years old, receives 123 pounds. The last time the "Iroo Horse" started he carried 124 pounds to victory in the Autumn Weight for Age race, at Morris Park, on October 25, 1902. Last year Advance Guard was not sent to the post.

Gunfire, which was a good mare last year, is given 117 pounds in the Brighton Handicap, while Charles Elwood has the same. Hursthouse has 116 pounds, with Rannels, Aesful, Lord of the Vale and Santon at 115 pounds. Next in order come such good horses as Mizzen, Whorler, Reliahle, Eugenia Burch, Grand Opera, Francesco, Igniter, Roehampton, High Chancellor, Injunction, Hunter Raice, etc.—*Rider and Driver.*

The Buffalo Racing Association will open its meeting June 6th and continue eighteen days, closing Saturday, June 25th. In the advertising pages of this paper will be found the full conditions of ten rich stakes to be run at this meeting. The Buffalo Derby has a guaranteed value of \$6000, and none of the stakes are of less than \$1000 in value. The Iroquois for two year olds is worth \$2000 and the distance is five furlongs. All the stakes are well arranged and should attract a very liberal list of entries from horsemen. The racing is under the auspices of the Jockey Club. Entry blanks for those stakes can be obtained from Mr. James H. Scanlan at the Emeryville track or from Mr. Ed Cole, Associate Judge, at Ascot Park, Los Angeles. Address all entries to The Clerk of the Course, Buffalo Racing Association, 23 Nassau street, New York. Entries close Tuesday next.

Del Monte is thronged with devotees of polo and pony racing, the polo tournament having opened on Thursday of this week. To-day, Saturday, the pony races are to take place. An excellent program has been arranged by Mr. Robert Leighton, who came down from Victoria to manage the meeting for the Polo and Pony Racing Association. A very long list of entries has been received and all the best ponies in the State will compete. At least five carloads of ponies arrived at Del Monte during the first three days of the week.

Modicum, the winner of the \$10,000 Burns Handicap at Ingleside, Saturday last, was purchased by D. S. Fountain from W. M. Rogers at Chicago, last summer, for \$750. Two years ago this horse was bought in at the sale of the Rancho del Paso horses by John Mackey for \$200.

Once again there are dreams of another track at New Orleans. This time it is said sufficient money has been subscribed and a plot of ground leased. Several prominent citizens of New Orleans have been mentioned and the authentic statement made that the new track will apply to the Western Jockey Club for dates next season, wish the idea of dividing the patronage with the Crescent City Jockey Club, which at present is conducting the sport in the Louisiana metropolis.

Some estimates published recently show that in 1903 there started in the United States and Canada 5500 running horses, of which 2400 won races. It seems to have escaped general notice that the large percentage of winners shows utter mediocrity rather than anything else.

The "color line" appears in racing! That is to say the colors worn by the rider have been under revision and it was a much needed item. Some time since the Australians—the people who gave us the startling gate—revised their colors thoroughly, revoking all colors existing, giving plain rules as to how new colors might be chosen and adopted, all old standard combinations within the limitations being given priority so that no one should snatch them. Then followed some plain directions as to the cardinal colors, and subshades, the point being that all braids, diamonds, sleeve or body slashing was discontinued and the all half-colored jacket, which looks red on the backstretch and blue on the homestretch, was very properly wiped out entirely. The trouble with many American colors, possibly not those of leading stables, is that they have been designed by the lady of the "menage." She chose some combination "because it looks too sweet for anything," and cares not if it cannot be seen across the paddock. When, generally for peace sake, the man has adopted such colors, he will fight like a Bash Bazouk in their

interests if anyone criticizes them or wishes to remove them, although when the suggestion was first made he probably thought them about "the worst ever."—*Sports of the Times.*

Was Absolutely Sound.

Auctioneer George Bain is unquestionably one of the best of the great army of good story-tellers in the horse business, but he is best right on the block.

The following will be readily recognized by those who have heard him sell:

"I said this horse is usefully sound, not uselessly sound," said Auctioneer Bain, sorrowfully. "And I am bid only \$20."

"Twenty-five?"

"He's yours."

"Look here, men," cried the official booster, "here's the horse you're looking for. You can drive him with one hand and smoke a cigar with the other, and he's no Irishman, either."

"This here horse, gentlemen," shouted an anxious consignor, as the bidding dragged, "is absolutely sound, ab-so-lutely. He's got a little mite of a puff on that near hock and a very small splint; one of his eyes is a little mite blue, and he split his ear on a barb-wire fence. Otherwise he is sound—absolutely."

"Look that horse over carefully, men; he's a good one. He's worth more money than that in the country. Don't let 'em steal him, Mr. Auctioneer."

Somebody got him for \$60; and the consignor shed a few tears. But as he walked down out of the box he remarked: "I only brought him along to fill the car, and all he ever cost us was twenty and the freight."

"Gentlemen, this horse will go right up to a steam engine, or wade through a drove of bumblebees. You can't frighten him, nor make him do a mean thing."

At the end of the speech Mr. Horse jumped eleven feet straight up, kicked himself loose from the cart, and dodged a hundred men for ten minutes. As he was led back to the block his owner shouted: "That's the first wrong thing I ever saw him do. He's scared of the crowd."

The next offering had been bid up to \$25 when it began to neigh for its mate. "That's nothing," said Bain, "he's only 'hollering' at the price."—*Various Exchanges.*

There is lots of caloric atmosphere blown about in California, but the following from last week's Kentucky Stock Farm will rush the mercury up on any stove circuit: "Jack Donnelly of New York" was in Lexington last week with a story about trotters that, if true, has all other tales of the turf faded to a dirty pink. Mr. Donnelly, he it said, is no novice at the trotting game. He could not be muddled very easily, if at all, on any proposition that might arise, and those who know him best say that he has no time to dream dreams nor manufacture fairy stories. And this is what he said: "At Charles A. Kemer's farm, Great Barrington, Mass., I saw six green trotters, all by Leonatus 2:17½, that can heat 2:10." Furthermore, Donnelly avers that there are twenty that can beat 2:20, and he says he saw five of them trot a half in a minute each. It is not for the writer to say whether Donnelly is to be taken seriously. Mr. Kemer had L. A. Doyall at his farm for some months, and Doyall can find speed if there is any in the county where he is working horses. Leonatus was a trotter of immense speed; he is well bred; he has served a lot of good mares, and there is no good reason why he should fail to sire lightning-fast trotters. It may be that I have not quoted Donnelly with absolute correctness. But I am not far out of the way at the worst. If you do not believe me, or if you doubt Donnelly, Great Barrington is still on the map and has a postoffice. A two-cent stamp will carry your letter there, and it is safe guessing you will receive an answer."

Warranted to Give Satisfaction.

Gombault's
Gaustic Balsam

Has Imitators But No Competitors.

A Safe, Speedy and Positive Cure for Curb, Spint, Swoeny, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a Human Remedy for Rheumatism, Sprains, Sore Throat, etc., it is invaluable.

Every bottle of Gaustic Balsam sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address:

The Lawrence-Williams Co., Cleveland, O.

ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

The New York Show.

The Westminster Kennel Club's twenty-eighth annual show at New York last week was that organization's record show, 2494 entries, embracing over 1700 dogs. Spratts Patent looked after the benching; this important feature of the big show was as usual very satisfactory to the club, exhibitors and visitors alike.

Six rings were necessary for the dogs judged on the ground floor, whilst the small breeds were looked after in two rings in the gallery, an accommodation for owners that was an appreciable innovation.

Pleasant weather and a large attendance during the whole show will go much to enhance the growing popularity of bench shows in New York.

A pleasing feature of the judging was the arrangement whereby spectators and visitors could tell one dog from another in a class, numbers were worn by handlers and owners when the dogs were in the ring.

The strongest of the smooth Fox Terrier classes was considered that for open bitches, writes an Eastern authority, in which C. K. Harley's Wandee Violet (late Holmhury Brilliant) was the winner. She had previously won in puppies, novices, and been second to Sabine Victory in limit. Recently imported from England, this precocious young dame had been deemed in her native land the best youngster brought out last year, very compact and the "correct size" according to England's present fad. She was probably unfortunate to be beaten in limit, as her more successful rival is certainly lacking in power of jaw and substance. On the other hand, she might have given way in the open class to Sabine Lavender, who could do no better than reserve. Lavender was shown in the pink of condition and is a decidedly high class terrier.

Sabine Result, the grand boned, beautiful ribbed and sturdy loined English importation, obtained the ribbon in the winners class for dogs from the sound, home bred crack Norfolk All Blue. The latter was not looking his best, as his coat was "starey" and his loin pinched.

Other winners in the smooths were the neat headed dog Warren Drastic (third open) and the clean headed bitch Warren Donation (third novice and second open), Wandee Sprite (second novice).

When the judge came to wire hairs he "was apparently tired out," continues Mr. Mayhew, "and he somewhat startled the spectators by withholding the first prize in the class for dog puppies, in spite of the fact that Cairnsmuir Battleaxe is quite up to the average and only requires time to finish into a good average terrier."

The surprise came, however, when Cairnsmuir Barker, heat the English Champion Wandee Coastguard, the winner at the Ladies' and Brooklyn shows. Barker by no stretch of imagination can take rank as a "class" terrier; his "humpy" hack, common finish, straight stifle and lack of power generally stamping him a very ordinary specimen.

Coastguard on the other hand is a dog of great individuality and possesses a beautifully chiselled head, with a good terrier expression and finish of muzzle. He is also a good size, with abundance of bone.

The pick of the opposite sex was probably Wandee Manila, who after winning in limit, had to give way to Selwonk Fidget in open. Fidget was dead out of coat, her hone looked shrunk, she lacks power in foreface and in body cannot be compared with her rival from the Wandee Kennels.

Sabine Result won the challenge cup, Fidget reserve. Sabine Kennels won the prize for the best team of smooths. The special for best team of wires went to Wandee Kennels.

St. Bernards were representative classes considering their decline compared with entries five or six years ago. James Shannon's Crusader took puppy honors. Louis Walthers' well known Ch. Sir Waldorf held his own against all comers. Second to him was Uncle Sam V., a son of Remnant's Best, but hardly up to the standard in head properties of the Remnant family. Frank Jay Gould's Our Bobs took third, he is a good fronted and honed dog, but hardly massive enough in skull. Probably the most typical of the rough dogs was Miss A. A. Marks' Columbia's Uoole Remus, a sweet headed specimen, but on the small size. Miss Marks' Baby Beautiful, a typical daughter of Mayor of Watford, swept the line in bitches. L. Walthers' Columbia's Hope being in for second honors.

Newton Abbott Kennels held the trump cards for both sexes in smooths, with two grand specimens, Newton Abbot Squire and Ch. Dolly Varden.

The attendance for the opening day was particularly gratifying. Not only were nearly all the well-known dog fanciers seen, but there was an unusually large number of ladies present both afternoon and evening, and they were fully as keen as the men in crowding around the big rings and watching the high-class dogs put through their paces for blue ribbons.

The judging of Russian Wolfhounds, late in the afternoon, proved one of the most popular features of the first day.

All of the classes showed a splendid lot of dogs, and the result was a grand triumph for the Valley Farm Kennels of Simsbury, Conn., which won six firsts, getting the blue ribbon in the puppy, limit, and open classes for both dogs and bitches. For most of the winners it was the second time they had ever been shown. The Valley Farm Kennels is the exhibit name of J. B. Thomas Jr., the ex-captain of the Yale track team, and who has made an enviable reputation in recent years as a breeder of fine dogs. In the class for American-bred Russian Wolfhounds, Mrs. Richard Harding Davis, with her celebrated Crossroads Czar, had to take second, E. L. Kraus taking the leading honor.

Ben Lewis, of Laodowne, Penn., carried off some blue ribbons in the Greyhound classes. Mrs. H. C. Kelley, of Fishkill, and Mrs. Philip Hone of New York, were rivals in the novice class, but the blue ribbon went to Lewis and Mrs. Kelley got the second award.

The largest individual exhibitor was Thomas W. Lawson of Boston. It is easy to distinguish his dogs, even without the aid of the name Lawson Farm, that usually accompanies them. His dogs are all supplied with dark blue blankets, bordered with orange braid and when a long string of dogs thus attired is seen, the sight is taking enough to attract one's curiosity. Mr. Lawson's nine English Toy Spaniels were thus attired during the greater part of the opening day, and so were his dozen or more Bulldogs, a notable exhibit in themselves.

J. Pierpont Morgan's half dozen fine looking Collies were deservedly popular with the spectators.

In the Bloodhound classes, Dr. C. A. Lougest, of Boston, was almost as successful as ever. His well known Wandle Warrior, which last year won the championship, was again invincible. Only four Newfoundlanders were exhibited. Mrs. Stormvan's Grave-sande, of Boston, got the blue ribbon, while S. Hell-muth, of Sheepshead Bay, got the second prize.

Field and Fancy credits Mr. Powell with a predilection for the "medium sized, sound, well knit" Fox Terrier, "and those far from the ground or too big did not get away from the others."

American Stock-Keeper says "there have been some upsets, or rather differences of opinion, the most notable being perhaps the downing of Wandee Coastguard by C. Barker, generally conceded to be an inferior Fox Terrier. The smooths were well judged, but the wires left something to be desired."

In Collies, Ch. Wishaw Clinker proved invincible with Ormskirk Olympian second. The son of the great Heacham Galopin came over on the Oceanic shortly before the show.

It is estimated by the experts that nearly \$30,000 was expended in the purchase of dogs, from English breeders and owners for the W. K. C. competitions.

This strenuous rivalry has gone to so great an extreme that in a percentage of breeds the home product is out of the race. Aware of this, and with a commendable desire to give breeders with exhaustible resources some encouragement, the bench show committee composed of Richard H. Williams, Walter Ferguson, Jr., and William Ranch introduced classes for American bred dogs.

DOINGS IN DOGDOM.

The S. F. K. C. officials are working assiduously for a big show here in April. Mr. L. Cooper will have charge of the Market-street office, which will be opened on March 1st.

Good news is that the premium list will be out early and mailed to every fancier whose address is available. The list of specials, and good ones at that, is growing daily.

The question of judges, Eastern, Coast or local selections, is now agitating Coast dogdom from centre to circumference. James Mortimer will deal out the ribbons here in April and in Portland afterwards.

Vancouver, Nanaimo, Victoria, Tacoma, Salem, Spokane later in the year, will probably engage local judges, a Coast representative of dogdom, there being a fair amount of eligibles to select. Seattle may have an Eastern judge.

San Jose, Los Angeles and Sacramento will very likely take home talent. Possible exceptions might be made, should any noted figure in doggy affairs be sojourning here at the time the opportunity will be embraced. This reminds us that Mrs. Lee of Toledo was mentioned for St. Bernards at one of the shows following our high spring show. Among the local talent there is some really good men available for the various breeds. Frank Turner of Victoria may do some judging at one of our smaller shows. Overtures to bring Mr. Jas. Cole to Seattle fell through, we are informed.

Alta Rachel, a once good St. Bernard bitch, died this week, the poor animal had been the victim of neglect and starvation. Since coming under Mr. W. Wallace's care several weeks ago everything possible was done to make her sound again, but her friends were found too late.

The list of judges selected for the Chicago Kennel Club show and the breeds they will pass upon are as follows:

Dr. R. L. James, Blue Island, Ill.—Bull Terriers.
A. D. Lewis, Hempstead, L. I.—Collies and Old English Sheep Dogs.

M. C. Byers, Grand Rapids, Mich.—Pointers and Setters.

J. Steele MacKenzie, Riverside, O.—Scotch Terriers.
E. M. Oldham, Newark, N. J.—Toy Spaniels, Sporting Spaniels, Pomeranians, Yorkshire Terriers, and Toy Terriers.

J. Willoughby Mitchell, Brooklyn—Fox Terriers, Airedales, Irish Terriers, Bedlington Terriers, Dandie Dinmonts, Welsh Terriers, Skye Terriers, Schipperkes, Manchester Terriers, Greyhounds, and Whippets.

James Mortimer, New York—St. Bernards, Mastiffs, Great Danes, Newfoundlanders, Bloodhounds, Russian Wolfhounds, Deerhounds, Foxhounds, Beagles, Chesapeake Bay Dogs, Dalmatians, Poodles, Bulldog, Boston Terriers, French Bulldogs, Dachshunds, Griffons, Pugs, Maltese Dogs, Italian Greyhounds, Chihuahuas, and Toy Poodles.

Two litters of Fox Terriers are now at Wandee Kennels that should produce something good.

On January 1st Wandee Seabreeze whelped six puppies (3 dogs) to Sabine Result. Result, it will be remembered, was first winners at the L. K. A. show in New York.

Another litter, the first here for Warren Coastguard, is out of the wire bitch Foxhills Fearless, third limit at Philadelphia. Fearless arrived here in whelp to Coastguard, she gave birth this week to five puppies.

The Canadian Kennel Gazette is authority for the statement that all of the Coast shows this year will be P. K. L. shows.

The San Francisco Kennel Club show in April, the Los Angeles show and proposed Santa Barbara show will be under A. K. C. rules.

Spokane will hold a show in October—during fair week.

Many years ago a vessel from Newfoundland ran aground near an estate called Walnut Grove, on the shores of the Chesapeake. The estate belonged to Mr. George Law, a member of a well-known Maryland family. On board the ship were two Newfoundland dogs, which were given by the captain to Mr. Law in return for kindness and hospitality shown to himself and crew. The beginning of the Chesapeake dog was a cross between these Newfoundlanders and the common yellow and tan colored hound, or coon dog, of that part of the country.

The marked characteristics of the Chesapeake Bay dog give every evidence of the truth of this story. Its strong power of scent, its hardihood, its shorter hair, its medium size and its remarkable endurance come from the hound, while its love of water, its power of swimming, its extraordinary ability to endure cold, its furry coat, wonderful intelligence and general good temper are all due to the Newfoundland.

Whatever may be said against the dog show, says *The Field*, it certainly has this advantage—that it popularizes a breed and brings those interested in a certain variety together, so that they can compare notes and benefit by each other's experience. It also, no doubt, in the main, tends to the breeding of dogs of more or less one recognized type, though it must be admitted that this type in some breeds varies periodically. On the other hand, is the show of use or harm to the man who loves a sporting dog for the work it can do, as opposed to its mere appearance? The answer is that, as at present conducted, shows do an immense amount of harm to sporting dogs, for in most breeds to win at a show, a dog must not merely be absolutely true to type, but must have all the so-called points of its breed over-developed to such a degree that it is often a perfect monstrosity. The main object for which it was originally differentiated and bred, namely, for work, seems to elude sight of in the mad endeavor to breed an animal which, though often lacking in courage and in constitution, has its show points more exaggerated than any other.

With regard to the sportsman's view of a dog show, why is it that the average shooting man will buy a gun dog almost anywhere except at a show? Why does the man who wants a working hound practically never go to the show bench? Briefly, the reason is this: To the eternal shame of the dog show exhibitor, not only is it possible to show and win with a dog that has never been in any way trained for or broken to the work for which it has been bred, but it is often actually profitable. The dog or hound may be absolutely worthless from a working point of view, yet because of its looks—looks, it must be borne in mind, which tell nothing of its silly brain, or its heart of a cur, or its absolute physical incapability on account of extreme nervousness to last out a long day or stay on to the end of the run—yet because it happens to possess the points of the breed in an exaggerated form, it wins its first prize after first prize, and, worse than all, is used at the stud or for breeding and so perpetuates its shortcomings. And this is not an overdrawn or fanatical view of the situation, but is, alas! the unfortunate truth. It is not only that the average show dog is merely unpracticed because most of its life is an artificial one, but that it is never trained at all, often, too often, being incapable of any real work.

Bulldogs are picking up a bit in New York, at least twelve good ones are on the card and coming from England to Eastern fanciers. Three are billeted for the Devon Kennels.

J. W. Flynn's Pointer bitch Nellie Bang came back here this week from Grand Junction, Tenn., where she was served by W. W. Van Arsdale's Dr. Daniels.

Old (?) Champion Woodcote Wonder is at it again. Bonnybred Kennels Bull Terrier bitch Fire Belle (Ch. Princeton Monarch-Richfield Girl) whelped, February 3rd, nine puppies (5 dogs) to the champion of champions.

Messrs. August Belmont of New York, president of the American Kennel Club, John G. Kent of Toronto, president of the Canadian Kennel Club and Marcel A. Vitti of Philadelphia have been chosen and named to represent American dog fanciers as an Advisory Committee in connection with the kennel show at the Universal Exposition at St. Louis. Chief F. D. Cohurn of the World's Fair Department of Live Stock has been notified of acceptance by the three gentlemen of the duties involved, and has invited the Committee to co-operate in all matters that will aid in making the kennel show a leading attraction of the Universal Exposition.

A striking feature in the classification of the kennel show of the Universal Exposition will be its recognition of the importance of breeding, with the intention to encourage in larger measure than heretofore the exhibitor who makes a study of practical methods of improving breeds of dogs. Puppy and adult classes for each of the breeds will be provided for in the World's Fair classification, with awards as well for producing qualities of sires and dams. All the recognized breeds of dogs will be named in the classification, with prizes unprecedented in amount, not the least of the pleasant surprises in store for the exhibitors of dogs at the World's Fair will be the absence of any charge for entrance fees.

Julius Rodelsheimer of Seattle was in this city during the week, stopping over on his return from New York. He, in company with Mr. Walter Stettin of this city, were daily visitors at the Westminster club show.

Norman J. Stewart of San Jose paid us a visit early during the week. The Santa Clara Kennel Club dates for a three day show are April 28th, 29th and 30th.

The San Jose dates will allow handlers and exhibitors to bring down dogs from Portland, which latter will be the final spring P. K. L. show up north. Just when Los Angeles will hold a show has not yet been proclaimed.

Santa Barbara, if the enthusiasm reported by Mr. Armstrong, is still on tap could sandwich in a show between the Garden City and Orange Grove shows.

There will be ten P. K. L. shows at least on the Coast this year. Here is what the league desires the American Kennel Club to do to bring them into the fold:

"That the American Kennel Club recognizes all wins heretofore made by dogs under the Pacific Kennel League rules, including those wins under the Canadian Kennel Club rules in British Columbia, which have been recognized by the Pacific Kennel League.

That the Pacific Advisory Board shall consist of one delegate from each club which is a member of the Pacific Kennel League, together with the members of the said board now acting under authority of the American Kennel Club.

That the Pacific Advisory Board of the American Kennel Club, as above organized, be empowered with full authority to arbitrate and regulate the internal affairs of the Pacific Coast clubs; that its findings in the event of an appeal being taken by any exhibitor be absolute and final.

That each club be empowered to elect its own member to such Advisory Board and that each member of the Pacific Kennel League, as now constituted, shall be entitled to one representative on such Advisory Board, to be elected as herein provided.

That these conditions are not subject to change or revision and must be accepted or rejected as a whole by the American Kennel Club."

The current issue of the English *Stock-Keeper* mentions two Fox Terrier cracks in the following paragraphs:

Rambling Major, the sensational wire-haired Fox Terrier, whose purchase by Mr. George Raper was only brought about after the expenditure of much persistency as well as gold, seems to have been aptly named, for he is again changing his abode. Rumor had it, a few weeks ago, that there was a great probability he would be installed as one of the favorites of the King at Sandringham, but somehow the matter fell through. It seems, however, that the fates have destined Major to be associated with royalty, for we understand he will find a new home in one of the royal palaces of Italy. Mr. Raper has not divulged the price, but those who know the amount which can be obtained at home for such scions of nobility in dog flesh will be able to estimate pretty correctly how much Mr. Raper's hanking account has been increased by the sale. That is more or less of a private matter. Breeders and exhibitors will be more concerned about the continued exportation of our very best specimens, and surely this dog is entitled to be so classed, for, although he has only been exhibited four times—namely, at the Crystal Palace, Edinburgh, Cheltenham, and Hale—he has won fourteen firsts and nine specials, including two championships, the Fox Terrier Club's fifty-guinea challenge cup, special for the best novice, and reserve for the best of any breed at the Crystal Palace, performances which stamp him as being one of the very best of his breed ever bred.

Holmury Brilliant, that beautiful smooth bitch whose name has appeared at the hand of the prize lists of nearly every important show during the past few months, is also leaving Mr. Raper's kennels this week, and accompanies her owner across the Atlantic, having been purchased by Mr. C. K. Harley, of San Francisco, who also has secured possession of Rahy Result, winner of five firsts at the recent Blackpool show. He will make a fitting companion to the first-named, for he is beautifully bred, his sire being Ridgwood Result and his dam Rich mond Pardon.

The Economic Value of the Meadow Lark.

Efforts have been repeatedly made for the protection of the meadow lark, a bird plentiful in this State and one of the merriest throated songsters of our fields. Neither sentiment nor the contention that the bird was of value to the husbandman and orchardist has prevailed against prejudice, indifference and erroneous claim that the yellow-breasted warbler was a grain destroying and destructive marauder.

At the convention of sportsmen held in this city several years ago for the purpose of framing proposed fish and game protective measures the meadow lark was not overlooked by a few of his friends—they were not strong enough however to get the bird recognition from the majority of the game protective solons. In fact, one venerable delegate representing the Grass Valley district, deliberately stated in his concluding remarks against the proposals for protecting the bird, that he "could not go home and face his constituents" if the convention entertained favorably the efforts to obtain protection for the meadow lark. While this matter was not exactly in the line of game protection, still it had with several other measures an indirect standing before the convention.

In 1901 a law was passed by the State legislature, a law which is practically a dead letter and entirely inoperative for protection. The only good feature of the statute is the sale prohibition. This law is as follows:

Section 637a.—Every person who, in the State of California, shall at any time hunt, shoot at, pursue, take, kill, or destroy, buy, sell, give away, or have in his possession, except upon a written permit from the Board of Fish Commissioners of the State of California, for the purpose of propagation or for education or scientific purposes, any meadow-lark, or any part of the skin, skins, or plumage thereof, or who shall rob the nest, or take or destroy the eggs of any meadow-lark, shall be guilty of a misdemeanor; provided, that nothing in this section shall prohibit the killing of a meadow-lark by the owner or tenant of any premises where such bird is found destroying berries, fruits, or crops growing on such premises.

In the light of expert testimony it looks as if prejudice, founded on common rumor based upon a superficial observance of the habits of the bird, should not prevail. The United States Department of Agriculture has given the subject the benefit of careful and exhaustive investigation, the results are most favorable to the claim that there is probably but few birds as valuable to the farmer as the meadowlark. It is entirely terrestrial in its habits, procuring almost its entire food supply from insect life harmful to meadows, prairie and agricultural lands.

The Biological Survey, U. S. Department of Agriculture has recently issued a table, illustrated by diagram, which gives a graphic description of the aid these birds are to agriculturists. The table, showing the variety of food for the past year, is as follows:

Months	Stomachs Exam'd	Animal Food	Grain	Seeds	Total
January	13	24.36	75.28	35	100
February	1	.00	25.00	75.00	100
March	12	73.14	17.00	9.86	100
April	28	77.51	15.10	9.39	100
May	8	97.99	1.88	.13	100
June	20	95.79	2.10	3.11	100
July	18	97.32	.00	2.68	100
August	28	99.35	.00	.65	100
September	29	99.20	.40	.40	100
October	40	94.39	.61	5.00	100
November	22	77.08	6.50	16.42	100
December	19	39.32	32.70	28.09	100
Year	238	72.95%	14.71%	12.34%	100%

The proportions and kinds of animal food as shown in the diagram were as follows:

- No. 1. Orthoptera—Red-legged grasshoppers, meadow grasshoppers, other grasshoppers, crickets.
- No. 2. Coleoptera—Weevil, billbug, curculio, clover weevil, flea beetle, lady birds, scarred-snout beetle, leaf-eating beetle, flea beetle, darkling beetle, rove beetle, longhorn beetle, tiger beetle, May beetle, ground beetle, click beetle.
- No. 3. Lepidoptera—Butterflies, moths, cutworm, armyworm.
- No. 4. Hemiptera—Stilt bug, soldier bug, assassin bug, chinch bug, spittle insects, tree hoppers, jumping plant lice.
- No. 4. Hymenoptera—Ants, wasps, stinging ants, ichneumon flies.
- No. 5. Miscellaneous Animal Food—Ticks, snails, thousand legs, small batrachians, sowbugs, spiders and cocoons.
- No. 6. Grain—Clover, wheat, corn, oats.
- No. 7. Seeds of Weeds—Pigeon grass, panic grass, smart weed, rag weed, groundwell seed, black mustard, bayberry.

The diagram showed that nearly three-quarters of the meadow lark's food for the year was composed of insects, over 12% weeded seed and 15% grain. The favorite food is insects, when they can be obtained; for six months of the year the amount being over 90%, and according to the above table during August and September over 99%. Even during the winter months, when in many sections insect life is dormant, the lark finds enough that is hidden below the surface of the ground or secreted among the grasses to furnish a very considerable portion of its diet. An examination of the table showing the actual kind of food found in the 238 stomachs gives further proof of the immense economic value of the meadow lark. Grasshoppers and crickets comprise over 25% of its food, while an equally large share is made up of beetles, among them curculio weevils and click beetles, these latter during the larval stage being known as wire worms, which often destroy the planted seed before it has germinated, thus ruining fields of wheat, corn and other grain at the outset. Meadow larks also destroy cutworms, army worms and the pest known as the chinch bug. In the yellow patches of the sprouting wheat fields where the cutworm has made an inroad, the lark can be seen industriously decreasing the numbers of the farmers' pest.

This habit of the bird has given it a reputation, among the ignorant, of feeding on the milk sap of the wheat. Never was there a greater libel, the cutworms are what the bird is after. It is but fair to say here, that many of our farmers are now wise to the doings of the bird in this respect and they accord the meadowlark protection and give him their good will, some farmers will not allow any shooting on their lands believing that if they did, their friends, the larks,

would be killed. It requires a clever hunter however, to get a large bag of larks in a day's shoot, they are very wary and carry plenty of lead. There are methods of hunting the lark, where several shooters combine, when the combined bag can be rather a large one.

The data above given is in keeping with other statistics computed from the examination of several thousands of larks' stomachs.

The most dangerous menace to the bird is the net. Several market or pot hunters, generally foreigners, will operate a long, close meshed net at night, dragging the net over meadow land or hillside where the birds nest. This nefarious method is a deadly one, for the poor birds have no chance to get away.

Statistics show that chinch bugs have destroyed in the United States, during the last fifty years, grain to the value of several hundreds of millions of dollars.

In some of the Southern States, notably in Georgia, the meadowlark is called the wheat bird, it being claimed it destroys growing wheat; however, the scientific study of its food proves this to be and unfounded and erroneous claim.

The meadowlark is protected by laws in all parts of the country except in the following states viz: Virginia, North Carolina, Georgia, Alabama, Mississippi, Louisiana, Tennessee, Idaho, Missouri and California (?).

The present law should be changed and market hunting and pot hunting of the meadowlark prohibited.

The varieties of the species in this country, habitats, etc., are as follows:

Description: Meadowlark (*Sturnella magna*) Adult both sexes; general appearance of back and wing coverts mixed black and brownish, each feather being streaked or barred; top of head with median line of buff outer tail-feathers largely white, inner ones barred; line from bill over eye yellow, bordered above and below by black; sides of throat whitish, middle throat, breast and upper belly bright yellow; large black crescent on breast, sides and lower belly white streaked with black; legs strong, toes long. General aspect of head very flat from crown to end of bill. Length of males from end of bill to tip of tail 9.50 to 11 inches; females 8 to 10 inches.

Western Meadowlark (*Sturnella magna neglecta*) Differ from the Eastern form (*magna*) by being larger and lighter colored, almost grayish when looked at from above; the yellow of the throat extends to the cheeks, which are grayish white in *magna*.

Texas Meadowlark (*Sturnella magna hoopesi*) In size and general appearance like *neglecta* but the cheeks are whitish as in *magna*; the yellow of under parts being somewhat deeper.

Distribution: The Meadowlark (*magna*) is found in Minnesota, Iowa, western Kansas and Indian Territory, and northern and eastern Texas and all of the country east of this line of states, also in the southern portions of Manitoba, Ontario, Quebec, New Brunswick and Nova Scotia. It breeds in all parts of this immense district. In the winter months it is not generally found north of a diagonal line commencing on the Atlantic coast at about 42° north and running southeasterly to 38° north in Kansas.

The Western Meadowlark (*neglecta*) is found in North and South Dakota, Nebraska, western Kansas and Indian Territory, and northern Texas and all of the territory west to the Pacific, also in southern British Columbia and Alberta, southwestern Saskatchewan and western Manitoba. It also overlaps the territory of the eastern meadowlark by a very irregular distribution in Minnesota, Iowa, Missouri, Wisconsin, Illinois and southern Michigan.

The Texas Meadowlark (*hoopesi*) is found from southern and western Texas through southern New Mexico and Arizona.

Nest: Is placed beside a tuft of grass or at the foot of a weed stalk in a natural depression, or one made by the birds in a meadow or prairie; it is built of coarse grasses or weed stalks lined with finer material of the same kind and is usually well hidden by a dome or roof.

Eggs: White, spotted and speckled with brown, purple and lavender. Usual number five, varying from three to seven.

A Chapter on American Bears.

Of American wild beasts, those covering the widest range, are the bears. Some member of the ursidae family exists, or has existed, from the Texas line to our furthest northern frontier. Of the clearly defined bear line, there are within our limits certainly four species. First comes the black bear, that originally could be found from the Canadian lines to the Mexican border. Then comes the grizzly bear, with its subspecies, the silvertip and the cinnamon type, ranging from the Rocky mountains to the Pacific Coast. Third is the great Alaskan bear, and the fourth is the polar, which occurs very sparsely along the northern Alaskan coast.

The widest of the bear family in its distribution is the black bear, which was once found all over the United States, and still exists in some of them. This bear is among the most interesting of American wild animals, so writes William Hugh Roberts. In cunning it takes very high rank, being equalled only by the wolf and fox families. In some respects it is even superior to both in wisdom and sagacity.

It is interesting to watch a bear entering a field of corn. It reminds one more of an old woman with a bundle than of anything else, as it clambers over the seven or eight-rail fence, and, after a few minutes of watchful rest, it begins operations. When the tall stalks are planted in rows, the bear will begin by taking the middle furrow and breaking down first the stalks to the right of it, then those on the left, until it has eaten all it wants. The bear never leaves the field by any other route except that by which it entered unless very hard pressed. This habit makes it easy to capture it as it comes in or goes out. Having slept all day, about 5 or 6 P. M. the bear awakes, yawning, and rubbing its eyes, very like the human, who loves his comfortable bed and is loth to leave it. Finally, after a tremendous yawn, the bear emerges from its den and hunts for a draught of good cold water. There is nothing about which wild animals are more fastidious than in the quality of the water they drink. It must be from a running stream or cold spring, and clear. Water is usually abundant and of fine quality in a bear country.

Reader, did you ever witness an old she bear instructing her cubs how to enter a cornfield, when the corn is in its richest condition, the milky state? It is worth any degree of trouble to see. Leaving the maternal den, in the hollow of some enormous tree, as near the ground as possible, they are guided to within a hundred or two yards of the Virginia rail or worm fence this, almost invariably, being the sort of fence commonest in a bear country. There the young ones are carefully concealed in a hollow log and hidden by two or three maternal low, whispered growls, reinforced by gentle pats, to remain perfectly

Cattle Raising in California.

BY E. W. HOWARD,
Vice-President State Board of Agriculture—
President California Live Stock Breeders' Association.

Cattle raising has been from the earliest days, is now, and always will be, one of the most extensive and profitable industries in California.

As in other sections of the United States, the "cattle business" in California has presented various and varied stages of development in keeping with the onward march of settlement and civilization. The *laissez faire* methods of the days of the Spanish rancho and early days of California Statehood are over. We find now very few unfenced ranges, and what were once vast holdings, and in many instances brought under irrigation. We are entering now more rapidly than many suppose the regime of the small farmer and cattle-raising in connection with a scientific and intelligent rotation of crops, which methods will tend to conserve the fertility of the soil and also to the production of a better type of cattle, be they beef or dairy stock. Of course, there are vast stretches of country which, because of their character and location, will always be range, pure and simple.

The much-discussed and often a laborious question, What is the most profitable breed of cattle in California? is easily answered: Any breed. For conditions and environment suitable to any one of the standard breeds can be found in California. The Devon thrives in the rolling foothills and rough sections of the Coast range, and in them find a region akin to his native hills of Devonshire. The Shorthorn, than which there is no more universally adaptable breed, thrives and grows sleek in the low lands and meadows of our interior valleys, and divides honors with the Devon in the more hilly sections. Here and there the white faces of the Herefords predominate. Red Polls, Brown Swiss and other dual purpose breeds have their advocates.

The special purpose Holsteins and Jerseys are legion, and in many instances very high types of their kind, and are profitable under suitable environment, which is to be found from one end of the State to the other.

There are in California various avenues of effort open to one contemplating the raising of cattle. There is a good market for pure bred bulls of the beef brands for use on the large ranges of this and neighboring States. The same is true of the dairy breeds, for use throughout the ever-expanding dairy districts, so that one may devote his time and labor to the production of the improved types of pure bred cattle for breeding purposes and he will be repaid. He can confine his operations to the production of beef cattle to consume and transform the roughage on the farm into concentrated agricultural wealth. Or, if he prefers to be a stockman pure and simple, he can depend upon hountiful nature throughout the rolling foothill country to furnish a variety of native grasses—hul clover, wild oats, bunch grass and alfalfa, than which no artificial ration will turn the lusty steer more quickly into a chunk of porterhouse and oleo oil. So well recognized is this fact among stockmen that thousands of cattle are annually brought to California from the less-favored cattle ranges of our sister states to receive the all-important finishing touches which make them eligible to the market class known as prime beef.

One might ask how do California conditions compare with those in other sec-

tions of the world for the production of fine types of cattle? Have we, first, a substitute for the green meadows of England, the succulent turnips and other roots of Scotland, or the blue grass of Kentucky? The answer we find in our broad acres of alfalfa, for alfalfa is equal to any one of the above in food value, and in some respects to all three, for alfalfa is primarily a bone and muscle producer rich in protein. In climate we have a great advantage, an advantage that cannot be overestimated, for close stabling, with all its consequent ills, is unnecessary. Too much weight cannot be put upon these favorable conditions of climate and available food supply as we find them in California, for environment is one of the prime factors in producing types. Breed prepotency has little weight when hampered by unfavorable environment. Early maturity and aptitude to fatten, which are necessary characteristics of rent-paying cattle, cannot be developed or even transmitted for any length of time under unfavorable conditions. That we have the most favorable conditions is evidenced by the general excellence of our live stock. Conspicuous examples of recent date are to be found in such performers as Lou Dillon. What California did with the horse is rapidly being repeated with other breeds of live stock.

Of our sheep and hogs, Professor Carlyle, than whom there is no better judge, in the course of an address before the California Livestock Breeders' Association, at the recent State Fair, said: "The coast states—California, Oregon and Washington—are going to breed the swine from which we in the East are going to breed our stock. You have a climate and other conditions which will produce the swine, the bone and the vitality. I saw Poland Chinas and Berkshires here which cannot be equaled in the East. In sheep, too, the Pacific Coast states will beat the East, because you have all the essentials." Having, therefore, the natural favorable conditions, it is assuming too much to say that California will make history among the cattle breeders of the world, and that the breeders of the corn belt will look to California for breeding stock and herd headers, as well as to the grass-fed herds of England and the root-fed herds of Scotland.

And now a word about markets. Among our buyers at the point of delivery there is keen rivalry and healthy competition exists.

The prices for all livestock products have been well sustained for several years and in some instances the supply does not equal the demand; we have had to import the deficiency. With a rapidly expanding population and new markets in the Orient, prospects for the future are good, and what is better, present conditions are good and our stockmen as a class are prosperous.

Dairying in Europe.

The climate of Great Britain and the chief dairy countries of Europe is somewhat different from that of our country, being much more uniform. The extreme temperatures to which we are accustomed are unknown. Their winters are much warmer and summers cooler. The use of ice, which is so essential in this country, is practically unknown there in the ordinary operations of the creamery or dairy. The large concerns are usually equipped with a refrigerating plant where cold storage is desirable, but for the dairies and creameries cold water and a room built partly below the surface of the ground on the shady side of the building answers every purpose.

In the construction of their dairies and creameries our European friends are somewhat in the lead. This may be due in part to the fact that there is little or no wood available for building purposes, making the use of brick or stone quite necessary. I found this true in every

country I visited, and usually the inside of these stone buildings is cool and airy. Some of the private dairies are finely furnished and are models of neatness and order.

The creameries of Denmark and Sweden are usually arranged after a similar plan and consists of a large room for the weighing can, milk tanks, separators, etc., a smaller room for churn and butter work and a room for the boiler and engine. The milk is brought to the creamery in wagons holding a large number of cans. These cans are square, so that they pack closely together, and their capacity is about ten gallons. The milk is bought and paid for according to the per cent of fat it contains, the test system being in almost universal use. All milk is pasteurized by heating to about 165 degrees, separated while hot and the cream immediately cooled to the ripening temperature. A starter is used in ripening cream, and a good quality of butter is usually produced. Europeans demand a butter with less salt than is required by Americans, 3 per cent or even less being the amount usually used.

In Ireland there are about 500 creameries, and through the efforts of the Irish Co-operative society these creameries have been established on a paying basis. The largest concern in the island is owned and managed by Cleaves Bros., with headquarters at Limerick. They employ about 400 people in the various departments of their business and receive milk from every large territory. Some of it is brought in by the donkey teams everywhere so common in Ireland. Two horse teams also collect a part of it. The most up-to-date

arrangement employed is several steam motor cars of about forty horsepower each of which runs through the country and fills its big galvanized milk tanks at the farmer's door, later returning to the main plant. A feature of dairying in Great Britain and Ireland which is not found either on the continent or in America is the use of large quantities of preservatives in butter in order that it may keep for a long time.—*American Agriculturist*.

Demand for Buttermakers.

There is a greater demand for first class buttermakers today at large salaries than we have ever had before, said Professor G. L. McKay in an address before the Minnesota dairymen's convention. We have had more calls for makers at salaries of \$1200 per year than we could supply. This was not because we did not have good men, but because we did not have men enough to go around with all the necessary qualifications.

Buttermakers should enter butter in the educational contests and should occasionally attend some good dairy school if they wish to keep abreast of the times. A great deal more will be required of the buttermaker of the future than has been required in the past. The competition will be greater, with bigger skilled men entering it. Many of our brightest four year college men are taking up dairying as a life profession.

In killing hogs, it is a waste of time to make gambrel sticks every year. Sufficient good ones should be made and kept on hand from year to year, so as to be ready when wanted.

BUFFALO RACING ASSOCIATION

UNDER THE AUSPICES OF THE JOCKEY CLUB.

RACE COURSE:

Kenilworth Park, Buffalo, N. Y.

NEW YORK OFFICE:

23 Nassau St., New York, N. Y.

JUNE MEETING, 1904.

The Meeting will begin Monday, June 6th, and Continue to Saturday, June 25th, 18 Days.

The Following Events are Opened to Close and Name at Midnight of TUESDAY, FEBRUARY 23, 1904:

THE BUFFALO DERBY.

Guaranteed Value, \$6000.

THE BUFFALO DERBY, FOR NOW THREE-YEAR-OLDS. Guaranteed cash value \$6000, of which \$750 to the second and \$250 to the third. By subscription of \$10 each; \$25 additional if not declared by March 22, 1904; starters to pay \$100 additional. Non-winners of \$2400 in 1904 allowed 4 lbs.; of 1903 allowed 6 lbs.; of 1902, allowed 8 lbs.; maidens allowed 21 pounds. One Mile and a quarter.

THE IROQUOIS—FOR TWO-YEAR-OLDS.

Guaranteed Value, \$3000.

THE IROQUOIS FOR TWO-YEAR-OLDS. Guaranteed cash value \$3000, of which \$300 to the second and \$200 to the third. By subscription of \$10 each; \$15 additional if not declared by March 22, 1904; starters to pay \$25 additional. Non-winners of \$2500 allowed 11 lbs.; of \$1500, allowed 7 lbs.; of \$1000, allowed 10 lbs.; maidens allowed 20 lbs. Five furlongs.

THE INTERNATIONAL HANDICAP.

Guaranteed Value, \$1500.

THE INTERNATIONAL HANDICAP, FOR THREE-YEAR-OLDS AND UPWARD. Guaranteed cash value \$1500, of which \$200 to the second and \$100 to the third. By subscription of \$40 each, half forfeit, or only \$10 if declared by March 22, 1904. Weights to be announced March 9, 1904. Winners after the publication of weights of one race of the value of \$1000, or of two races of the value of \$500 each, or of four races of any value, to carry 5 lbs. extra. One Mile and a sixteenth.

NIAGARA SERIAL HANDICAPS.

Guaranteed Value, \$3700.

THE NIAGARA SERIAL HANDICAPS, FOR THREE-YEAR-OLDS AND UPWARD. By subscription of \$50 each, which shall entitle the entry to start in each of the three handicaps: The Cataract, of \$1500; The Rapids, of \$1200, and The Whirlpool, of \$1000. Also all entries shall be handicapped, if duly entered, free for all overnight handicaps during the meeting, thus saving declaration fees.

THE CATARACT.

Guaranteed cash value, \$1500, of which \$300 to the second and \$100 to the third. Weights to be announced three days before the day of the race. Winners after the announcement of weights to carry 3 lbs. extra. One mile and a sixteenth.

Entry Blanks may be obtained from MR. JAMES H. SCANLAN, Emeryville Race Track, and from MR. ED. COLE, Associate Judge, Ascot Park, Los Angeles. Address all entries to The Clerk of the Course, Buffalo Racing Association 23 Nassau Street, New York.

THE RAPIDS

Guaranteed cash value, \$1000, of which \$250 to the second and \$100 to the third. Weights to be announced three days before the day of the race. Winners after the announcement of weights to carry 3 lbs. extra. One mile and a quarter.

THE WHIRLPOOL.

Guaranteed cash value, \$1000, of which \$300 to the second and \$100 to the third. Weights to be announced three days before the day of the race. Winners after the announcement of weights to carry 3 lbs. extra. Six furlongs.

THE GENESEE, SELLING, FOR TWO-YEAR-OLDS.

Guaranteed Value, \$1000.

THE GENESEE, FOR TWO-YEAR-OLDS, SELLING. Guaranteed value, \$1000, of which \$300 to the second horse and \$100 to the third. By subscription of \$10 each; \$15 additional to start. The winner to be entered to be sold at auction for \$3500. If for \$2500 allowed 5 lbs. If to be sold for less, 1 lb. allowed for each \$100 down to \$1000. Selling price to be stated through the entry box at the Course, at 12 o'clock noon of the day before the race, or to be sold for \$3500. Five furlongs.

THE LEATHER STOCKING, SELLING.

Guaranteed Value, \$1000.

THE LEATHER STOCKING, FOR THREE-YEAR-OLDS, SELLING. Guaranteed value, \$1000, of which \$300 to the second horse and \$100 to the third. By subscription of \$10 each; \$15 additional to start. The winner to be entered to be sold at auction for \$3500. If for less 1 lb. allowed for each \$100 down to \$1000. Selling price to be stated through the entry box at the Course, at 12 o'clock noon of the day before the race, or to be sold for \$3500. One mile and a sixteenth.

THE CLINTON, SELLING.

Guaranteed Value, \$1000.

THE CLINTON, FOR THREE-YEAR-OLDS AND UPWARD, SELLING. Guaranteed value, \$1000, of which \$300 to the second and \$100 to the third. By subscription of \$10 each; \$15 additional to start. The winner to be entered to be sold at auction for \$3500. If for less 1 lb. allowed for each \$100 down to \$1000. Selling price to be stated through the entry box at the Course, at 12 o'clock noon of the day before the race, or to be sold for \$3500. One mile and a sixteenth.

Entry Blanks may be obtained from MR. JAMES H. SCANLAN, Emeryville Race Track, and from MR. ED. COLE, Associate Judge, Ascot Park, Los Angeles. Address all entries to The Clerk of the Course, Buffalo Racing Association 23 Nassau Street, New York.

JOHN BODEN, Secretary.

Pertinent Poultry Paragraphs.

If your fowls are kept in pens do not forget to give them some sort of green feed every day.

Green onion tops and surplus lettuce make good feed for young chicks that are kept confined.

The comb is the best indicator of the health of a hen. As long as it is bright red the hen is all right.

Size has nothing to do with merit. This is decided by the amount of profit from a given quantity of feed.

Don't lose sight of the fact that the highest priced fancy fowls are of those varieties that are most valuable for market purposes.

Those who have bantams or want to raise them will find their best birds for the shows of next winter among June and July hatches.

The poultry breeder who does not live up to his advertising should be driven out of the business. There are still a few of them left.

He who has not time enough to give his poultry good care is too busy to make money from keeping it and would better sell at once.

The new American Poultry association has started out on the right line. It will protect the honest dealer by exposing the dishonest one.

Keep ducklings out of the sudden showers of summer until after they get feathers. No young fowl will drown in a hard rain quicker than a duckling.

Let it be the business of one person to feed the chickens if possible. Where half a dozen have charge of the flock it is likely to be neglected by all of them.

Domestic poultry is not subject to disease when carefully attended to. As a general rule it may be stated that disease arises from neglect in some particular.

The man whose hens never pay their way always has that kind for some reason. We have suspected that the trouble was with the man rather than the hens.

It takes hot money and experience to make large profits from the poultry business the same as from any other business. In this world we do not get anything for nothing.

We hear a great deal about overfat hens not laying. It isn't so much overfat as lack of exercise. The hen that is made to scratch for what she gets will get heavy and plump, but never too fat to lay well.

If possible plow the poultry run up two or three times during the summer and sow some kind of grain in the soil. The chickens may not let the crop grow, but they will derive benefit from the freshly turned up soil and the exercise they get in digging out the grain.

On many farms in the west grit is as scarce as hens' teeth and should be supplied. Broken stoneware or chinaware makes the best kind of grit if it is pounded into pieces small enough for a hen to swallow.

A 10 per cent solution of water glass has been found to preserve eggs perfectly if they are kept in a moderately cool place. Use stone jars in preference to any other vessel. Common ash butter tubs are also good.

Whenever you see a good formula for feeding hens to promote egg production you may depend on it that the feed is made up of a great variety of feed stuffs. Variety is the secret of success in egg production.

The poultryman who does not know which of his hens are the best layers is not as well acquainted with the flock as he should be. It is the drones in the flocks of this country that keep the average down to sixty eggs per year.

One reason why eggs are so low priced in summer is because so many go to market in a condition that approaches spoiling. If everyone would be careful to sell perfectly good eggs the average price would be at least 4c higher during the summer.

If your hens have scaly legs do not allow

them to remain in that condition. Mix one teaspoonful of coal oil with two or three of lard, or in that proportion, and thoroughly grease the shanks of the afflicted fowls. This will kill the mites that cause the trouble. It is a good plan to prevent the trouble by greasing the shanks of the whole flock occasionally.—*Commercial Poultry.*

Selecting the Best Cows.

My best cow last year made 504 pounds of butter, the poorest made only 200 pounds. The ten best cows averaged 400 pounds each.

The cost of keeping a cow for the year averaged \$30. The average receipts for cream alone was \$65 each, the increase of the herd and the skim milk which was fed to the pigs would make about \$10 per head more. This income was made on an average price for butter of 20 cents.

This gave me a profit on the poorest cow of about \$10 above the cost of feeding and the profit on the best was about \$70 above the cost of feeding. This is a practical illustration of the value of selection.—F. S. J.

Difference in Eggs.

No matter what is said to the contrary, there is a great difference in the flavoring of an egg. Eggs laid by an active, healthy hen supplied with good fresh food are much finer in flavor, color and smell and taste than those that are laid by hens that are the common scavengers of alleys, hack yards and pigpens.

The department of agriculture at Washington is investigating a new discovery which promises to be of much importance especially to dairy farmers. It is that of manufacturing flour from milk. It is said that the apparatus has been perfected by which milk can be reduced to a powder, which is not sensitive to heat and other conditions which vitally affect milk in its natural state. It is estimated that the cost of producing this milk flour will be about 25 cents per 100 quarts and flour from skimmed milk will probably be sold at 12½ cents per pound. Converted into flour skim milk will have an added value.

It does not give the dehorned stock a fair chance with those having horns to keep them in a lot together. They are at a disadvantage at the trough at the rack, and everywhere where each one needs to assert his rights.

Speaking of killing hogs, trim the hack-bones and spare ribs rather closely, and hang them up to dry. Unless the weather is too warm, they will keep, nice and sweet, for weeks. Don't pack in a box or tub, as they are almost sure to spoil.

One can scarcely expect the best of pork grown in filthy conditions and fed upon any old thing. The flavor of hog dirt is not enjoyed by any one. But we all enjoy good sweet ham.

We see lard and salt recommended for horses with colic. Melt the lard and dissolve all the salt in it that it will take up, then drench the horse with it. Use about one pint at a time.

Jackson's Napa Soda is sold in every city, town and hamlet in the State.

WANTED TO EXCHANGE

A BLOCK OF OIL LAND, RIGHT IN THE oil belt of Kern county, for good standard-bred Trotting Stallion, good size, sound and speedy; bay, brown or black. Give full description and pedigree in first letter. Address J. L. PURCELL, Grass Valley, Cal.

Nothing Excels this Simple Remedy To Cure Coughs, Sore Throat, To Relieve Asthma, Bronchitis.

BROWN'S BRONCHIAL TROCHES

Sold in Boxes only. Avoid Imitations.

THE SARATOGA ASSOCIATION

For the Improvement of the Breed of Horses

J. AGOSTINI, Secretary.

ANDREW MILLER, Treasurer.

RACE COURSE: Saratoga Springs, New York.

NEW YORK OFFICE: The Windsor Arcade, 46th St. & 5th Ave

STAKES TO BE RUN AT THE Summer Meeting, 1904. To Close on Monday, March 7, 1904.

For Three-Year-Olds and Upward.

The Saratoga Handicap of \$12,000. For Three-Year-Olds and Upward. By subscription of \$300 each, half forfeit, or \$25 if declared by June 1st. To the winner \$9000, to the second \$2000, and to the third \$1000. Weights to be announced ten days before the race. Winners of a race of the value of \$4000 after the publication of the weights to carry 5 lbs. extra. ONE MILE AND A QUARTER.

The Saratoga Cnp of \$10,000 For Three-Year-Olds and Upward. By subscription of \$100 each, or \$50 if declared by June 1st for entries made March 7th; and \$300 each for entries made July 1st, when the event shall close. Starters to pay \$100 additional. To the winner \$500 and a cup of the value of \$250, to the second \$100, and to the third \$50. Weight forage. ONE MILE AND SIX FURLONGS.

The Merchants' and Citizens' Handicap For Three-Year-Olds and Upward. By subscription of \$50 each, or \$25 if declared by June 1st. Starters to pay \$50 additional. SILVER MOON

McGREGOR-ALMONT STALLION Size, Style, Substance.

By Silver Bow, Jr. (his dam Magenta by Tempest, next dam by Com. Belmont, etc.) by Silver Bow 11708, son of Robert McGreggor 647 (sire of Cresceus 1583½).

SILVER MOON'S dam Leona 228 (Reg. Vol 12) by Almont 20503, son of Algona 11543, by Almont 33.

SILVER MOON is a square trotter, has a high rate of speed and will be raced on the California Circuit, 1904. The combination of McGreggor and Almont blood in SILVER MOON is an especially desirable outcross for the Wilkes and Electioneer blood which is so numerous in California. He stands 16½ hands high and is sure to produce large handsome horses that will sell well.

Season of 1904 at Pleasanton Race Track—Terms: \$25 the Season

Mares not proving in foal can be returned in 1905 free of charge or money refunded. Best of care taken of mares but no responsibility assumed. Address,

JAMES E. BERRYMAN, Pleasanton, Cal.

Pedigrees Tabulated and type written ready for framing. Write for prices. BREEDER AND SPORTSMAN, 36 Geary Street, San Francisco, Cal.

War and the Meat Demand.

The law of supply and demand makes the market, says the *National Provisioner*. The extraordinary and the high price for it for several years that began with the Spanish-American war bulged livestock values. When peace came and the excitement had settled the domestic market settled down to a normal state.

The Boer war followed the Spanish war. During this South African fight between England and the Transvaal the demand for beef and packinghouse products was extraordinary and every large packinghouse in this country had its order book for foreign shipments well filled. That can be seen when it is remembered that a total force of 350,000 men had to be maintained in the field, 300,000 of whom were on the aggressive and had to be fed from a base which drew its supplies largely from America. It took fully 4,000,000 pounds of beef per week to maintain the British force in the field. Other meats were consumed in proportion. The United States packers supplied nearly 200,000,000 pounds of beef to the British army during the last year of the South African war. In addition to this we had to maintain a considerable force on a war footing in the Philippines and an army on a peace footing in Cuba until late in the spring of last year.

These facts alone would largely account for the very high price of beef during 1902, as army beef had to be of the export order. The call for finished cattle was, therefore, unusually great, so the price paid was a resulting one. The closing of the Boer war, peace in and the evacuation of Cuba and the conquest of the Philippines reduced the necessity for continuously large and high-priced orders for beef. This war demand having fallen off, the beef and, hence, the livestock market drifted back to the normal market upon the normal demand for dead stuff. The result is the present state of the live and dead meat trade. The two wars above named created the unprecedented demand that made the price. The close of those wars found our supply of livestock relatively short and, therefore, left the plane of prices higher during 1903, than they have been—harring 1902—for years.

If Japan and Russia continue at war, the United States may be called upon to supply fully 5,000,000 pounds of beef weekly to the belligerents. That would mean a great deal to the cattlemen of this country. Pork and other food would go across the oceans in large quantities. War, or no war, our meat orders in that direction will be large.

A Calf Sold for \$4000.

The proprietors of the Brothertown stock farms near Deansboro, N. Y., sold the nine-week-old son of Sadie Vale Concordia, their world record Holstein-Friesian cow, to Messrs. Henry Stevens & Son of Lacons, N. Y., for a price reported to be \$4000. Sadie Vale Concordia completed her sixty day butter test on March 27, 1902, scoring 220 pounds of butter in that time. The calf is the bluest blooded bull living to-day. His dam, Sadie Vale Concordia, made 30 pounds 10.2 ounces of butter in seven days, 123 pounds 9.5 ounces in thirty days and 220 pounds in sixty days, all world's records. All the blood in the bull is of the highest strain, and Messrs. Henry Stevens & Son have drawn a prize in him, even at the enormous reported price of \$4000.—*New York Farmer*.

The annual report of the commissioner of internal revenue for the fiscal year demonstrates the fact that there is a large demand in the United States for oleo. When the Groat bill was passed at the last session, putting a tax of ten cents a pound on oleo colored to represent butter, it was confidently expected that the product would be driven from the market. Instead, the report shows that during the year 67,785 796 pounds of uncolored oleo was manufactured in the United States and taxed at 1/4 cent a pound,

Edward Chadhourn, a prominent orchardist of Suisun valley, is quoted as authority for the statement that almond bulls scattered over the land will kill morning glory, and that he has experimented with the same with successful results. The experiment will be tried by other fruit growers.

FOR SALE. TRAINING AND BOARDING STABLE

AT THE EDGE OF GOLDEN GATE PARK and half mile from Speedway. For further information call at office of BREEDER AND SPORTSMAN

McKINNEY STALLION FOR SALE

RUSSELL MC

BY McKINNEY: FIRST DAM CHEERFUL by Larco, he by A. W. Richmond; second dam Russellwood by Lord Russell 4677 by Harold 413; third dam Carlotta by Nutwood 600; fourth dam Lady Mayberry by Chieftain 721. RUSSELL MC, foaled in 1898, is a rich seal brown in color, stands over 16 hands weighs about 1100 lbs. Is a horse of lofty carriage and commanding appearance. He has great muscle, bone and substance. His breeding is of the very best, coming from the strains that have produced the record breakers and great sires and dams. He has shown that he is a fast horse, having trotted in his three-year-old form a full mile in 2:15 1/4, quarter in 33 seconds and won second money in the Occident Stake in 1901. A great opportunity to get a well-bred McKinney cheap. Will be sold for \$500. Apply to or address DR. J. DE BARTH SHORB, Los Angeles, Cal.

PERCHERON AND BELGIAN STALLIONS

The Farmer's Supply of the Middle West. Cedar Rapids (Iowa) Jack Farm

Three importations this season of prize-winning Percherons, Belgians and German Conchers and Catalan Spanish and Majorca Jacks. I have the largest Draft and Coach Horses in America, and will sell more quality for the money than you can find anywhere.

Remember, the largest sale of Imported and High-Bred Jacks ever held in America will take place at the Cedar Rapids Jack Farm some time during the first half of April 1904. Watch for date.

In the sale of Jacks and Stallions to go to the Pacific Coast I arrange with all my customers to make shipment about the first of each month and to go together the purchases and ship them in one car by freight. I now have three head of Jacks in my barn which I have just sold to go to Washington and Oregon, and would like very much to receive orders from California points immediately so that I can send the stock at a load rate. I will probably sell 8 or 10 head more to go in this car, so the transportation will not exceed \$25 to \$35 per head. All parties who want to buy Jacks and Stallions please write me immediately, or come and see me at once. By this arrangement I can save you enough express on Jacks and freight on Stallions to pay your fare here and return to California. Do not wait to write me, but come at once.

W. L. De CLOW, Cedar Rapids, Iowa.

GREEN'S RUFUS 63 (4291)

Will serve a limited number of Approved Mares, Season 1904

FEE - - \$75

Reductions made for two or more mares

Dictatus Medium 32499

Will make the coming season at

Race Track, Hollister, Cal.

Jos Sanchez in charge

\$40 FOR THE SEASON.

Payable at time of service, with usual return privilege. Every care taken to prevent accidents, but no responsibility should any occur. Prompt and careful attention in all cases. Pasture furnished to mares sent from a distance at \$2.50 a month.

A DICTATUS MEDIUM PURSE OF \$100.

I will give a purse of \$100, with entrance money added for a race, best two in three, open to any and all colts from a year old, bred in California, to be run on the 1st of June, 1904. (Exact date to be hereafter announced.) \$5 entrance money, payable June 1, 1905, 35 thirty days before the race. Three moneys: 60 per cent to first horse; 30 per cent to second and 10 per cent to third. For further particulars, address

R. P. LATHROP, Hollister.

DESCRIPTION.

DICTATUS MEDIUM is 6 years old, weighs 1220 pounds. A beautiful turned bay horse with heavy mane and tail kind and gentle, with a perfect disposition. Good flat heavy bone. He has great power and speed. Has a record of 2:24, but has worked out in 2:12. He is a horse that will go out any day and do his best. His colts are models of grace and beauty. Only one so far has been worked. This one, Al Wilson's yearling LITTLE MEDIUM, paced an exhibition 1/4 mile on the Hollister Race Track in 35 1/2 seconds, a 2:33 pace. DICTATUS MEDIUM is by Dictatus 2:17 one of the best bred and fastest horses ever brought to California. The dam of Dictatus Medium is Belle Medium (dam of Stam B. 2:11 1/4), by Happy Medium, grandsire of the dam of Lou Dillon 1:58 1/4. His second dam is Argenta by Almont Lightning, sire of the dam of Zomro 2:11. There is no doubt but Dictatus Medium will prove to be a sire of speed as well as good size, style and disposition.

BAYSWATER WILKES 2:25 1/4

Sire of KELLY BRIGGS 2:10 1/4

WILL MAKE THE SEASON OF 1904 AT

WOODLAND, CAL.

Son of Sable Wilkes 2:18 and Fanny Bayswater

Dam of 2 in 2:30

Fee \$40.

BAYSWATER WILKES is a sire of speed, size, good looks, soundness and gameness. Every one of his produce that has been trained can show standard speed. His sire, Sable Wilkes, also sired Nushagak, sire of Aristo, winner of the Occident and Stanford stakes. His dam, Fanny Bayswater, is the dam of Senator L., holder of the champion four-mile trotting record of 10:12.

Breed to BAYSWATER WILKES and you will get colts that will sell at good prices.

For cards containing full pedigree and all particulars address

S. H. HOY, Winters, Cal.

SIDNEY DILLON 23157

Sire of LOU DILLON 1:58 1/4 (the Fastest Trotter and Greatest Record Breaker in the world), Dolly Dillon 2:06 1/4 (the fastest mare of 1901), B. S. Dillon 2:16 1/4 and Captivity 2:28 1/4.

SANTA ROSA STOCK FARM
SANTA ROSA, CAL.

SIDNEY DILLON was sired by Sidney 2:19 1/4; dam Venus (dam of Adonis 2:11 1/4, Leah 2:24 1/4, Cupid 2:18 and Juno, the dam of Mercury 2:21 and Ida 2:30) by Venture 2:27 1/4. Sire of dam of Directum 2:55 1/4. SIDNEY DILLON is a model of symmetry and imparts his grand individuality, inherent speed and excellent disposition to all his progeny.

Terms for the Season, \$100.

Only a limited number of approved mares taken. Usual return privilege. In case horse is sold service fee will be returned if mares have not proven in foal. Season ends July 1, 1904. Pasture, \$4 per month. Best of care taken of mares, but no responsibility assumed for accidents or escapes. For particulars regarding shipment of mares, etc., address

FRANK TURNER,
Supt. Santa Rosa Stock Farm,

OAKWOOD PARK STOCK FARM,
DANVILLE, CONTRA COSTA COUNTY, CAL.

LIMONERO

RECORD (3) 2:15 1/4

REG. No. 33389

(A Great Sire of Beauty and Early Speed)

By PIEDMONT 9:04 (sire of 6 in 2:20 list and of dams of Fanny Wilcox 2:10 1/4, Alta Vela 2:11 1/4, etc., etc.); dam LULANEER (dam of Limonero 2:15 1/4, Bion 2:19 1/4) by Electioneer 1:35.

LIMONERO 2:15 1/4, bred at the Palo Alto Stock Farm, is one of the best Stallions standing for service in California. He is a magnificent dark bay horse with no marks, and in breeding, class and individuality ranks with any of them. He gets big bays and browns that are sure to be good race horses and high class roadsters. A number of his youngsters are to be seen at the Los Angeles track. LIMONERO 2:15 1/4 got his record as a three-year-old in the fourth heat of a six-heat race for a \$5000 purse which he won at Lexington, beating the great Expressive, B. B. P., Baron Dillon, Axlinite and Futurity. LIMONERO 2:15 1/4 will make the Season of 1904 at the

AGRICULTURAL PARK, LOS ANGELES.

Fee \$25 FOR A LIMITED NUMBER OF GOOD MARES. Excellent pasturage and the best of care taken of mares at reasonable rates, but no responsibility assumed for accidents or escapes. Mares should be shipped to University Station, Los Angeles Co., Cal., in care of

HARRISON G. ARMS,

Owner.

J. H. WILLIAMS,
University Station, Los Angeles, Cal.

The Fastest Trotting Son of McKinney

KINNEY LOU 2:07 3/4

(Winner of \$11,450 in 1903) Will Make the Season of 1904, Limited to One Dozen Approved Mares, at

AGRICULTURAL PARK, SAN JOSE.

Service Fee, \$100.

SEASON ENDS MAY 1, 1904.

KINNEY LOU was one of the great race winners of 1903 on the Grand Circuit, and is a high class race horse game as a pebble and perfectly gaited. He is from race-winning and producing families on both sides, his dam, Mary Lou 2:17, being a great race mare and own sister to the well known race horses Shylcock 2:15 1/4 and Ned Winslow 2:12 1/4. Mary Lou is by Tom Benton out of Brown Jenny (dam of 3 in list) by Dave Hill Jr., next dam by Black Hawk 766. Kinney Lou's oldest colts are two-year-olds and all have size, good color, and are natural trotters with good dispositions.

For further particulars and card containing tabulated pedigree address
BUDD DOBLE, 1030 Pacific Ave. Alameda, Cal.
or San Jose, Cal.

HOW TO KEEP A CAREFUL RECORD

OF STALLION SERVICE: BUY MY SERVICE BOOK. It will bring success to you this season making all outstanding accounts collectible and bankable. It records all the facts you want and none that you don't want, and each service is secured by bankable note. Price of book only 50c. My horse hills and stationery are best and cheapest. Send to-day for free advertising offer and sample pages. Address F. H. ENO, 509 Mulberry St., Des Moines, Ia.

THE CHAMPION SIRE OF EARLY AND EXTREME SPEED.

NUTWOOD WILKES.

He is the only Stallion that ever produced two three-year-olds in one season with records of 2:12 and 2:12 1/4 respectively. Who is it, ex-champion three-year-old gelding of the world, reduced his record to 2:10 1/4. John A. McKerron 2:04 1/4 (2:12 1/4 as a three-year-old) is the fastest trotter of all the famous tribe of George Wilkes.

NUTWOOD WILKES will make the Season of 1904 at the

NUTWOOD STOCK FARM, from Feb. 1st to July 1st.

Fee = \$50

Nutwood Wilkes 22116

SILVER BEE 2:27 3-4

By SILVER BOW 2:16

(Sire 2 in 2:15, 8 in 2:30)

1st dam BELLE Mc (dam of Worthwood (1) 2:50 and Silver Bee (2) 2:27 1/4) by Ensign Goldust Jr.

2d dam LITTLE BELLE (grand-dam of 2 in list) by Belmont (sire of Nutwood 2:18 1/4 and 58 more in 2:30).

3d dam Thoroughbred Mare by Imp. Trustee.

(RECORD MADE AT TWO YEARS OLD)

Season of 1904 at

VORDEN, SACRAMENTO CO.

FEE: \$30 FOR THE SEASON.

SILVER BEE is a handsome, well developed horse, stands 16 hands high and weighs about 1200 pounds. He is a model of symmetry, fine head and neck, short back, legs and feet like iron, perfect disposition and has great intelligence. No more perfectly gaited trotter stands for service and his record is no measure of his speed, as he can show a 2:30 gait at any time. In his blood lines he represents the most fashionable strains. His grandsire Robert McGregor sired that wonderful horse Crescens 1:59 1/4, and on his dam's side he carries the blood of the Goldust family, the most beautiful of all trotting tribes, besides that of the sire of Nutwood, the greatest of sires. His only foal to be trained is Glide, one of the handsomest young horses in Sacramento county, that has trotted a trial in 2:22. Good pasturage at \$3 per month. Every care taken to prevent accidents or escapes but no liability assumed. All hills to be settled before mares are removed. Address communications to MCKINNON & GREEN, Vorden, Sacramento Co., Cal. or to W. O. (JOE) BOWERS, Capital Hotel, Sacramento.

Quinn's Ointment

Will Make A Horse Over;

will put sound legs under him and will save him from the cheap hawker and trader. It is the standard cure for Sprains, Cuts, Splints, Windpuffs and all the various lumps and bunches of like kind. Keep it always on hand and you will be prepared when trouble comes. Leading horsemen everywhere know it and use it.

Mr. H. H. Clark, Fredonia, N. Y., writes: "The bottle of Quinn's Ointment purchased from you about two years ago removed a curb and thoroughpin and did it for good. My horse's leg is as smooth as ever."

Price \$1.00 per bottle. Sold by all druggists or sent by mail. Write for circulars, testimonials, etc.

F. W. KELLEY, Sec'y, 36 Geary St., S. F.

CAMPBELL'S EMOLLIO IODOFORM GALL CURE

For GALL BACKS and SHOULDERS, CRUPPER SORES and SADDLE GALLS there is none superior.

The horse CAN BE WORKED AS USUAL. For BARBED WIRE CUTS, CALKS, SCRATCHES, BLOOD POISONED SORES and ABRASIONS OF THE SKIN it has no equal.

It is very adhesive and easily applied to a watery as well as a dry sore.

Its use will absolutely prevent BLOOD POISONING. In this respect there is no Gall Cure offered which can justly even claim to be a competitor.

We placed it on the market relying wholly on its merit for success, and notwithstanding the fact that comparatively little has been done in the way of advertising the sales of 1903 were 100 per cent greater than the aggregate sales of Gall Cure preceding that year. This increase was entirely due to its MERITS, and from it we feel justified in saying that it is THE GALL CURE OF THE 20TH CENTURY.

It is a quick and sure cure for those troublesome skin cracks under the fetlock which injure and often lay up race horses.

All Trainers Should Have it in Their Stables

PRICE:—3 OZ. BOX, 25c.; 1 LB. BOX, \$1.00.

Read our "ad." on Campbell's Horse Foot Remedy in next issue of this paper.

RITA H. 2:11 1-4

Pacing Mare by McKinney 2:11 1-4

ELECTRO MCKINNEY

Brown Colt, Four-Year-Old Trotter by McKinney 2:11 1-4

RITA H. is a dark brown mare who stands nearly 16 hands high, and will weigh in racing trim about 1050 lbs. This mare has had this year a very remarkable record. She started in the North-western Circuit in the States of Oregon and Washington, and out of eight starts won her first seven races and only lost four heats during the entire circuit, and has a pacing record of 2:11 1/4. The mare is five years old and is excellent on the road. She does not pull or lug, and a lady can drive her anywhere. Last spring she trotted a workout mile in 2:18 1/2 and repeated in 2:16 1/2, after only seven weeks' work. Her owner has driven her in 2:12 1/2 in the Los Angeles Driving Club races, she having won all of them in which she started. This mare can step two heats below 2:10.

ELECTRO MCKINNEY is a brown stallion foaled in 1900, and stands 15 hands 1 inch in height. He trotted a full mile as a two-year-old in 2:31 1/4, last quarter in 35 seconds, and when a three-year-old a full mile in 2:21 1/2, last quarter in 32 seconds. He is perfectly gaited and a grand individual in every respect. Weighs about 950 lbs. ELECTRO MCKINNEY is bred in the purple, and is one of the best sons of McKinney alive to-day. McKinney is undoubtedly the greatest sire for his age, living or dead. ELECTRO MCKINNEY was not raced last year, being only a three-year-old and not entered in any stakes it was decided to hold him over.

These horses are all right and there is not a thing the matter with them, but my business demands are such that I cannot afford to devote any time to racing them. For prices and further particulars address

BYRON ERKENBRECHER,

321 CURRIER BUILDING, LOS ANGELES, CAL.

Or inquire at Office of BREEDER AND SPORTSMAN.

"SAVE-THE-HORSE" Registered Trade Mark SPAVIN CURE

Cured horses are absolute certainties as to the possibility of the remedy for your own case.

Marysville, Ont., Dec. 14, 1903.

The Troy Chemical Co., Troy, N. Y.
Gentlemen,—My horse was affected with a thoroughpin which rendered her almost useless, although a valuable animal being one of a matched pair of roadsters. It was about the size of a goose-egg both inside and outside of the leg. I tried some of our best veterinary skill as well as different blistering medicines with no effect. I worked with it for about one year. Being a subscriber to the "Country Gentleman" I saw your advertisement in it and determined to try it as a last resort as I was discouraged with everything else. When I had used the first bottle I saw a change. This encouraged me and I kept at it and completed a cure. I have no hesitation in saying that I believe "Save-the-Horse" is the best, and would advise all who have a horse so affected to use nothing but "Save-the-Horse". I give you permission to use my name.

Yours truly,
J. G. ALLISON.

On broken down, weak and injured tendons, ruptured ligaments and all strains its power is unerring; permanently cures all broken down conditions of the ankle, hock, tendons or ligaments without scar, blister or loss of hair. No man need see his horse suffer and become incapacitated. "SAVE-THE-HORSE" POSITIVELY AND PERMANENTLY CURES HOCK AND DOG SPAVIN, THOROUGHPIN, RINGBONE (except low ringbone) CURE, SPLINT, CAPPED HOCK, WINDPUFF, SHOE BOIL, WEAK AND SPRAINED TENDONS AND ALL LAMENESS. Apply in all extremes of weather. Horses may work as usual with boots, as no harm can result from destruction of hair or scalding of limb.

\$5.00 a bottle. Written guarantee with every bottle. Constructed solely to protect you. Need of second bottle improbable, except in rare cases. Copy of booklet and guarantee sent upon application. \$5.00, at druggists and dealers, or sent express paid by

TROY CHEMICAL CO., TROY, N. Y.
D. E. NEWELL, 519 Mission St., San Francisco, Cal., Pacific Coast Agent

A Sidney Stallion With Earning Capacity

FOR SALE.

In pursuance of my intention to retire from the business of breeding horses, and having disposed of all my broodmares at auction, I now offer at private sale the stallion

WILLIAM HAROLD 2:13 1-4.

His sire is the great Sidney 2:19 1/2, grandsire of the champion trotter of the world, Lou Dillon 1:58 1/2, and his dam the great race and broodmare Cricket 2:10 (dam of four in the list) by Steinway, the greatest son of Strathmore.

WILLIAM HAROLD is a producer. The only two of his get to start are that wonderfully fast trotter Janice 2:08 1/2 and the pacer Dan Burns 2:15. WILLIAM HAROLD'S services in the stud were very limited up to three years ago, as he was raced. His weanlings, yearlings and two-year-olds are very promising and have size, good looks and great natural speed, besides being uniform in color, nearly all bays. He is a sure foal getter, is in the very best condition, sound and healthy, and with ordinary good business management can earn in the stud in 1904 the price asked for him.

For tabulated pedigree and full particulars, address

WINCHESTER

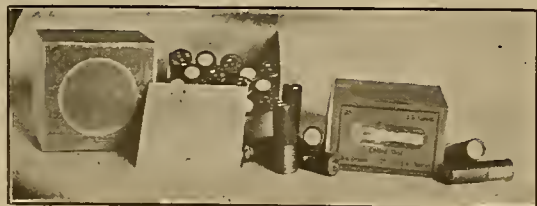

REPEATING SHOT GUNS

A CHANCE FOR A DOUBLE

A QUESTION often asked about Repeating Shotguns is, "How quick can a second shot be fired with them?" Shooters that have used Repeaters answer with one accord: "Doubles" are just as easy to make with a **WINCHESTER REPEATING SHOTGUN** as they are with a double barreled gun. The third shot that a Winchester Repeater gives often hags a badly crippled bird which otherwise would get away. Winchester Repeating Shotguns are made in "Take Down" styles in 12 and 16 gauge.

(ELM RIDGE)

SPRING MEETING, 1904.

Commencing April 30th and Closing May 21st, 1904

NINETEEN DAYS RACING.

STAKES TO CLOSE MARCH 1, 1904.

THE KANSAS CITY DERBY—\$5000 Added. A sweepstakes for three-year-olds (foals of 1901). \$15 to accompany nomination and \$125 additional to start. \$5000 added, of which \$1000 to second, \$500 to third, and fourth to save starting fee. Weights, colts 119, geldings 116 and fillies 114. The winner of two three-year-old races of the value of \$3500 each to the winner, to carry 5 pounds penalty. Starters in 1904 that are non-winners of a three-year-old race of the value of \$2000 or of two of the value of \$1000 each to the winner, allowed 5 pounds. Maidens 10 pounds. One and one-quarter miles.

THE MISSOURI HANDICAP—\$1500 Added. A handicap sweepstakes for three-year-olds (foals of 1901). \$5 to accompany nomination and \$50 additional to start. \$1500 added, of which \$300 to second, \$150 to third, and fourth to save starting fee. Weights to be announced three days before the race. Winner of a race after the announcement of weights, 5 pounds extra, selling race excepted. One mile.

THE SWOPE PARK STAKES—\$2000 Added. A sweepstakes for two-year-olds (foals of 1902). \$5 to accompany nomination and \$50 additional to start. \$2000 added, of which \$300 to second, \$150 to third, and fourth to save starting fee. The winner of one race of the value of \$2000 or of two of the value of \$1000 each to the winner, to carry 5 pounds penalty, selling race excepted. Non-winners of one race of the value of \$1000, or of two of the value of \$400 each, allowed 3 pounds. Non-winners of a race of the value of \$400 allowed 5 pounds. Maidens 10 pounds. Selling race excepted. Five furlongs.

THE KANSAS CITY JOURNAL STAKES—\$1200 Added. A sweepstakes for two-year-old colts and geldings (foals of 1902). IF ENOUGH JUMPING HORSES

\$5 to accompany nomination and \$50 additional to start. \$1200 added, of which \$200 to second, \$100 to third, and fourth to save starting fee. The winner of a race of the value of \$1000 to carry 3 pounds; of two or more, 5 pounds extra. Non-winners of a race of the value of \$500, or of two of the value of \$400 each, allowed 3 pounds. Maidens 8 pounds. Selling race excepted. Four and one-half furlongs.

THE BABY STAKES—\$1200 Added. A sweepstakes for two-year-old fillies (foals of 1902). \$5 to accompany nomination and \$50 additional to start. \$1200 added, of which \$300 to second, \$100 to third, and fourth to save starting fee. The winner of a race of the value of \$1000 to carry 3 pounds; of two or more, 5 pounds extra. Non-winners of a race of the value of \$500 or of two of the value of \$400 each, allowed 3 pounds. Maidens 8 pounds. Selling race excepted. Four and one-half furlongs.

THE ELM RIDGE HANDICAP—\$3500 Added. A handicap sweepstakes for three-year-olds and upwards. \$10 to accompany nomination and \$50 additional to start. \$3500 added, of which \$500 to second, \$250 to third, and fourth to save starting fee. Weights to be announced three days before the race. Winner of a race after the announcement of weights to carry 5 pounds penalty, selling race excepted. One and one-eighth mile.

THE COUNTRY CLUB HANDICAP—\$2000 Added. A handicap sweepstakes for three-year-olds and upwards. \$5 to accompany nomination and \$40 additional to start. \$2000 added, of which \$400 to second, \$200 to third, and fourth to save starting fee. Weights to be announced three days before the race. Winner of a race after the announcement of weights, 5 pounds extra, selling race excepted. One and three-sixteenths mile.

ARE HERE, JUMPING RACES WILL BE INTERSPERSED THROUGH EACH WEEK.

THE HUNT AND POLO CLUB STEEPLECHASE HANDICAP—\$1500 Added. A handicap sweepstakes for three-year-olds and upwards. \$5 to accompany nomination and \$50 additional to start. \$1500 added, of which \$300 to second, \$150 to third, and fourth to save starting fee. Weights to be announced three days before the race. Winner of a race after the announcement of weights, 5 pounds extra, selling race excepted. Four or more horses of entirely different interests, or the race will be declared off. Starters to be named through the entry-hex at the usual time of closing of this day's racing, and those so named are liable for the starting fee. Full course, about two and one-quarter miles.

THE STAR-TIMES HANDICAP—\$1200 Added. A handicap sweepstakes for three-year-olds and upwards. \$5 to accompany nomination and \$50 additional to start. \$1200 added, of which \$300 to second, \$100 to third, and fourth to save starting fee. Weights to be announced three days before the race. Winner of a race after the announcement of weights, 5 pounds extra, selling race excepted. Six furlongs.

THE KANSAS CITY WORLD SELLING STAKES—\$1200 Added. A selling sweepstakes for three-year-olds and upwards. \$5 to accompany nomination and \$50 additional to start. \$1200 added, of which \$350 to second, \$100 to third, and fourth to save starting fee. The winner to be sold at auction for \$3500. If for less, 3 pounds allowed for each \$500 to \$2000, and one pound for each \$100 less to \$500. Starters and selling price to be named through the entry-hex the usual time of closing for this day's racing, and those so named are liable for the starting fee. Fifteen-sixteenths mile.

The full value of all stakes will be paid in cash. Liberal Overnight Events with attractive conditions. No Purse less than \$500.

NOTICE TO NOMINATORS—In Selling Sweepstakes more than two can be nominated, but only two can start.

Entrance Fees Must Accompany Nominations.

SPECIAL NOTICE—No entry will be received for any of these stakes except upon this condition: That all disputes, claims and objections arising out of the racing, or with respect to the interpretation of the conditions of any race, shall be decided by a majority of the Executive Committee present, or those whom they may appoint, and their decisions upon all points shall be final.

The Club also reserves the right to refuse the entries of any person, or the transfer of any entry, and without notice.

GREEN'S RUFUS.....The Baywood Stud, San Mateo

NEXT TUESDAY, March 1st, will be an important date with harness horsemen on this Coast. On that date entries will close for the stakes offered by the Pacific Coast Trotting Horse Breeders Association and also for those offered by the Pleasanton Racing Association. The programs for both these meetings are all made out and advertised, and owners will be spared that worry of former years over the question as to just what days the different classes will be slated for. The Pleasanton meeting will be held the last week in July or the first week in August. It will open the circuit. There is a stake of \$1000 for 2:20 class pacers, one of \$1000 for 2:24 class trotters, one of \$600 for three-year-old trotters and one of \$500 for 2:13 class pacers. All these stakes close next Tuesday. Besides these stakes there are eight classes that will not close until July 1st. All are advertised in our business columns. The Breeders Association offer a program of twelve races, of which four are colt stakes already closed and the other eight are to close Tuesday next. The Pacific Slope Stake for 2:20 pacers is \$1500, and the California Stake for 2:24 class trotters is \$2000. The Green Class trot, which is for horses without records, is \$800. Horses that have started in races are eligible to this class provided they have no records. The 2:13 class trot is \$700; the 2:18 trot, \$600; the 2:10 pace, \$800; the 2:25 pace, \$600; and the 2:14 pace, \$700. The Breeders meeting will be held at Santa Rosa or San Jose, probably the former place. Horsemen should be liberal with their entries this year at both the Pleasanton and Breeders meetings. If good lists of entries are made other associations will be encouraged to get up meetings and offer liberal purses.

SECOND PAYMENT WILL BE DUE on Tuesday next on mares nominated in the Pacific Breeders \$6000 Futurity for the produce of mares bred in 1903. Some of the mares named in this stake have foaled, others are due to foal and a few will not have foals this year. Owners, however, should make the second payment which is only five dollars, on all mares, whether they have foaled or not, as the substitution clause in the conditions of the Stake permits a transfer of the nomination in case the mare or foal dies or the mare slips or has a dead foal or fails to prove in foal. There are a number of applications already in for nominations in this stake and by paying up parties can get all their money back. Those

whose mares have foaled or will foal should not fail to make the payment as eligibility to the stake will make the foal more valuable if one desires to sell, and then the glory and profit of winning any division of the stake will be worth much. Don't let the first of March go by without making the payment. It pays to enter in the big stakes.

THE WESTERN HORSEMAN has issued a souvenir number that is a beauty and full of good things. Its business columns show that there is great prosperity in the trotting horse breeding business in the Middle West.

BOARD OF APPEALS MEETING.

W. G. Durfee, the Los Angeles Trainer, is Reinstated.

Strong Resolutions Adopted Censuring Mr Joseph Cairn Simpson.

The Pacific District Board of Appeals of the National Trotting Association met at the office of its Secretary, 36 Geary street, on Thursday evening of this week to consider the application of W. C. Durfee, the well known trainer and driver of Los Angeles, Cal., for reinstatement.

As will be remembered by our readers, Mr. Durfee was expelled from the turf last September by the Oregon State Fair Association for refusal to comply with Section 6, Rule 27 of the N. T. A. rules. In the Greater Salem Stake at the Oregon State Fair Mr. Durfee started the mare Sweet Marie and won the first heat in 2:13½ with Briney K. second and Dr. Hammond third. In the next heat there was a head and head finish between the same three horses, Dr. Hammond winning by a short head in 2:12½, Briney K. being second and Sweet Marie third, a head behind Briney K. When the horses came out for the third heat the judges told Mr. Durfee that Mr. Tilden would drive Sweet Marie. Mr. Durfee refused to permit Tilden to drive, took his mare from the track and was thereupon expelled. He asked for a hearing of his case before the District Board of Appeals and the case came up Thursday evening. The members of the Board present were A. B. Sprckels, Chairman, J. C. Kirkpatrick, and Capt. N. T. Smith, Second Vice-President of the National Trotting Association and ex-officio member of the Board. The new member, Mr. John A. McKerron, was not present.

After the application of Mr. Durfee and the reply of two of the judges had been read, the testimony of the following witnesses were taken: Robert Leighton, Presiding Judge at the meeting; Chas. Jeffries, Manager of the Spokane Fair; A. T. Van De Vanter, President of the North Pacific Fair Circuit and Manager of the Seattle Fair Association; Ed Hughes, driver of Dr. Hammond, and W. G. Durfee the petitioner.

There was but little variance in the testimony. Presiding Judge Robert Leighton testified and was sustained by the other witnesses that the only point first held by the Judges against Mr. Durfee was that he carried Dr. Hammond wide going round the first turn in the second beat, which Mr. Durfee explained was owing to the fact that the inside of the track was cut up for the runners and was not good footing. It was agreed by all the witnesses who were questioned on the matter that the Judges themselves had no thought of punishing Mr. Durfee for laying up the beat until President Webrung and Secretary Wisdom came into the stand and demanded that he be taken out and Mr. Tilden substituted in his place. The judges evidently were of the opinion that the officers of the association had the power to instruct them in their duties and they acted accordingly.

Mr. Durfee's petition for reinstatement alleged that he did not pull the beat but drove his best to win, and that as Tilden and he were not on speaking terms he did not want him to drive his mare, and that in any event the punishment was excessive. It was brought out in the testimony that had he been allowed to start the mare Sweet Marie in the other races in which she was entered and in which by her expulsion she was not permitted to start, it would have made a difference in his favor of approximately \$4000.

After hearing all the testimony the Board unanimously decided that Mr. Durfee and the mare Sweet Marie should be reinstated.

After the Durfee case had been disposed of the following resolution was introduced and unanimously adopted:

WHEREAS, E. P. Heald who has been an honest and efficient member of the Board of Appeals of the National Trotting Association for the last ten years, and

Whereas much to the regret of the members of this

board his place has been vacated and another appointed in his stead, and

Whereas Mr. Joseph Cairn Simpson who at the courtesy of the Pacific District Board was appointed on the Rule Committee at the National Trotting Association Congress held in New York, February 10, 1904, and

Whereas said Simpson agreed at the request of N. T. Smith, second vice-president of the National Trotting Association, to nominate the old board and recommend their reappointment, and

Whereas, it now appears that before Mr. Simpson left to attend said Congress that he agreed with Mr. John A. McKerron to have him appointed in place of Mr. Heald, thereby showing that Mr. Simpson did not expect or intend to carry out the wishes of the Pacific District and as a result showed said Simpson acted against the interests of said district and proved false and disloyal to his trust: now, therefore,

Be it resolved that the expression of this board is one of disappointment, regret and disapproval of the action of said J. C. Simpson.

Resolved that in justice to Mr. Heald, this Board takes pleasure in declaring that Mr. Heald, during the ten years he has been a member of this Board, has been faithful, honest, just and industrious in the discharge of his duties and enjoyed the confidence and respect in a superior degree of his associates, and they would very much like to see him back on the Board. His position as a member of this Board had the support and approval of every member of the National Trotting Association in the Pacific District.

Kansas City Jockey Club Stakes.

On Tuesday next, March 1st, entries will close for the stakes offered by the Kansas City Jockey Club. This, the first meeting of this new and enterprising club, surely deserves the support of all horsemen, as its stake offerings are most liberal, and as there will be no purse offered of less value than \$500 added, its daily average distribution should be as large, if not larger, than that of any other club during the time of their meeting in the West.

They offer three stakes for two-year-olds—the Swope Park Stakes, five furlongs; the Kansas City Journal Stakes, four and a half furlongs; the Baby Stakes (for fillies) four and a half furlongs. The largest of which is \$2000 added, the smallest \$1200 added.

For three-year-olds they offer the Kansas City Derby, one and one-quarter miles, with \$5000 added, and the Missouri Handicap, one-mile, with \$1500 added.

For three-year-olds and upward they offer five stakes—one of these being a steeplechase called the Hunt and Polo Steeplechase. This has \$1500 added. The Elm Ridge Handicap, one and one-eighth miles, has \$3500 added, and is one of the richest handicaps offered in the West, and the Country Club Handicap, one and three-sixteenths miles, has \$2000 added—this handicap to be run the latter part of the meeting.

They also offer a stake for sprinters, called the Star-Times Handicap, with \$1200 added, and a selling stake, fifteen-sixteenths of a mile, called the Kansas City World Stakes, with \$1200 added.

Horsemen should notice that the entrance fee is very light, as in the majority of stakes it is only \$5 to enter. This stake offering will compare favorably with any club in the West.

The Kansas City Derby is conditioned so that it will not penalize the winner of a single Derby—a horse to get a penalty must win two Derbys, yet non-winners of \$2000 will have an allowance, giving them a chance to even defeat a derby winner. As to the two year old stakes, there is a stake for fillies and a stake for colts and geldings, the distance of each being four and a half furlongs, each of these having \$1200 added, and the Swope Park Stakes, with \$2000 added, at five furlongs.

This meeting will open April 30, and continue nineteen days, closing May 21.

Whitney Stable to Be Dispersed.

NEW YORK, February 25—Almost the entire racing stable of the late William C. Whitney will be sold at public auction within the next few months. Harry Payne Whitney, who under his father's will is the sole executor of the estate, decided a few days ago that he would follow this course.

Eighty splendid broodmares on the farm near Lexington, Ky., will be kept, however, as will several of the stallions, including the great Hamburg, for which Whitney paid \$60,000, and Meddler. It is said that he will also keep Cudde, the winner of the Metropolitan Handicap at Morris Park last year.

In all the Whitney racing stables contain about 250 horses. It is said to-day that Whitney will retain nearly 100 of these and put the remainder under the hammer. The majority of the horses, notably the yearlings and two-year-olds, are at present stabled at Aiken, S. C., in charge of trainer John Rogers.

JOTTINGS.

THE TURF CONGRESS of the National Trotting Association which held its biennial meeting at New York, Feb. 10th, furnished a number of surprises. The amateur element which has been battling for some time for recognition by the National Association finally won a victory and succeeded in electing many new members of the Board of Review. Among the more prominent of the new members are Mr. H. K. Devereux of Cleveland, Mr. C. K. G. Billings of Chicago, Senator Horace White of Syracuse, Major J. M. Johnson of Calais, Maine, Col. F. E. Perkins of Providence, Rhode Island, Mr. Jas. Butler of New York, and Mr. John A. McKerron of San Francisco. There were fifty-three delegates present at the Congress and they held 374 proxies. Some of the parties who have been making the loudest protests against the proxy system, were themselves the leading holders of proxy ballots, having concluded as one of them is said to have remarked, "to fight the devil with fire." It is also stated that while no test vote was taken of the strength of the opposing forces, that had one been called for there would not have been a majority of a half dozen votes either way.

The opposition had two measures which they centered their forces on. The first was the placing of representative men actually connected with the business of conducting race meetings on the Board of Review. Right here is where Prof. E. P. Heald, member of that Board from the Pacific District, was knifed in the back by an enemy who followed the old game of "playing both sides against the middle." If there has ever been a member of the Pacific District Board who has been "actually connected with the business of conducting race meetings," it is Prof. Heald. As President of the Pacific Coast Trotting Horse Breeders Association he has been a most active and energetic official, attending all its meetings and giving a large part of his valuable time to their management. In fact he has been the only member of the Board of Appeals who has been "actually connected with the business of conducting race meetings." His high standing, his personal and business integrity, and his genial personality, have made him one of the most beloved and highly respected men on the Pacific Coast connected in any way with harness horse breeding and racing, and that he should be removed was a surprise to every true friend of the industry here, and is considered an affront by every association on the Pacific Coast that was represented at the Turf Congress by proxy or otherwise.

The files of the Eastern turf journals just at hand throw a little light on the transaction. Mr. Joseph Cairn Simpson of Oakland was a delegate to the congress with two proxies, but the reports do not state whether these were given by associations on this Coast or not. Mr. Simpson had been appointed a member of the Rule Committee by President Johnston, and of some twenty or thirty proxies sent on from this Coast it was especially conditioned that Mr. Simpson should not be permitted to vote any of them. In fact, Mr. Simpson went East instructed that no changes in the Board of Appeals of the Pacific District were desired. It is well known here that between President Heald and Mr. Simpson there has been ill feeling for a long time. The demand of the opposition element for changes in the Board of Review therefore gave Mr. Simpson his opportunity, and the result looks as if he had embraced it. The members of the National Trotting Association on this Coast knew little and cared less for the factional strife that was being waged in the East. They were simply in favor of all measures that were considered for the best interests of harness racing. Had they known an effort would have even been attempted to remove Prof. Heald from the Board of Appeals, they would have sent a strong protest against such a proceeding, and a delegate to represent their interests. But they did not, and it was thus very easy to include the Pacific District Board in the list of those in which changes were made.

The other change which the opposition wanted and which it has been fighting for for some time was a rule that would permit them to charge gate money at some of their meetings without their horses incurring the penalty of any record or bar. Frederick Watson, manager of the New York Department of the American Horse Breeder writes of the action on this measure as follows:

"This was one of the 'bones of contention' over which the opposition intended to contest, and had not the rule been drawn with great care it could not possibly have passed without testing the strength of

the opposition to the limit. As it was there was actually no opposition, after some explanation was made regarding one clause in the proposed rule. This was that all amateur clubs, taking advantage of this rule, must be members of the League of Amateur Driving Clubs and they must also be members of the National Trotting Association. It was explained that the reason it was insisted upon that the amateur driving clubs must join the league was, that the league would then be responsible for the genuineness of the amateur standing of the clubs, and must therefore, for its own protection and credit see that no attempt was made by any club to evade the penalties of professionalism under the guise of amateur racing. The rule permitted only one race meeting each year at which gate money could be charged, at which no records were incurred, and the meeting must not exceed three days. After the rule and its bearing on the smaller amateur clubs was explained, it passed without any further opposition. The passage of this rule does not have any effect on the ordinary matinees at which no gate money is charged, and that rule under which the amateurs held their matinees last season without getting records remains unchanged."

While the new rule will doubtless be hailed with delight by the amateur organizations, there is no question but it will take the most careful scrutiny and watchfulness on the part of the National Association to prevent its abuse, and the management of the League of Amateur Driving Clubs will have a job on its hands. In every sort of sport it has always been very difficult to keep the line clearly drawn between professionals and amateurs owing to a consuming desire on the part of many "to eat their cake and have it." It is to be hoped that the new rule has been so drawn that the time of the next meeting of the Board will not be entirely taken up with protests against infractions of this rule.

A. J. Meston, so long in charge of the advertising department of the Fasig-Tipton Co., has resigned and taken a like position with James Butler. If he applies the same principles to advertising Mr. Butler's groceries that he did to getting out the Fasig-Tipton literature, Butler will have to call in all his horses in training and hitch them to his grocery wagons in order to deliver the goods on time.

The fact that the popular actor, Denman Thompson, is now on a farewell visit to San Francisco with his play, "The Old Homestead," recalls a story which the great reinsman, Budd Doble, tells on him, and which illustrates Uncle Josh's "weakness" for attending the races. Some years ago when the Prince of Starters, the lamented James Caldwell, was alive and engaged in wielding the flag at one of the San Francisco tracks, Doble, Caldwell and two or three other horsemen were standing in the lobby of the Palace Hotel about the noon hour. Denman Thompson passed by and Caldwell hailed him, asking if he intended visiting the races that afternoon.

"No," said the eminent actor, "I am very busy to-day and I can't go."

"You had better come out," replied Caldwell, "there is a good handicap on to-day and it will be a great race."

"No," retorted Thompson, "I'll not go—too many things to attend to to-day. I'd like to, but I can't spare the time."

With that he started to walk away, when Caldwell, taking a five-dollar piece from his pocket, banteringly remarked, "I'll bet you this five, Denman, that you go to the track."

Thompson halted a moment, looked at the five, and, with a twinkle in his eye, replied:

"I'll not take the bet, Jim, as I think you've got a shade the best of it."

Walnut Grove Farm Stallions.

The stock farm situated at that beautiful spot on the Sacramento river known as Walnut Grove, and which bears that name, has made considerable trotting horse history already and will make much more in the future. Mr. Alex Brown, its proprietor, is an intelligent as well as an enthusiastic horse breeder and believes in advancement all the time. The Walnut Farm sires, Nushagak and Prince Ansel, will make the season of 1904 at the farm, the first at a fee of \$50 and the other \$30 for the season.

Nushagak is without doubt one of the handsomest and best formed stallions in California. Like many other well bred young sires he had a very limited number of mares until his colt Aristo 2:17½ came out and won the Occident and Stanford Stakes, and he has since been well patronized. While he has but a very limited number of foals Aristo is not the only fast one, as the same year his daughter The Bouquet trotted fast enough to have won both those stakes had Walnut Grove Farm started her instead of Aristo. Another filly Majella, took a yearling record of 2:29 and had a four-year-old trial of 2:13½. Aristo was not raced last year as a four-year-old, but at the

State Fair was worked a mile in 2:11 with a dozen watches held on him.

The sire of Nushagak is Sable Wilkes (son of Guy Wilkes and Sable by The Moor). Sable Wilkes held the three-year-old record of 2:18 and has sired 38 standard performers. The dam of Nushagak is Fidelia, dam of Fidette 2:2½ and granddam of Mary Celeste 2:17½, by the great Director 2:17, the next dam is a daughter of Reavis Blackbird 2:22 and the next dam by Lancet, son of McCracken's Blackhawk. Here is a rare combination of blood lines. Wilkes, Director, The Moor, Blackbird and Blackhawk. The Wilkes family have won a majority of the races for years. The Moor sired Beautiful Bells, the greatest of all broodmares, and the family is noted for handsome horses. Director founded one of the greatest racing families ever seen on the turf. The Blackbirds were game race horses and the Blackhaws one of the best branches of the Morgans. The combination is one of speed, soundness, good looks, long life and great power of endurance.

Prince Ansel is a son of Dexter Prince. He was one of the sensational two-year-olds of his year and took a race record of 2:20½. His sire has a big list of race winners with low records, such as Eleata 2:08½, James L. 2:09½, Edith 2:10, etc. The Dexter Princes are all large horses with excellent conformation and all have great speed. The dam of Prince Ansel is Woodflower, a producing daughter of Ansel, son of Electioneer, the next dam is the famous mare Mayflower 2:30½, that has produced two in the list and has eight producing daughters. Prince Ansel has no colts older than three years, and only three of that age. One of these now at Pleasanton is the only one ever shod and be can beat 2:30 now. At \$30 the season Prince Ansel should make a big season this year.

Los Angeles Driving Club Matinee.

A big attendance was drawn to Agricultural Park, Los Angeles, on Monday last, Washington's Birthday. It was the first meeting at which cups were awarded the winners, President Byron Erkenbrecher offering a silver trophy for the free for all pacers, and the club giving another for the 2:20 class trot. The President's cup, which is a very elaborate and handsome trophy, must be won three times to become the permanent property of the winner. Mr. Robert A. Smith won the first race for this cup with the pacer Harry Hurst by Delwin. The Club cup was won by Dr. C. W. Bryson with George B. The first race of the day was won by Mr. Alfred Solano's Honolulu Maid, driven by W. A. Mosher. The second race went to Dr. J. DeBart's Sborb's Chantwood. The next event was a race for polo ponies, one quarter of a mile and was won by Sea Foam ridden by Dr. Edwards, who "put it all over" the other riders. The fourth event was the trot for the club cup. The fifth race went to the good colt Tee Dee Cee by Zombro, owned and driven by Mr. Geo. E. Lattimer, a member of the Buffalo Driving Club, and a new comer to Los Angeles. Tee Dee Cee won his race easily trotting one beat in 2:20. The next event was the free for all pace for the Erkenbrecher cup, and was won as stated above by Robert Smith's entry Harry Hurst. Mr. M. B. Mosher, owner of Athlene, drove her to victory in the seventh race, and the eighth race was won by Glen owned and driven by G. A. Pounder. The last race on the program was a three furlong dash for ponies nominated by ladies. Mrs. William A. Maier's nomination, Toto, won ridden by Dr. Edmonds. The summaries follow:

First race, 2:40 class, mixed—Honolulu Maid won two straight beats, Maudie second, Jack M. third, Tripoli fourth, Ruby A. fifth; time 2:34, 2:38.

Second race, 2:20 class, mixed—Luna won two straight beats, Chantwood second, Riverside Wood third, Nell fourth, Bonnie Carlotta fifth; time 2:24½, 2:27½.

Third race, polo ponies, quarter-mile dash—Sea Foam won, Crescent second, Bobby Bobbs third; time 0:27. Fleet also ran.

Fourth race, 2:20 class for driving club cup—George B. won, Electra second, Rondow third, Zombretta fourth; time 2:16, 2:20, 2:17.

Fifth race, match—Tee Dee Cee (Lattimer) won, Maud (Black) second; time 2:20, 2:25½.

Sixth race, free-for-all pace for Erkenbrecher cup—Harry Hurst won, Billy K. second, Wood B. third; time 2:21½, 2:16.

Seventh race, 2:35 class, mixed—Athlene won, Willie Jib second, Charlie Dunn third, Gray Bess fourth, Neerbird fifth; time 2:25, 2:29, 2:27.

Eighth race, 2:30 class—Glen won, Toughnut second, Chicora Girl third, Chino fourth; time 2:19, 2:20.

Ninth race, ladies' plate for Galloways, three-furlong dash—Toto (Edmonds) won, Crescent (Tom Weiss) second, That Boy (H. Weiss) third; time 0:41 seconds.

A fine surrey, one of the best made, and handsomely finished is for sale at about half its value by the Kenney Manufacturing Company, 531 Valencia street, San Francisco.

One of Electioneer's Best Sons.

That Electioneer was the greatest sire of trotters that has yet been produced is beyond question if the records are the proof. He has 158 trotters with standard records, which is 23 more than any other stallion has yet produced, and this in spite of the fact that he has been dead more than thirteen years. As a sire of pure gaited trotters, he probably outclasses every stallion thus far bred, and consequently intelligent breeders are looking to his sons for the same great qualities that he possessed. One of the very best sons of Electioneer now living is that fast, clean gaited trotter, and game race horse, Alta Vela 2:11½, owned by Mr. F. Gomet of this city, and now in the stud at San Jose in charge of Hans Frelson. Alta Vela was bred at Palo Alto farm. His registered number is 2249 and his record, made in a hard fought race, is 2:11½. But three of Electioneer's get—Aion 2:07½, Sunol 2:08½ and Palo Alto 2:08½—have faster records, and no horse ever sired by that great son of Hambletonian has cleaner or more perfect trotting action. He trotted his races without hoots and without heavy weighting and his gait comes as near being the poetry of motion as ever shown by a trotter from Lady Suffolk to Lou Dillon. Mendocino, sire of Monte Carlo 2:07½ and other fast ones, is a much admired stallion at the present time. He is by Electioneer out of a mare by Piedmont and that is the way Alta Vela is bred. Alta Vela's dam is Lorita by Piedmont, and had a trotting record of 2:18½. Her dam was the great broodmare Lady Lowell by St. Clair, and produced Ladywell 2:16½ and Lorita 2:18½, besides being the grandam of six with records better than 2:30. The next dam was Laura that produced the horse Doc that sired the great trotter Occident 2:16½, at one time holder of the champion record. As a race horse Alta Vela never had a superior in his class. He would fight out as many heats around 2:12 as any horse and come back game every time and finish his heats in a manner that it always took a faster horse to heat him. His experience in the stud has been limited, but his colts are of good size, solid color, bays or browns, and all good lookers. In looking over the lists of stallions from which to choose one to book your mares to, do not miss the name of Alta Vela. His fee is \$50 and he will heat the San Jose race track during the season.

Small Breeders Have a Chance.

"Some men who are breeding on a small scale seem to think they stand small chance in the futurities with the men who are breeding on an extensive scale, and they are therefore reluctant about nominating mares, says the *Horse Breeder*. But the facts don't seem to bear out this view of the case. We can name at least three prominent money-winners in the futurities that were not named by large breeders. Sadie Mac 2:11½ is the most conspicuous of the lot, for it is well known she was the winner of the Kentucky Futurity of 1903, and was the only nomination of her breeder, J. M. Johnson. Katherine A. (2) 2:14 won the two-year-old division of the Kentucky Futurity in 1902, and third money last year in the same stake, and she, too, was the only nomination of her breeder, James E. Clay. Barongale 2:15½, winner of second money in the Kentucky Futurity last year, was one of five nominated by Riverside Park Farm."

It is the same out here in California. The winner of the two-year-old trotting division of the Breeders Futurity last year was Almaden, owned by Mrs. C. A. Durfee, and her only nomination. The winner of the two-year-old pacing division was Seymow, owned by Elmo Montgomery of Davisville and was his only nomination. The winner of the Occident and Stanford Stakes was Tuna, one of the five nominated by Oakwood Park Stock Farm. Tuna was sold by the Farm to Ben Chahoya, who in turn sold her to Henry Sanders, who won the Occident with her and then sold her to Mr. J. De La Montanya of this city a day or two before she won the Stanford Stake.

The First Ball-Bearing Sulky.

Many years ago when I was in New York at the stables of the late Z. E. Simmons, a man came in and showed a pair of "pully blocks" with which he claimed that a man could hoist a bale of hay or straw as easily as a horse could do the work with the ordinary rig. It struck Mr. S. that if such a device could be applied to a sulky wheel it would be a very great improvement. He wrote to parties asking if it could be done, and if so requested them to do the job and send the wheels to him. They did so.

I attended a harness race at Fleetwood Park, some time afterwards, when Dan Mace, Dan Pfifer, Johnny Murphy, John Lovett and others were contesting. Murphy won the first heat, Pfifer the second and Mace the third and fourth, with Murphy far behind at the finish. Mr. Simmons said to Murphy, "Johnny,

your horse seems to be tired; he can't get up the hill." "Yes," replied Murphy, "my chances are gone; my horse gives it up." Mr. S. said, "Perhaps if you will change sulkies he will do better. I have a lighter running sulky than you; try him to it."

Murphy did not think it would make any difference. He said, "I can't win," but to please Mr. Simmons he changed the sulky. To my surprise and that of many others Murphy won the fifth and sixth heats. Riding home that night with Mr. Simmons, he said to me: "That change of sulky was very lucky for Murphy; it made him win the race." Of course I agreed with him, and was glad of it. Mr. S. laughed loudly and said "Do you remember the man who came to the stable some time ago wanting me to buy those pulleys that could lift so much very easily?" I replied that I did. "Well," said he, "I got to thinking if they could be converted to the wheels of a sulky it would be an improvement and it was, and that is the sulky."

I need not say that I was much astonished. "I have never told anyone about that sulky," said Mr. S., "only you, and I know you won't make it known." On account of the controversy now on the Maud S. performance, I thought it would do no harm to report what I had seen in the early days of the ball-bearing trotting sulky.—J. M., V. S., in *American Horse Breeder*.

Dan Patch 1:56 1-4 in a Fire.

Recently while making a trip from Chicago to Minneapolis writes "Driftwood" in the *Horse World*, I had got as far as LaCrosse, Wis., where I bought an evening paper, and despite the big scare head lines announcing the first blood for Japan against the Russian bear and then telling about the Baltimore fire my eye fell first on a smaller heading which read "Fire could not destroy Dan Patch. Neither can it destroy us" (this was the announcement of a safe deposit company). I was a little curious to know if Dan had really been in a fire, so when I got to the International Stock Food town I looked up Mr. M. H. Savage, the genial owner of the famous pacer and to my surprise found that he had actually run the gauntlet of fire only last Sunday. It all came about through a defective flue that had been doing service for the past seven years. When the blaze was first discovered the boys tried to put it out, but could not, so the fire alarm was turned in and the department was soon on hand, and not a minute too soon. In the meantime Mr. Savage had appeared on the scene and naturally was giving an impromptu war-dance over the possibility of losing Dan Patch. Dan wears never-slip shoes in winter and when he is jogged the calks are put in and when he returns they are removed. The boy who takes care of him did not lose his head. There was about as much danger from ice as from fire, so he went into Dan's stall and put the calks in place and when he got ready led the horse out through the portion of the barn that was on fire and right into the face of the fire engines that had gotten into place by this time in front of the barn. Dan was seemingly the coolest one in all the crowd, and apparently the least concerned. The other horses in the stable had to be gotten out through the usual methods of blindfolding. The fire was soon under control and less than \$200 damage was done. The incident shows some horses are great, and that to be so, first of all they must have a brain that is active and can grasp a situation the same as in the human family.

Ben Kenney on Lou and Nancy.

"Nancy Hanks," the one time trotting queen, could not have beaten Lou Dillon, the world's fastest trotter," says the trainer and driver Ben Kenney. The latter developed the sensational mare of a decade back, and up to the present time has always maintained that Nancy Hanks was in harness horse racing a mare without a peer. Continuing, Kenney says: "I know there is a marked difference in the make and weight of the sulky pulled by Nancy Hanks when she scored her mark of 2:04 and that drawn by Lou Dillon when she trotted in 1:58½. It is my opinion that with the same sulky used by Lou Dillon's owner in his assault against time with his great mare and the additional help of the leading runner, instead of a pacemaker at side, that Nancy Hanks would have a faster record now to her credit than 2:04; but the reason that she could not beat the present queen of the turf is simply because the California-bred mare has more speed. I never saw Nancy Hanks trot a quarter faster than 0:29½, and I saw Lou Dillon on several tracks the past season go a quarter of a second faster, to say nothing of her sensational performance that distance on the Speedway of the metropolis. Nancy Hanks was a very great mare, but Lou Dillon is greater, and any horse with ever a chance to beat her must come from the future—not out of the days gone by."

Horses vs. Automobiles.

A party of horsemen, among whom were some who had tried the "chug-chug" cars, were comparing notes one evening at a regular meeting-place of the handlers of the ribbons, and some of the stories told by those who had experimented with the "lever" were funny indeed. One of those who had tried driving the wagon without the horse said that the hardest thing he had to learn about the business was to remember that the automobiles "could not see." As he put it, "I was always used to driving horses that could be pretty well trusted on the road to look out where they were going, and I have had some that would turn out of their own accord when they met another wagon or were going to pass one. Oftentimes at night I have had to depend entirely on the horse's eyesight and trust to him to steer clear of obstacles, so when I first tried to run an automobile I forgot that the fool thing could not see, and that it was necessary to keep steering it 'all' the time."

"The consequence was, that I was continually either almost running over or into something, or into the ditch, and only for the fact that I was cautious about going fast at first, and so generally had time to 'recover my senses,' and steer out of danger before I actually did hit anything, I must certainly have got into a bunch of trouble. One time, however, I did do the trick up in real shape. I invited my best girl out for a ride, something I had often done in the days when I had a horse in front of my wagon. Now my horse was used to 'one-hand driving,' and was of that kind that you did not have to keep even one eye on all the time. We got along well enough in the automobile for a while, but as soon as we got out into the country roads I began to pay a little more attention to my girl and a little less attention to the machine, and the next thing we knew we ran into the ditch, and some part of the machinery broke. We had to leave the machine there and walk home. My girl was so mad with me that she only spoke once during all that walk home, and then she said: 'The next time you ask me to go riding with you, you take a horse,' which advice I followed you can bet."

Another horseman in the crowd, who had tried the gasoline burners, said that the hardest thing he found to overcome was "not to talk" to the machines. He said that the first time he tried handling the lever he could not prevent himself from clucking to it to get it started, and when he wanted to stop he commenced to say "whoa, whoa," in fact, as he put it he got so mad with the machine because it refused to answer to his order to "whoa," that he commenced to tug at the lever instead of working it right, and got the whole machinery mixed up generally, and only for the fact that there was an expert sitting alongside of him, there would certainly have been an accident.

A short, but decidedly funny story came from another one of the party. This man was in a business wherein he used a horse and wagon to make a round of calls, and had been persuaded to try an automobile. He did not attempt to drive much on the first trip himself, but on making the first stop on his rounds commenced to feel under the seat for something and not finding it exclaimed in an angry voice, "that blamed fool at the barn has forgotten to put in the tie strap."—Fred Watson in *Am. Horse Breeder*.

Two Probable \$5000 Purses.

While none of the Grand Circuit tracks have as yet published their programs of early closing events, all of them are studiously considering their arrangement and will undoubtedly soon be in the field with the official announcements. The current of change, the movement toward new methods, is apt to be still stronger this year than last. As evidence of this we may state that while the large advance purses of the earlier Circuit meetings have invariably, in the past, been offered for the slower classes, there are apt to be notable departures from this system. The management of at least one of the early August meetings is debating the offer of two \$5000 purses which, instead of being for 2:24 or 2:30 horses, will be, in all probability, for 2:11 trotters and 2:08 pacers instead. The number of candidates for these classes is larger and often they are better matched in the early season than in the so-called "slow" classes, where the presence of a Direct Hal or a Rhythmic destroys the element of sharp contest which attracts the public to the gate. If these proposed purses are offered they will also be conditioned much on the plan used in similar ones by Messrs. Welch and Jones at Hartford and Cincinnati. There will be but three heats, each heat a race. In each heat \$1500 will be divided among the first three horses in the ratio of 60, 25 and 15 per cent. At the close of the race the horse standing best in all three heats will be awarded the remaining \$500 of the purse money. This plan affords opportunities for as many as nine horses to win portions of the purse, while it also obviates the possibility of a prolonged, exhausting contest, which is sometimes damaging in its effects on the contestants early in the campaign.

It seems to the *Review* that such purses as these ought to be highly successful. If the disposition to support them is demonstrated, they will surely be given at the meeting in question.—*Horse Review*.

Answers to Correspondents.

WM. MEAD, Santa Maria—Please give me the breeding of the stallion Hanford Medium, also his record and when made, against what horses and who drove him.

Answer—Hanford Medium, bay horse, foaled 1888, by Milton R., dam Tave by Signal. His record is 2:11½, made September 9, 1896, at the State Fair at Sacramento. It was in the 2:14 class pace, won by Welcome, who took the first, second and fifth heats in 2:10½, 2:10½ and 2:15½. Del Norte took the fourth heat in 2:13½ and took second money. Hanford Medium won the third heat in 2:11½ and third money. Al Gregor, Plunkett, Belle and Prince Almont were the other starters. Hanford Medium was driven by S. H. Hoy in this race we believe.

A. Salinas—Please publish in next issue the 2:30 performers sired by Robin, son of Live Oak Hero?

Answer—Robizola 2:12½, Black Bart 2:17½, both trotters, and Roblet 2:12 and Cock Robin 2:20, both pacers. There may be others but these are all reported in the Year Book.

W. MILLER, Honolulu—Kindly inform me through the columns of your paper of the breeding of imp. Crighton, where foaled and who his California owner is and what the horse's performances were in Australia. Also kindly inform me in what year Rarus trotted against Goldsmith Maid.

Answer—Crighton is a chestnut horse, blaze face, foaled 1889 and was bred by Mr. James Lee, of Larras Lake, New South Wales, Australia. He is by Cliveven (son of Yattendon and Lady Chester) and his dam is Ghinni Ghinni by Barbarian out of Nightshade by Kingston. He is now owned by Mr. A. B. Spreckels of this city. Previous to coming to America Crighton won the A. J. C. Maiden Stakes, 1½ miles, 107 pounds in 2:40; was beaten only a head by Trieste (the best filly in the Colonies) for the Biennial Stakes, 1½ miles, Crighton carrying 127 pounds to Trieste's 124, and was beaten a head for the Queensland Derby, after being left thirty yards behind at the start. At Bay District track, imp. Crighton won some good races and was accounted a phenomenally fast horse. Twice he has taken first prize at the San Francisco Horse Show, a fact that speaks volumes for the horse as an individual.

Rarus met Goldsmith Maid at San Francisco, May 26, 1877.

ROBERT HORNER—Please publish in your paper the breeding and registered number of the following thoroughbreds: Puryear D., Emma Collier, Joe Stacey and Alpheus. Also the full breeding of Dictatus Wilkes 17,800.

Answer—Thoroughbreds have no number. The number of their certificates of registration can be obtained by writing to The Jockey Club, The Windsor Arcade, New York. Dictatus Wilkes 17,800 is by Dictator 113, dam Manola by George Wilkes, third dam Lizzie Brinker by Drennon, fourth dam by Copperbottom.

S. F. L., San Francisco—Can you give me the breeding of the horse Askotb, he by imp. Lord Esterling?

Answer—The correct spelling of this horse's name is Asquith. He is by imp. Lord Esterling, dam Tarpeia II. by imp. St. Blaise, second dam Tarbouche by Kingfisher, third dam Touques by Monarque.

W. G. GOODMAN, Galt.—Kindly give in your valuable paper the breeding of Lady Beth, dam of Rosie Woodburn, also state if registered.

Answer—Lady Beth is by Goldnut (son of Nutwood and a mare by Sportsman). Her dam was by Cave's Bellfounder, and was a full sister to Colonel, a stallion that had a record of 2:32 and won a two mile race in 5:48 at Sacramento in 1882. Lady Beth is not registered.

SPINKS, Sacramento.—Kindly give me the breeding of Lady Bird, also her age, and oblige a subscriber.

Answer—There are several mares by that name. Please write us which one you mean.

The Horse and His Origin.

In an interesting address of the Hon. C. E. Stubbs, at the late Portland, Or., live stock meeting, among other things he said: "In some countries we find the horse the object of veneration and worship, and in all the constant companion of the greatest princes and mighty conquerors of the day. On the sun-parched deserts of Arabia the horse shared the same tent as his master; drew the war chariots of the conquering chieftains and bore the sovereigns of the orient on their gala day parades. In war he was indispensable to the armed knight, and the prowess of the most redoubtable warrior was often measured by the speed and courage of his charger. Poetry and song have portrayed his sterling qualities, and the legends of that prehistoric period had filled the eastern world

with interest in the equine race thousands of years before the advent of the Christian era. Some of our most eminent students of equine history have divided the horse kingdom in its aboriginal state into five distinct classes, which were known and designated entirely by their color. The white horse and the gray were found in an untamed state in their original habitations to the north of the Black sea in Europe and in western Asia. In the latter place the white horse was consecrated to pagan dieties and always preferred by oriental monarchs for use upon all state occasions. The bay horse was indigenous to northern Persia and the great plains east of the Caspian sea. Here in the very cradle of our earliest civilization the horse first became domesticated, and performed a most important part in the evolutions of that prehistoric age. One of the most interesting of the five early families into which hippologists have divided the horse kingdom was the dun. His original habitation was in central Asia, and in his wild state was a mountain animal that climbed the lofty peaks and scaled the precipitous mountain sides with the utmost security. The piebald horse was another important branch, and deserves more than passing attention. He was originally found on the high plateaus of Thibet, in an altitude thousands of feet above the level of the sea, where, protected by rugged mountain ranges, he is yet found in limited numbers in his untamed state.

"The piebald played a most important part in the development of the Grecian empire, and equine writers tell us that 'he has ever been, when left to himself, the most clannish of horses, refusing to mix

the merchants in your home town who use the largest amount of advertising space are the most successful, the most prosperous and are worth the most money. They made it out of their business by advertising, by letting the public know what they had to sell in their line of trade. The same proposition will bring similar results to stallion owners. The stallion owner may argue that his stallion is known to all the owners of brood mares in his section of country, or all that own mares in easy reach of his stallion. The same conditions prevail in the case of the local merchant, every farmer and citizen of the country or city knows who the merchants are and they have known them for years. But they don't go to his store simply because they know the merchant. They go because the merchant advertises something that attracts their attention. The same kind of goods may be on the shelf of another merchant in the same town, who does very little advertising, but nine times out of ten the people buy of the merchant who advertises. The season of the year is at hand to advertise stallions. Perhaps you did advertise last year, or two years ago. You may say "it did not pay, that you cannot trace any business to the advertisement." Do you suppose that every customer who goes to a store to buy goods tells the merchant that he came in because he saw the business advertised? Successful business men advertise all the time. They get the trade coming to their stores and they hold it by constantly advertising. Suppose the merchant quit advertising, and a new store should open up in the town, why the old merchant would lose his business. The expense

The Abbot 2:03 1-4

with any other race, and resolutely preserving his peculiar distinction through untold ages.' The last, but not the least of this grand division of the horse family was the black. He is said to have been the largest of the five divisions, and was found further to the west. In the valleys of the Rhine, the countries, unrestrained by man, was found a race whose progeny is the foundation of every breed of draft horses in the world today. Whatever may be said of the division of the horse family in colors, it is an undeniable fact that the horse has always been closely identified with every movement of human progress and is in no small degree responsible for the rise and fall of ancient dynasties and the evolution of empires. It is said that for a period of over 3000 years the horse can no where be found to have been used for common work and that 'not until the eleventh century does he make a historic appearance in agriculture.' The ox and the ass having heretofore performed that service. It is susceptible of historical proof that the horse entered upon his domestic career as an element of worship, a warrior and a colonizer, and when the minds of man became more enlightened and war ceased to be the chief vocation of the human race, other and more useful work was imposed upon the horse."

Does it Pay to Advertise?

Judicious advertising is necessary in all lines of commercial business in order to succeed. The above statement is easily verified. Just look over your country paper or a daily, if you subscribe for the latter, and carefully examine the largest and most attractive advertisements therein. You will find that

of a season's advertisement is small. Every stallion owner can afford to do a certain amount each year. The more he does the better it will pay.—*Spirit of the West.*

Death of The Abbot 2:03 1-4.

Following close on the death of Beautiful Bells, The Abbot 2:03½, best son of her best son, died at the Scannell Stock Farm, Fishkill, New York, February 20th, after an illness of two days. The Abbot was a bay gelding foaled 1893 and was bred by Mr. C. J. Hamlin of the celebrated Village Farm, East Aurora, New York. He was sired by the Falo Alto bred stallion Chimes, son of Electioneer and Beautiful Bells, and his dam was Nettie King 2:20½ by Mambrino King, grandam Nettie Murphy by Hamlin's Patchen. The Abbot was campaigned several years for Village Farm by Ed Geers, who drove him to his record at Terre Haute, Indiana, September 25, 1900, in an effort to beat 2:04. Geers drove him a workout mile in 2:03½ to wagon one morning at Cleveland, being timed by a number of horsemen. He was sold at auction in New York two years ago and purchased by Commissioner John C. Scannell, of New York City, who owned him at the time of his death. Mr. Scannell paid \$26,500 for him, which was the largest price ever paid for a trotting gelding until Mr. Smathers paid \$40,000 for Major Delmar last year. The Abbot raced through the Grand Circuit for years, meeting all the free for all trotters and defeating them repeatedly. He was the fastest of the descendants of Electioneer.

Jackson's Napa Soda does not tangle the feet.

Notes and News.

Entries close Tuesday next

For Pleasanton and Breeders meeting.

Visit the Haywards Horse Show to-day.

Grass is growing very fast in Central and Northern California and pasturage is good.

Kenney, the bike doctor, makes a specialty of putting solid and cushion tires on carts, buggies and bikes.

Providence will open about the same early closing classes as last year, which means a \$10,000 2:14 trot and a \$10,000 2:11 pace.

The Livermore Horse Show will be held Saturday next, March 5th. A large number of draft horses will be on exhibition as will many trotting stallions and fine roadsters.

J. L. McCarthy & Son have issued a very handsome catalogue for their second spring horse auction at Irvington Park, Portland, Oregon, which opens on March 1st. Over 180 horses are catalogued.

Second payment of \$10 is due and payable Tuesday next, March 1st, on foals entered in the Special Harness Stallion Stake inaugurated by the State Agricultural Society. This payment is on foals of 1902.

J. W. Zibhle has taken his string to San Jose. He stepped the three year old colt Allesandro a half in 1.12 over the Golden Gate Park speedway a few days before he left, and the colt was not all out by a good deal.

M. J. Reams came down from Rush & Haile's Stock Farm in Solano county this week and purchased of W. J. Kenney, 531 Valencia street, a No. 30 McMurray cart to work his horses to this spring and it's a beauty.

The Trotter and Pacer says: "C. K. G. Billings is en route to California. Prior to leaving the east he pledged a Lou Dillon Day for charity to Philadelphia enthusiasts. Just like him. Always ready in any emergency."

The death of The Abbott 2:03½ which occurred last Saturday is a misfortune. There were many who thought this great gelding would have been able to reach the two minute mark this year had he lived and kept in good condition.

Don't overlook Monterey 2:09½ this year. He is Sidney's fastest son, and his get are good lookers and fast. He'll sire a great one before long and then there will be a rush to him. Breed now and get in on the boom that is sure to come.

Monroe Salishury's old favorite Margaret S. 2:12½, by Director, one time rival of Nancy Hanks 2:04, is a regular on the Philadelphia roads at eighteen years of age. She holds her speed, it is said, and can yet step with the cracks to wagon.

Sadie Moor 2:26, the handsomest little roadster owned by Rev. W. J. Speers of Oakland, has a handsome little black colt at her side that arrived on Friday of last week. He is by that grandly bred stallion Guy McKinney and a credit to both sire and dam.

Sam Gamble has Stam B. 2:11½ nicely established in comfortable and cosy quarters at the old Valensin farm, the former home of Sidney, about three miles from Pleasanton. Stam B. will have a good season this year, and a better lot of mares than he has had in former years.

The stallion San Diego 8776, sire of Lottie 2:15, died recently at Woodland. San Diego was by Alcona Clay 2756, dam Fontana (dam of Silas Skinner 2:17, etc.) by Almont 33, granddam Fanny Williams (dam of Bay Chieftan 2:28½) by Abdallah 15. He was bred by Mrs. Silas Skinner of Napa.

Don't fail to make the second payment of \$5 on Tuesday next on the mare you entered in the Pacific Breeders Futurity No. 4. If the mare has not foaled yet and you are not certain she will, make the payment anyhow as there will be plenty chances to transfer it and get your money back.

Head of Kinney Lou 2:07 3-1

There recently arrived at the Excelsior Stables, 1000 Geary street, this city, two handsome roadsters that are for sale. One is a cream colored gelding with white mane and tail and a perfect beauty. The other is a large, fine, bay gelding, an own brother to that fast horse Geo. W. Bennett by Alex. Button.

Only sixteen pacers stepped miles in 2:06 or better the past season. Of the sixteen, fourteen were sired by horses with records, and the fastest record of any of the sires of 2:06 performers or better, is Star Pointer 1:59½, with Joe Patchen, 2:01½, the second fastest sire. Of these 2:06 performers, not any two of them were sired by the same horse.

Nutwood Wilkes 2:16½ has a representative hack east that is said to be a show horse. John Splan recently sold this colt to M. H. Tichenor, the leading dealer in high-class carriage horses in New York. The colt is a two year old and is by Nutwood Wilkes 2:16½, dam Ella 2:29 by Electioneer, second dam Lady Ellen 2:29½, dam of six in 2:30, by Carr's Mambrino.

The Jesse D. Carr estate has sold the handsome and well bred stallion Boodle Jr. to Mr. Cressey of Sacramento. Boodle Jr. is a well bred horse and is a sire of good looking foals. He is by Boodle 2:12½, dam Nina B. by Electioneer, next dam Gahilan Maid, own sister to the great broodmare Lady Ellen by Carr's Mambrino. The terms of the sale are private.

Mr. Geo. L. Warlow, has a very fine two year old

Many of the more common digestive troubles of the horse are directly traceable to some imperfection of the teeth. Neglect of these often leads to imperfect mastication, impoverished condition, irritability, digestive disturbances and eye derangements. When dentition goes on regularly, the colt gets sixteen new teeth, eight in each jaw, between its second and third years. Therefore, the mouth should be often and carefully examined at this period, and all irregularities adjusted. If the colt's system seems to be in a languid condition, this will retard dentition and should be remedied by extra feeding, especially of oats.

Alexander MacLaren, Buckingham, Que., owner of Larahie the Great (3) 2:12½, recently bought the mare Lady Mary Tudor by Directum 2:05½, dam Pearl McGregor 2:23½ by Robert McGregor 2:17½. Her second dam is the dam of three: third dam, dam of two in the list. This mare was sold in New York a little over a year ago for \$1200 to Robert Stewart, Aylmer, Que., of whom Mr. MacLaren bought her. At the same sale one of her yearlings sold for \$2200. She is said to have a world of speed, but has somehow been a hard mare to control. Mr. MacLaren bought her to breed to Larahie the Great, and she ought to prove a very valuable broodmare. Larahie has been bred to sows very high class mares in the last two years, the result of which should enhance his reputation as a sire. Mr. MacLaren has a yearling by Larahie, out of the broodmare Susan Stout by Ondale, that recently sold for \$2000, which he thinks very well of.

Tohe Broderick, trainer and driver of trotting horses, showman, clamhake promoter, and politician, died at Ottawa, Ill., February 5th, after a week's illness. He was forty-eight years old. Broderick was a well known character about Chicago for twenty years, and numbered among his friends the leading politicians of both parties. He planned the first race meeting on a snow course in Chicago, and for many years the Tohe Broderick snow derby was an event looked forward to with interest by the owners of harness racers. Broderick was born in Cambridge, Mass. Before going to Chicago he was one of the best known drivers of trotting horses in the East, bringing out, among others, the trotter Judge Brigham, now known to the records as Jay Gould 2:21½. In 1892 he was a member of Buffalo Bill's show, and traveled around the world.

For all kinds of weather there is no drink like Jackson's Napa Soda—plain or in a lemonade.

Saratoga Racing Association.

The stakes for the summer meeting of 1904 which will close on Monday March 7th, one week from Monday next, are advertised in this issue. The Saratoga Handicap has a value of \$12,000 and is for three-year-olds and upwards to run one mile and a quarter. The Saratoga Cup has a cash value of \$10,000, and is for three-year-olds and upwards to run one mile and six furlongs. The Merchants' and Citizens' Handicap will have \$3000 added money and is for three-year-olds and upwards to run a mile and a furlong.

The Champlain of \$3000 is a handicap for three-year-olds and upwards to run one mile and a furlong. The Delaware Handicap has \$1500 added, the distance is one mile and is for three-year-olds and upwards.

The Amsterdam and The Catskill are selling races each having \$1500 added, and the distances are one mile and seven furlongs respectively.

For the three year olds there is the Saranac Handicap, \$5000, one mile and a furlong. The Huron, a handicap with \$1500 added, one mile and a sixteenth.

Entrance to Speedway Golden Gate Park

Museum on Main Drive, Golden Gate Park

C. W. Marks believes that James A. Murphy's top-notch road pacer, Don Derby 2:04½, can pace three blocks to any Chicago's pacer two and a half. That means a sixteenth of a mile lead when he may meet anything on Grand Boulevard, as all know there are eight blocks to the mile with charming regularity in Chicago. Fanfaron 2:11½ can fly on a smoothly trod snowpath to light cutter. A race is on almost every day and never has Chicago enjoyed such a run of good sleighing.

colt by Athadon that he calls Athasham which he says is the best and fastest two year old he has ever raised. When it is remembered that Mr. Warlow bred and raised Athanio 2:10 that took a two year old record of 2:19½, and adds that Athasham is a better colt than Athanio, it will be seen that this two year old must be a good one. Mr. Warlow makes his statement from actual tests and trials that he has given Athasham who is now but twenty-one months old.

The Seneca, a selling race, \$1500 added, six furlongs. The Mohawk, \$1500 added, one mile and a furlong.

The two year olds have five stakes having a value of from \$1500 added money to \$5000 in The Adirondack a six furlong race. Address all entries to the Secretary of the Saratoga Racing Association, Windsor Arcade, 46th street and 5th avenue, New York City.

THOROUGHBREDS AND PONIES.

Owing to the unsettled weather the international polo tournament, which was to have been commenced at the Burlingame Country Club to-day, has been postponed until March 12th or 14th, the exact date to be announced later. The pony races scheduled for this meeting will be held at Tanforan track, as the track at Burlingame is not wide enough to accommodate the large fields that are made certain by the big entry list.

In the deciding game of polo played at Del Monte on Friday of last week the Burlingame Country Club team scored a brilliant victory over the English players.

The honors of the day were shared by Thomas A. Driscoll and Walter S. Hohart of the winning team with Captain Neil Haig of the losers.

The score stood seven goals to two in favor of the Whites at the beginning of the last period of play. Tom Driscoll scored immediately after the ball was tossed in. The Reds then ran up a sequence of four goals, but their effort came too late, as the bell sounded the end of the game with the score eight goals to six. The teams were made up of the following players:

Whites—C. Garland, T. A. Driscoll, W. S. Hohart, John Lawson.

Reds—B. Williams, W. McCreery, R. Chaplin, Captain Neil Haig.

Referee, F. J. Mackey; umpire, E. Ezra; timekeeper, J. O. Tobin.

Walter Hohart and Tom Driscoll each scored four goals, Captain Haig three, Walter McCreery two and Basil Williams one. Tom Driscoll electrified the spectators by picking the ball out of a scrimmage a few moments after play commenced, and with three strokes he scored the first goal. The Reds nearly scored shortly after. Before the end of the period Tom Driscoll scored again.

The Reds made a determined stand in the second period and for a time seemed to have the better of their opponents. It was not for long, however, as the Whites soon regained possession of the ball. Walter Hohart ran it down the field and placed it for Garland, who nearly scored. John Lawson was playing a brilliant game, and was loudly applauded for a stroke from the sideline in which the ball went just outside the posts. Walter Hohart made up for this lost opportunity just before the end of the period by scoring from the seventy-five yard line.

He added another point to the score of the Whites in the third period, sending the ball between the posts at an awkward angle. When the ball was first tossed in for this period Tom Driscoll picked it out of the scrimmage and ran it down the field, placing it for Walter Hohart, who just missed scoring. Captain Haig, the big, bluff Englishman, who is so great a favorite with the spectators, nearly scored from the seventy-five yard line. The play all through this period was fast.

Captain Haig scored the first goal for the Reds early in the fourth period on a free stroke after a foul. Walter McCreery scored a second goal almost immediately on another free hit, this time after the ball had been driven out of the bounds on a safety hit.

Tom Driscoll, on his big white-faced pony Jim Driscoll, drew a round of applause from his adherents early in the fifth period. He picked the ball up near the middle of the field and with the other players strung out behind him like the tail of a comet ran it to the goal in three strokes. He was in an awkward position for the decisive stroke, but as he galloped past he sent the ball squarely between the posts. Soon after he placed the ball for Walter Hohart, who scored on an easy shot.

Captain Haig proved a host in himself in the last period and turned the tide of battle decidedly in favor of the Reds. Excitement was intense as point by point the Reds drew up on their opponents. When the bell finally sounded they were but two short of the number required to make the score a tie. The score in favor of Captain Driscoll's team was 8 to 6.

Saturday the program of pony racing drew an immense crowd to the track at Del Monte. Mr. Walter Hohart's Silver Dick and Mr. Rudolph Spreckels' Becky were the only starters in the first race. The betting throughout was slightly in favor of Silver Dick, who was installed an 8 to 10 favorite. Lawrence McCreery, who proved the cleverest gentleman rider of the day, sported the colors of Rudolph Spreckels on Becky, cerise, with green fleur de lis.

Silver Dick showed the manners of a perfect gentleman at the post, being as easily handled as a shetland pony. There was one false start and then the two great ponies were sent on their journey. Dick out-

broke Becky at the start and won under restraint by two lengths. After the race Mr. Tobin said he did not know it was a start, owing to the confusing orders of the starter, and that he threw Becky out of her stride when he finally got away.

Silver Dick nearly met with a reverse in his next start, over a distance of three-sixteenths of a mile. With F. J. Carolan's chestnut mare Bonnie he raced out in front of the field of five. All the way through the stretch they ran like a double team. As they approached the wire Mr. McCreery drew his whip and Silver Dick responded gamely. Mr. Carolan ceased his urging of Bonnie just for an instant, and Dick gained a nose decision.

Rudolph Spreckels' beautiful mare Becky reinstated herself in public favor by gaining a popular victory in the last race on the card. She seemed much improved by the race she ran earlier in the day, and covered the quarter mile in the fastest time of the meeting. She was away well and held her field safe throughout, winning by two open lengths from Carlotta.

F. J. Carolan's Fusillade, the diminutive scion of a noble family, made a show of his field in the three-quarter mile race. Ridden by Mr. Carolan, who was eleven pounds over his allotted weight, he won in a common canter. Lawrence McCreery laid too far out of it with Lotrix in the early part of the journey. He had too much ground to make up when the stretch was reached and finished a poor second.

Fusillade is one of the best bred ponies living. He is by St. Leger out of Fusee. St. Leger was sired by the noted Doncaster, which also sired Ben d'Or; the

Walter Hohart's Silver Dick

latter sired Ormonde, the horse of the century. Fusee, the dam of Fusillade, was by the famous Australian horse Carbine. Summary:

Del Monte pony races—First race, one quarter of a mile—W. S. Hohart's Silver Dick (L. McCreery), won; Rudolph Spreckels' Becky (R. M. Tobin), second. Only starters. Time, 25 seconds.

Second race, three eighths of a mile—W. E. Pedley's Carlotta (F. W. Wilson), won; Paul Clagstone's Miss Miller (P. Clagstone), second; R. Spreckels' Joyful (B. Williams), left. Time, 37½ seconds.

Third race, one-half mile—L. McCreery's Lucy Glitters (L. McCreery), won; R. and W. McCreery's Sunset (R. McCreery), second; Dr. E. J. Boeseke's Sadie (F. W. Wilson), third. Time, 53½ seconds. Fretful also ran.

Fourth race, three-sixteenths of a mile—W. S. Hohart's Silver Dick (L. McCreery) won; F. J. Carolan's Bonnie (F. J. Carolan) second; R. and W. McCreery's Vitesse (R. McCreery) third. Time, 19 seconds. Maud H. and Pat also ran.

Fifth race, three quarters of a mile—F. J. Carolan's Fusillade (F. J. Carolan) won; R. Spreckels' Lotrix (L. McCreery) second; Dr. E. J. Boeseke's Lucille (F. W. Wilson) third. Time, 1:25. Pechome also ran.

Sixth race, a quarter of a mile—Rudolph Spreckels' Becky (R. M. Tobin) won; W. E. Pedley's Carlotta (T. W. Wilson) second; F. J. Carolan's Floradora (F. J. Carolan) third. Time, 0:24½. Miss Miller also ran.

Paul Clagstone's Miss Miller, the Seattle mare of which so much was expected, proved a disappointment. She was fractious at the post in the second race and delayed the start. When Starter Cody finally sent the field away, Mr. Clagstone, who rode Miss Miller, was so tired he could not do her justice. She finished second to Carlotta. In her next start her rider dismounted after she had fought with him for some time.

Lawrence McCreery, on Lucy Glitters, outfinished his brother Walter, on Sunset, in the third race, winning by a nose. The remainder of the field was beaten off.

The meeting was a brilliant success in every particular. The track appointments, under the direction of Robert Leighton, the clever racing secretary, and clerk of the scales, were a duplicate of those to be seen on any up-to-date metropolitan course. General A. W. Barrett, as presiding judge, filled every requirement. Thomas A. Driscoll was paddock

judge and clerk of the course, and had the horses ready to file out of the saddling paddock at the sound of the hughle. The riders all sported new silken colors, which added picturesqueness to the scene.

Washington's Birthday was celebrated by an excellent program of pony racing. F. J. Carolan's ponies won three of the races, McCreery Brothers' two, Walter Hohart's Silver Dick one, and Rudolph Spreckels' Maud H. one. Silver Dick carried 165 pounds in his race and won in 24½ seconds for the quarter of a mile.

Mr. Joseph Terry of Sacramento has hooked his three good mares, Phyllis, Alicia and Divina, to the imported stallion Canopus owned at Rancho del Paso. Canopus is by Sheen, dam Charmian by Bertram, or Galopin; second dam Lucetta by Tithorpe; third dam Verona by Orlando, and fourth dam Iodine by Ion.

It is said that the first thoroughbred ever insured was Emilius, winner of the Derby in 1823. The insurance amounted to only \$500. He was one of the most successful stallions in the history of the turf.

Strange and unaccountable fatalities which followed in the wake of horses named after prominent Memphians and western folk in general and the sudden and sometimes tragic death of half a dozen wealthy residents of this city for whom horses had been named has caused a change in the nomenclature to be chosen for the present band of juveniles which are to be christened with names for their 1904 campaign, says the Chicago Horseman.

J. W. Schorr, the wealthy Memphis brewer, was first to abandon the plan to honor good friends and customers with thoroughbreds bearing their initials, names or part names. During the first few years horses he named for Memphians and St. Louis people were winning performers as the feats of Sam Phillips, winner of the St. Louis Derby of his year; Eddy Busch, Lady Schorr, Alard Scheck, Watkins Overton, W. Overton, F. W. Brode, Joe Frey, winner of the California Derby, and many others will testify. Then came a change in quality of the horses bearing names of Memphians, however, later on, and while the outside world may never have heard of Pat Carlin, Mike Carlin, G. W. Mohr, Fred Breens, Joe Mancini, and others named after local men of business, the local following knows that they are thoroughbreds with blue blood in their veins, but barren of usefulness on a race track; and many were the jokes hurled at the gentlemen whose names the horses bore, usually trailing in far behind the fields.

Main street and other business thoroughfares in Memphis might serve as a good index to a stud book or racing guide, for every few yards there is the name of the men or firm for whom some stake horse or selling plater has been named.

Things have changed now. Merchants with any special brand of cigars, drugs, chill cure or whisky are not clamoring with owners to christen their young stock with their names, and owners are adopting other names for their two-year-olds.

The cause of it all is that several prominent men have suddenly become deranged or met death under unusual circumstances. George Arnold, that good son of Sir Dixon, that was killed in a railroad wreck and for whom his owner received a verdict for \$20,000 in court, was first of the Memphis-named horses to meet death, and the man for whom the horse was named followed shortly afterward, although up to a few weeks before death he had enjoyed good health all his life.

The horse W. Overton was a kind of Hindoo at Washington Park, and St. Louis, during the meetings of 1899, but when he was retired to farm for winter rest near St. Louis, W. Overton bled to death from entanglement with a barbed wire fence. Watkins Overton, a member of one of the oldest families in the state and the party for whom the horse had been named, is generally supposed to have taken his own life in his residence by sending a bullet through his brain.

One of the most expensive yearling investments J. W. Schorr ever made was in a son of Hanover, which was subsequently named Fred Hessig, in honor of his oldtime friend, who was a member of the famous Chickasaw Guards in their championship days. Fred Hessig proved a disappointment and on being sold to other parties the horse was relegated to a life of drawing an Arkansas plow, and when last heard from he had been kicked to death in his stall by an angry mule. Lately the news was brought of the death of Fred Hessig, the namesake, in Paducah, Ky. Hessig had been demented for several months and died a lunatic.

For this and other reasons owners are not anxious to name their horses for Memphians and Memphians are not making inducements to owners to have any particularly richly bred youngster named after them.

NEW YORK LETTER.

Interesting Gossip about the Turf, the Polo Field and the Kennel.

NEW YORK, Feb. 19, 1904.

The principal topic among racing men is still the death of William C. Whitney and its effects on racing in this section, and the more one considers the matter the plainer it appears that, while racing loses mainly a liberal patron, the calamity of his death effects more the breeders than racing itself.

Of course the death of a man of Mr. Whitney's parts is a loss to the community, but he was only a public character as far as his interest in racing went, and he takes with him only his personality. There is no principle that he represented, he was not the harrier in the way of any wrong influence, and the enemies of honest racing gain nothing by his absence.

As a man of charming personality, who could be appreciated but by those who had the good fortune to be brought in contact with him personally, Mr. Whitney will be very much missed.

As a liberal patron of the sport, and enthusiastic supporter of the movement to elevate the turf and develop the Saratoga Association, he is decidedly a loss, but his death will strike the hardest blow to the breeders, because they not only have lost one of their best customers, but the dispersal sale of his enormous stable will glut the market, which is already suffering from the overproduction of the last few years.

The fate of *The Morning Telegraph* interested newspaper and racing men because it has been the only New York paper specially devoted to racing for many years.

This paper was acquired by W. C. Whitney who also purchased its rival, *Daily America*, which he discontinued. The policy of the *Telegraph* was extravagant and with no apparent purpose, so that as an organ of racing it was a failure.

At the end of the Eastern racing season, Mr. Whitney apparently withdrew his support and the paper ran down until it began to be a question whether it would exist through the winter.

On top of this, Mr. Whitney's death made its future even more problematical until it was announced that H. P. Whitney, his elder son, had announced that he would run the *Telegraph* himself. This settles the matter temporarily, at all events.

STEEPLECHASING.

The Steeplechase people have been more active during the off season than the Jockey Club has. At their annual election they succeeded in replacing a lot of useless incumbents on the list of stewards, with such good, practical workers as Harry J. Morris of Baltimore, Joseph E. Widener of Philadelphia, and E. V. R. Thayer of Boston.

They took the active management of steeplechasing more in their own hands, relieving the Jockey Club of some of its duties.

This branch of racing is becoming both popular and fashionable. There are more high class horses and more high-class men in it than there has been. There is more money to be won also, and valuable stakes are being planned.

The element of the hunt meetings held on the grounds of the different hunting clubs is growing into something of importance. Heretofore these meetings were mere social functions held informally with nominal prizes to be won. Now they are carried out under the supervision of the National Steeplechase and Hunt Association, and there are open races with a thousand dollars added.

The gentleman rider has come to the front in the last few years, partly because of the opportunity these amateur meetings afford and partly because we have no other school from which to draw our supply of professional cross-country jockeys. Formerly the flat race jockey took to steeplechasing when he got too heavy for flat race work, but our modern jockey's seat is such that a boy who affects it can't sit on a horse over a fence.

Hunting in the neighborhood of New York used to be confined to drag hunting. This was only practicable when the ground was soft, because it amounted to a sort of slow steeplechase with a few checks in it. When the ground became frozen, drag hunting stopped until the spring came and thawed things out.

Lately some of the hunts have taken to foxhunting as well as a drag. At Meadow Brook they have hunted three days a week, in spite of frost and snow, and have had fairly good sport. Foxhall Keene, the master, brought out a very good pack of English hounds, but although they are grand hounds to look at, and hunt in orthodox English fashion, it is doubtful if they could kill an American fox.

The Grafton, at Worcester, Massachusetts; Mr. Hitchcock's Hunt at Aiken, South Carolina, and other hunts have got better results with American

hounds, and have given up the English ones altogether.

POLO NOT FLOURISHING.

Polo is practically dead in the East. The disastrous results of the last two years' play has taken the life out of the game. The management of the Polo Association and the arrangement of the tournaments and handicaps threw all the prizes into the hands of two teams representing the very rich element. The result was that when these two clubs had gathered the best men under their standards and purchased the best ponies in the land, they had no one to play with.

The only hope for a revival of interest lies in the possible action of the delegates when they come together at the annual meeting of the Polo Association in April.

The suggested visit of a team from Hamburg and another from the Hawaiian Islands, to play in the tournament at the World's Fair, at St. Louis, may cause some interest in a general way.

The Hawaiians are not natives, but graduates of Harvard, Yale and the Leland Stanford Universities. The Germans have never been identified with polo in the American mind, but it may be interesting to know that a team from this Hamburg Polo Club actually did beat a team from the Buda-Pesth Club; and this Buda-Pesth team beat one from the London Polo Club for the International Champion Cup, at Hamburg, last June.

WESTMINSTER BENCH SHOW.

The interesting feature of the week was the twenty-eighth annual bench show of the Westminster Kennel Club at Madison Square Garden. It was an unequalled success, socially, financially and from a sportsman's point of view. There was also a slightly international character added by the prizes sent over by the Bulldog Club of England and the St. Petersburg Dog Society of Russia.

There were over nine hundred exhibitors, and twenty-four specialty clubs were represented. The judging was done promptly, but it took the four days, working from ten in the morning till six at night, to get through with it.

The fashionable dogs were the Irish terriers which were satisfactorily judged by O. W. Donner, of Rye, New York; fox terriers, huddogs, bullterriers, alreales, Boston terriers, St. Bernards, Great Danes, Russian wolfhounds, old English sheep dogs, collies and Pomeranians.

Dudley E. Waters, of Grand Rapids, Mich., judged St. Bernards. The best of then coming from the Newton Abbott Kennels, New York.

J. Blackburn Miller, of New York, handled the Great Danes; Dr. S. J. Bradbury, Lynbrook, N. Y., sporting spaniels; E. D. Faulkner, N. Y. French bulldogs; Alex L. Goode, Boston, Boston terriers; Chas. D. Bernheimer, N. Y. poodles; E. Lester Jones, Madison, N. J., beagles; Dr. F. C. Ewing, St. Louis, Mo., Scottish terriers.

For huddogs and hull terriers, W. J. Pegg of London had been brought over specially, as had E. Powell, Jr., of Shrewsbury, England, to judge fox terriers, and Geo. Raper, of Gomersal, England as general judge.

Mr. Pegg, who is president of the English Bulldog Club, was very happy in his decisions, but Mr. Powell's judgments were adversely criticised in some instances. George Raper accomplished his Herculean task of judging bloodhounds, Newfoundlanders, mastiffs, deerhounds, Russians, foxhounds, griffons, retrievers, collies, sheepdogs, Dalmatians, chow chows, Alreales, bassets, dachshunde, whippets, black-and-tans, skyes, Beddingtons, dandies, schipperkes, pugs, and all toy breeds, with general satisfaction. He is probably the best all round judge of dogs in the world.

The pointers, judging by John Brett, were a splendid lot. Among them B. F. Lewis' Ch. Mark's Rush carried off the honors.

A good deal of interest was taken in the two Russian wolfhounds imported by the Valley Farm Kennels and bred by the Grand Duke Nicholas. They are wonderful looking animals, especially Bistri, the dog which stands thirty-six inches high. The judge, however, placed the bitch Sorva first.

J. Pierpont Morgan's collies and the Croker huddogs came in for their share of attention, and the gallery where the toys were exhibited was crowded with ladies. The little Pomeranians, especially the sable and black ones are very fashionable and very expensive.

The spaniels and setters shown were small, but in pointers they seem to be going back to the larger type.

The exhibit of greyhounds was very high-class. B. F. Lewis' Landsdowne Coldstream, a brindle and white dog, has size and finish and rare feet.

As an example of the passing of fashionable types, there were only three Newfoundlands, one mastiff, one skye terrier and half a dozen pugs in the show. BELMONT PURDY.

Horses in Siberia.

Before the occupation by Russia of the Ussuri country and the coasts of the Pacific, the horse was unknown here. The natives were content with the service that dogs and reindeer could render them. The first horse made its appearance with the first Russian settlers. The breed of horses was very unsatisfactory; they came either from Transbaikalia or Manchuria. During the last few years Western Siberia has supplied the Amur provinces with horses. In 1902 about 1500 of them arrived in this country, writes R. T. Greener, U. S. Agent at Vladivostok, Siberia.

Dr. Doolsky, a veterinary surgeon, has received permission from the military governor to open a normal and medical horseshoeing establishment.

Hitherto all horseshoeing has been performed, outside of the cavalry, by self-taught blacksmiths. Naturally the work was crudely, improperly and often very cruelly done, demanding the intervention of members of the local Society for the Prevention of Cruelty to Animals.

The horses suffered greatly. Hoof diseases were frequent, and the animals soon became worthless. There are about 4000 horses in this vicinity, not counting artillery and cavalry mounts, driven mostly by Chinese. They are generally Korean ponies, short, stocky and handy. They stand the climate well, pull most astounding loads, are willing creatures, but are unmercifully beaten. There are few level streets in this city, so most of the work is hill climbing.

Shoes suitable for hill traffic are needed. It is estimated that each of the 4000 horses needs shoeing at least ten times per year at a cost of \$10.87. Fifteen hundred horses would make a good business for the new veterinary, not to mention the humanitarian view of his work. Dr. Doolsky was shown a specimen of the Akron rubber shoe, happily sent to this agency, but what is most needed are specimens of the latest pattern of iron or steel shoes, especially those fitted without nails, easily put on, and readily adjusted. They should be sent via Moscow and marked "samples."

Molasses as Horse Feed.

A Department of Agriculture bulletin contains the following on feeding molasses to horses: G. H. Berns reports the successful feeding of molasses to 100 draft horses, working ten hours a day, hauling very heavy loads, usually at a walk. The horses averaged 1700 in weight and were fed per head, night and morning, one quart of molasses diluted with three quarts of water and thoroughly mixed with six pounds of cut hay of good quality, 1.5 quarts of cornmeal and 2.5 quarts of coarse bran. In addition they were fed five quarts of dry oats in the middle of the day and 11 pounds of long hay at night. It is stated that the horses gradually improved in condition and gained in weight during the fourteen months covered by the test.

The Kenney Manufacturing Company, 531 Valencia street, San Francisco, has a second-hand Toomey cart with wood wheels, extra heavy carriage tie, cushion, etc., that is as good as new, having been used but little, which will be sold for \$90, regular price \$135. Harness, blankets, etc., goes with it. They also have a fine surrey for sale cheap and manufacture sulky wheels and attachments to order. Pneumatic tires, solid cushions put on all kinds of vehicles.

WILL NOT SCAR OR BLEMISH.

GOMBAULT'S CAUSTIC BALSAM

Is the safest and most effective lotion or blister for ailments of

HORSES and CATTLE

and supersedes all cautery or firing.

It is prepared exclusively by J. E. Gombault, ex-Veterinary Surgeon to the French Government Stud.

As a **HUMAN REMEDY** for Rheumatism, Sprains, Sore Throat, etc., it is invaluable.

Every bottle of Caustic Balsam sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address:

THE LAWRENCE-WILLIAMS COMPANY Cleveland, Ohio

ROD, GUN AND KENNEL.

Conducted by J. N. De WITT.

AT THE TRAPS

A rainy, squally day cut down a large attendance at the Ingleside trap grounds last Sunday. As it was, twenty-nine shooters lined up and managed to get away with about 4000 targets, under the circumstances this gathering at the initial shoot for this season is an indication that the sport of trap shooting will be well patronized this year. Conspicuous among the local shooters were a number of visiting sportsmen: Leo Kincannon of Pinole, J. W. Sheard of Tacoma, W. H. Varlen of Pacific Grove, G. A. Johnson of Colusa; Moore, Toddy and Leavell of Martinez and others.

Ten events were shot, a 25, 20 and eight 15 target races. Classing shooting was the order of money division in the regular events with side pools for high guns.

The scores made in the various events were the following:

	15	15	15	15	20	15	15	15	25	15
Kincannon.....	12	12	15	13	19	14	12	10	24	11

The officers of the Golden Gate Gun Club are: W. S. Wattles, President; E. F. Foster, Secretary-Treasurer; Ed. Donohoe, C. C. Nauman and W. R. Murdock, Board of Governors.

The club program has already been published in our columns. The division of the club shooters into classes this year seems to be a taking idea. The roll of membership will be increased by the addition of the following new members: E. Gamble, H. Klevesahl, J. Potter, F. E. Lockwood, G. G. Gaud, C. P. Hensley, E. Saunders, R. C. Reed, C. Sylvester, B. Burton, E. G. Stutte, H. Hoyt, W. Sheard, E. Kerrison, H. Althause, J. Birmingham, Jr., C. D. Laing, D. Daniels, H. P. Jacobsen, B. Holbrook, F. J. Moore, J. N. Clark, W. M. McDonough and J. Bruns.

The College City Gun Club will hold their first shoot on Sunday March 6th at the club grounds in North Berkeley. The club trap shooting program will embrace five regular shoots—each shoot to take place on the first Sunday of the month and commencing as noted above.

The sportsmen of Southern California have made an early and enthusiastic start for a lively trap season as will be noted in the following received from a Los Angeles correspondent:

The first annual handicap target tournament of the reorganized Los Angeles Gun Club took place on their new grounds near Sherman Junction on Feb. 20th and 21st. Of the 43 shooters that faced the traps at this tournament 40 shot Winchester "Leader" shells, and 8 Winchester "Pump" guns. The highest general average of the tournament was 89%, and was made by W. H. Seaver of San Francisco shooting from the 20 yard mark and using a Winchester "Pump" gun and Winchester "Leader" shells. The second high average was made by Guy Lovelace, of Los Angeles, shooting from the 18 yard mark and using a Parker gun and Winchester "Leader" shells. The third high average was made by J. E. Vaughn, of Los Angeles, shooting from the 20 yard mark and using an L. C. Smith gun and Winchester "Leader" shells. The Tufts-Lyon Challenge Medal was captured by Guy Lovelace of Los Angeles on the score of 45 out of a possible 50, with a Parker gun and Winchester "Leader" shells. In this event W. H. Seaver of San Francisco scored 46 out of 50 with a Winchester "Pump" gun and Winchester "Leader" shells, but being a manufacturer's representative and shooting only for the targets, his score therefore did not count. The Two Man Team "E. C." Cup was captured by J. E. Vaughn of Los Angeles and Roy Whitman of Oxnard on the splendid score of 47 out of a possible 50. Mr. Vaughn shot a Smith gun. Mr. Whitman used a Winchester "Pump" gun. Both gentlemen shot Winchester shells. The Individual Championship Diamond Medal was won by Guy Lovelace of Los Angeles on the splendid score of 47 out of a possible 50 with a Parker gun and "Leader" shells. The big miss-and-out event was captured by Fred Gilbert shooting a Smith gun and "Leader" shells. The Five Man Team Cup, 25 targets per man, was won by Messrs. Stephen, Vaughn, G. Gibson, J. Gibson and Whitman on the score of 109 out of a possible 125. All five of the gentlemen composing this team used Winchester "Leader" shells, and Messrs. Stephens and Whitman also used Winchester "Pump" guns.

The third annual target tournament of the Ontario Gun Club was held at Ontario, Cal., on Washington's Birthday. Of the 26 shooters who participated in this tournament, 21 shot Winchester "Leader" shells and 6 used Winchester "Pump" guns. The first three high averages of the day were made by shooters using the Winchester "Leader" shells, and of these three, two were made by shooters using in connection Winchester "Pump" guns. W. H. Seaver of San Francisco, using a Winchester "Pump" gun and "Leader" shells, scored 89.9-10% on the 200 targets he shot at during the day. Roy Whitman of Oxnard, using a Winchester "Pump" gun and "Leader" shells, scored 90.5-10% on the 180 targets he shot at during the day. J. Gibson of Nordhoff, shooting a Parker gun and "Leader" shells, scored 88.9-10% on the 150 targets he shot at during the day. Messrs. Seaver, Whitman and Gibson used the Selby Factory loaded shell.

The Blue Rock Gun Club of Alameda held a meeting last Wednesday evening and the following officials were elected for the ensuing year: A. L. Foster, President; M. H. Ulrichs, Vice-President; H. Rickelsson, Secretary-Treasurer; L. Weinman, G. Morris and N. Reincke, Board of Directors.

The club has been in existence now for about ten years; although the list of membership has been limited to twenty-five or thirty members, the club has always conducted most enjoyable gatherings.

The initial shoot for the season will take place on Sunday, March 6th. The regular club shoots thereafter will take place on the club grounds near Alameda on the first Sunday of each month. The club extends a cordial invitation to all trap shooters to attend the club shoots.

SAVE THE BIRDS.

The Economic Value of the Robin.

The robin in most parts of the country is too common a bird to need an introduction to any one except an urbanite. However, even those who think that they have nothing to learn about the robin will be surprised how much of interest and value can be gleaned by a systematic study of the life history of this species during an entire year. Let this embrace notes on the migration, courtship, home building, food, both for young and adults, how long before young can care for themselves, how many broods in a season, habits after breeding season, etc. Such records will serve to remove any prejudices and give an amount of real pleasure that can not be appreciated until realized by actual participation. Moreover, such a complete and intimate knowledge of a bird will excite a desire for facts regarding other species which can better be obtained by observation than from books, and thus the observer will soon be able to name all the common resident birds of his locality and know their relations to mankind. The more a person investigates nature the broader, fuller and more complete becomes his own life, and in proportion to his subjugation of nature is his own development, physically, mentally and morally.

Wherever the robin breeds within the confines of civilization, man is its friend, and a mutual attachment has grown up that borders on sentiment. The man extends his protection and the bird rewards by making his home almost under the same roof tree, displaying a confidence in his human brother that is begotten by lack of fear.

In the robin's winter home in the southland all is different, for there no sentiment but that of gastronomy is displayed; the bird is simply a tender morsel to be made an integral part of a stew or a pie. In Central Tennessee are large tracts of cedars, the berries of which serve to attract myriads of robins in the winter. One small hamlet in this district sends to market annually enough robins to return \$500, at five cents per dozen, equal to 120,000 birds. One informant naively says: "They are easily caught at night in the roost in young cedars; we go to the roots with a torch and kill them with sticks, others climb the trees and catch the robins as they fly in." One of the officers of the Louisiana Audubon Society furnishes the following information regarding robin slaughter in his own State: "They are commonly killed for home consumption and for marketing, a conservative estimate of the number killed annually being from a quarter of a million in ordinary years to a million when they are unusually plenty. During the past winter one gunner killed over 200 robins in one day, and in one village in the State the boys and young men are vying with each other for a record in robin killing, the present high score being 200 birds in one day." Better, by far, sentiment than slaughter, as one preserves and the other destroys what is of great value, as will be proven later.

That the robin is a very beneficial bird there is no doubt, although it is claimed by some persons, especially small fruit growers, that it eats cultivated fruit to an injurious extent. This charge, the evidence shows, is confined to special localities and to a very limited period and is not at all general.

The table of food for the year shows that cultivated fruit is only eaten to any serious extent during the months of June and July, when it amounts to 30%; however, during the same months the insect food

amounts to over 40%, thus showing the benefit to largely exceed the damage. The cultivated fruit eaten in the month of December was necessarily waste fruit that was left on trees or vines as worthless.

In the Southern country where the robin receives no protection whatever, it can not be claimed that it eats cultivated fruit, as the bird is not resident there except in the winter, when fruit is not in season.

The horticulturist can protect his small fruit crops by growing a few wild fruits for the robins and the cultivated kinds will not be disturbed; but thousands of injurious insects will be eaten that would otherwise be a pest.

A careful study of the food tables abstracted from data furnished by the Biological Survey, United States Department of Agriculture, ought surely to convince everyone that the robin is a very valuable aid to the agriculturist and therefore ought to be carefully protected. The 330 stomachs examined were collected in the territory between Massachusetts and Kansas, and Canada and the Gulf States, excepting a few from California. The contents, therefore, must show in a fairly conclusive manner the food that the robin eats during the year. The wild fruit that the robin eats does not effect the relation of the bird to man either way; it is simply one of the methods that Nature provides to distribute seeds of plants.

FOOD FOR THE YEAR.

Month	Stomachs Examined	Insect Food	Wild Fruit	Cult'd Fruit	Mixed Food	Total
January.....	36	6.11	87.64	..	6.25	100
February.....	6	46.83	44.67	..	8.50	100
March.....	63	62.15	33.32	..	4.46	100
April.....	69	69.73	7.17	..	23.10	100
May.....	12	84.58	3.75	..	11.67	100
June.....	18	51.44	19.33	29.17	.06	100
July.....	26	42.12	25.42	30.38	2.08	100
August.....	56	48.66	49.20	.34	1.80	100
September.....	26	32.04	66.33	..	1.73	100
October.....	44	5.00	89.34	100
November.....	7	45.71	54.29	100
December.....	6	30.33	33.44	33.33	8.00	100
Total.....	330	43.78%	43.23%	7.77%	5.22	100%

An analysis of the 44% of the robins' food consisting of insects is not only of interest, but is instructive, as it serves to show that during the whole year the average is well kept up. Beetles of various kinds (Coleoptera) form nearly 19% of the food of the year, in May reaching a maximum of over 53%, which is largely of May beetles (Lachnosterna). There are over sixty species of this genus in the United States, all of which are harmful. The adults sometimes completely defoliate small trees and do great harm to large ones. The larvae of these beetles are known as "white grubs" and are often great pests, especially in strawberry plantations and in pastures, where they destroy the roots of the grasses. Grasshoppers and crickets (Orthoptera) are also eaten to a considerable extent, over 9% being the average for the year; in August they comprise over 30% of the food. Both of these classes of insects are serious pests, and any bird that destroys them is too valuable to kill.

The other 17% of the insect food consists of moths and butterflies (Lepidoptera), bees, wasps and ants (Hymenoptera) bugs, aphids (Hemiptera), etc. Many larvae of the owl-moths (Noctuidæ) are eaten, a family which includes caterpillars so well known and dreaded by the name of "cutworms." One robin had no less than 40 army worms in its stomach and another contained 125 March flies (Bibio). Some of these latter destroy the roots of growing plants, especially grass. The wise farmer and plantation owner will use every means in his power to encourage the robin to remain on his premises, for by so doing myriads of noxious insects will be destroyed.

Description: Robin (*Merula migratoria*). Male—Head and sides of throat black; center of throat white, streaked with black; upper parts dark slaty brown, tail black, when widely spread showing a spot of white on tip of each outer tail feather; wings slightly darker than back; under parts rufous except lower abdomen and under tail coverts, which are white; in fall and winter the feathers of breast and belly broadly tipped with white; bill yellow; feet and legs dark; length from tip of bill to end of tail, 10 to 11 inches. Female—Same as male except the whole plumage is distinctly lighter. Nestings—Conspicuously streaked above with buff and heavily spotted above and below with black.

Western Robin (*Merula migratoria propinqua*). The western robin differs from the eastern bird in being slightly larger and having less white on the outer tail-feathers, often lacking it entirely.

Distribution: The robin (*migratoria*) is found in all portions of North America east of the Rocky Mountains, from the Gulf of Mexico to Alaska, and breeds in all of this great region that lies north of a line running through Kansas and Virginia, excepting the extreme northeastern Arctic regions. It winters sparingly in sheltered localities to about 44° north, but the great body of birds spend the winter months in the territory between 36° north and the Gulf of Mexico.

The Western robin (*propinqua*) is found in the territory lying west of the east base of the Rocky Mountains from British Columbia south to Oaxaca, Mexico.

Nest: Is built of coarse grass, leaves and rootlets, usually cemented together with mud, and lined with finer material of the same kind as the foundation.

Eggs: Light greenish blue, usually varying from three to five in number.

John Bradshaw, owner of the Woodlawn Kennels, bobbed up serenely this week on his return from New York. He brought out several good ones, among them a fine looking, well broken young Pointer. His trip was very pleasant and enjoyable. At the New York show he met a number of old acquaintances and was well received by the professionals who took pains to make his visit agreeable.

Bradshaw has a fund of good stories and reminiscences anent the Eastern show. Among others he relates an attempt to fill a commission for a Boston Terrier. He saw a young dog on the bench, one he judged would do. Asking the price of the owner, he was astounded by the answer, "Well, you can take him for \$1000." Bradshaw knows a dog and pausing a moment, replied, "Out in our part of the country they hold up people for their money with a shotgun, here you do it with a Boston Terrier."

Business in Boston was very good however. Every time a dog was sold, he was immediately replaced by another one. There was only the regulation few in sight on the benches, but the supply was equal to a lively demand and good prices were paid for any kind of a Boston.

Pacific Fox Terrier Club.

A regular meeting of the Pacific Fox Terrier Club was held last Monday evening at No. 41 Sutter street, C. K. Harley presiding and Messrs. Moore, Richardson, Shannon, Ackerman, Cunningham and Martin present.

The Produce Stakes for 1904 were renewed and entries received as follows:

FIRST DIVISION.

1. J. P. Brown's (Riverside, Cal.) Cairnsmuir Favour (St. Leger-Richmond Luck) whelped Jan. 3, 1903, four pups (2 dogs), by Terence (Don Caesario-Dunelm Treasure).

2. C. K. Harley's (San Francisco) Wandee Delight (Norfolk Victorious-Norfolk Tatters) whelped April, 1903, three pups (2 dogs), by Wandee Blizard (Blizard-Pop).

SECOND DIVISION.

1. J. P. Brown's Cairnsmuir Favour whelped August 24, 1903, four pups (1 dog) by Garston Prefect (Norfolk Trueman-Elmwood Vassar).

2. C. K. Harley's Eclipse Blanche (Ben D'Or-Bedford Birch) whelped June, 1903, three pups (2 dogs), by Wandee Blizard.

3. I. L. Ackerman's (San Francisco) Maggie the Maid (Ch. Watchmaker-Nettle) whelped July 7, 1903, three pups (2 dogs), by Ch. Hummerstone Bristles (Meersbrook Bristles-Hummerstone Weasel).

4. Dominick Shannon's (San Francisco) Scarlet Sage (Scorcher-Lillian Sage) whelped May 15, 1903, four pups (2 dogs), by Norfolk Trueman (Ch. Veracity-Norfolk Jewel).

5. I. L. Ackerman's Hummerstone Daisy (Cuntator-Meersbrook Liss) whelped August 18, 1903, three pups (1 dog), by Ch. Hummerstone Bristles.

6. I. L. Ackerman's Warren Corinne (Claudian-Warren Restive) whelped August 4, 1903, six pups (3 dogs) by Forest Flash (Norfolk Trueman-Lillian Sage).

Competition for above stake to take place at the forthcoming show of the San Francisco Kennel Club at Mechanics' Pavilion, April 13th to 16th.

The following prizes were offered by the club for said show: \$5 best dog pup, \$5 best bitch pup, \$5 best best dog, novice class; \$5 best bitch, novice class; \$5 best dog, limit class; \$5 best bitch, limit class, \$5 best dog, open class; \$5 best bitch, open class.

C. K. Harley offers a valuable trophy, (donor not to compete), for the best Fox Terrier dog.

I. L. Ackerman offers the Hummerstone trophy, (donor not to compete), for the best of the opposite sex to the winner of the Harley trophy.

The following were elected officers for the ensuing term: C. K. Harley, President; W. W. Moore, First Vice-President; E. C. Ford, Second Vice-President; J. B. Martin, Secretary-Treasurer. Board of Directors—Dominick Shannon, Newton H. Hickman, J. P. Brown, W. J. Foster and Irving L. Ackerman.

DOINGS IN DOGDOM.

The San Francisco Kennel Club will open an office at No. 630 Market street on March 1st. The office will be open from 9 A. M. until 6 P. M. until later on when the office hours will be extended, so as to accommodate fanciers and intending exhibitors, in the evening until 10 P. M.

The premium list will be mailed early to every available address. Copies can be obtained or will be forwarded, upon personal or written request to Secretary J. L. Cunningham at the above address.

The classification will be ample and the list of special and regular prizes will be greater and of more value, it is intended, than at any previous show of the club.

This year the prize for first will be an elegant silver medal, struck from a new design made especially for this show. Cash prizes will be given for best kennels in every breed. Breeders trophies are offered for Cocker, Fox Terriers and Bull Terriers. Specialty club cash prizes for best in puppies and novice are offered for several breeds.

Entries will close at 10 P. M., April 2d. All entries mailed and post marked April 2d will be received.

The President's trophy this year will be offered for the best Setter in the show. This trophy will be a handsome and expensive cut glass punch bowl and glasses and well worth competing for.

The Pacific Cat Club show will be held in the gallery during the last two days of the show.

It may be in order here to suggest to the Bench Show Committee the advisability of having numbers displayed by exhibitors and handlers while in the ring so that the members of the press and spectators will know what dogs are being judged and awards made in the various breeds and classes brought into the ring. This is a matter that can be easily looked after by the ring steward or man at the gate.

Another suggestion is that it might have an appreciated innovation, to exhibitors and patrons of the show, if the judging rings would be exclusively for the use of judge, ring steward, exhibitors and handlers in charge of their respective dogs, and such of the club officials whose presence may be required in the ring.

Hitherto we have noticed that the good natured presence of various enthusiasts in the ring end about the secretary's table while the judging was going on, has been of a confusing nature to the spectators, so much so, that often the identity of the judge has been lost and a local light of dogdom has been mistaken either for the judge or one of the balance wheels of dogdom. The experiment of keeping the ring clear this year might be tried with the possible chance of being a very agreeable digression from a long established custom that has, at best, only a few personal commendations in its favor.

Returns from Boston show that Wandee Kennels have retrieved a few of the laurels dimmed at the W. K. C. show.

Wandee Coastguard was first winners and won special for best. The kennels also took special for best team of wire hairs.

Mr. Thos. S. Griffiths writes from Spokane: "We have just added to our Collies a fine young dog, Glen Tana Monk (Ch. Wellesbourne Conqueror-sire of Ch. Parbold Piccolo, out of imp. Parbold Ping Pong, dam of Ch. Parbold Purity). Monk is handsomely marked, black, tan and white and eight months old."

His dam and granddam, Parbold Philomena, have wonderful records. Before P. Philomena left England she whelped a litter of five—P. Ping Pong, Dingle Galety, Liberty Belle, P. Philosopher and Spartho Statesman. All of this litter proved to be first prize winners, but the remarkable part of it is, all these in their first litters produced winners—Parbold Ping Pong produced Ch. Parbold Purity, Dingle Galety produced Dingle Frivolity, a coming champion; Liberty Belle had Bonnille; Parbold Philosopher threw Rockan, a big winner; and Spartho Statesman sired Parbold Paragon, claimed to be the best young dog in England. Paragon has defeated some of the very best of them. I may send Monk to Frisco but as yet he is only a very green pup, not even chain broken."

At the annual meeting of the American Kennel Club in New York on the 10th inst. the resolutions of the Pacific Kennel League, which were published in last week's issue of this journal, were disposed of summarily, as follows:

"The Secretary: 'I have a communication from the Pacific Kennel League.'"

Mr. Carnochan: 'I move the matter be laid on the table.'

Motion seconded and carried."

Ch. Hanover Monarch has an enviable reputation as a producing sire of large, strong and beautifully marked litters. Beach Hill Kennels are in receipt of the pleasing news from Needles, Cal., that a recent litter of puppies were all, in markings, etc., as near like the sire's grand Collie type as could possibly be desired.

Two crack brood bitches, in whelp, are now on the way from the East.

Miss Beach states that the orders for puppies are in excess of the supply.

A well-broken, handsome and good dispositioned English Setter, bred in the purple, is for sale. Particulars can be obtained by addressing the kennel editor.

Canine pyrotechnics will blaze in an amazing manner down south if the story published in the Los Angeles *Examiner* of the 19th inst. is to be relied upon.

While it is undoubtedly a good thing for Coast dogdom that there is to be an active kennel club in operation in Los Angeles, still there are some inaccuracies and conditions of doggy information in the story that form an odd combination with a well timed enthusiasm that is deserving of much success. In the absence of more definite information we quote the published story:

"Temporary organization of the Southwestern Kennel Club with headquarters in this city was effected yesterday. It was decided to hold the first dog show in Los Angeles in April. The temporary officers elected are: President, Dr. F. W. Steddon; Secretary and Treasurer, F. H. Kirby, editor of the *California Sportsman*."

A general meeting of dog fanciers will be held in a week or ten days, for the selection of permanent officers. At this time there will be elected also a first and second vice-president and one to serve with the other officers of the club as directors ex-officio.

Two prominent local men are mentioned favorably for president, namely, W. W. Sweeney, an old time breeder and the first importer of the Japanese Spaniel to the Pacific Coast, and Baron Von Smith, a well known dog fancier.

The organization of the Southwestern Kennel Club will prove the death knell to the American Kennel Club on this Coast. The new club will take in Mexico, Arizona and Southern California. Application of the Southwestern Kennel Club will be at once made to the Pacific Kennel League of Portland. Other kennel clubs of the Pacific Coast will then join the Pacific Coast League. This means that next year all the dog shows of the league will be held independently of the American Kennel Club of New York.

The league will be composed of kennel clubs in Tacoma, Seattle, Portland, Sacramento, San Francisco, San Jose, San Diego, Santa Barbara and Los Angeles.

The league will have its own stud books for registration. It will not be necessary to take the dogs East to compete for national prizes as in the past. The American Kennel Club will be entirely ignored.

Arthur Letts is one of the foremost promoters of the Southwestern Kennel Club. He has worked assiduously for over a year to bring about the new organization. Although proffered the presidency of the club at the meeting, in consideration of his valuable services, Mr. Letts refused to accept the honor.

"One effect of the new club," says Mr. Letts, "will be to raise the standard of breeding. Fanciers will be encouraged to exert themselves. There is no reason why successful dog shows should not be held in this city. We have plenty of material to make a showing creditable with the East. Many of the fine-blooded Eastern dogs are brought here by tourists. These will be allowed to compete with local fanciers. There will be a chance for owners to make national reputations with their dogs here on the Coast."

Secretary F. H. Kirby took an active part in forming the new club. He will undoubtedly be retained as the permanent secretary and treasurer.

"The people of Los Angeles will be privileged to see a great dog show here in April," he said. "I anticipate there will be fully 300 entries from this section alone. Added to this display will be that of the winners from the other league kennels of the Coast. The Southwestern Kennel Club is here to stay. We will

start out right by making the entry fee five dollars each. We have every encouragement from fanciers to go ahead. I have a number of letters from men and women of Los Angeles anxious to enter their dogs for the much-coveted blue ribbons.

Judge James Cole of Kansas will probably officiate at the exhibition here in April."

We wish the new club every success and suggest strenuous compliance with the Golden Rule, "Go it while you're young."

Vaccination Against Distemper.

In the year 1896 Professor Lignieres discovered the specific microbe of distemper, termed a *cocco-bacillus*, or the *Pasteurella canis*, the common characters of which resemble those of the microbes of fowl cholera, equine influenza, swine-fever, guinea-pig distemper, white-sour and lung disease of calves, etc. Following on this, Dr. Philalix investigated a disease of the guinea-pig resembling canine distemper, and isolated a similar microbe which he afterwards cultivated in such a manner that he was able to vaccinate the guinea-pig and prevent the disease. After this, he applied the same method to the dog, and during the last three years many thousands of dogs have been vaccinated in various countries, including France, Algeria, Alsace, Belgium, Holland, Italy, Switzerland, Great Britain and Ireland.

It reduces the liability to the disease from ninety to one hundred per cent to five per cent, and the mortality from ninety or fifty per cent to two or three per cent.

The principle of the method is that introduced by Pasteur in 1880 for fowl cholera and afterwards for anthrax and rabies, and by other authorities for black-quarter and many other microbial disease.

It consists in producing active immunity in a dog by injecting a series of virus-vaccines of various grades of virulence. These vaccines contain the living, but attenuated, microbe of the disease, and when injected at suitable intervals, a degree of resistance, proportionate to the dose or virulence of the microbe, is obtained. This kind of immunity, which is comparatively slowly produced and lasts a considerable time, must be developed before the onset of the disease. It is preventive but can never be curative.

It does not cause the disease and is not injurious to those animals already effected, but if properly carried out, prevents natural infection or contagion.

The first inoculation is made with a very mitigated or attenuated culture, called the first vaccine; fifteen to twenty-one days after this a second inoculation or vaccination is performed, this time using a more virulent or stronger culture—the second vaccine. For the majority of cases the two inoculations are sufficient. However, in very sensitive animals, and in kennels where malignant distemper usually rears, a third inoculation may be deemed necessary. This third inoculation may be made either by using a larger dose of the second vaccine or by using a still stronger, or slightly attenuated culture—the third vaccine, allowing an interval of one to three months from the second inoculation.

The dose of the first vaccine is, for a puppy of six to eight weeks old, 2 cc.; of eight to twelve weeks, 2½ cc.; and over twelve weeks, 3 cc.

It should be injected under the almost hairless skin inside the thigh, after it has been previously washed with warm water and soap. The best kind of syringe to use is a Roux's sterilizable antitoxin syringe, which should be sterilized in boiling water before use. It should have a capacity of 3 to 5 cc., and (a cubic centimetre is equivalent to 16.9 minims).

The dose of the second vaccine is from 2 to 3 cc. It is to be injected, under the usual precautions, fifteen to twenty-one days after the first inoculation, but under the skin of the opposite thigh.

If a third inoculation is decided upon, this may be done with either 4 cc. of the second vaccine, or 2 cc. of the third vaccine, one to three months, the latter preferably, after the second inoculation.

The vaccine should be freshly prepared and, after the bottle has been opened, used up at once. If it is not going to be used up immediately, it should be kept in a dark, cool place, such as a cellar, as light and heat cause it to deteriorate. Before use the bottle should be well shaken up, when it produces a light turbidity. Some vets have used musty and mouldy vaccine without producing any swelling or illness.

Within a few hours after the injection there may be a slight feverishness, characterized by temporary loss of appetite and slight dullness; also there may be stiffness of the inoculated limb, especially if there is a swelling, which is to be desired, at the seat of the injection. Usually the animal is "itself" after a few hours. It is claimed accidents do not arise from the inoculation. Beyond the few phenomena above mentioned, it seems very harmless to dogs of all breeds, even including Japanese Spaniels, Toy Griffons, Toy Pomeranians, etc., of all weights and of all ages, provided they are strong and free from disease or infection. Healthy puppies or adult dogs only should be vaccinated.

It should be adopted early, preferably at the age of two months, before the puppies are exposed to the risk of coming in contact with distempered dogs, or of being placed in infected quarters or surroundings. Although two months seems to be the most suitable age, dogs of any age may be vaccinated to advantage.

The vaccinated animals should be kept in a clean, warm and dry place, free from draughts, but well ventilated, and should have suitable food given them. They ought not to be allowed to drink out of dirty pools, or eat filth or come in contact with other dogs, until at least a fortnight or three weeks after the second or last inoculation. The disease is not likely to be prevented if the dog is exposed to contagion during the vaccination period, or is already the subject of the infection at the time of inoculation.

San Francisco Fly Casting Club.

The club medal contest for the season 1904 will be held at Stow Lake, Golden Gate Park, on the following dates, commencing Saturday, at 2:30 p. m. and Sunday 10 a. m.

CONTESTS.

1.....	Saturday, February 27	Sunday, February 28
2.....	March 13	March 13
3.....	" 25	" 27
4.....	" April 9	" April 10
5.....	" 23	" 24
6.....	" May 7	" May 8
Classification Re-entry	" 21	" 22
7.....	" June 11	" June 12
8.....	" 25	" 26
9.....	" July 30	" July 31
10.....	" August 27	" August 28
Class Re-entry.....	September 17	September 18

There are ten Saturday and ten Sunday contests, five in classification and five in class. The contests are open to members of the club only, and to place contestants on an equal footing, there has been three classes arranged for—championship, first and second class.

Four events have been provided for, viz.: Fly Casting for Distance.—Length of rod not to exceed 11 feet, weight unlimited but must be a single handed rod.

Distance and Accuracy.—At buoys, 35, 40 and 45 feet, with rods not to exceed 11 feet in length and 5½ ounces in weight.

Accuracy.—At buoys 50, 55 and 60 feet, rods not to exceed 11 feet in length and 8½ ounces in weight.

Lure casting for accuracy at 6-inch buoys, 60, 70, 80, 90, 100 feet, length and weight of rod unlimited; reel must be free running and lure must be a rubber frog not to exceed ½-ounce in weight.

Club rods will be at the Lake on all contest days for the use of members.

Secretary Brotherton announces that the monthly meeting and smoker will be held at Jules' restaurant next Wednesday evening at 8 o'clock.

Some Savage Traits of an Asiatic Bear.

Some time past we published a short story descriptive of the combative and fighting qualities of various wild animals. Among other things was an account of a battle to the death between a polar bear and a "sloth" bear, both animals being in captivity at the time. The smaller animal of the two, the "sloth" bear, was accredited with killing his larger adversary after a comparatively short fight. Comment was made upon the rather unexpected termination of the row between two combatants where the disparity in size was so great, the natural supposition being that weight and strength and the apparently greater ferocity and fighting qualities of the larger bear would prevail. The "sloth" bear, however, can be reckoned upon to give a good account of itself in close quarters, as will be gathered from the following narrative by an English sportsman as given by the *Indian Field*:

Ursus Labiatus alias Melursus Ursinus, as he is now called, the common "Sloth" bear of India, appears to be an animal of varied accomplishments and strange contradictory character. Scarcely any two of the sportsmen to whom we are indebted for information regarding the habits of Indian game appear to be of one mind with respect to the temper and general bearing of this interesting quadruped in such dealings as he may have with man. A quiet, inoffensive vegetarian say some, a poor old blundering buffoon of the woods, fleeing from a shadow, receiving his death wound with quiet resignation, and remonstrating with plaintive ululations alone. A saucy-tempered quarrelsome brute, say others; a fendishly persevering raven, that will not leave his victim the semblance of humanity, says the native.

It appears, however, that the character of this bear, with respect to man, depends largely on locality. On the Central Indian plateau he is an object of great dread to the native, and vastly more to be feared than any tiger or panther. Instances of his totally unprovoked attacks on human beings are here frequent. A belated villager, some poor creature squatting in the woods to gather the fallen flowers of the mhowa tree, the traveler pausing by some jungle pool—any of these will do. The face and head of the victim are almost invariably chosen as his objective by this infernal brute, and he will not usually leave the poor palpitating flesh until it is impossible to tell to whom it once belonged. That this picture is not too highly colored may be proved by anyone traveling in those parts. Gruesome objects, once men, now jawless, sightless, scalped horrors, alms-entreatings through some quivering slit in a ghastly mask, are at the present moment to be seen in the hamlets of the forest region of which I speak. These are instances of the somewhat incomplete handiwork of this same melursus.

Fewer accidents occur to the sportsmen through the agency of bears than by that of felines. This is to be attributed to various reasons. Melursus is not so quick, and his armament is inferior to that of tiger or panther; once wounded he appears to lose heart to a greater extent; the ground he chooses as his resort often abounds in point of vantage for the hunter on foot; his black coat will not permit him to hide in a handful of twigs. All this, added to the fact that some of our hooks on Indian sport make light of and poke fun at him, induces the ordinary sportsman to undertake operations against the so-called "Sloth" bear without, perhaps, that seriousness that would accompany his actions when tackling more dangerous game.

The bears which the writer has shot may be numbered on the fingers of his hands, but, although in each case the episode terminated to his satisfaction, not to say amusement, every one of those bears that

could try to get at him did its very best to do so, differing in this respect from the majority of felines with which he has had to do.

The last rencontre, which took place on May day of this year, had quite a different ending. As it was fully illustrative of the dangers of shikar that may fall to the lot of even the most cautious of shikaries it appears incumbent that the narration thereof, as a distinct warning, should not be withheld from brother sportsmen.

I should hasten to make it plain that being a "family man" my methods of shikar have to be tempered with a due regard to the avoidance of a too intimate or personal acquaintance with wild beasts in their live and kicking state. A "foot" shikari of the tree and rock roosting species, I had hitherto gone ex cathedra through episodes, some tame, some exciting, and happily without harm to any of the people accompanying me, which had imbued me with a cocksureness that a certain amount of ordinary prudence was all that was required to justify me in assuring those anxious for my welfare that no risks could or would be run.

I think it will be allowed that fate played me a sorry May Day trick; yet forwarned is forearmed, it may be as useful a hint to others as to myself, and so I would point a moral while in no way "adorning" my tale, indeed it does not appear to require any embellishment.

On the 1st of May I rode out at dawn from camp to a low range of rocky hills, to which I had sent on the men overnight, and where, I was assured, I should find bears, I did.

On reaching the base of the hill not long after sunrise, a distant whistle and vigorous beckoning brought me scrambling happily to the top, where I was informed that a large she-bear with two cubs had been seen loafing about, and had, just before my arrival, disappeared behind some rocks half way down the hillside. Creeping along, I met the other shikari, and was joined by two of my men with rifle and gun.

It appeared that there were some caves below those rocks. I then went cautiously, and found myself on top of a long terrace of perpendicular sandstone, about twenty feet high, running along the face of the hill. At the foot of this cliff came a narrow ledge, and below this again, a sloping face of smooth rock, that becoming ever steeper, at length dropped over the edge of another khud of some twenty-five feet. At the bottom of this lower cliff was a mass of big boulders and thorny jungle crept up thus far from the surrounding woods.

I had previous experience of she-bears, which I had known to come viciously charging up fifty yards of rocky hillside for nothing at all but the sound of a human voice, so I stood quietly there to elaborate a scheme by which the old lady might be "drawn" without compromising anybody's safety. As I did so, I heard a bear snuffling and grunting about a hundred yards off, nearer the foot of the hill, and ran on tip-toe along the rocks to find that the beast, which had evidently become suspicious, was making off into the jungled plain below. I followed the noises for about half an hour without coming up with the bear, then lost them, and returned to the hill, rating the shikaries for not having marked the game down with greater accuracy. Since only one bear had been seen, and the hill and caves had been watched from before dawn, it was natural to conclude that that bear was the one I had heard going away and that the caves were vacant; so I came climbing up in a slanting direction and joined the shikaries, after which we all clambered on to the narrow ledge before described and began looking for marks along it, out of curiosity to see the place. I had quite given up all hope of any shikar that morning, and was ruminating on the shocking gameless condition of the country in which I had already wasted a useless fortnight. I went slowly along the ledge, followed by the shikaries and men, looking into little recesses under the perpendicular face of sandstone, and under the impression that there was no hiding place sufficient for a bear. The shikaries, local men, were now of opinion that there was no cave here. After a time there came a corner, round which curved the ledge we were following, and passing this I suddenly found myself in front of a large low-roofed cave about sixteen feet square. At the far end of this antechamber, into which the morning sun shone brightly, were two dark apertures leading into the howels of the hill. On the sandy floor of the entrance to the cave were the fresh ingoing marks of a bear and none leading out.

We had halted, I suppose for a few seconds, and I had let fall a word or two to the effect that a bear was there all right and it was no place for us.

I turned and followed the men at a walk. We took a few paces. A disgusting hollow bubbling issued from the cave behind us, hurr—whirroo! burr—whirroo!

"Only a demonstration!" thought I; but pushed on behind the men, round the curving ledge, my one thought to get off that abominable narrow place and on to ground where one might turn and face things better.

The gurgling-hurle of the bear came quickly closer. My half-naked shikari leaped like an ape up a narrow chink in the rock. I shoved the other man, a young Jat havaldar, round a sudden shoulder in the sandstone cliff, but had no time or, indeed, room to follow, whipped round with rifle half way to my shoulder, and next instant a large black mass of hair shot roaring round the corner and was into me at once. I had just time to let off the rifle into her back at about six feet, the muzzle almost touching her, when, practically simultaneously, her jaws closed on my right thigh and she threw up her head. Her momentum carried me off my legs and I fell forward right on to her back, clutching at the long black hair. Next moment, locked together, a beast with two backs, we were revolving with great rapidity down that rounded shelving sandstone shoot, with, I am told, the little bear, one of the cubs, doing his little bit of a turn too, all three mixed up together.

I was suffering no pain, there was not time to feel

confused, I made stupendous efforts to get some sort of a grip on the rock, but uselessly. I knew instinctively that cliff was waiting for us, and I knew how I should fare if that bear got me at rest on level ground. Round and round we whirled. I breathed desperately to myself "done for now!" Our revolutions increased in rapidity, I felt only half conscious, appalled at the speed of our descent; suddenly a shock—a numb feeling seized my back and side—the bear seemed to rush from me. She fell, accompanied by my rifle, with a mighty thud and appeared to fall up, not down! I had clutched at something. It was a little tree, and then I found that I was hanging by it head and shoulders over the edge of the khud.

My Jat, who had luckily left his shoes behind on ascending the hill, appeared crawling down the rock slope.

"Oh Bhagwan! Bhagwan!" I heard him say. "He is saved. Oh Bhagwan!" Assisted by him I limped up to the ledge once more. "Where was the bear? Where the rifle?" Sudden rage consumed me, and my eyes ranged the jungle at the foot of the hill for the bear, then my eyes fell on one tiny solitary tree, a mere branch—less than a sapling—that clung to the very edge of the cliff.

What a marvellous escape! And how had it placed itself exactly in the hollow of my back as we whirled down! The very nature of the wood, too, might have been specially arranged; nowhere thicker than a man's ankle; it was of an extremely tough species, and had not yielded; as indeed a stouter tree might easily have done, under my weight and impact.

Remembering now that the bear had seized me, though no pain had accompanied that strange, soft firm grip, I glanced down * * * * * was that my leg?

Sitting down and taking down my breeches a horrid sight was revealed. A pool of blood was collected round the knee, six inches above which appeared four wounds, two of them of great depth. No pain could be felt, even when, to gauge the extent of the injury, I thrust three fingers into the largest hole and felt round a high internal space. Woeing the bites out with holed water from my water bottle, and binding up with a handkerchief and strips of paggri, I struggled, supported, to the base of the hill, the next thing being to get to camp and antiseptics. Meanwhile the shikaries, who had gone down to pick up the pieces of my rifle, brought up the carcass of the bear cub, with my bullet hole in its forehead. The little brute, clinging to its mother's shaggy shoulders, had intercepted, or at least set up the bullet considerably. Whether the she-bear got any of it is not known. She went slowly off round a spur of the hill, halting twice en route, say the men.

Camp, six miles off, was reached at last on a stretcher made of two poles and a paggri. Here, to my concern, it was found that most of the perchloride of mercury mixture brought with me had leaked from the glass-stoppered bottle; but a little was left, and, making up the solution, I washed and syringed out the wounds, now nearly fainting from the pain. A day of "loo" or roaring hot winds was succeeded by a calm, cool night, and I was carried ten miles further. By this time my back had stiffened from my fall of the morning, and it was impossible to obtain rest for a moment, nor could I, though continually sitting up and lying down again, draw breath without pain. To ease the back I tried to turn on my side, but at that such a cramp seized the lacerated muscles of the thigh that the horrified bearers of my bed almost dropped me at the sharp bark which rose involuntarily to the sky.

All next day was spent at a roadside bungalow; the wounds had skinned over, and it was necessary to open them up and dress them again, which at last I forced myself to do with my penknife. At night came torture at the hands of the little native assistant surgeon summoned to treat me. A night of morphia-induced slumber and twenty-five miles more, on the bed, brought me to a small civil station, a friend in need, and comparative rest—comparative only, for here came chloroform and an operation. Though a mauling from a bear is not so dangerous as one from a carnivorous animal, there was considerable apprehension of pyæmia setting in, but the fact of being in good hard condition averted that from the outset.

Three weeks on one's back, surrounded by hospital smells, and kept on the move by painful dressings, affords ample scope for thought. Many a time have I revolved the affair in my mind, and held discussion with my host, himself a shikari.

In the first place, the unlucky position that placed me at that bear's disposal was one of sheer deception, it was dhoka, as my men said. Secondly, as the bear had some distance in which to get up a rattling pace, and a sharp curve round which to approach me completely under cover until within a few feet, it was impossible to stop her in time. Indeed, had I brained her she must have got me once, somewhere, being straight ahead—on to me and coming so fast. The only thing that could have averted a catastrophe would have been a projectile of sufficient energy to at once overcome and arrest her energy of say 250 lbs. traveling at 15 miles per hour, and it is not possible to carry a pompon Vickers-Maxim every where.

So far, we see, all the luck was on the side of the wild beast, but immediately she seized me, it was my star that rose with a bound. The large muscle in front of the thigh was bitten through, no large vessels, veins, or arteries there. Anywhere else might have resulted badly, if not fatally, and bones must have gone. The bear, therefore, chose the one part that could afford it.

Again, the precarious foothold saved me. Our impact and my fall on her back upset the brute, and our rapid descent of the slope prevented her from losing her grip and seizing me again, it would doubtless have been my face and head then!

After that, the wonderful tree! Interposed in the small of my back, the only place to stop my whirling descent, it saved me doubly; for had I possibly escaped instant death by falling, the bear, finding me still with her, would undoubtedly have polished me off in her own hideous way.

The Heifer.

In the dairy heiferhood stands between calfhood and motherhood, and is the state in which the character of the life of the cow is to a very great extent determined. The improved dairy cow is an animal of sensitive artificial development. This fine development is what we call heredity and toward its fixation into a type all careful breeders of her kind are working, writes W. F. McSparran in *Farm and Fireside*. This work has produced wonderful results, but we are not yet near the end of it, nor even where we may safely rest, for the tendency to reversion to type is a constant warning to the careful breeder to be on his guard.

Now it is a well recognized fact in animal husbandry that the most active agency in animal development toward improving or fixing a type or tendency is the simple one of feed—abundant, proper feed. It is readily understood that until we can truthfully boast that we have fixed the characteristics desired in our dairy animals, so that their transmission to offspring is a certainty, that our guarding against reversion to type must not be relaxed. This being recognized as true, it requires no argument to show a reasonable breeder that the natural, the original, primary characteristics or functions make the first demand upon the food consumed, and the more artificial ones have to take what is left, and if there is a deficit the less established tendency of the animal suffers most. It is not a survival of the fittest, but an appropriation by the strongest.

Now, the giving of an abundance of rich milk is a created or an evolutionary function of the good cow. Man has encouraged and fostered the cow in this work. It is a function that grows up with the calf and the heifer and reaches its maturity well on in the life of the cow.

All good dairymen know that without enough feed of a proper kind the cow will diminish her milk flow, become reduced in flesh, and soon pass below the point of being kept profitably; but every dairyman does not know that the very kinds of feed that keep the cow in good flesh and maintain her milk flow are the kinds that in the heifer build up the qualities so much desired in the cow. The well-bred dairy heifer is as much a creature of man's skill in directing and amplifying functions as is the heavily, continuously rich-milking mature cow.

If dairymen in general do know this, and that plenty of proper feed is necessary for the heifer, they do not live up to their light. A student of dairiology does not have to go far among breeders to find heifers royally bred that are outrageously fed. Many of the same breeders will tell one what may be expected from this heifer or that one on account of the long lines of producing blood in their pedigrees. I like the heifer's pedigree filled with good blood, but I like quite as much to keep her belly full of good food, for the most royal blood that ever flowed from worthy parents will get mighty poor and thin when fed on brambles and ragweeds.

After the true dairy heifer is safely in calf she can be fed almost any amount of wholesome food she will eat and digest. There is not much danger of her getting too fat, and if she does put on a little superfluous flesh, if she is truly dairy-bred she will liquidate it into the milk pail when she enters the dairy as a cow. It is equally true that the heifer carrying her calf cannot possibly do herself justice, either as a heifer or when she has graduated into cowhood, unless she has been well fed as a heifer. It is this short-sighted, stingy policy of underfeeding the calves and heifers that makes so disgracefully many thoroughbred scrubs in our

pedigreed cattle. The pedigree of the animal is a charter of obligations to the animal's owner, and all the "happy nicks," inbreedings and outcrossings, will not make good cows where feed is unwisely withheld at any time during the life of the candidate.

General Points on Steer Feeding.

In feeding cattle the usual practice is to take the animal from grass at about eighteen months of age and to feed heavily on concentrated rations during several months. During this period the framework of the animal is rounded out and fat deposited among the organs and tissues of the body. The tendency for several years has been toward the fattening of younger animals. The four-year-old steer is a thing of the past, while the three-year-old steer is rare. In some sections, especially where the feeding period is long by reason of the hard winters, some cattle are marketed as long yearlings, having been fed continuously and sold as "baby beef."

The source of feeding cattle is with the general farmer and Western ranchman. The Western cattle that were formerly marketed from grass are being shipped more and more into the cornbelt for a finishing period. The ranchmen have by the use of good bulls made a wonderful change in the character of Western cattle. It is now possible to buy at the principal cattle markets range cattle almost pure bred and of great uniformity of type. The farmers of the corn growing sections must meet the competition of the ranches by growing a better class of steers, and to do this they must breed with a definite object in view, avoiding the crossing of beef and dairy cattle.

With cheap corn our methods of feeding have been comparatively wasteful. In the rise of the price of land and the crops grown thereon methods of feeding must be improved. Not only must the more common feeds be fully utilized, but the feeder must be on the lookout for supplementary feeds from oil mills, factories, etc., in order to reap the more profit. Formerly the principal grain feed in most sections where cattle were fattened was ear corn, it being shoveled out to them to their full capacity to consume it.

The cattle feeding industry is now becoming more varied in the methods employed in different sections. In the semiarid regions of the West they are using alfalfa and Kafir corn end in the neighborhood of sugar factories sugar beet residues; in the corn belt corn and corn stover and a variety of supplementary feeds as gluten meal, oil meal, etc., near the cotton states corn and cottonseed meal in varying proportions form the principal grain feeds, with corn stover and clover hay for roughness. In Kentucky blue grass forms a large part of the roughness, especially in the central portion of the state, and a great many cattle are fed in the neighborhood of the distilleries on slop, using wheat straw and cottonseed hulls for roughness.

The fact seems warranted that in Kentucky, with a residue of blue grass corn fodder and hay, with some grain and a reasonable price for certain by-products, it may be profitable to feed cattle. On the other hand, to buy the cattle and then to buy the feeds makes it a doubtful proposition. The factors that may be against profitable cattle feeding under these circumstances are the local high prices of feeds, the lack of uniformity in the feeding cattle and the distance from the best markets.—D. W. May, Kentucky Experiment Station.

Buying a cow is no small undertaking. She should be known as to her health, the quality and quantity of milk, how long she milks, and her general disposition.

The nervous, restless cow, fond of tossing her head, should be deborned, or have her horns tipped with brass knobs, lest she injure somebody or something.

An Epitaph to a Husbandman.

He would start and rise
Before the crowing cocks;
No more he'll raise his eyes,
Whoever knocks.

He who before the stars
Would call the cattle home—
They wait before the bars
For him to come.

He at whose happy call
The farmstead woke again,
The horses in their stalls
Expect in vain.

Busy, hitherto and hold,
He labored for the morrow;
The plow his hands would hold
Rusts in the furrow.

He had to leave his fields,
His orchards cool and dim:
The clouds he used to cleave
Now cover him.

But the green, growing things
Lean kindly to his sleep:
The white roots and wandering strings
Closer they creep.

Because he loved them long,
And bravely did his part,
Tenderly now they throng
About his heart.

—C. G. Roberts.

The Texas Range Area.

The range area of Texas has been greatly reduced during the present year on account of the state school lands coming upon the market, lands which have heretofore been held under the lease laws for grazing purposes only, says a *Country Gentleman* correspondent. It is another instance of the invasion of the western prairies by the man with the hoe. The big pastures are being bought up by farmers, and gradually the plow is turning the virgin sod for the production of cotton, corn, wheat and forage crops, with cotton far in the lead. Indeed, as a gentleman from Big Springs remarked the other day: "While the older portions of the State are wrestling with the problem of diversified farming, King Cotton is moving west and is laying heavy tribute upon the range cattle industry of the State. Driven from his old habitat by diversification and the Mexican holl weevil, he is rapidly establishing out here a new empire, carved out of the Texas range and apparently not on shifting sands."

Experiments have shown that the contamination of milk occurring under ordinary circumstances can be reduced fully ninety-five per cent by taking care to avoid all possible sources of impurity and conditions favoring germ growth. The fact that bacteria are usually attached to larger bodies makes the work of preventing their entrance into milk comparatively easy. But with all the care practicable to observe, some bacteria will get into milk. Therefore it must be cooled as soon as possible and held at a low temperature to prevent multiplication. The different stages through which milk passes might be compared to the links of a chain—if one is weak the strength of the whole chain is impaired—so if the care of milk is neglected in any particular, the precaution taken at other times may be rendered useless.

At a recent dairy show in England seventy-one cows competed in the various classes. Of these, eighteen were Jerseys and sixteen non-pedigreed Shorthorns. No Holstein-Friesians or Ayrshires were present. The tests were decided by both the Babcock method and the churn. The first prize in the butter test was won by Daisy, a non-registered Shorthorn five years old and sixty-five days in milk. Her yield was fifty-three pounds of milk, which gave three pounds one and one-half ounces of butter. The first prize Jersey was seven years old, 110 days in milk, yield forty-five pounds five ounces of milk and producing two pounds nine and three-fourths ounces of butter.

When pasturage is scarce, milk cows should be fed bran, or some concentrated food to take its place.

Dairy Notes.

The salt trough should be easy of access, and should always have salt in it.

If cream is permitted to stand too long it will sour and the butter will be furry.

Calves should suckle cows a few days after birth, as the milk contains elements needed by the calf.

Rape is being largely fed to milk cows, but can be used only after milking, as it causes the milk to taste.

Creams make better butter to rise in cold air than to rise in cold water, and the milk will keep sweet longer.

Pasteurized milk is that which has been heated to about 212 degrees F., and all the active souring bacteria have been killed.

When milk is to be cooled it needs not only to be set in cold water, but it should be stirred occasionally so as to be cooled evenly.

A poor quality of butter runs the price down. It is impossible to keep the price up or to hold customers if the quality is poor.

The heifer with her first calf is when the habits of milking and feeding are established. At that time she should be very carefully handled.

Speaking of calves, we would be glad to have some of our subscribers write of the comparative advantage of having calves come in the fall or winter.

Heifers with calf should not be housed in stalls with other cattle larger and stronger than they. They will seldom injure each other if deborned.

Other things permitting, morning has been found the best time at which to churn. Milk should not stand too long before churning—never more than thirty-six hours.

It is an advantage, some believe, to have the calves come in the fall, because they are ready to take care of themselves by the time the grass is ready for them.

The churn should be tested frequently by scraping with a knife to see if it is clean. If the churn is wooden use plenty of hot water and soda to keep it sweet and clean.

It will make the milk sour more quickly to let the skimmed milk and refuge milk stand in vessels into which sweet milk is strained, unless thoroughly scalded and aired.

It is reported that Australia has not yet recovered from her heavy losses of sheep, five years ago, and in consequence is not exporting as much refrigerated muttons as was anticipated.

No difference how inviting or how generous is the supply of feed, if the cows have to eat in the cold, wind or rain, they will not do their best. They need end must have protection of some kind.

Farmers ought to produce good butter cheaper than anyone. They may have a large amount of cheaply grown feed which cannot be utilized unless it is fed. He also has the benefit of the manure, which is no small item on a farm.

Breeders who take into consideration every item in their stock lay a good deal of stress upon the milking qualities of their brood sows. It is almost useless for a sow to bring a large litter of pigs and not be able to take proper care of them.

Cows almost pay for their feed in the manure they make. Their droppings are much more valuable if taken up every day and mixed with earth. The manure is heating and will make more fertilizer if the cows are bedded with straw.

How to Spice Beet.

Take seven pounds of thin flank, salt it, remove the inside skin and powder the beef well with a mixture of pounded nutmeg, ginger, mace and cloves, also black pepper and cayenne; roll it up tight and tie it with a tape, putting a skewer at each end, or roll it in thin muslin to keep in the seasoning; cover it up close in a pan of cold water and simmer for four hours. When you remove it from the fire place it between two plates, with a weight on top, or in a meat presser; remove the tape and skewers before it comes to the table; to be eaten cold.

How to Raise Calves by Hand.

"I have made calf rearing my business for over twenty years, and during the last fifteen years have placed my chief reliance on skim milk. For growing calves I consider separator skim milk at least equal to whole milk, though calves will not lay on as much fat as they will when whole milk is fed; but they will make as good growth and be as thrifty on skim milk. There is nothing in butter fat that a calf can use in building body tissue. Butter can be converted into body heat and body fat, and nutriment for this purpose can be supplied more cheaply with flax meal which contains thirty to thirty-five per cent oil. My system of feeding is very uniform. When the calf is dropped I let it suck once and then remove it from the dam. If it is removed in the morning I give it no feed until the following morning. This is done so the calf will be hungry and drink without the fingers. I give from three to four pints of its mothers milk twice a day, immediately after milking the dam. A small calf gets three pints and a large calf four pints. This I continue for about one week. Then for one week I give it whole milk half and skim milk twice a day, giving it only from three to four pints. The third week I feed all separator skim milk but put in the milk a teaspoonful of ground flax. I gradually increase the skim milk and flax meal so that by the end of the fourth week it is receiving a heaping tablespoonful of flax meal and ten pints of milk twice a day. After the first month it has access to a little early cut hay and a little whole oats or a mixture of whole oats and bran or shorts.

"The important points are strict regularity in time of feeding, quantity and temperature of milk.

"It has been the general opinion among farmers that separator skim milk was not a strong or nutritious feed, and that a large mess must be given to make up in quantity what they supposed it lacked in quality, and the result was that calves were over fed and indigestion would be produced, which was followed by scours and hloat.

"If directions are strictly followed the calf will always act more hungry after taking its meal than they did before, but it is better thus than to give it a larger mess and then have a case of scours or bloat on your hands. The milk should be measured every time with a clean tin cup or weighed with a balanced scale.

Each calf should be fed by itself out of a clean tin pail, which should be washed and scalded after each feeding just as thoroughly as one does the milk pails. Place the calves in small stanchions while they are being fed, so that they will not get in the habit of sucking each other. Have the little manger in front of them wide enough so that an ordinary tin pail can be set into it. Have partitions placed in the manger, and when the calf has taken the milk take out the pail. If the calf is old enough to eat oats or bran, throw in about a tablespoonful, and it will soon get the habit of chewing the oats as soon as it has taken the milk, for about that time it wants to do something, and if it is not confined in a stanchion or tied out of reach of another calf it will amuse itself by sucking its neighbor's ears. The bottom of the manger must be a dressed board about ten inches wide and should be so adjusted that it can be taken out once a week and scrubbed with hot water and soap, for the manger must be kept absolutely sweet and clean."—T. L. Haecker in Roseburg, (Ore.) Plain Dealer.

Hogs' livers are now being used as substitutes for goose livers in the manufacture of pate de foie gras, and according to Dr. Harvey W. Wiley, Chief of the Bureau of Chemistry of the department of Agriculture, the substitution can be detected only by microscopic examination. He declared that hogs' livers were shipped from this country abroad and returned to the United States in the shape of pate. Much of the pate, he said, is totally innocent of goose livers.

Fattening Beef Cattle on Sugar Beets

The experiment of fattening beef cattle on sugar beets, which is now being made on the McMasters place near Cordelia by J. W. Howard, a prominent stock man of Oregon, should attract the attention of, and be closely watched by both stockmen and the owners of land adapted to the production of these beets. If it can be done successfully it will prove a boon to the stockmen at the season of the year when feed is scarce. There are times in this section of the State when the feed on the ranges is not sufficient to fatten cattle, and of hundreds of head of stock no beef cattle can be found during the fall and early part of the winter. If it should be found that cattle fatten well on sugar beets, it would be a profitable investment for stockmen to feed their cattle beets when other feed becomes scarce and thereby be enabled to place beef upon the market at a time when without such feeding it could not be done.

The owners of land adapted to the growth of sugar beets, and there is much of such land in Solano county, should also watch the outcome of the experiment as it might be a source of profit to them too. It seems to be conceded that the Hawaiian company, which for several years has cultivated large beet plantations southwest of Suisun and in this vicinity, will discontinue the industry at the expiration of its lease of the lands next year and the owners will then have the lands on their own hands. If the extensive feeding of beets to cattle should be inaugurated, they could devote the land to the growing of beets for that purpose and thereby get better returns than from other crops.—Solano Republican.

C. A. Morrill Traps Coyote.

One of the largest coyotes ever seen in Solano county was caught in a trap last Sunday by C. A. Morrill on the Rush ranch east of Suisun. It was larger than the ordinary shepherd dog. The animal was caught by means of a plan published in the Republican several weeks ago. He put a quantity of sheep's blood, which had been kept until it had become old and thus giving it a strong scent, into a sack and trailed the latter from a place known to be a rendezvous of coyotes over the ground a certain distance and buried the same in the ground. Over the spot where the sack of blood was buried a trap was set and hidden. On the following morning the coyote was found in the trap. During the week previous to the capture of the coyote Mr. Morrill had lost over thirty lambs killed by the animals.—Solano Republican.

An apparatus used in Germany for purifying milk by ozonization consists of two vessels placed one above the other, so that the milk can flow from the upper to the under vessel in a thin stream. The carbon points of an electric arc light are then arranged one on each side of the stream of falling milk, so that the electric arc is formed in or close to the stream. It is asserted that the zone engendered by the electric current round the stream is effective in killing all the micro-organisms that the milk may contain.

As the result of several years experience the Wisconsin station publishes the following conclusion: From the breeding records of 514 ewes at this station we conclude that, for such animals and conditions as ours, the normal period of gestation ranges from 144 to 150 days after date of service, and that more ewes will lamb 146 days after service than at any other time. There is no appreciable difference in the period of gestation for male or female offspring in sheep.

Jackson's Nana Soda untangles the feet.

Chicken Chatter.

Fat hens do not lay well. Dampness means death to poultry. Burn all sweepings from the houses. For only broilers start the incubators now.

Have a system in your feeding and keep to it.

To have healthy fowls they must be kept busy.

Above all things avoid leaks in the hen houses.

Now is the time to feed cut green bone to your hens.

Always keep charcoal where the fowls can reach it.

Use coppers as a disinfectant in the poultry houses.

Proper feeding and housing is the secret of success.

Vary the food—fowls get tired of one thing all the time.

Don't neglect to cool the eggs in your incubators occasionally.

To have plenty of eggs in winter keep the hens warm and busy.

Take the chill off of the water before giving to the fowls to drink.

Don't forget the dust-bath; it is essential for the well-being of the chickens.

Tobacco added to the earth in the dust box will aid in keeping the vermin down.

Scatter the grain well when feeding, so that all the fowls will have an equal chance.

See that the fowls have some sort of green stuff, particularly now in the cold weather.

Linseed meal acts as a tonic and will also brighten the plumage when fed to the poultry.

Keep green stuff—cabbage, lettuce, turnips, or something green—before the fowls during the winter time.

Grit is cheap and in the long run pays better than broken crockery and such things that may injure the birds.

See that the eggs in the incubator are either all light or dark, as there is a difference in the thickness of the shells, and the hatch will not be even otherwise.—The Feathers.

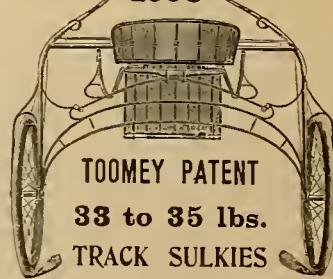

A Tree-Feeding Story.

It is reported that a new method of feeding trees and plants without the agency of the roots has been discovered by the well-known entomologist, Mr. T. A. Mokrshezki of Polish Russia, who has explained his discovery in a lecture before the Imperial Botanical Society of India. He has invented an apparatus by which he can introduce into the stems of apple and pear trees salts of iron, either in the form of a solid or in solution. The effect of the chemicals is, on the one hand, completely to cure the tree of chlorosis, and on the others, to stimulate its growth in an important degree. Among other extensive researches the scientist has applied his theory to 800 fruit trees growing on the southern shore of the Crimea. By introducing dry sulphate of copper into the stems he produced an unusual development of the trees, as many photographs testified. M. Mokrshezki considers that in this way the size of a fruit tree can be increased, its color improved and varied, and its diseases removed.

Every calf in Germany will be vaccinated upon reaching its third month, with specially prepared tuberculosis bacilli taken from human beings, if the proposals of Professor Behring, the great bacteriologist and opponent of Professor Koch's tuberculosis theories, are adopted by the Reichstag. Professor Behring pleaded the adoption of an imperial law to this end, in conference to the ministry of agriculture. The professor also proposes to add a gramme of formalin to every ten quart can of milk. He maintains that fresh milk contains elements fatal to disease bacteria, but that it quickly loses them. Formalin, he adds, would conserve these elements indefinitely.

Air chicken houses as well as your own house, and thereby keep them fresh and dry.

NOT A FAILURE IN TWENTY-FIVE YEARS.

There may be some better criterion of the value of an article than the "test of time," but if there is we do not know of it.

Kendall's Spavin Cure
has stood this "test of time" and is more popular today than ever before. Unequaled for Spavin, Ring Bone, Curb, Splint and all forms of Lameness. Read the unsought endorsement of others and then act for yourself.

Dr. B. J. Kendall Co., Enosburg Falls, N.Y.
Gentlemen:—I have been using your remedies for about twenty-five years with success. I keep your Spavin Cure all the time. I have never known of a single failure where it was used according to directions. I think it is the greatest remedy on earth for what you recommend it. I can tell of a number of cases where it was used that got well in a few days that seemed almost hopeless. Please mail me your "Treatise." Very truly yours,
A. B. WALDEN.

Price, \$1; six for \$5. As a hint for family use it has no equal. Ask your druggist for Kendall's Spavin Cure, also "A Treatise on the Horse," the book free, or address,

J. L. PURCELL, Grass Valley, Cal.

BROWN'S BRONCHIAL TROCHES

Neglect of a Cough or Sore Throat may result in an incurable Throat or Lung Trouble. For relief use BROWN'S BRONCHIAL TROCHES.

Sold in Boxes only. Avoid imitations.

Poultry Notes.

Soft shells are almost sure to occur where hens have not access to lime.

It is an extravagant policy that kills the laying hens. They are paying handsomely for their board.

Whole wheat and wheat bran mash are good foods. In buckwheat countries this is fed with good results.

If the young chick survives ten days he is pretty safely through the hazardous age, and probably will live.

Old pans make very good nests. They are lighter to carry than a box, and are not so apt to breed vermin.

In order to keep the perches clean have them movable. They have two sets, and clean one set and give them sun and air while the others are being used.

The object of every farmer should be to have his fowls lay from November till March. They must not be overcrowded. They must be fed and kept clean.

Hens should not lay and set on the same straw. When she has exhausted her "lay-out" and wants to go to setting, she should have a new nest of straw.

The general opinion is, for the all-purpose fowl, the Plymouth Rock is equaled by only a few breeds and excelled by none. It is a good fowl for beginners.

The plumage of a fowl has something to do with its sale. The handsome ones may not lay any more eggs, but will sell to better advantage when taken to market.

The vermin which are so troublesome among chickens can do little on ducks and geese, because of the heavy down. Ducks and geese are subject to few diseases and are easy to raise.

Because white is a favorite color nearly all the breeds may now be found in white as well as in the original color. The color makes no differences. Color is only a matter of taste.

We hear talk about "luck" in poultry raising. Such persons raise a few fowls in spite of their ignorance. It probably is all in the management, and they happen to adopt the right way.

When turkeys are raised by hens they do not require as large a range as when they have a turkey mother. They seem to do as well with the hen, and never seem to be inclined to range over the whole place and that of your neighbor.

One of the most economic ways to begin with thoroughbred poultry is to buy the eggs. Set them under a good hen. You may raise some as good as the breeder from whom you obtained the eggs, and which could not be purchased at any price.

Poultry may be overfed. They will not founder as does a horse, but they become sluggish and inactive and will not lay nor scratch. A heavy feed at night and a lighter one in the morning will compel them to take advantage of the range for part of their ration for the day.

Some are of the opinion that bantam chickens are not "fit" to eat. While this is not true, they are practically useless for anything except an ornament. They make nice pets for the children. They would tear up a garden, but will do little harm among bushes and the larger flowers.

It is the second or third year that takes the grit to undertake, after failures and disappointments. It is no small affair for a poor fellow to spend money for the best breed, the best incubator, the best feed, and do his best, and then come out with little or nothing. Some do this and stop; others do it, persevere and succeed.

It is often recommended that male fowls be separated from the flock as soon as laying season is over. We are not wholly in sympathy with this, as it is not nature's method. The males are the natural defender and associate for the others. They are lonesome without him. No flock amounts to much without the male, as no house amounts to much without a man. There may be too many, as they will fight. A moderate number always seemed, to this writer, desirable.

Jackson's Napa Soda is sold in every city, town and hamlet in the State.

There is a tendency for the milk to have the same quality throughout the entire history of the animal, from a heifer to old age; that is, the heifer that gives milk of a certain richness will not be apt to vary much from this quality as she increases in age. There may be a slight increase in the percentage of fat as age advances, but average figures show the whole variation to be only about one-sixth of 1 per cent. Age will influence the quantity of milk. From 2 until 5 years there is a gradual increase in the quantity, after which time it remains about the same during the periods of activity, until the age of 11 or 12 years, and then it decreases.

Pigs begin to eat a little by the time they are three weeks old, and should have a separate trough to which they can go at any time. Milk with a little shorts stirred in makes a good feed for a starter.

PERCHERON AND BELGIAN STALLIONS

The Farmer's Supply of the Middle West.

Cedar Rapids (Iowa) Jack Farm

Three importations this season of prize-winning Percherons, Belgians and German Coachers and Catalan Spanish and Majorca Jacks. I have the largest Draft and Coach Horses in America, and will sell more quality for the money than you can find anywhere.

Remember, the largest sale of Imported and High-Bred Jacks ever held in America will take place at the Cedar Rapids Jack Farm some time during the first half of April 1904. Watch for date.

In the sale of Jacks and Stallions to go to the Pacific Coast I arrange with all my customers to make shipment about the first of each month and to group together the purchases and ship them in one car by freight. I now have three head of Jacks in my barns which I have just sold to go to Washington and Oregon, and would like very much to receive orders from California points immediately so that I can send the stock at a carload rate. I will probably sell 8 or 10 head more to go in this car, so the transportation will not exceed \$35 to \$35 per head. All parties who want to buy Jacks and Stallions please write me immediately, or come and see me at once. By this arrangement I can save you enough express on Jacks and freight on Stallions to pay your fare here and return to California. Do not wait to write me, but come at once.

A Sidney Stallion With Earning Capacity

FOR SALE.

In pursuance of my intention to retire from the business of breeding horses, and having disposed of all my broodmares at auction, I now offer at private sale the stallion

WILLIAM HAROLD 2:13 1-4.

His sire is the great Sidney 2:19½, grandsire of the champion trotter of the world, Lou Dillon 1:58½, and his dam the great race and broodmare Cricket 2:10 (dam of four in the list) by Steinway, the greatest son of Strathmore.

WILLIAM HAROLD is a producer. The only two of his get to start are that wonderfully fast trotter Janice 2:08½ and the pacer Dan Burns 2:15. WILLIAM HAROLD'S services in the stud were very limited up to three years ago, as he was raced. His weanlings, yearlings and two-year-olds are very promising and have size, good looks and great natural speed, besides being uniform in color, nearly all bays. He is a sure foal getter, is in the very best condition, sound and healthy, and with ordinary good business management can earn in the stud in 1904 the price asked for him.

For tabulated pedigree and full particulars, address

H. W. MEEK, San Lorenzo, Cal.

Isn't He Worth Saving?

Why trade off or sell at a beggarly price a good horse just because he "goes lame." "throws a curb" or develops some other hemish? There is nothing in the way of Spavins, Curbs, Splints, Windpuffs or Bunches which will not yield readily and permanently to treatment with

QUINN'S OINTMENT.

Dr. E. B. Davenport, a prominent physician of Sheridan, Ind., writes: "I have used a number of remedies for the removal of curbs, splints, thickened tendons and tissues generally, but for the last two years I have not been without Quinn's Ointment. I have tested it thoroughly at different times, and say without hesitation that it is the only reliable remedy of the kind I have ever tried." Sold by all druggists or sent by mail. Write us for circulars, testimonials, etc.

W. B. Eddy & Co., Whitehall, N. Y.

\$100 Reward

For long years we have offered to pay this amount for any case of Lameness, Curb, Splint, Contracted Cord, Colic, Distemper, etc., which cannot be cured by

Tuttle's Elixir

Used and Endorsed by Adams Express Co.

We have never been obliged to pay the reward for obvious reasons. It's infallible in all cases of Thrush, Cracked and Greasy Heel and all forms of Lameness.

Tuttle's American Condition Powders—a specific for impure blood and all diseases arising therefrom. Tones up and invigorates the entire system.

Tuttle's Family Elixir—Is unequalled as a remedy in the home. We send a sample free for 6c in stamps, merely to pay postage.

Send at once for our 100-page book "Veterinary Experience," which we mail free.

Tuttle's Elixir Co., 437 O'Farrell St., San Francisco, Cal.

Beware of so-called Elixirs—none genuine but Tuttle's.

Avoid all blisters; they offer only temporary relief, if any.

has for SALE some broodmares, yearlings, by Washington McKinney. Good prospects for 1904, and roadsters.

To cure a Wind Puff or Strained Joint:

Steam the part with very hot water for 20 minutes, rub dry and apply

ABSORBINE

once or twice a day, rubbing it in. At night saturate the hair full of the following wash: 1 oz. ABSORBINE, 1 pint vinegar and 1½ pints water, cover with a layer of cotton and bandage over. Repeat as above until cured. ABSORBINE sold by regular dealers or delivered for \$2 per bottle. Mfg. by W. F. YOUNG, P. D. F., Springfield, Mass.

Also manufacturer of Toleum for horses' feet.

For sale by Mack & Co., Langley & McNamee, Redington & Co., J. O'Kane, and J. A. McKerron, all of San Francisco.

FOR SALE.

The Green Meadow Farm

CONSISTING OF FIFTY ACRES OF THE most productive land in Santa Clara County, located within one-half mile of the Santa Clara railroad depot and 100 yards of the city limits. Handsome modern 9-room house, commodious stables, 50 box stalls, barns, granaries and every improvement that goes to make a first-class breeding farm. Fine artesian well and abundance of water piped to all parts of the place. Sewer connections, gas, electricity, etc.; fruit, gardens, big alfalfa fields. In every respect an ideal place, and one that will increase in value with each year until it becomes high-priced city property. Will be sold at a bargain if sold without delay.

HAMBLETONIAN WILKES (sire of 9 with records from 2:08 1/4 to 2:13) and several high class colts and road horses for sale.

Call or address for particulars

SILVER MOON

McGREGOR-ALMONT STALLION

Size, Style, Substance.

By Silver Bow, Jr. (his dam Magenta by Tempest, next dam by Com. Belmont, etc.) by Silver Bow 1:40, son of Robert McGregor 617 (sire of Crescens 1:50 1/4).

SILVER MOON'S dam Leona 2:28 (Reg. Vol 12) by Almont 20503, son of Algona 11543, by Almont 33.

SILVER MOON is a square trotter, has a high rate of speed and will be raced on the California Circuit, 1904. The combination of McGregor and Almont blood in SILVER MOON is an especially desirable outcross for the Wilkes and Electioneer blood which is so numerous in California. He stands 16 1/4 hands high and is sure to produce large handsome horses that will sell well.

Season of 1904 at Pleasanton Race Track—Terms: \$25 the Season

Mares not proving in foal can be returned in 1905 free of charge or money refunded. Best of care taken of mares but no responsibility assumed. Address

For further particulars inquire of or correspond with

A. C. DIETZ, Prop., Santa Paula, Cal.

THE STANDARD BRED TROTTER STALLION

CASSIAN

(Bay Colt foaled 1901)

By Mendocino 22607 (3) 2:19 1/4

(Sire of Monte Carlo 2:07 1/4, Idolita 2:09 1/4, etc.); dam CREED (3) 2:18 1/4 by Palo Alto 2:08 1/4; second dam Clarabel (dam of 3 in 2:30) by Abdallah Star; third dam Fairy (dam of 2 in 2:20 list) by Hambletonian 10.

CASSIAN is a high-class young stallion in every particular and one of the best bred ones ever foaled at the famous Palo Alto Farm. He has produced blood on both sides, and every one of his ancestors for four generations are producers. He is a beautiful bay in color, a splendid individual, a fast natural trotter and has

every qualification for a sire of extreme and early speed, being good galloped, level headed and game

Season of 1904 AT AGRICULTURAL PARK, SAN JOSE.

Fee \$50 FOR THE SEASON, with usual return privilege. Excellent pasture and the best of care taken of mares in any manner that owners may desire, at reasonable rates.

For further particulars address

J. G. CUICELLO, San Jose, Cal.

Or JAMES COFFIN, 132 Market Street, San Francisco.

SILVER BEE 2:27 3-4

By SILVER BOW 2:16

(Sire 2 in 2:15, 8 in 2:30)

1st dam BELLE Mc (dam of Worthwood (1) 2:30 and Silver Bee (2) 2:37 1/4) by Ensign Goldust Jr.

2d dam LITTLE BELLE (granddam of 2 in 1st) by Belmont (sire of Nutwood 2:18 1/4 and 58 mare in 2:30).

3d dam Thoroughbred Mare by Imp. Trustee.

(RECORD MADE AT TWO YEARS OLD)

Season of 1904 at

VORDEN, SACRAMENTO CO.

FEE: \$30 FOR THE SEASON.

SILVER BEE is a handsome, well developed horse, stands 16 hands high and weighs about 1200 pounds. He is a model of symmetry, fine head and neck, short back, legs and feet like iron, perfect disposition and has great intelligence. No more perfectly galloped trotter stands for service and his record is no measure of his speed, as he can show a 2:30 gait at any time. In his blood lines he represents the most fashionable strains. His grandsire Robert McGregor sired that wonderful horse Crescens 1:50 1/4, and on his dam's side he carries the blood of the Goldust family, the most beautiful of all trotting tribes, besides that of the sire of Nutwood, the greatest of sires. His only foal to be trained is Glide, one of the handsomest young horses in Sacramento county, that has trotted a trial in 2:22. Good pasture at \$3 per month. Every care taken to prevent accidents or escapes but no liability assumed. All bills to be settled before mares are removed. Address communications to MCKINNON & GREEN, Vorden, Sacramento Co., Cal. or to W. O. (JOE) BOWERS, Capital Hotel, Sacramento.

Speed, Breeding and Individuality FOR SALE.

RITA H. 2:11 1-4

Pacing Mare by McKinney 2:11 1-4

ELECTRO MCKINNEY

Brown Colt, Four-Year-Old Trotter by McKinney 2:11 1-4

RITA H. is a dark brown mare who stands nearly 16 hands high, and will weigh in racing trim about 1050 lbs. This mare has had this year a very remarkable record. She started in the North-western Circuit in the States of Oregon and Washington, and out of eight starts won her first seven races and only lost four heats during the entire circuit, and has a pacing record of 2:11 1/4. The mare is five years old and is excellent on the road. She does not pull or lug, and a lady can drive her anywhere. Last spring she trotted a workout mile in 2:18 1/4 and repeated in 2:18 1/4, after only seven weeks' work. Her owner has driven her in 2:12 1/4 in the Los Angeles Driving Club races, she having won all of them in which she started. This mare can step two heats below 2:10.

ELECTRO MCKINNEY is a brown stallion foaled in 1900, and stands 15 hands 1 inch in height. He trotted a full mile as a two-year-old in 2:31 1/4, last quarter in 35 seconds, and when a three-year-old a full mile in 2:21 1/4, last quarter in 32 seconds. He is perfectly gaited and a grand individual in every respect. Weighs about 950 lbs. ELECTRO MCKINNEY is bred in the purple, and is one of the best sons of McKinney alive to-day. McKinney is undoubtedly the greatest sire for his age, living or dead. ELECTRO MCKINNEY was not raced last year, being only a three-year-old and not entered in any stakes it was decided to hold him over.

These horses are all right and there is not a thing the matter with them, but my business demands are such that I cannot afford to devote any time to racing them. For prices and further particulars address

WINCHESTER

REPEATING SHOT GUNS

A CHANCE FOR A DOUBLE

A QUESTION often asked about Repeating Shotguns is, "How quick can a second shot be fired with them?" Shooters that have used Repeaters answer with one accord: "Doubles" are just as easy to make with a WINCHESTER REPEATING SHOTGUN as they are with a double barreled gun. The third shot that a Winchester Repeater gives often bags a badly crippled bird which otherwise would get away. Winchester Repeating Shotguns are made in "Take Down" styles in 12 and 16 gauge.

Starters to pay \$100 additional. To the winner \$5000 and a cup of the value of \$250, to the second \$1000, and to the third \$500. Weight forage. ONE MILE AND SIX FURLONGS.

The Merchants' and Citizens' Handicap

For Three-Year-Olds and Upward. By subscription of \$50 each, or \$25 if declared by June 1st. Starters to pay \$50 additional. With \$3000 added, of which \$500 to the second and \$250 to the third. Weights to be announced three days before the race. Winners after the announcement of the weights to carry 3 lbs. extra. ONE MILE AND A FURLONG.

The Champlain of \$3000, A Handicap

For Three-Year-Olds and Upward. By subscription of \$50 each, or \$25 if declared by June 1st. Starters to pay \$50 additional. To the winner \$2000, to the second \$400, and to the third \$200. Weights to be announced three days before the race. Winners after the announcement of the weights to carry 3 lbs. extra. ONE MILE AND A FURLONG.

The Delaware A Handicap

For Three-Year-Olds and Upward. By subscription of \$50 each, or \$25 if declared by the hour of closing entries on the day preceding the race; with \$1500 added, of which \$250 to the second and \$150 to the third. Weights to be announced three days before the race. Winners after the announcement of the weights to carry 3 lbs. extra. ONE MILE.

The Amsterdam Selling

For Three-Year-Olds and Upward. By subscription of \$50 each; \$15 forfeit; with \$1500 added, of which \$250 to the second and \$150 to the third. The winner to be sold at auction for \$4000. If for \$3000 allowed 7 lbs.; then 1 lb. allowed for each \$100 down to \$1500. Selling price to be stated through the entry-box by the hour of closing entries on the day preceding the race. ONE MILE.

The Catskill Selling.

For Three-Year-Olds and Upward. By subscription of \$50 each; \$15 forfeit; with \$1500 added, of which \$250 to the second and \$150 to the third. The winner to be sold at auction for \$4000. If for \$3000 allowed 7 lbs.; then 1 lb. allowed for each \$100 down to \$1000. Selling price to be stated through the entry-box by the hour of closing entries on the day preceding the race. SEVEN FURLONGS.

For Three-Year-Olds.

The Saranac of \$5000, A Handicap.

For Three-Year-Olds. By subscription of \$100 each, or \$25 if declared by June 1st. Starters to pay \$50 additional. To the winner \$1000, to the second \$700, and to the third \$300. Weights to be announced three days before the race. Winners

RITA H. 2:11 1-4

Pacing Mare by McKinney 2:11 1-4

ELECTRO MCKINNEY

Brown Colt, Four-Year-Old Trotter by McKinney 2:11 1-4

RITA H. is a dark brown mare who stands nearly 16 hands high, and will weigh in racing trim about 1050 lbs. This mare has had this year a very remarkable record. She started in the North-western Circuit in the States of Oregon and Washington, and out of eight starts won her first seven races and only lost four heats during the entire circuit, and has a pacing record of 2:11 1/4. The mare is five years old and is excellent on the road. She does not pull or lug, and a lady can drive her anywhere. Last spring she trotted a workout mile in 2:18 1/4 and repeated in 2:16 1/4, after only seven weeks' work. Her owner has driven her in 2:12 1/4 in the Los Angeles Driving Club races, she having won all of them in which she started. This mare can step two heats below 2:10.

ELECTRO MCKINNEY is a brown stallion foaled in 1900, and stands 15 hands 1 inch in height. He trotted a full mile as a two-year-old in 2:31 1/4, last quarter in 32 seconds, and when a three-year-old a full mile in 2:21 1/4, last quarter in 32 seconds. He is perfectly gaited and a grand individual in every respect. Weighs about 950 lbs. ELECTRO MCKINNEY is bred in the purple, and is one of the best sons of McKinney alive to day. McKinney is undoubtedly the greatest sire for his age, living or dead. ELECTRO MCKINNEY was not raced last year, being only a three-year-old and not entered in any stakes it was decided to hold him over.

These horses are all right and there is not a thing the matter with them, but my business demands are such that I cannot afford to devote any time to racing them. For prices and further particulars address

PALACE HOTEL, SAN FRANCISCO, CALIFORNIA.

TOURISTS and TRAVELERS will, now, with difficulty recognize the famous COURT into which for twenty-five years carriages have driven. This space of over a quarter of an acre has recently, by the addition of very handsome furniture, rugs, chandeliers and tropical plants, been converted into a lounging room—the FINEST IN THE WORLD.

The EMPIRE PARLOR—the PALM ROOM, furnished in Corise, with Billiard and Pool tables for the ladies—the LOUIS XV PARLOR the LADIES-WRITING ROOM and numerous other modern improvements, together with the unexcelled Cuisine and the Most Convenient Location in the City—all add much to the ever increasing popularity of this most famous HOTEL.

GOOD ENTRY LISTS have been received for the stakes advertised by the Breeders and Pleasanton Associations and there is every likelihood that the summer harness racing in California this year will be much better than it has been for some time. The Breeders Association received an average of over twelve entries for each race on its entire program, which is evidence of the popularity of the association with horsemen. Owing to the fact that the directors will not act on these entries until after this issue of the BREEDER AND SPORTSMAN goes to press, the list cannot be published until next week, but there is scarcely a doubt but every race advertised by the Breeders will be declared filled, as the lowest entry any class received was seven, and it looks on paper as if there will be a hot contest in every event on the card. We expect Vallejo will make an announcement of its purses within the next two weeks, and every other association that contemplates holding a meeting this year should not delay its announcement any further than April 1st. We would suggest to all these associations that the dates held by the big conclave of Knights Templar to be held in San Francisco during the early part of September be avoided, as the Knights will hold the center of the stage during that time and no country fair or race meeting can expect to draw a crowd during Templar week, as all roads will lead to San Francisco then and all will be crowded with country people heading for the metropolis to see the show. The big parade of the conclave is to be on September 6th. By avoiding that week in selecting dates the country meetings will not have to play against a stronger attraction as the show people say.

SANTA ROSA STOCK FARM has just issued a handsomely printed Souvenir Catalogue containing photo engravings of Sidney Dillon, Lou Milton, Lou Dillon, the champion trotter of the world, and several of the young colts and fillies on the celebrated farm. The introduction to the subject matter in the catalogue states "the wonderful performances of Lou Dillon during the past season and the widespread interest in her abilities as a record breaker, have

suggested to the executors of Mr. Pierce's estate the compilation of a catalogue of the horses still in possession of the estate, including half sisters to Lou Dillon, for distribution to the horse loving public, as a souvenir of Santa Rosa Stock Farm." The catalogue was compiled by Mr. William G. Layng, former editor of this paper, and now proprietor of the Occidental Horse Exchange in this city, whose close and intimate acquaintance with the late Henry Pierce, and with his brother Mr. Ira Pierce, as well as his extensive knowledge of trotting horse matters, specially fitted him for the task which he has carried out with ability and good judgment. This souvenir catalogue of Santa Rosa Stock Farm will be a valuable addition to horse literature.

A STUDY IN EQUINE PORTRAITURE that has attracted much favorable comment by those who have seen it, was recently finished by Mr. Dave Bloom, the well known artist of this city. The subject is the head of the world's champion trotter Lou Dillon 1:58 1/4, from which Mr. Bloom has made a burnt etching on white holly. The portrait is true to life, the brown tones of the etching combining with the white background of the wood in making a color that is almost identical with the beautiful chestnut of the mare. The half-tone reproduction which appears on our front page this week does not reproduce this effect but makes a rather harsh picture. The original must be seen to be appreciated and is now on exhibition at the art rooms of Kennedy & Co., No. 10 Post street, this city.

A NEW JOURNAL, bearing the title of *The Kentucky Farmer and Journal*, printed at Lexington, has made its appearance, the first issue bearing date February 19. The new paper has been started to represent the farming and breeding interests of Kentucky and its departments include Thoroughbreds, Trotters, Saddlers and Drivers, Cattle, Sheep, Swine and Poultry and General Farm Notes. Major P. P. Johnston, is President of the company, Desha Breckenridge, Secretary, and Horace Wilson, Managing Editor. The initial number is a well gotten up paper of eight pages of seven columns each, and is well filled with interesting reading matter and advertisements.

THE SYMPATHY of every horseman on the Pacific Coast, will go out to Major P. P. Johnston, the honored President of the National Trotting Association, in the loss of his beloved wife, who died February 18th from disease of the heart.

A HANDSOME PAPER is the Spring Souvenir number of the *American Sportsman*, published at Cleveland. The cover is particularly effective, containing portraits of Lou Dillon, Creceus, John A. McKerron, Dan Patch and Star Pointer, all champions.

Reports Many Sales.

In a letter to the BREEDER AND SPORTSMAN dated February 29th, Mr. De Clow of the Cedar Rapids Jack Farm reports that he had a very lively week last week. That Monday he sold a stallion and a jack to Mr. Alex Brown of Soda Springs, Idaho, for \$2000. Tuesday to Mr. J. Coyle, Marshall, Minn., the jack Ironwood for \$650, and Silver King to Mr. I. A. Hoskins of Fletcher, Wash. Wednesday the jack Flying Dutchman to W. R. Tuning & Son, Allen, Neb., \$900, and the jack First Ribbon to A. C. Henderson of Williams, Iowa, \$650. Thursday the imported Spanish jack Atrideo to G. H. Greene, Seneca, Ill., \$1200. Friday to J. A. Poggemann of Okarche, Okla., the imported Spanish jack Mesuando for \$1100. Saturday the four stallions to Sherman Wolfgang of Marshalltown, Iowa, \$7100.

Last Monday to Bridges Bros., Leigh, Neb., the jack Midnight Bells, \$800. Tuesday to Peter H. Leinen of Portsmouth, Iowa, the Belgian horse Bijou de Sant \$1500. Wednesday to D. M. Brooks of Yankton, S. D., the jack Caliope, \$750.

Mr. De Clow holds his stock sold to his Pacific Coast customers until a carload is bought and they are shipped under carload rates to save the excessive express rates to the Coast.

Mr. Brown shipped to Idaho Friday carrying the jack previously purchased by Mr. J. R. Martin of Moro, Ore., also carrying the jack bought by Mr. I. A. Hoskins, Fletcher, Wash. Mr. De Clow says that excessive express rates to the Pacific Coast has been very detrimental to the business and he thinks the new method of grouping the sales together and shipping them by freight will be more than satisfactory. He is bringing a new importation of jacks from Spain. They arrived in Antwerp last Thursday to sail on Saturday, but the sailing was deferred until February 27th, so they cannot reach Cedar Rapids before March 10th.

Death of Boodle 2:12 1-2.

Mr. Henry Struve, of Watsonville, had the misfortune to lose his good stallion Boodle 2:12 1/2 by death last Saturday. The horse had a very severe attack of catarrhal fever a few months ago and the disease affected his heart. He died from dropsy.

Boodle was a seal brown horse, sixteen hands high and weighed about 1150 pounds. He was bred by H. N. Smith of the Fashion Stock Farm, Trenton, New Jersey, and brought to this State by C. A. Stockton & Co. of San Jose. He was raced on the California circuit several years, proved himself a game trotter and took his record of 2:12 1/2 at Los Angeles in a winning race in 1895, beating Visalla 2:12 1/2, Nelly W. 2:15 1/2 and Prince Ira 2:19 1/2 in straight heats.

Boodle was a well bred horse, his sire Stranger being by Gen. Washington 1161, out of the famous mare Goldsmith Maid 2:14, once champion of the trotting turf. Boodle's dam was by Jay Gould, the sire of Pixley 2:08 1/2 and many others, and his grandam by Ethan Allen. In the stud Boodle did not prove a great success as a sire of speed, but as his patronage was not extensive and he did not get the best class of mares, he may be put down as a fairly successful sire for his opportunities. He is the sire of that good mare Ethel Downs 2:10, that died before the limit of her speed was reached, Thompson 2:14 1/2, Merle M. 2:25, Ned W. 2:29, and Boodle Boy 2:29 1/2.

Boodle got many large, handsome horses that proved good carriage animals, and owing to this fact was patronized during late years quite extensively by farmers and others who were breeding for size and style more than speed. Boodle was owned for many years by G. K. Hostetter & Co. of San Jose and was driven to his record and managed by C. F. Bunch, the well known trainer. Two years ago Boodle made a season in Oregon and on being returned to California was purchased by Mr. Henry Struve for \$1700. Mr. Struve had a large number of mares booked to Boodle for this season, and at his death began looking about immediately for a horse to take his place. On Tuesday last he secured a lease of Mr. W. E. Meek's very handsome stallion Welcome 2:10 1/2 after trying in vain to get Mr. Meek to set a sale price on that horse. Welcome was shipped to Watsonville this week. Mr. Struve made a wise selection, as Welcome is not only a magnificent individual, but he has size and is a producer of speed as well, being the sire of Iloilo 2:15, Emmy Lou 2:25, Fancy 2:27 and others, from his first crop of colts, and has a number of others that will enter the list this year.

Montesol and Pole Star.

Alameda and Contra Costa county breeders will have the good fortune to secure the services of two well bred sons of McKinney 2:11 1/2 this year in Montesol and Pole Star, owned by Pat Foley of Alameda. Mr. Foley will stand these stallions at Alameda Race Track, in Alameda county, and at Danville, Concord and Pinole in Contra Costa county.

Montesol has a trial of 2:24 and is an own brother to Lady Grannard 2:23 trial 2:13. His dam is the registered mare Igo by Antevolo, second dam Daisy May by Nutwood and third dam the Ralston mare by Alexander's Abdallah 15. This is a combination of the greatest strains of trotting blood and should make Montesol a sire of speed. He is a good individual, standing 15.3 and weighing 1125 pounds.

Pole Star is a four year old of great promise. His dam Mountain Hare was by Young Venture by Venture 2:27 1/2, sire of the dam of Directum 2:05 1/2 and claimed by some to be the sire of the dam of Sidney Dillon and Cupid. See advertisement of these stallions on another page.

Resolutions of Respect.

The following resolutions were passed at the meeting of the Congress of the National Trotting Association recently held in New York:

WHEREAS, Intelligence has been received of the recent death of a former official of The National Trotting Association, Mr. Jesse D. Carr, of Salinas, California; and

WHEREAS, Mr. Carr through many years of efficient and valuable services in The National Trotting Association inspired in his associates respect for his ability and character, and affection for his estimable qualities.

Therefore Be It Resolved, That The National Trotting Association in congress assembled officially record its expression of esteem for its late associate, its appreciation of his services, and its sorrow in his loss.

Resolved, That these resolutions be recorded and that a copy be sent by the Secretary to the family.

The New Zealand Trotting Association has passed an order that in future all trotting and pacing horses imported into that country from the United States must have certificates from the American or National Trotting Associations, and that all penalties for entrance fees, etc., due in the United States will be recognized. Secretary F. W. Kelley of the Pacific District Board of Appeals of the National Trotting Association is empowered to issue export certificates.

High Class Stallions at Los Angeles.

It is seldom that one can find "under one roof," as it were, three such high class young stallions as Mr. W. G. Durfee is advertising this year to stand for public service at Agricultural Park, Los Angeles. These stallions are Petigru 2:10½, Coronado 2:18½ and Silver Coin 2:11½.

Petigru is a trotter, one of the gamest and strongest going horses ever seen on this circuit. Mr. Durfee purchased him in the east, with the idea of racing him here and then using him in the stud, considering him a very valuable horse with which to mate the McKinney and other California bred mares. Petigru raced successfully through the California circuit in 1902, and took a record of 2:10½ in a six heat race which he won. Petigru's sire is a producing son of Onward, probably the greatest son of George Wilkes. His dam is Lemonade, the only mare that has three trotters in the 2:12 list. Petigru stands 16.3 hands high and weighs 1275 pounds.

Coronado 2:18½ looks more like his sire McKinney 2:11½ than any of his sons, but he is a handsome horse. He stands 15.3 weighs 1150 pounds, is a rich seal brown. Mr. Durfee selected him from seven sons of McKinney as the best representative of that great sire. The dam of Coronado is Johanna Treat that had a three year old trial of 2:17. She is by Thomas Rysdyk 2:28, and her dam was Kate Treat by Venture 2:27½, sire of the dam of the great Directum 2:05½, etc. Coronado was a high class race horse, winning five races out of eleven starts. He has trotted an eighth in 15½ seconds with an open hidle and no hoots.

Silver Coin was one of the sensational three year olds of 1902. He had to race principally against aged horses as there were few races for pacing colts of his age that year. It was at Woodland track that he met the aged campaigners Midnight 2:11½, Doc Wilkes 2:12½, King Cadenza 2:15 and several others. It took five heats to decide the race and the three year old won it. He took the last three heats and the time of his miles were 2:11½, 2:12 and 2:13, a great performance for a three year old and one seldom equalled. Silver Coin's dam is Jenny Mac 2:09 by McKinney, and his second dam Leonor, dam of four in the list by Dashwood. He is a handsome horse, with size, style and every other quality to commend him.

The above three horses will be in the stud at Agricultural Park, Los Angeles, during the season of 1904, and a card containing pedigree and full particulars in regard to them will be sent on application to Mr. Durfee.

Has the Three Valuable Qualities.

Speed, size and good looks are considered the three most valuable qualities in a harness horse, and when they are all found in an eminent degree in a stallion he is a good one to breed to. Seymour Wilkes is that stallion, and he will stand during the season of 1904 at Lakeville, Sonoma county, at the low fee of \$30, or \$50 to insure.

Seymour Wilkes was sired by the king of the Wilkes family, George Wilkes 2:15½, dam Early Bird by Playmail (brother to Barney 2:25½); second dam Lucy by Odd Fellow (son of Chloroform); third dam by a son of Williamson's Belmont; fourth dam by Blackhawk 767. Playmail was by Mike 3403 (he by Vermont 322 out of the Perring mare), out of Kate McDonough dam of Ella Lewis 2:27 and grandam of Saladin 2:05½).

Seymour Wilkes stands 16 hands high and weighs 1200 pounds. He is a seal brown in color and in conformation is one of the most symmetrical horses in California. His qualities as a level-headed, game and speedy race horse are known to all horsemen. He is the fastest son of the mighty Wilkes, his record being 2:08½, and on his maternal side traces to the very best of sires and dams. He has an iron constitution and all owners of good mares that want good horses that will have breeding, size, bone, quality, good disposition and extreme speed should not overlook this horse. His service fee is placed at a very low figure considering his merits. He never was hred hut to a few mares, and his progeny are models of perfection.

One of the fastest green trotters of 1903 on the Grand Circuit was Mr. Salishury's Monroe by Seymour Wilkes. He won several races and took a record of 2:12½. He was known as the best and lightest gaited hlg trotter on the circuit. Monroe will go East again in 1904 and is expected to get a record of 2:08 or better. He is one of Seymour Wilkes' first crop of colts.

Seymour Wilkes vanquished many of the fastest pacers in California, including the mighty Silkwood. The first of his progeny are remarkably fine looking. Several may be seen on the farm where he is at present, and are perfect counterparts of this great horse. As a sure foal getter Seymour Wilkes is, perhaps, unequaled. Read his advertisement in another column.

Jackson's Napa Soda does not tangle the feet

Pony Racing at Tanforan.

The officials of the California Polo and Pony Racing Association have arranged an attractive program for their meeting to be held at Tanforan racecourse on the 12th and 14th inst.

All the ponies which helped make exciting sport at the recent Del Monte meet will again be seen in competition. Silver Dick and Becky will fight their battles over again in the sprints, while the southern contingent will make another attempt to heat Fusillade with Carlotta in the distance events.

One of the most interesting races will be at 300 yards for bona fide polo ponies, the prize being the artistic Shreve cup. The races are at various distances from three-sixteenths of a mile to one mile. After the first day's racing the weights will be re-adjusted by Robert Leighton, the racing secretary. All ponies must be ridden by qualified gentlemen riders. The program follows:

SATURDAY, MARCH 12.

Three-eighths of a mile—For maiden ponies; top weight 160 pounds; 4 pounds allowed for each half-inch under 14 hands 2 inches; purse \$75; value to winner \$50, second \$15, third \$10.

One-fourth mile—For ponies; top weight 165 pounds; 4 pounds allowed for each half-inch under 14 hands 2 inches; purse \$100; value to winner \$70, second \$20, third \$10.

Five-eighths of a mile—For ponies; top weight 155 pounds; 4 pounds allowed for each half-inch under 14 hands 2 inches; cup value to winner \$85, second \$25, third \$15.

Three hundred yards—For bona fide polo ponies that have never won a race; top weight 175 pounds; 5 pounds allowed for every half-inch under 14 hands 2 inches; cup \$85; cup presented by Messrs. Shreve & Co.

Three-sixteenths of a mile—For ponies; top weight 165 pounds; 4 pounds allowed for each half-inch under 14 hands 2 inches; winners once this year to carry 5 pounds extra, twice or more 8 pounds extra; purse \$75; value to winner \$50, second \$15, third \$10.

Five-eighths of a mile—For ponies; top weight 155 pounds; 4 pounds allowed for each half-inch under 14 hands 2 inches; purse \$100; value to winner \$70, second \$20, third \$10.

Three-eighths of a mile—For ponies that have not won a race since January 1, 1904; top weight 160 pounds; 4 pounds allowed for each half-inch under 14 hands 2 inches; purse \$75; value to winner \$50, second \$15, third \$10.

MONDAY, MARCH 14.

One-half mile—For ponies; top weight 155 pounds; 4 pounds allowed for each half-inch under 14 hands 2 inches; winners once this year 6 pounds extra, twice or more 10 pounds extra; cup value to winner \$60, second \$25, third \$15.

Three-sixteenths of a mile—Handicap for ponies 14 hands 2 inches and under; weights announced Saturday, March 12th, at 6 P. M.; acceptance due Monday, March 14th, at 11 A. M.; purse \$75; value to winner \$50, second \$15, third \$10.

Three-eighths of a mile—For ponies; top weight 160 pounds; 4 pounds allowed for each half-inch under 14 hands 2 inches; previous winners at this meeting to carry 8 pounds extra; purse \$75; value to winner \$50, second \$15, third \$10.

One-fourth of a mile—Handicap for ponies 14 hands 2 inches and under; weights announced Saturday, March 12th, at 6 P. M.; acceptances due Monday, March 14th, at 11 A. M.; purse \$75; value to winner \$50, second \$15, third \$10.

Five-eighths of a mile—Handicap for ponies 14 hands 2 inches and under; weights announced Saturday, March 12th, at 6 P. M.; acceptances due Monday, March 14th, at 11 A. M.; purse \$75; value to winner \$50, second \$15, third \$10.

Three and a half furlongs—For ponies; top weight 160 pounds; winners once this year to carry 5 pounds extra, twice or more 8 pounds extra; purse \$75; value to winner \$50, second \$15, third \$10.

"Columbus" who edits that interesting department of *The Western Horseman* entitled "The Western Department," writes as follows of George M. Patchen 2:23½: "The *American Sportsman* quotes C. J. Hamlin as saying that he once saw George M. Patchen 2:23½ trot a mile to wagon in 2:16½. This is certainly a performance that few have ever read of and proves George M. Patchen the very greatest trotting stallion of his day. The writer has letters in his possession, written in 1903, at a time when he was preparing a table of the descendants of Andrew Jackson, which state in emphatic language that Andrew Jackson had no greater descendant than George M. Patchen, and that America never produced his equal. He was described as the most perfect type of a trotting horse; handsome, stylish, good gaited and apparently conscious of his powers and position. These letters were written by parties familiar with every trotter from Flora Temple to Maud S. and Nancy Hanks, and represented the views of honest, practical horsemen. It is recalled that one Boston gentleman wrote as follows of George M. Patchen: 'It has frequently been claimed that Robert McGregor was 'Emperor of the Homestretch,' but it could be stated of George M. Patchen that he was master of ceremonies during the entire length of the mile; equally as attractive when the word was given as when finished; always appealing to one's sense of beauty and fitness, and ever the same great horse.'"

Cured Swollen Navel.

The Lawrence-Williams Co., Cleveland, O., Jan. 20, 1903.
Used your Gombault's Caustic Balsam on valuable colt with swollen navel. It was as big as an egg and of two months' standing; very hard. It cured him sound and well. Think there is no medicine that equals it. Our druggist handles it, and several have been using it.
W. T. DUHE.

Answers to Correspondents.

Please give me the breeding of Miss Grant, thoroughbred?

Answer—Miss Grant, chestnut mare, foaled 1893, by Audrain (son of Springbok and Alme by Planet), dam Madamoiselle by Red Eye, second dam Magenta by imp Yorkshire.

T. P. SCHWARTZ, Woodland.—To decide a bet please give twenty mile trotting record.

Answer—The twenty mile record is held by Capt. McGowan, a roan horse of unknown breeding. It was made at Boston, Mass., October 31, 1865. He trotted the distance in 58 minutes and 25 seconds. Six horses have trotted twenty miles inside of one hour and hold official records.

W. W. PRICE, Butte City, Cal.—Please give through the columns of your valuable paper the names of a few of the best colts of Prince Airle 28045 and the performances of each; also his own record.

Answer—Prince Airle has no record. He was sold at the closing out sale of Corbett's farm in 1898 to Mr. Gordon F. Williams, who shipped him to Kimberley, South Africa. None of his get have yet taken standard records that we know of.

R. E. M., City.—Please give me the breeding of Why Not and Rita, both thoroughbred mares.

Answer.—There are two mares named Why Not. Both are chestnuts. Why Not, foaled 1886, is by Three Cheers, dam by Joe Hooker, grandam by Norfolk. Why Not, foaled 1883, by Geo. Wilkes, dam Flora A. by Tom Bowling, grandam by imp. Australian.

F. S. DASHIELL, Santa Rosa.—We do not find the mares you name in any volumes of the Register up to date.

J. H. SANDERS, Smartsville.—We do not find Fairfax by Rinfax in the stud book. He raced as hy Rinfax, dam Carmalita.

GEO. R. DITTUS, Sacramento, Cal.—Please give the breeding of Rockwood, his record and state if he has sired any in the list. Also the breeding of Comet and his record.

Answer.—Rockwood 1467, bay stallion foaled 1875, by Fleetwood 894, dam by Abdallah 15. He is the sire of five in the list. He has two producing sons, and his daughters have produced seven with standard records. He has no record. A gelding by the same name has a record of 2:25½ made at San Jose in 1894. Three trotters and five pacers by the name of Comet have records, and we do not know which one you refer to.

A. ABBOTT, Oakland.—Please answer in your next issue if there was a son of Director called Correction. If so how was he bred on dam's side and record if any, also where owned and by whom bred.

Answer.—We do not find any record of Correction by Director. The horse Corrector by Director was bred by Mr. Frank S. Malone of this city. His dam was Brainey by Echo, and second dam Lady Dudley by Tom Dudley. Corrector is the sire of Helen J. 2:18. Corrector did not have a standard record.

W. J. S., Seattle, Wash.—We can find no record of a mare by Diablo called Hazel B. If you will give us her age and state what year she raced we may be able to ascertain the facts you desire. Please give the owners as far as you know.

GEORGE WOODS, San Luis Obispo.—Will you please answer the following in your next issue if possible? Give Altoona's (8850) 2:30 list. He is sire of how many dams? Also name of Monroe Chief.

Answer—Altoona 8850 is sire of May B. 2:16 Alloreta 2:16½, Almo Jay 2:19, Almo 2:22½, Altoonia 2:22½, Flora G. 2:25, Lara D. 2:25, Alberta 2:29½. His son Almo Jay is the sire of Robin 2:23½. One of his daughters has produced San Luisito 2:14½. Monroe Chief 875 is the sire of 12 in the list. Ten of his daughters have produced 12 trotters and 1 pacer in the list.

W. MARTIN, Sacramento.—I have just got a horse called Judge Walling. He was sired by Waldstein. Will you please let me know through the next issue of your paper whether he has a record, and if so, what it is. Also give me his breeding on dam's side. He used to be owned by a man by the name of Jacobs.

Answer—Judge Walling's name does not appear in the Year Book as having a record. He is not registered and we have no record of his breeding.

Dr. S. A. Tuttle—
Dear Sir:—I write you these few lines in gratitude I owe to you for your splendid Elixir for what it has done for me. I tried many liniments, but I had the suggestion to give Tuttle's Elixir a trial. I had an accident which broke the ankle joint on each side. I had much trouble in fighting with inflammation which kept it in a swollen condition for a long time. But when I applied the Elixir I found relief and had the pleasure of a peaceful sleep, which I had not enjoyed for eight weeks before. I kept on applying it until I felt perfectly safe to go without a cane, and now I have no sign of any pain and feel all right. I have met many who have had accidents since I became well, who asked me what I did, and I have recommended your Elixir, with the same effect. I used only two bottles where I used six of the other liniments.
Yours truly,
THOMAS DAVIES, 36 Kilton Street.
Taunton, Mass., April 21, 1902.

Death of J. Malcolm Forbes.

One of the greatest losses that has come upon the trotting horse industry of the United States in many years is the death of Mr. J. Malcolm Forbes, of Boston, which occurred February 19th. The following account of Mr. Forbes' career is taken from the *American Horse Breeder* of that city:

John Malcolm Forbes was born in Milton, Mass., February 2, 1847. He graduated from the Boston English High School in 1863, after which he entered the counting room of his father, a prosperous and very highly respected merchant and extensive ship owner, who amassed a great fortune in the East India trade.

After becoming familiar with the details of his father's business, J. Malcolm Forbes resumed his studies again, entering the Massachusetts Institute of Technology, from which he was graduated in 1869. He soon after became a partner in the firm of J. M. Forbes Company, founded by his father, and for several years past has been at the head of that establishment. He was financially interested in several successful railroads, both steam and street, in various parts of the country. He became interested in the Bell Telephone enterprise in its early days, and for several years has been one of its directors.

When the American Trotting Register Company was formed, and bought John H. Wallace's works, Mr. Forbes furnished substantial financial aid to the enterprise, and has since been a director in that company. When the New England Trotting Horse Breeders formed a stock company several years ago, and built the excellent mile track at Readville, Mr. Forbes became a large stockholder in that association and has since been one of its strongest pillars.

The deceased was a natural athlete and a great admirer of clean, honest sports, especially contests of speed, both between horses and boats. He began racing boats when a mere boy, and has for years enjoyed the reputation of being one of the most expert amateur yachtsmen in the world. He was a member of the New York Yacht Club, as well as of the Eastern Yacht Club, and was commodore of the latter. He was also one of the most prominent members of the syndicate that built the successful cup defender Puritan, of which he afterwards became the sole owner. He finally sold the Puritan and bought the Volunteer, which he owned at the time of his death. He was also fond of fast trotters, and for many years has been one of the most prominent road drivers of Boston.

Some twelve or fifteen years ago, Mr. Forbes decided to engage in the trotting breeding business. He purchased several estates contiguous to each other in a part of Canton known as Ponkapog, situated directly at the base of the famous Blue Hill. Here he erected commodious, well ventilated stables, which, though modest in external appearance in harmony with the taste of the proprietor, who had no fondness for outward display, contained every convenience for the health and comfort of the animals. Suitable paddocks were fenced off, and a good trotting track constructed with a three-fourths of a mile circuit.

In selecting his foundation stock Mr. Forbes' aim was to secure the best. He had watched with interest the great success of Palo Alto as a trotting breeding establishment, and of Electioneer as a sire. About this time Arion astonished the world by trotting to a two-year-old record of 2:10½, lowering the world's champion record for trotters of that age 7½ seconds. Mr. Forbes liked the breeding of the young stallion, and in common with all trotting horsemen admired his speed. After considering the subject carefully he decided to buy the colt, if possible, to place at the head of his stud.

Ex-Governor Stanford, the owner of Arion, was then a United States Senator, and was at Washington. Mr. Forbes wrote Senator Stanford, asking a price on Arion. The senator replied that he did not care to sell the colt, and it would be useless to price him, as no one would pay what he should ask. Mr. Forbes briefly acknowledged the receipt of his favor, and added: "You did not reply to my question. I asked you what price you put on Arion? Please reply."

To this Senator Stanford answered that he "had not thought of selling the colt and should not sell him for less than \$125,000." Mr. Forbes then wired Stanford: "Will meet you in Washington," which he did at the earliest opportunity. Senator Stanford appeared somewhat chagrined when Mr. Forbes called upon him, and said he did not want to sell the colt at any price, and did not really consider that he had positively offered to take \$125,000 for him.

Mr. Forbes replied that he considered it his privilege to claim Arion for \$125,000 in case he decided to pay that price, but added, "I shall not buy the colt until I look him over. I shall go to California and see him. If he suits me I shall pay you \$125,000 for him, the price which you gave me to understand that

I could have him for, and on account of which I have left my business to visit you."

Senator Stanford was too honorable to retract. Mr. Forbes visited California, liked the colt, paid \$125,000 for him, and also bought several choice young mares from Palo Alto Farm at high figures. This it will be remembered was when prices on choice trotting stock were at high water mark.

The price paid for Arion is the highest ever paid for a trotter. The nearest approach to it is \$105,000, paid for the stallion Axtell after he had trotted to a record of 2:12 as a three-year-old.

When Bingen 2:06½ won the two-year-old stake at a meeting of the New England Breeders' Association at Mystic Park, Mr. Forbes was present and liked the colt. Bingen was then owned by George W. Leavitt, now of Readville, and Mr. E. H. Greely of Ellsworth, Me. Other parties had been trying to negotiate for the colt. Mr. Forbes asked Mr. Leavitt his price for Bingen. His price was \$8000. "I will take him," said Mr. Forbes. The latter was much like the late Robert Bonner who once said: "If a horse suits you, buy him, and pay the price." It took Mr. Forbes but a few minutes to buy Bingen.

Those who were most intimately acquainted with Mr. Forbes, will always remember him as one of the noblest types of sturdy New England manhood. He stood squarely and unflinchingly for everything that was honorable, upright and just, both in business and sports. He thoroughly detested in both, everything that savored of deception, trickery and unfairness. During the past few years he contributed liberally to the support of trotting interests. He has raced horses with varying success. If he ever suffered by an unjust decision made by an honest judge, no murmur of complaint escaped his lips. Speculating upon the results of a contest had no charm for him. He was in favor of pool-selling, properly regulated, because he realized that high-class trotting meetings which bring together the best horses, cannot be successfully conducted without it. He patronized trotting meetings from pure love of that noblest of all sports. He was anxious to see every element that is detrimental to it eliminated, and reforms instituted that will make it as attractive and unobjectionable to the best element of society as are the best conducted theatres and most fashionable resorts of amusements. He was as willing to sacrifice as much to accomplish this desirable object as any other man.

Mr. Forbes was easily approached, but to strangers his quiet, dignified reserve made him seem somewhat cold and uncompanionable. His most intimate acquaintances and friends, however, know he was exactly the opposite. It can be truthfully said of him as Mark Anthony said of Brutus:

His life was gentle, and the elements
So mixed in him that Nature might stand up
And say to all the world: "This was a man."

News from the North.

Last week's issue of the *North Pacific Rural Spirit* was a handsomely illustrated edition of 32 pages, a large portion of which was devoted to the resources of Polk county, Oregon. From the horse department of the paper we extract the following items of news:

Notwithstanding the fact that Altamont spent most of his days in or near Oregon, there are but three entire sons of this grand old horse in this State.

The Idaho Inter Mountain fair has announced two early closing harness events for their 1904 fair as follows: \$1000 for 2:14 pacers, and \$1000 for 2:17 trotters.

N. K. West has employed Simeon Lindsey to train and drive his stable of trotters this year. Mr. Lindsey is a young man of sterling qualities, and the masterly way he handled Vision 2:12½ last season placed him in the front rank as a trainer and driver. We wish him success with The Commonwealth, Satin Royal and others that may come under his direction.

Three Years' Experience.

Here is a letter of a veteran trainer who knows his business. He has found in Absorbine something that he can depend on to take out soreness. He has evidently, like all the rest who handle the good ones, experimented largely, but now he has found something he can pin his faith to, can absolutely rely on:

Niles, Ohio, April 27, 1903.
W. F. Young, Springfield, Mass.
Dear Sir:—For the last three years I have used Absorbine in doing a racehorse, and find it best for taking out soreness by steaming the shoulders and muscles of anything I can find.

Yours truly,
Absorbine \$2 per bottle, express prepaid.
Address W. F. YOUNG, P. O. F., Springfield, Mass.

The racing partnership of L. V. Bell and James H. McCormick has been registered with the Eastern Jockey Club. McCormick is only interested in one-third of the stable, which will race in the name of L. V. Bell. Almost every prominent trainer in the country is interested to this extent in the horses which they train, and this 10 per cent interest which they have in the winnings has to be duly registered.

A finesurrey, one of the best made, and handsomely finished is for sale at about half its value by the Kenney Manufacturing Company, 531 Valencia street, San Francisco.

Leading Sires of Winners.

The volume of 2:30 speed which a stallion sires has ceased to be of much interest to the man who hopes to breed a winner, for the reason that 2:30 speed is of no value on the race track.

To-day a winner must be able to perform in 2:15, and he will not travel far in fast company without being able to shade 2:10 when necessary. Hence, the main question about a stallion is not as it used to be, "How many has he in the list," but "How many winners has he?" That is the vital point. What proportion of a stallion's standard performers have records in 2:15 or 2:10? An answer to this question gives the true test of a stallion's value. The table which follows is prepared for the purpose of showing all trotting bred stallions living or dead, that have sired twenty or more with records in 2:15. These are the most successful sires of what is now considered winning speed. Only ten stallions come within this classification. The number of their performers in 2:30, 2:15 and 2:10 is given in the first three columns, and the next two columns give the percentage in round figures of each stallion's 2:10 and 2:15 list as compared with his 2:30 list. The date in front of the stallion's name is the year in which he is foaled:

	No. of performers sired		Percentage performers	
	2:30	2:15	2:10	2:15
1865—Direct 2:05½	54	30	8	37
1887—McKinney 2:11½	57	27	8	45
1882—Baron Wilkes 2:15	112	28	11	24
1881—Gamhetta Wilkes 2:19½	147	27	12	18
1876—Alcantara 2:23	164	31	10	6
1875—Bourbon Wilkes	97	22	6	22
1875—Onward 2:25½	182	27	10	6
1880—Wilson 2:19½	117	20	6	17
1874—Red Wilkes	175	34	3	14
1878—Simmons 2:28	120	26	2	21

The classification brings out very clearly the leading positions as sires of extreme speed held by Direct 2:05½ and McKinney 2:11½, and singular to say they are the youngest stallions in the table. Both are exceedingly popular in the stud and have a large number of fast youngsters coming along, which will place them that much further in the lead over what we have been accustomed to consider our most successful sire.—*Horse Review*.

The American Trotter.

For centuries all leading nations of the earth have aspired to produce a breed of light and medium harness horses which would, to the highest degree and in the broadest sense, best fill the place of a universal horse, but not until the American trotter received those efforts of improvement was effective progress made. The breeds of older countries go too much to size and "meat," while the American thoroughbred was never a harness horse. For something more than a century have rational efforts been made to perfect the breed of the American trotter, and though a breed has not been perfected, we are to-day breeding, in large numbers, the most perfect harness horse yet produced in any country, and to mammoth proportions has the trotting horse breeding industry of this country grown. Not only do we produce the fastest harness horses in the world, but the American trotter, as bred and raised at the present day, is not only by far the most useful horse of the period, but he is the nearest ideal individually. He is not only a harness race horse, but he is the ideal road horse, a splendid saddle when trained to saddle; the best carriage horse in the world; an incomparable horse show horse, and, withal, unsurpassed as an agricultural horse—an every-use farm horse.

In considering the present status of trotting horse breeding and casting around at the great number of stallions in service—as shown by the business pages of this splendid business number—the more timid are disposed to ask: "Are we not breeding too many horses, and will we not again, in a few years, find ourselves with a big surplus and fighting with low prices?" To this the logical answer is, no. Why? Because we are breeding a very different class of horses from that which we bred ten to twenty years ago when we glutted the market; because, largely through the much better general average of trotters bred at the present time and for some years back, the uses to which trotting bred horses are put have increased many fold; because everyone who wants a horse at all wants a good one, and because we are now breeding good ones. It was largely the lack of quality that caused so much loss in horses some years ago, and as breeding is being carried on now that lack of quality will never again be so marked. People are not now content to breed for speed alone, nor does value depend on speed alone. It is no unusual thing nowadays for trotting bred horses which do not trot fast to sell for from one to five thousand dollars, and for every single horse of this kind that is now produced there are scores of buyers. As now bred and raised, nearly all trotting foals make good looking horses; are good for something, and bring good, fair prices when offered for sale—prices which net good profits. Breeding and raising a trotting bred colt, one by a really good sire and possessing some future promise—as most of such do—is a most interesting operation, and offers diversion and profit to the over-worked business man, professional man and the up-to-date farmer.—*Western Horseman*.

Notes and News.

Boodle 2:12½ is dead.

Welcome 2:10½ will make the season of 1904 at Watsonville.

George G. 2:12½ will be raced over east this year. It is expected that he will be a good horse in his class over there.

Sadie Moor 2:26 dropped a fine colt by Guy McKinney March 20th and on the 29th was bred to Arner, own brother to Diablo 2:09½.

At an auction sale of horses held in Sanger this week prices were good and bidding lively. A yearling by Athaneer sold for \$112.50.

The Livermore horse show will be held to-day and there is every prospect of a fine display of horses. The parade will start at 11 A. M. prompt.

Harry J. 2:09½ has been taken to Pleasanton by Geo. Trank and will be made ready for the 2:10 and faster pacing classes in California this year.

Vance Nuckols, who bought Pauline Simmons for \$2000 at the Lexington sale of the Tranter-Kenney Co., will campaign her down the Grand Circuit.

Thos. Smith of Vallejo was in this office one day this week and states that he will soon have a program arranged for the Vallejo meeting this year.

The Idaho Inter-Mountain Fair, which holds its meetings at Boise City, will give \$1000 for 2:14 class pacers and \$1000 for 2:17 class trotters this year.

A carload of grade draft horses were purchased in and around Salinas last week by a San Francisco dealer. The average price paid was \$250 per span.

S. Christianson's handsome mare Simone by Simmons will be bred to Kinney Lou 2:07½ this year. His brown mare by Allie Wilkes will be mated with Stam B. 2:11½.

Belgium will make a great exhibit of draft horses at the world's fair. The animals are being assembled at Springfield, Ill., where they will be kept until the exposition opens.

It looks as if the racing on this coast will be first class this year. All the purses are filling well. Associations that have not thus far announced dates would do well to get in line.

Fourth payment of \$10 each must be made on foals of 1903 entered in Breeders Futurity No. 3 by April 1st. This stake has a guaranteed value of \$6000. If you have a nomination in it pay up.

Osmont, the pacer by Altamont that Under Sheriff Daly of Napa sold to Salt Lake parties, is now owned by Mayor Ezra Thompson of that city. Osmont took a record of 2:14½ last year at Boise, Idaho.

But little work has been done with the trotters and pacers during the past few weeks owing to the rains. The downpour has been very welcome, however, and there is no kick at the condition of the tracks.

There is an average of a little over twelve entries to each purse advertised for the Breeders meeting, and Oregon, Washington and other distant points to hear from. The full list will appear next week.

Red Nuttle, a full brother to Red Nutting 2:13 by Red Wilkes, will make the season at San Jose this year. Red Nuttle is a large horse, well proportioned and a naturally fast trotter. His colts all show speed.

At the regular auction held in Chicago week before last two drafters of Clydesdale blood were sold, one for \$350 and the other for \$360. These are the best prices paid this year for drafters in the Chicago market.

There is a three-year-old brother to Diablo 2:09½ at Oakwood Park Farm that is a pure gaited trotter and will be trained at that gait. Bert Webster is handling quite a number of very promising youngsters at this farm.

Direct and McKinney lead all stallions in the percentage of 2:10 and 2:15 performers in their lists. McKinney mares bred to Bonnie Direct should make the right nick, as it will be a union of the two greatest speed producing families.

Did you nominate your mare in the Pacific \$6000 Breeders Futurity for foals of 1903? If so, see that the fourth payment does not go delinquent on the first day of April. You can't win the stake unless you keep up these payments.

Charles Whitehead is handling Mr. J. D. Kalar's three-year-old filly Maggie Glynn by Robin at the Salinas track, and thinks her a good prospect. She is entered in the Occident Stake of this year, and is being pointed for that rich event.

Davenport, Iowa, which is generally visited by the California trainers who go East to race in the Mississippi valley, has claimed August 15th to 20th as its dates. Four stakes of \$1000 each will be advertised and nine purses of \$500 each.

Judge Vanderhurst, of Salinas, has sent his four year old pacing gelding Darius by Dictatus, and his two year old colt Roberto by Robin, to Charles Whitehead, lessee of the Salinas race track, to be trained. Both are very promising prospects.

Orders for Vita Oil are being sent in to the manufacturers very often these days. This sterling remedy has been popular with California horsemen for years and its popularity is extending all over the eastern states. It is an assassin of pain and soreness.

Martin Carter has sent eight head of trotters and pacers to San Jose in charge of William Cecil. His stallion Nutwood Wilkes put three three-year-olds in the list last year and there are about a half dozen of the same age that are ready to enter the list this year if asked.

County Clerk J. D. Kalar of Monterey county has sold to George Davis of Pleasanton the sorrel pacing mare San Lucas Maid 2:11½ by Dictatus, dam by Sidney; second dam by Berlin, son of Reavis Blackbird. The price paid was \$1000. San Lucas Maid is six years old and much faster than her record.

The Village Farm of C. J. and Harry Hamlin pay Direct's son, Direct Hal, a great compliment indeed when they put his stud fee for 1904 at \$150, while the fee of their premier sire, the great Chimes, is placed at \$100. The people in the East most certainly appreciate the value of a fast and well bred son of Direct.

E. D. Jordan, owner of the Plymouth Hackney Stud, has sold the imported Hackney stallion Lord Denby 2d to a breeder in England and the stallion, together with three fine carriage horses, was recently shipped to London. Lord Denby's place in the Plymouth stud has been taken by imp. Gentlemen John.

Ed Parker has reached Pleasanton with J. B. Iverson's string of trotters and pacers. There are seven in all, as follows: Dictatress 2:09½, Prince Gift 2:12, Dictina by Dictatus, Princess 2:15½, Derby Chief and three youngsters. Mr. Parker will have a couple of young Rey Directs from Rancho del Valle in his string this week.

Orlando J. Ralph of Moscow, Idaho, writes the BREEDER AND SPORTSMAN that he will be out somewhere with his string of horses this year, but has not fully decided just where he will race. His horses have not had a harness on since last October owing to the weather and he cannot begin training until April. If Mr. Ralph does not go East he may come to California.

There is a demand for several nominations in the Breeders Futurity No. 3, foals of 1903. Nominators who are paid up in this stake and whose mare proved barren, had a dead foal or twins, or whose mare or foal died, have the right of transferring such nomination or of substituting another foal regardless of ownership. These substitutions must be made on or before Friday, April 1st.

Searchlight 2:03½ will again have a grand lot of royally bred mares this year. He has everything to commend him and that he will sire extreme speed is as certain as night follows day. His stable companion, Lecco, will also be one of the great speed sires. Two such highly bred and splendid individuals as Searchlight and Lecco will do much to improve the stock of California, and they should be liberally patronized.

C. A. Stanton, who recently opened at San Jose, Cal., a branch of Singmaster & Sons, Keota, Iowa, breeders and importers of Percheron, Shire, Belgium and French Coach horses. Anyone in need of a stallion of either of these breeds should call on or address Mr. Stanton at 63 North Pedro street, San Jose. McCormick Bros. of Rio Vista recently purchased a draft stallion of Singmaster & Sons, for which they paid \$2500.

Peter J., a son of Stam B. 2:11½, owned by S. U. Mitchell of Sacramento stepped a half in 1:15 the other day, with the last quarter in 35 seconds—and this with his first pair of shoes since last summer. Unfortunately he is not entered in any stakes. Moral: Enter your colts in the stakes in the days of their extreme youth and when they are three year olds they will have a chance to earn you goodly sums of money.

C. K. G. Billings has put a number of his greatest matinee mares out of commission via the breeding route. It is stated that Lucille 2:07, the ex-champion wagon trotting mare is in foal and will be bred back in the spring as will Mazette 2:04½, erstwhile champion pacing mare, Louise Jefferson 2:10, Imogene 2:11 and Fanny Foley 2:19½, at three years of age. These mares are all to be bred to John A. McKernon 2:04½, to which Lucille is said now to be in foal.

It is reported on what is considered reliable authority that the Napa Race Track has been sold to parties who will cut the property into town lots. A new electric line is in course of construction between Vallejo and Napa and the buyers of the race track property are interested in this road. As the land adjoins the town of Napa it will make ideal residence property, but it is a pity to see the track go. We understand the price paid for the property was \$9000.

A dispatch from Eldora, Iowa, says: "R. J. Baker, a prominent horse buyer, has been located here for a number of days buying horses and mules for the Japanese-Russian war, and has purchased thus far during the month of January in central Iowa \$80,000 worth of these animals. The mules and horses are shipped to Buffalo, and will then be shipped abroad. Mr. Baker is an expert judge of horses and had no difficulty in buying forty head here one day."

The broodmare Laurel 2:13½ by Nephew is offered for sale. Her dam is Laura C. 2:29½ by Electioneer, her second dam the thoroughbred mare Fanny Lewis by imported Buckden. Laurel is in foal to Stam B. and is expected to foal any day. Her four-year-old filly by the same horse is at Santa Rosa, and is evidence that the nick is a good one. Laurel is owned by an estate and Mr. F. J. Yandel of Santa Rosa, who has her in charge, has been ordered to sell her. She is a bargain at the price asked. Write him about her.

Kinney Lou 2:07½ never in his life looked as well as he does now, and Budd Doble expects great things of him this year. His stud season will end May 1st. Several mares have already been bred to him and several more are booked. He is McKinney's fastest stallion trotter, and McKinney is the greatest of all 2:15 sires. Kinney Lou's dam Mary Lou 2:17 was a great race mare. He is from race winning and producing families on both sides, and if he don't sire great speed and high class race winners there is not much in breeding.

The stallion Justinian is offered for sale. This horse was sired by Richards Elector, son of Electioneer, and his dam is the great broodmare Lily Langtry, dam of Ed B. Young 2:11½ and Dudley 2:14, by Nephew. Justinian is a trifle over 17 hands high, weighs about 1300 pounds and is a grand horse. He has been owned by a gentleman of means who did not have him trained and has bred him to a few of his own mares. Justinian has splendid trotting action, is a rich seal brown, and perfectly sound and gentle. He should make a great stock horse. See advertisement.

James Butler of New York, who has so many young horses in training at Pleasanton under Monroe Salisbury's charge, expressed his views recently on training three-year-olds as follows: "A well developed fast three-year-old will stand a lot of work, and I do not believe it is any too soon to begin racing them. In my opinion there is really less danger of a colt going wrong or breaking down by racing him every week from Buffalo to Lexington, than if he were receiving his special weekly preparation for the Kentucky Futurity. A three-year-old that is racing weekly is more likely to be in shape for the Lexington Futurity than if he received special preparation for that race only."

Dolly Dillon 2:06½ by Sidney Dillon, sire of the champion trotter Lou Dillon, has been sold for a long price to James Brown, a Vienna millionaire, and was shipped to her new Austrian home on Friday of last week. She went in fine style on a fast passenger steamer and her berth cost more than a prima donna's. The price is not mentioned, but as \$13,000 was refused for her lately, it can readily be guessed that the Vienna horse fancier paid well. Last spring Lou Dillon sold for \$4000, at auction, but she has greatly improved since that time. The mare is nine-years-old, and, as under Austrian laws horses over nine-years-old are forbidden to race, her racing career abroad will be brief.

Silver Moon, the handsome big three-year-old owned by James Berryman of Pleasanton, is in the stud at that place at the very low fee of \$25. Silver Moon is a son of Silver Bow Jr., that phenomenally fast trotter owned by Isaac Morehouse, that is credited with workout miles in 2:10 and quarters in 30 seconds. Silver Bow Jr. was by Silver Bow 2:16 and he by Robert McGregor, sire of Cresceus 1:59½. The dam of Silver Moon is Leona by Almoon, son of Algona, sire of Flying Jib 2:04. Silver Moon represents a combination of the McGregor and Almont blood that should be a very desirable outcross for nearly all California mares. He will get size and good looks and has as good a chance to sire speed as any horse.

In spite of the threatening weather the Horse Show at Haywards last Saturday was a complete success. There was a parade of over one hundred horses trotting bred, thoroughbreds, carriage and draft breeds and some very fine teams and single horses were shown. William McDonald of Livermore filled the position of announcer and did his work in a first-class manner, giving the pedigree and particulars in regard to each horse as it was led by the stand. A number of sales were made during the day and nearly every stallion exhibited had one or more mares booked by owners who attended the show. The rain of the day previous, and the threatening weather of Saturday morning kept many people away who would have otherwise attended, but there was a big crowd present nevertheless.

Jerome Eddy 2:16½, who died last week in Rhode Island, was the sensational trotting stallion of his year, 1882, and there were not a few horsemen who predicted that he would eventually become the champion trotting stallion. His record was but a second and a quarter slower than that of Smuggler whose 2:15½, made in 1876, stood for eight years. But Jerome Eddy never reached the pedestal upon which his admirers had set their hopes that he would one day be placed. He did, however, retire from the turf at the close of the 1882 campaign the most talked-of stallion in the world. In the Jewett stud he had the advantage of the best mares, yet as a sire he was by no means a pronounced success, falling, eventually, into the list of the neglected, as has been the fate of nearly every male descendant of Volunteer 55. Jerome Eddy's fastest performer is the trotter Fanny Wilcox 2:10½. Another performer, the pacer Violetta, also secured a record of 2:10½. His other contributions to the 2:15 list are Ella Eddy 2:12 and Mary Ann 2:12½, both pacers. He sired the dams of sixteen standard performers, including the stake-winning colt trotter The Rajah 2:14½, one of the best youngsters ever raced, and a great winner both at two and three years. Jerome Eddy was by Louis Napoleon 207, out of Fanny Mapes by Abdallah 15.

Harness Racing in Russia.

The following account of harness racing in Russia was written by Thos. Mack for the souvenir number of the *Western Horseman* which was published Feb. 12th, and is one of the most complete and interesting accounts of racing there has yet been printed:

"Many people think the land of the Czar to be a cold, barren country where nothing could be attractive but a roaring fire to keep warm by. Now this is a great mistake, as Russia has some delightful weather, their summers being about like our own here in Indiana, and I think a great deal warmer. The winter, it is true, is very cold, but nevertheless the trotting is carried on just the same.

The horses over there are of a coarser, bigger-boned and more rugged type than the American trotter. They can stand the climate, both hot and cold, much better than the imported horse, as I have known several horses that became quite famous here in America, and were sold to Russia, which were failures the first year or two, simply because they could not get acclimated.

No American's horses are allowed to trot in Russia now, only in a few small races, and then he must give the native horse from three to five seconds, something rather difficult to do. Two year olds are not allowed to race at all, and three year olds can only trot a verst, which is about three-quarters of an English mile. As a four year old a mile is the limit, but after the fourth year any distance up to four miles can be trotted. By this method the Russian horses are kept in use when others are broken down owing to early training. No geldings are allowed to trot by the Russian clubs, and as for pacers they are hardly known. The first meeting of the year is held at Moscow, which starts about the 10th of April, and the races here are conducted just as they are in the United States. Some very large purses are hung up. The largest is the "Derby," and the value being over \$15,000 makes it a coveted prize. This race is for four year olds. Two heats are trotted; the winner of the fastest heat gets the money. When the entries are made each driver must be present to draw his number for the races. If he draws number one twice, he has the pole both heats, even though he be last the first heat. The positions are not awarded according to the finish, but as the drawing resulted the day before. At Moscow the starts are very bad, as the horses are compelled to walk up to the start, and when the word is given they are not moving faster than a three-minute gait.

Another peculiar rule we find in Russia, that is, there is never a distance, fig. If on going away a horse makes a standstill break, and the driver sees he has no chance for the heat pulls up and jogs the mile, finishing perhaps half a mile behind, still in the second heat he will be allowed to start again. Often-times a couple of horses will trot a good heat, and the drivers, satisfied that they can not do better in a second attempt, will draw their horses, and perhaps the drivers who finished third and fourth will come to the conclusion they can do no better and also draw out, leaving perhaps only the one who was far behind in the opening heat. The chances are that with the balance of the horses out of the way, he will go out and trot a quarter of a second faster than the first heat, thereby getting first money.

The purses and stakes are divided in Russia a little differently from in the United States. The winner gets 75 per cent of the entire amount, including purse, entrance money and everything, 20 per cent goes to the second horse and 5 per cent to the third. Outside the Derby there are about six other big stake races for four-year-olds, worth from \$2500 to \$8000. The best record for this age is 2:16. The three-year-olds have a number of good races; the best one is worth \$7500. The best record for this age is 1:30 (one verst). For aged horses there are a large number of good races, the best one, the Czar's prize, worth \$8000. It is not the money so much the owners care for in this race, but the honor of winning a prize named after the Czar is something any one of the Russian noblemen consider a great feat. The distance for this race is two miles. The best two-mile record is 4:35. Then there are races two and three-quarters of a mile, three and one-half miles and four mile dashes.

The best record for one mile, aged horses, is 2:14. The most amusing race I ever saw is the handicap, where the horses are placed according to their records. Usually there are about twenty to twenty-five starters, and they will be strung out over an eighth of a mile. The start is very trying on some of the drivers, as each one must stand at his post and wait until every horse has his right place. When all is ready and the entire field is standing still, the starter rings the bell and it is here the fun commences. Everybody tries to hurry their horses away, and as a result half of them are standing still or else hucking like bronchos. A lot of them will go away

on a run, and the result will be the whole outfit will be bunched in a short time. The horses that are handicapped the most as a rule win, they being steadier and faster.

About the middle of August the Moscow meeting is over and the St. Petersburg meeting begins. Here can be seen the old style racing as it was in Russia years ago. The track is three-quarters of a mile, and it is necessary to go a turn and a half for a mile. The horses do not race in company like they do in Moscow. All races are just like a workout, everything against the watch. Only two horses are raced at a time, sometimes twenty-five minutes is taken up with one race. Starting on opposite sides of the track, and going in the same direction, the two horses score down, and just as they come to the starting point an electric clock is started by the horse, and on finishing is stopped again by the horse. The way this is done is very simple. A small cotton string is attached to the clock and stretched across the track and tied to a post, so that when a horse goes away he will break this string with either his head or shoulders, and the result will be the clock will be set going. When finishing the string will be again stretched across the track and as the horse goes by the stand the clock is stopped in the same manner. This way there is no chance to give any horse only what is coming to him, and every one has a square deal. The time is then taken and placed on a board in front of the stand in view of all. Then the next two are called and so on down the entire number of the horses. The horse having trotted the fastest mile is the winner. I have seen races in St. Petersburg that were worth five to ten thousand dollars, and oftentimes a quarter of a second would decide the event.

Should a horse make three breaks in going a mile or five breaks going two miles he is disqualified. If in any one of these breaks he makes fifteen jumps, or, in other words, does not strike a trot in fifteen strides, he is disqualified.

The meeting at St. Petersburg lasts until about the 1st of November. Then the different stables ship home, and until about November 25th there is no racing. The reason is, they are waiting for cold weather to set in, and then the winter meeting will start. Of all the sport in the world, there is none to compare with the trotting in Russia during the winter months. Just as soon as the ice gets hard the meeting will begin, and lasts as long as the ice lasts.

The construction of these tracks is very simple, for all around the infield are any number of hydrants, and just as soon as it gets cold enough the hydrants are turned on and the track is flooded, freezing as fast as it strikes the ground. For several days this will be done, and by that time a thickness of perhaps four to six inches is the result. During the meeting every few days this same thing is gone through, and the track is kept as smooth as a billiard table. As it snows a little every day, large forces of men are kept busy cleaning the track, and by the time the meeting is half over large banks of snow to the height of eight or ten feet will be banked all around the course.

At Moscow there can be seen large fields of horses scoring for the world, the drivers wearing their colors and riding in sulks, just as it is in the summertime. The grooms stand around with heavy furs and cool their horses out, never paying any attention to the cold. I have seen races trotted here 14 to 15 degrees below zero, and perhaps five to ten thousand people in attendance. The cold does not affect the public, as everyone wears heavy fur clothes and cares little how cold it gets. The law prohibits racing when the thermometer registers 16 degrees below zero, but oftentimes I have seen it 20 below and still they race. Owing to the short days in winter, the races are recalled at 11 o'clock in the morning, and are finished by 3:30 or 4 o'clock. In the summertime it is just the reverse, the start is about 5 o'clock and the finish at 9 or 10 o'clock at night.

There is no hookmaking in Russia. All betting is done in the French mutual style, and is backed by the government. Among the drivers can be found quite a number of Americans well known in the United States. Frank Starr, Frank Caton and son William, James Allen and John Raymer being the most prominent. The stand at Moscow is one of the finest in the world, and I think there is no other city that can compare with the old Russian capital from a racing standpoint. During the summer, while the running meet is on, there is sport every day of the week. Sunday is always the big day. The derbies and all large events are decided on the Sabbath. The price of admission is about the same as in the States. During the past five years there has been quite an advance in the breeding of trotters in Russia. As a rule, a good Russian mare bred to some good American stallion produces a first-class trotter. The best trotter over there the past two years among the three and four year olds is a son of Alvin (the chestnut stallion that was at one time owned up in Canada),

and out of a Russian mare. The get of Bron Rodgers have the most speed of any among the American stallions, still Harlo, San Malo and Winter-set have sired a number of good ones.

A good horse can win more money in Russia than he can in America. The purses are larger, they race the year round and only two or three ships have to be made the whole season. Should a horse go wrong during the summer he can be laid up until the winter meeting, and a bad leg can be made to stand during the cold weather much easier than when it is so hot.

Entrance money is very little compared to this side, and, all taken into consideration, a man with a first-class horse can win more and save more than he can in the States. Frank Starr had one horse that won in one year over \$50,000. All was won in St. Petersburg and Moscow, and as it is only twelve hours ride from one place to the other, but little shipping had to be done. Take the sports, the people, the climate and the country, and we can find many worse than Russia.

Sensible Words.

The following is an extract from an editorial in the last issue of the *Kentucky Farmer and Breeder*, the new paper of which Major P. P. Johnston, President of the National Trotting Association is one of the principal stockholders:

It has become the habit with certain parasites who live on the interest they defame, to decry the great work done by the trotting organizations and indulge a perpetual longing for the methods of the jockey club, an organization with less than a score of tracks, while trotting horses race on more than eleven hundred in this country and Canada.

The difference in magnitude and in conditions are neither estimated or understood by these people whose knowledge of the subject is in reverse ratio to the noise they make and the dogmatism with which they proclaim their ill-founded opinions. The trotting system represents the accumulated wisdom of the best intellects connected with the interest for the last thirty years that of men who were powerful in politics, in war, in literature and as capitalists and leaders in great business enterprises. They turned from their various vocations and lovingly gave their best efforts to safeguarding and developing the greatest organization of its kind the world has ever known.

Look from these men to the midgets who decry their work and clamor for the substitution of a system they understand as little as they do this. It would be amusing and instructive if some newspaper will delve in the debris that hampers the business and give a roll of these carpers to contrast with the men who created, developed and supported our unrivaled system.

Uniform laws and equality before the law are the underlying principles of the governing bodies of the trotting turf. No one of the trotting tracks have privileges or rules that are not equally secured to every other, whether a Grand Circuit track or a grand or lesser track, not in the Grand Circuit.

Trotting races will be administered on all of them alike, this year as heretofore, by three judges of equal power and dignity without interference from any source. No individual or set of individuals, official or private, will have the right or will dare to go to the stand and attempt by suggestion or otherwise to influence their action.

There are fourteen entries in the 2:10 pace for the Breeders meeting and it should prove a hummer. The pacers entered are Delphi 2:12, Topsy 2:10, Jonsa Basler 2:11, Harry J. 2:09, Edwin S. 2:13, Kelley Briggs 2:10, Ama A. 2:13, Tidal Wave 2:13, Dictatress 2:09, Daedalion 2:11, Alone 2:09, Cuckoo 2:13, Ben F. 2:10, and I. Direct 2:12. If this bunch of horses all come to the wire in good shape there can be three heats in 2:10 without anyone getting the flag. It should be a race worth going miles to see.

Horse Owners Should Use GOMBALT'S CAUSTIC BALSAM

The Great French Veterinary Remedy.
A SAFE, SPEEDY & POSITIVE CURE.

Prepared exclusively by J. E. Gombault, ex-Veterinary Surgeon to the French Government Stud.

SUPERSEDES ALL CAUTERY OR FIRING.

Impossible to produce any scar or blemish. The safest, best Blisters ever used. Takes the place of all liniments for mild or severe action. Removes all Bunches or Blisters from Horses or Cattle.

As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, etc., it is invaluable.

WE GUARANTEE that one tablespoonful of Caustic Balsam will produce more actual results than a whole bottle of any liniment or spavin cure mixture ever made.

Every bottle of Caustic Balsam sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address

THE LAWRENCE-WILLIAMS COMPANY, Cleveland, Ohio.

ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

SAVE THE BIRDS.

The Economic Value of the Flicker.

"Fair are the meadows,
Fairer still the woodlands,
Robed in the blooming garb of spring."

Would spring, with its fair meadows and woodlands, be the same if the birds were removed from it; or, if not all, some of the most familiar ones? Surely, the person who has no intimate acquaintance with birds and can hardly name a single species, would think that the opening year had a strange and unfamiliar aspect. Birds are as much a part of the garb of spring as the rippling brooks, the vernal grass, the swelling huds and the first wild flower. No other bird takes a more prominent part in the well known and favorite pastoral play of "Spring" than the flicker.

With his robust voice, rollicking and varied calls and grotesque actions, he is the clown of the play who season after season announces his presence with the oft repeated, familiar, but none the less welcome cry of "Well! here we are again." Although the flicker is a woodpecker, yet it is quite as terrestrial as arboreal in its habits and is as fond of taking a dust bath as are the gallinaceous birds.

Wherever the flicker is found it has so impressed itself upon its human neighbors that it has been given names expressing characters or individual traits of the birds. One compiler having collected no less than 124 of these vernacular names. So states Mr. William Dutcher, Chairman of the Protective Committee, American Ornithologists Union.

While the flicker is to a certain extent frugivorous in its food habits, yet by far the larger percentage of its yearly food is insects. Of these, ants (Formicidae) form the principal diet. This has apparently been the case for so long a period that the tongue of the flicker has become specialized in order that its favorite food may be obtained with the least trouble.

Diagrams, food tables and percentages prepared from data furnished by the Biological Survey, United States Department of Agriculture, show that 75% of the food of the red shafted flicker was composed of ants, beetles and miscellaneous insects, 12 1/2% of fruits and 12 1/2% of vegetable and mineral matter. For the northern flicker about 55% was composed of ants, beetles and miscellaneous insects, fruits about 35%, mineral and vegetable matter 10%. The percentage of ant food was 56% and 43% respectively. These facts were obtained from the examination of 394 stomachs of the northern flicker and 42 of the red-shafted flicker, over one-half of the specimens of the western species being from California; the stomachs of the northern flickers were collected in 28 States including Canada.

If the flicker had no other economic quality it would deserve protection because it is the enemy of the ant family, fifty per cent of its food for the year being of these insect pests. Ants, besides being wood-borers, care for and perpetuate plant-lice or aphids, which infest and are very destructive to vegetation in all parts of the country to the very serious loss of the agricultural interests. Professor Comstock says in his "Manual of the Study of Insects," p 157:

It is easy to see what benefit ants derive from this association with plant-lice, and how they should learn that it is worth while for them to care for their herds of honey-producing cattle. Little has been done, however, to point out the great benefit that accrues to the plant-lice from this relationship. It seems fair to assume that the plant-lice are greatly benefited, else why has the highly specialized apparatus for producing the honey-dew been developed?

Writers long ago showed that ants protect plant-lice by driving away from them lady-bugs and other enemies. Recently, however, Professor Forbes has demonstrated that, in certain cases at least, a more important service is rendered. In his studies of the corn plant-lice, he found that this species winters in the wingless, agamic form in the ear of previously infested corn-fields, and that in the spring the plant-lice are strictly dependent upon a species of ant, *Lasius alienus*, which mines along the principal roots of the corn, collects the plant-lice, and conveys them into these burrows, and there watches and protect them. Without the aid of these ants the plant-lice were unable to reach the roots of the corn. On p 637 it is stated: Ants take very good care of their cattle (aphids), and will carry them to new pastures if the old ones dry up. They also carry the aphid-eggs into their nests and keep them sheltered during the winter, and then carry the young plant-lice out and put them on plants during the spring.

Flickers also destroy quite a large percentage of beetles, moths, and miscellaneous insects and thus do much good. While the flickers are fruit-eating to some extent, yet cultivated fruit and grain are taken in so small an amount that the flickers can be considered entirely beneficial. Only one per cent of the food found in the 394 stomachs examined was cultivated grain and a like percentage was cultivated fruit. The fruit, however, was mostly confined to blackberries and raspberries, which might have been and probably were wild rather than cultivated. The following list of fruit and weed seeds, found in the stomachs of the flickers examined, shows conclusively that these birds do no harm to the agriculturist or fruit grower:

NORTHERN FLICKER: Fruit—Cultivated Cherry, Choke Cherry, Wild Black Cherry, Elder, Dogwood, Cornel, Peppercorn, Virginia Creeper, Hackberry, Poison Sumac, Poison Ivy, Sumac, Black Alder, Sullax, Blackberry, Raspberry, Waxmyrtle, Blueberry, Pokeweed, Serviceberry, Magnolia, Wild Grape, Huckleberry, Mulberry, Spicebush, Cedar, Sassafras, Persimmon, Apple, Pear, S. etc.—Sweet Fruit, Pigeon, etc. **WESTERN FLICKER:** Fruit—Hackberry, Pokeweed, Ivy or Oak, Apple, Sumac, Elder, Woodbine, Peppercorn, Grape, etc.—Purslane, Thistle, Amaranth, Acorn, Grass, etc.

The night hawk, dove, meadowlark and robin are the only species of birds which are not strictly game

birds that have suffered more than the flicker from boys, budding sportsmen and pot bunters.

In the fall of the year when the first frosty nights start the southward immigration and when the wild fruits and berries attract the flickers to the well laden branches, they suffer most from the gunners. It is not sport nor does it require skill to sit hidden under a tree and when a flicker flies in to pot it. Every land owner in the country should see that on his premises this style of hunting is stopped, and thus help to preserve one of the most useful birds.

To obtain much valuable and interesting information regarding flickers our readers are referred to the following authorities: "The North American Species of the Genus Colaptes, considered with special reference to the relationships of C. Auratus and C. Cafer," by J. A. Allen, Bulletin Am. Museum of Natural History, Vol. IV, pp. 21-24. "A Monograph of the Flicker," by Frank L. Harris, the Wilson Bulletin No. 31. "A Brood of Young Flickers and How They Were Fed," by Wm. Brewster. "The Auk," Vol. X, pp. 231-236. "The Food and Tongues of Woodpeckers," by F. E. L. Beal and Frederick A. Lucas, Bulletin No. 7, U. S. Department of Agriculture, pp. 35-39.

Description: The flicker (*Colaptes auratus*), No. 412, and Northern flicker (*Colaptes auratus luteus*) No. 412a, of A. O. U. Check-List. Male—Upper parts brown, barred with black; top of head slaty-gray; band of red at back of head; rump white, very conspicuous when bird is flying; tail black above, bright yellow below, except tips, which are black; throat and sides of head pinkish-brown; black mustache from base of bill; broad black crescent on upper chest; under parts from crescent to tail brownish-yellow white profusely spotted with black; under sides of wings bright yellow. Length from tip of bill to end of tail 11.50 to 12.50 inches. Female—Exactly like male except in lacking the black mustache. In rare instances there is a faint indication of the mustache in the female.

Red-shafted flicker (*Colaptes cafer collaris*), No. 413 of A. O. U. Check-List. Male—Very similar in most features to the Northern flicker. The prominent marks of difference are a red mustache instead of black; slaty-gray throat and sides of head instead of pinkish-brown; red under wings and tail instead of bright yellow. Length from tip of bill to end of tail 12.55 to 14 inches. Female—Similar to male but without a red mustache.

Remarks:—In the territory where the habitats of the Northern and red-shafted flickers overlap, many curious combinations of the characters of each species may be found.

Northern flicker (*Colaptes cafer saturatus*), No. 413a, of A. O. U. Check-List. Male—Is almost an exact counterpart of the red-shafted flicker in pattern of markings and size; it is, however, distinctly darker in coloration.

Gilded Flicker (*Colaptes chrysoides*), No. 414 of A. O. U. Check-List. Male—This species is a combination of the markings of the northern and red-shafted flickers. The band of red at the back of the head is lacking; the mustache is red as in the red-shafted flicker; the under sides of wings and tail are bright yellow as in the northern flicker. Female—Same as male, but lacks the red mustache.

Distribution: The Flicker (*Colaptes auratus*) and the Northern Flicker (*Colaptes auratus luteus*) have a combined breeding area bounded as follows: Commencing at Florida, northward to upper Labrador, northwesterly to and including Alaska, southeasterly along the Rocky Mountains to North Dakota, thence southerly to the Gulf of Mexico in Eastern Texas. It winters sparingly as far north as the parallel of Massachusetts, but the bulk are found south of a line from North Carolina westward.

The red-shafted flicker (*collaris*) is found from northern Mexico and Lower California between the Rocky Mountains and Pacific coast to northern California; from there northward to British Columbia it is confined to the territory between the coast ranges and Rocky Mountains.

The Northwestern Flicker (*saturatus*) is found in the humid region from northern California to Alaska.

The Gilded Flicker (*chrysoides*) is found from southern Arizona to Southern Sonora (Mexico), and westward to Lower California south of north latitude 30 degrees.

Nest: In an excavation chiseled by the flicker in a dead stub or live tree trunk. The entrance varies in height from two to seventy or more feet above the ground. Occasionally a hole is made in a post, telegraph pole, dwelling or bank. Apple orchards are especially favored as nesting sites.

Eggs: White and glossy. Number varies from four to ten for all species except the gilded flicker, in which it varies from two to five.

Coming Events.

Rod.

April 1-Sept. 10. Oct. 16-Feb. 1—Open season for taking steelhead in tidewater.
Nov. 1-April 1—Trout season closed.
July 1-Jan. 1—Open season for black bass.
Aug. 15-April 1—Open season for lobsters and crawfish.
Nov. 1-Sept. 1—Open season for crabs.
Sept. 1-May 1—Open season for shrimp.
Sept. 1-Oct. 16—Close season in tidewater for steelhead.
Nov. 15-Sept. 10—Season open for taking salmon above tide water.

Gun

March 6—California Wing Club. Live birds. Ingleside.
March 6—College City Gun Club. Blue rocks. North Berkeley.
March 10—Union Gun Club. Blue rocks. Ingleside.
March 17—Golden Gate Gun Club. Blue rocks. Ingleside.
March 27—Millwood Gun Club. Blue rocks. Mill Valley.
May 29, 30—Pacific Trap Shooting Association. Blue rock tournament. Ingleside.
July 1-Feb. 15—Dove season open.
Nov. 1-July 15—Deer season closed.
Sept. 1-Feb. 15—Open season for mountain quail, grouse and sage hen.
Feb. 15-Oct. 15—Closed season for quail, ducks, etc.

Bench Shows.

March 1, 2—Merrimack Valley Kennel Club. Lawrence, Mass. Albert Mitchell, Secretary.
March 2, 5—Duquesne Kennel Club of Western Pennsylvania. Pittsburgh, Pa. Fred S. Stedman, Secretary.
March 10, 12—Chicago Kennel Club. Chicago, Ill. H. J. Cassidy, Secretary.
March 15, 18—Rochester Kennel Club. Rochester, N. Y. H. H. Kingston, Secretary.
March 22, 25—Buffalo Kennel Club. Buffalo, N. Y. E. P. Sharp, Secretary.
March 28, 30—Brantford Kennel Club. Brantford, Can. Thos. H. Terry, Secretary.
March 30, April 2—Atlantic City Kennel Club. Atlantic City, N. J. Thomas H. Terry, Secretary.
April 7, 9—Victoria Kennel Club. Victoria, B. C. Thos. H. Terry, Secretary, Victoria, B. C. K. C.
April 13, 16—San Francisco Kennel Club. Eighth annual show Mechanics' Pavilion. J. L. Cunningham, Secretary-Treasurer.

AT THE TRAPS

The California Wing Club will open the live bird season to-morrow at Ingleside. The initial club race will be at 20 pigeons. The added money will be \$150, one money for every four guns, big guns to win.

The five following club shoots will be at 12 pigeons each, \$75 added; the concluding shoot will be at 20 pigeons, thus making 100 birds for each shooter during the season.

The handicapping and division of money will be the same as was in vogue last season. Four prizes valued at \$25 each will be awarded to the members that have made high scores for the seven club shoots.

The club events will start promptly at 10 o'clock a. m. on the first Sunday of each month. All back scores must be shot up prior to the shooting of the club match each meeting.

The handicaps as arranged by the Board of Directors are as follows:

C. C. Nauman 32 yards, M. O. Feudner 31, G. W. Gibson 31, Ed Donoboe 31, A. M. Barker 31, F. G. McConnell 31, H. E. Holmes 31, S. E. Knowles 30, W. E. Murdock 30, Ed Fay 30, A. T. Derby 30, H. F. Wagner 30, C. A. Haight 30, F. J. Stone 30, H. C. Golcher 30, P. B. Bekeart 29, G. H. T. Jackson 29, N. H. Neustadter 29, J. V. Coleman 29, P. J. Waleb 29, H. Justins 29, W. R. Golcher 29, E. Klevesahl 28, A. M. Shields 28, J. B. Coleman 28, Achille Roos 26, W. L. Gerstle 26.

The Union Gun Club will give seven regular club shoots this season at Ingleside. The first taking place March 14th and thereafter on the second Sunday of each month.

The club program for the season embraces four regular events:

First event—Warm up, 10 targets, big guns, entrance to be announced by the Captain.

Second event—Club race, 25 targets, \$26 added monthly, class shooting, eight classes: 24 and 25 breaks \$5, 22 and 23, \$4.50; 20 and 21, \$4; 18 and 19, \$3.50; 16 and 17, \$3; 14 and 15, \$2.50; 11, 12 and 13, \$2; 10 and under, \$1.50. Ties to shoot off at 10 birds, or shooter's option. Highest score in each class to take money. If no class, money reverts to big average trophy.

Third event—Club handicap match, 25 to 30 targets. Gold and silver trophies valued at \$50—Entrance 50c. Handicap to be governed according to scores made in club event, shooters to be divided into two classes: Over 17 breaks, first class, 17 and under, second class.

Highest score (a possible 25) in each class wins trophy during the month, same to become permanent property of member winning it oftener during the season. Ties to shoot off at 10 birds, or shooters' option. Handicaps as follows: Give 13 and under, 5 birds, 14 to 16 3 birds, 17 to 19 2 birds, 20 to 22 1 bird.

Fourth event—Open to all, handicap, 20 to 25 targets, entrance 50 cents. The club will add money at each shoot in this event. Shooters handicapped to ability, birds and distance, 20 breaks or over being possible. Purse to be divided. High guns, three moneys; 50%, 30%, 20%.

The Board of Directors will select and present a big average trophy to shooter making highest combined score during the season in club and trophy events.

One back score will be allowed in all events and must be shot up by the shooter at the shoot that he attends.

All shooters will shoot from 16 yards, excepting in fourth event, the winners in club handicap trophies, who, after once winning trophies, will shoot from 18 yards; upon winning trophies a second time, from 20 yards.

Other matches will be arranged by the Captain. At the end of the season a special medal will be given, and will be for shooters who have failed to win any prize in any of the second or third event shoots. Special medal race will be at 10 birds. Ties will be shot off at 10 birds in this event.

All shooters are invited to participate in any club, or other events for targets, at the rate of 2 cents per target. The initiation fee is \$1 per member, with an additional 50 cents per month for dues during the seven months of the season for trap shooting. Members in good standing will pay at the rate of 1 cent per bird in practice events.

The following are the officers of the club: Mr. C. A. Muller, President; Dr. W. A. Hansen, Vice-President; Mr. T. L. Lewis, Secretary-Treasurer; Mr. D. Daniels, Captain.

The Pacific Coast Trap Shooting Association propose to hold a tournament on the Ingleside grounds May 29th and 30th.

A meeting of the association will be held on the 14th inst.

A correspondent from the south sends us the following trap shooting data:

The initial blue rock tournament of the Pasadena Trap Shooters Association was held at Pasadena, Cal., on February 29th. Of the 19 shooters who took part in the shoot, 18 used Winchester "Leader" shells. The first high average of the day was captured by W. H. Seaver, shooting a Winchester "Pump" gun and Winchester "Leader" shells, with an average of 94.3-10%. Fred Gilbert, shooting a Smith gun and "Leader" shells, won second high average on 93%. J. E. Vaughn, shooting a Smith gun and "Leader" shells, tied with Guy Lovelace, who shoots a Parker gun and "Leader" shells, for third high average on 92.6-10%. The longest straight run of the day was made by W. S. Seaver with 47 consecutive breaks.

The Fish Commissioners will endeavor to propagate land locked salmon in several of the mountain lakes, a supply of eggs from Maine having been secured.

For all kinds of weather there is no drink like Jackson's Napa Soda—plain or in a lemonade.

Minimum Rating of Shows for 1904.

The following list is given in compliance with the rule that the secretary shall publish in the *American Kennel Gazette* for December of each year the ratings of shows for the following year. The next show given by any of the undermentioned clubs will have a minimum rating in accordance with this list:

	Dogs Entered	Min. Rating
Aurora K. C.	182	1
Rhode Island K. C.	523	3
Collie Club of America	66	4
Westminster K. C.	1650	5
New Jersey K. C.	572	3
Colorado K. C.	268	2
New England K. C.	735	3
Rochester K. C.	304	2
Duquesne K. C.	505	3
Coshocton K. C.	258	2
Unrichsville K. C.	254	2
Southwestern K. C.	138	1
Chicago K. C.	651	3
St. Louis K. C.	69	4
Buffalo K. C.	471	2
Atlantic K. C.	634	3
Sharon K. C.	246	2
San Francisco K. C.	465	5
Champlain K. C.	156	1
Montreal Canine Assn.	529	3
Ladies' K. Assn. (Hempstead)	639	3
New England K. C. (Braintree)	169	1
Wissahickon K. C.	480	2
Bay State Bench Show Assn.	260	2
Bar Harbor K. C.	75	1
Rhode Island K. C. (Newport)	309	2
Orange Co. Agri. Society	260	2
Bryn Mawr K. C.	371	2
Binghamton Industrial Ex.	34	1
Danbury Agricultural Society	318	2
Ladies' Kennel Assn. (N. Y.)	1159	4
Long Island K. C.	574	3
Boston Terrier Club	252	4
Philadelphia K. C.	550	3
Bay State Bench Show Assn. (Lynn)	274	2

Ratings of shows held in 1903 published to date:

Ladies' Kennel Association	4
Brooklyn	3
Boston Terrier Association	4

Moscow Dog Show.

The thirtieth dog show under the auspices of the Imperial Society of Sports of Russia was held at Moscow, commencing on Friday, January 29th, and concluding Tuesday evening following. This society enjoys the privilege of having the Grand Duke Vladimir, who is the Commander-in-Chief of the Russian army, and brother-in-law of the Duke of Edinburgh, as its president, and the Grand Duke Nicolai, whose magnificent team of Borzois is heard of in all parts of the European continent and in America, as well as in this country, as its vice-president. The latter nobleman is the Chief Commander of the Russian cavalry. Prince Menchikoff is also a leading member of the committee, which has in its honorary secretary, Dr. Scott, a gentleman of English extraction, who is noted for his popularity not only amongst the doggy community but throughout Moscow, the city of his adoption. Other gentlemen who took a leading part in the management, and who extended the greatest hospitality to the judge, were Mr. Daragan, the chairman of the committee; Mr. Southam, a brother of Dr. Southam, of Manchester; Messrs. Henry and Nicolas Stoecher, Mr. Henry A. Leyhrs (an American), and Mr. A. Morozoff, the last named a leading manufacturer of Moscow and employer of 15,000 hands, and at whose palatial residence in the city is to be seen probably the most wonderful private collection in the world of trophies of the chase shot by himself, including numbers of bears, wolves, elk, deer, lynx, and almost every variety of feathered game that is known in Russia.

The dogs, which numbered about 600, were benched in a spacious Drill Hall capable of supplying accommodation for at least five times that number, writes Fred Gresham in the English *Shooting Times*. Indeed,

at the same time there was a small horse show going on in the same building, and still plenty of room was left for the judging rings and for exercising the exhibits. On entering the Hall the first to attract the visitor was a number of stands covered with skins of bears and other wild animals, near to which were stuffed skins of wolves, which had been taken from animals that, when alive, were much larger than those seen at the Zoo, or other menageries in England; also cases of feathered game. On the second day two deer (a couple of Royals) shot by the Grand Duke Nicolai were brought into the show. These had been killed by the Grand Duke, with six others in the morning before he paid his visit to the show. Then, on the fourth day, four lynx were brought in, which had been shot the day before by some members of the committee. One of the deer had fifteen tines. Then came the dogs benched in the center and at the bottom of the Hall was the judging ring, necessarily a big one, considering that some of the classes were exceedingly well filled, one, for Pointer dogs, having upward of fifty entries.

There are no rules in Russia to refer to with regard to the management of dog shows; consequently, the committee has a somewhat difficult task to contend with, and, unless secrecy is kept as to which dogs have won prizes till the end of the show, very few of them would be brought back after the first day, as they are taken home each night, without any deposit having been paid; in fact, they are only on show about four hours each day, as they are brought in at 12 o'clock and taken away again at four. The prize cards are not up till the end of the last day. Gold, silver, and bronze medals are given as prizes, and a few special medals in the sporting classes. Mr. Gresham, who went over to judge the Pointers, Setters, Greyhounds, Fox Terriers, Collies and Bulldogs, did not complete his judging till the close of the third day; but he had a full list as there were upwards of 90 Pointers, in four classes, 54 Gordon Setters, 46 English Setters, and 30 Irish Setters. These were all independent exhibits, as no dog was allowed to compete in more than one class. The arrangement of the classes for each of the above breeds was a class each for dogs and bitches that had previously won a gold or large silver medal, and two classes for non-winners.

Specialty Club Notes.

The Pointer Club of America elected the following officers at a meeting held in New York during the W. K. C. show: R. A. Fairhairn, President; A. B. Hall, Vice-President; C. F. Lewis, Secretary-Treasurer; G. Muss-Arnoldt, D. J. S. Howe, Geo. S. Mott, Geo. S. Raynor, E. W. Throckmorton, C. P. Wilcox, W. C. Root, Dr. A. G. Terrell, Board of Governors; A. H. Ball, delegate to American Kennel Club.

The Russian Wolfhound Club of America was formally organized on Wednesday, February 10th. Constitution and standard was adopted, and officers elected as follows: Edward L. Kraus, President; John G. Kent, Vice-President; Jos. B. Thomas, Jr., Secretary-Treasurer; Executive Committee—James Mortimer, Dr. J. E. De Mund, E. M. Lockwood, Geo. Ronsee, Jos. B. Thomas, Jr. Dr. J. E. De Mund was elected delegate to A. K. C. The club organized with fifty charter members. Dues were fixed at \$5 per annum, with an initiation fee of \$5. Special prizes will be offered at the various shows, and every effort made to advance the interest of the Russian Wolfhound.

The Irish Terrier Club of America offers at the Duquesne Kennel Club show at Pittsburg, open to members only, a club cup for best American-bred dog or bitch in novice classes, a club cup for the best American-bred dog in the show; a club cup for the best American bred bitch in the show. The Pointer Club of America offers at this show a club medal for best dog in the show; also a club medal for best bitch, open to members only.

The Executive Committee of the Spaniel Breeders' Society is composed of H. K. Bloodgood, Marcel A. Viti, Howard Willits, George H. Taylor, George Graer, R. P. Keeshy and Dr. S. J. Bradbury. At a recent meeting of the club the question of classification was gone over and on motion of Mr. Viti the club classification will stand, but it was not made obligatory and show committees have the discretion to make up classifications for themselves. They must, however, have the society's approval and specials will be given in ratio with the liberality shown. It is expected the club will give another specialty show at Atlantic City, a committee having been appointed to act.

The annual meeting of the Collie Club of America was held in Madison Square, New York, on the evening of the second Wednesday in February, President M. M. Palmer presiding. Present—Miss Black, Miss Sadie DeKraft, Messrs. Van Schaick, Hunter, Hawkins, Walters, Geraghty, Copeland, Middlebrooke, Sargent Mayhew, Hall, Bascom, Speck, Read, Flinn, Brown, Hoppe, Preston, Lindsay, Oldham, Murray and Watson. Reports of the secretary and treasurer were read and approved.

The New England Collie Club applied for the sanction of the Collie Club in order to deposit same with the A. K. C., which was accepted and sanction granted.

Mr. Brown, who presented the application of the Collie Breeders' Association, was requested to lay before the club a copy of their constitution before final action could be taken.

The new officers for 1904 are: President, M. Mowbray Palmer; Vice-Presidents, J. Pierpont Morgan, Philip W. Moen, George Higginson Jr., J. Cromwell Cox; Executive Committee, John Black, E. M. Oldham, Edwin J. Van Schaick, John T. Coyle, Thomas B. Middlebrooke; Treasurer, John T. Coyle; Secretary, Wm. C. Hunter, Fayetteville, Pa.; Delegate to the A. K. C., Edwin J. Van Schaick.

On Saturday, February 20th, a number of fanciers and breeders of the Old English Sheep Dog met in the Ashland House, New York, and organized under the name of the Old English Sheep Dog Club of America.

The officers elected were: President, Howard Gould; Vice-Presidents, William C. Eustis and Charles Frohman; Treasurer, C. B. Dillingham; Secretary, J. W. Morgan.

The club was started with most favorable prospects, as some fifty members were enrolled.

The Japanese Spaniel Club has been admitted to membership in the American Kennel Club. This is a lively club and has fourteen members. The club is now working on the standard which was brought up at its last meeting. This meeting was not, however, well enough attended, and it is hoped another will be held and that some more members will be present, and some judges, so that the points in the standard can be properly decided. The club could not do much at the New York show, as it was only in process of formation, but hopes to spread itself at the summer show of the L. K. A.

At a meeting at Madison Square Garden, held Feb. 12, the following applicants who had been approved by the Membership Committee were formally elected to membership in the Bull Terrier Breeders Association: W. J. Pegg, of England; H. Fred Church, Taunton, Mass.; J. T. Michaud, Duluth, Minn.; Chas. Brewer, Dakota; John Bradshaw, San Francisco, Cal.; William C. Carroll, Buffalo, N. Y.; Ernest E. Betts, Chicago; G. C. Israel, Olympia, Wash.; H. Lindley Dobson, Maine; S. Joseph Drake, Jr., Harry Hayward, A. G. Howes, Geo. A. Bacon, O. H. Gruner and Parke C. Wood. The membership is now 44, with several applications of prominent breeders and fanciers not yet passed upon.

Mr. Pegg attended the meeting, and the anecdotes he told and the points in Bull Terrier history he was able to clear up were intensely interesting. Others present at the meeting were Frank F. Dole, Dr. R. L. James, Dwight W. Godard, R. H. Elliott, John Bradshaw, John McAuliffe, Chas. Muenchinger, Thos. Holden, Clair Foster, Dr. A. P. Northridge, A. C. Northridge, G. Edward Escher, Clifford Drake and John W. Britton.

The meeting was adjourned at 11 P. M. after resolutions of thanks and appreciation had been tendered Mr. Pegg, to which he replied, paying a flattering tribute to the enthusiasm and push of the Bull Terrier fanciers and the unflinching courtesy with which his awards had been accepted by the exhibitors.

Richard Croker, Jr., and a number of other men interested in dogs, intend to incorporate The Bulldog Club of America, the objects of which are declared to be the promotion of the breed of Bulldogs in this country. The other incorporators include Henry G. Beadleston, William C. Cadman, William P. Earle, William N. Lacort, Robert S. McCreery and John H. Matthews.

At a recent meeting of the Montreal Collie Club it was decided to hold their seventh exhibition of Collie dogs on March 11th and 12th, at the Karn Hall, St. Catherine street. This show is open to all, but is restricted to Collies only. Full particulars can be had from Mr. J. R. Lewis, 498 Clarke street, Annex, Montreal, Canada.

Charles H. Innes, Secretary of the English Bloodhound Club of America, writes us that the tenth annual meeting of the club was held on Thursday, February 11, 1904, in New York.

The following officers were elected: President, Dr. C. A. Lougest; First Vice-President, Louis B. Strong; Second Vice-President, George P. Finnegan; Secretary and Treasurer, Charles H. Innes; Executive Committee—Nellie A. Lougest and E. R. Weir. Delegate to the American Kennel Club, O. B. Weir.

Judges recommended were: R. F. Mayhew, James Watson, Dr. Louis C. Knox, James Mortimer, J. L. Winchell, George Raper and H. W. Lacey.

The report of the treasurer showed a good balance in the hands of the club. A committee was appointed to look over applications for registration to the American Kennel Club, to prevent fraudulent registration, a number of which have been reported during the last two or three years. Attention was also called particularly to a number of breeders in the South and West selling Southern Foxhounds and American Bloodhounds as genuine English Bloodhounds. It was voted to take action against such fraudulent registration and to prosecute whenever possible under the State law.

The following are the members of the club in good standing: R. F. Mayhew of Clifton, Staten Island, New York; George Raper of Sheffield, England; Henry P. East of Chislehurst, Kent, England; J. L. Winchell of Fairhaven, Vt.; Dr. C. A. Lougest of Franklin, Mass.; Charles H. Innes of Boston, Mass.; Wm. C. Freeman of Cornwall, Lehanon Co., Pa.; Doeland Hayes of Ovid, Clinton Co., Mich., Box 403; I. H. Wollery of Seattle, Washington; Nellie Lougest of Franklin, Mass.; George S. Small of Paterson, N. J., Box 648; Geo. P. Finnegan of Smithville Plate, N. Y.; Dr. Louis G. Knox of Danbury, Conn.; F. B. Gibson of Beaver Falls, Pa.; Chas. Dietrich of 1158 Superior St., Chicago, Ill.; Mr. Lewis of Cinn., Ohio R. R. Co.; Christina C. Whitney, 594 Seventh Ave., N. Y. City; James Penny of 403 East 91st St., N. Y. City; F. W. Clark of Danbury, Conn., Box 213; Robert Y. Evans of 105 Burling Ave., Flatbush, L. I.; Robert Dudley Winthrop of 40 Wall St., N. Y. City; Louis B. Strong of Hyde Hall, Cooperstown, N. Y.; Miss M. K. Bird of Westbury, L. I.; E. Shirley Borden of Bricksburg, Pa. Sta. E., care of F. S. Walton Co., Orthodox & Delaware River; O. B. Weir of Plattsburg, N. Y.; E. R. Weir of Plattsburg, N. Y.

Striker!—If they don't give you Jackson's Napa Soda when you ask for it.

DOINGS IN DOGDOM.

The office of the San Francisco Kennel Club is now open and doing business at No. 630 Market street. Mr. W. H. McManimon is in charge.

"The premium list will be ready next week. A noticeable and agreeable feature will be the best and largest list of handsome and valuable specials yet offered by the club.

The owners of English Setters and Pointers will be pleased to know that two beautiful trophies for the best in the field trial class of each breed have been donated this week. Dr. W. S. Tevis offers the Setter trophy and Walter Magee has given the Pointer prize. These two specials alone should induce a large entry.

A letter received from Col. R. F. Farwell, owner of the Sabine Kennels, is teeming with the true spirit of the sportsman and enthusiastic fancier. In response to a request from Mr. C. K. Harley the Colonel writes:

I received your message last evening, asking if I would offer a cup at your coming show, and I reply that I will with pleasure and am pleased to do so.

I have offered a cup at the specialty show to be held at Atlantic City, for the best team of American bred, and following out my ideas to help the home bred ones to get to the front will be pleased to offer a \$20 cup for the best team of American bred, either smooth or wire, two or more teams competing.

You and I can compete with our importations for specials offered and perhaps it may put a damper on those who are breeding and showing their own dogs. That is why I am particular in mentioning American bred dogs, for certainly we wish to foster this part of the fancy."

A new dog in town has kept the Great Dane fancy guessing. The dog, Rex, is a handsome harlequin and was brought in port by the Captain of a German steamer. His advent was proclaimed by the mate, the boatswain, the loblolly boy and numerous bow-legged salts that cruised about the town in search of a purchaser for a dog that had "won two prizes in Germany" and whose brother was sold for 2500 marks. The Captain asked \$1300 for the dog and we are informed did get a purchaser who paid \$1000—what puzzles the local Deutsche Doggen men is, who bought the dog? At all events he will be in the show and there will probably be some Dane idols cracked a hit.

The coming show of the Santa Clara Kennel Club promises to be a record show for San Jose. Miss Della Beach, the secretary, writes us that the judges selected are John Bradshaw of this city, for Fox Terriers, and Frank L. Turner, of Victoria, all other breeds.

Mr. Bradshaw knows a Terrier and has had a ring experience that should make his awards agreeable all round. Mr. Turner has officiated satisfactorily at numerous northern shows and is not unknown to San Jose fanciers.

The premium list will be issued next week and will offer among other things a handsome list of valuable specials.

San Joseans are enthusiastic over their kennel club and the coming show. A club meeting was held Thursday evening when the list of membership was increased to over sixty names, it is expected, that by the time of the club exhibition, there will be over 100 members enrolled. This will insure a large entry and a good gate.

The New England Collie Club has applied for membership to the A. K. C. The club has been endorsed by the Collie Club of America.

The Mott sale of Pointers in New York at the American Horse Exchange during W. K. C. show week, realized, \$1117.50.

Mr. Thos. S. Griffiths of Spokane writes us: "Just shipped a fine black, tan and white dog puppy whelped June 27th, out of imp. Moreton Vesta by Rippowan's Archer, to D. M. Juvenal, Potomac, Illinois. One hitch whelped August 15, 1903, dam out of Craigmore Ethel by imp. Balhead Commander to Mr. Davidson of Sheridan, Oregon, and six bitch puppies, all by Lenzie Prince, to H. Allen Usk. He uses a lot of dogs with his sheep on the Reservation. Busy getting our kennel of four ready for the shows at Victoria, Vancouver, Seattle and Portland. May send Bo Peep (bitch) by Ch. Heacham Galopin (sire of Ch. Wiskaw Clinker, the late winner at W. K. S., New York, and now owned by J. P. Morgan) to Frisco; too bad the dates conflict."

P. D. Linville last week sold his Setter dog Plumas to James Dunham of Oakland. Plumas is three years old and thoroughly broken to the gun.

Harvey McMurchy, the well known and popular representative of the Fulton Arms Company, arrived in this city during the week.

Donald McRae, an erstwhile member of the local duck shooting fraternity arrived in this city Tuesday evening. "Don" has been away for several years seeking the yellow dust in the frozen north. He hails this time from the Koyukuk region and has by a large majority more dust in his pockets than on his natty clothes.

At Omaha, Neb., February 2-5, Mr. J. H. Severson won the Inter-state Cup that the Nebraska State offered in competition. Mr. J. H. Severson used 3½ drams of "New Schultze" powder.

At Middleton, N. Y., on February 19th, Mr. J. S. Fanning shooting "Infallible" won first general average by breaking 89 out of 100 targets. Conditions were very hard, as the tournament was held during a snow storm. D. D. Stever and C. H. Smith were first and second amateurs, both using "Infallible."

Fly-Casters' Smoker.

On Wednesday evening the Fly-Casting Club members and invited guests met at Jules' Restaurant and enjoyed a smoker.

President Carlos G. Young, after requesting the company assembled to drink a silent toast to the memory of the club's late Captain, H. Battu, introduced Judge John Hunt as the chairman for the evening.

Among the speakers during the evening were Judge Hunt, George Lane, Chas. S. Wheeler, Alex. T. Vogelsang, Col. G. C. Edwards, F. H. Reed, Walter D. Mansfield, Jas. Watt and others. M. J. Hynes sang a song and told some funny stories.

Achille Roos offered a prize valued at \$50 to be competed for in the delicacy and accuracy event. This trophy is to be won twice by one member before becoming individual property. The winner for each season, until won twice, will be the high score in the event.

Mr. George Lane spoke feelingly of the past efforts and untiring enthusiasm shown since the organization of the club by the retiring president, the world's champion in long distance casting, Walter D. Mansfield. Mr. Mansfield responded in a brief and eloquent reply. The incident was carried into the history of the club with tumultuous applause.

A committee consisting of Judge Hunt, Alex. T. Vogelsang and Achille Roos were, on motion, appointed to select an appropriate testimonial for presentation to Mr. Mansfield, as a token of his fellow-members appreciation of his services in behalf of the club and the angling fraternity.

The range of topics, anecdote, reminiscence and repartee given by the various speakers, from the classic of Mr. Wheeler to the ludicrously humorous verses on Irrigation submitted by Mr. Vogelsang kept the company enjoyably entertained.

Among those present were: President C. G. Young, A. M. Blade, W. C. Misa, J. S. Benn, John Butler, T. W. Brotherton, F. E. Davenport, Colonel G. C. Edwards, S. A. Heller, Dr. C. W. Hibbard, E. H. Horton, Walter Cook, Charles Huyck, R. Isenbruck, R. Haas, C. Ashland, C. R. Kenniff, J. B. Kenniff, W. J. L. Kierulff, Forest Carey, A. B. Finch, Judge John Hunt, Thos. Lagercrantz, F. J. Lane, Walter D. Mansfield, E. A. Mocker, W. A. L. Miller, M. Schad, A. Muller, J. Peltier, F. H. Reed, W. W. Richards, Achille Roos, Charles Vogelsang, Samuel Wells, Samuel Rosenheim, H. B. Sperry, Judge J. M. Sewell, H. E. Skinner, Alex. T. Vogelsang, George Walker, W. A. Genesey, James Watt, Bert Spring, Maxwell McNutt, J. X. Dewitt, R. A. Smyth, W. A. McNaughton, J. C. Sellers, M. J. Hynes, Dr. W. H. Stephens, Mr. Bell, Mr. Kirk, G. W. Lane, W. E. Brooks, Chas. S. Wheeler, F. G. Sanborn, J. H. Fritch, James Turner, W. S. Turner, S. Walther, Milton Mannon, H. A. Herringer, Kirkaam Wright, W. J. Wolf, F. S. Johnson, Charles H. Kewell, A. Healey and others.

The initial meeting of the club at Stow Lake took place last Saturday and Sunday, the largest attendance being on the latter day. A perusal of the table of Sunday's scores given below will show a very creditable all round average.

The long distance work is worthy of commendation, particularly in the case of several new beginners at the lake, among whom were the Messrs. Sperry. At the first tournament of the club, years ago, first prize was taken by a cast of 81 feet, second prize went to a cast of 50 odd feet. When the present performances are taken into consideration with what was done some years ago the vast improvement achieved is very apparent.

Delicacy and accuracy casting is also of a higher degree of skill, particularly so as the competing conditions have been changed to a far higher standard than the original schedule.

SUNDAY CONTEST No. 1. Classification series—Stow Lake, February 28, 1904.

Striped Bass Fishing.

Members of the Pacific Striped Bass Club have had fair success trolling for bass in and about the Tiburon fishing waters. The fish are in good condition and the water, on incoming tides is not as roily as would be expected by reason of the up river heavy floods. The largest fish taken this week was a 23 pounder which was caught by Mr. Carroll.

Numerous and up to date unavailing complaints have been made by anglers and citizens against the persistent and systematic violation of the law by the net fishermen. These fellows seem to be pursuing their law-breaking vocation as indifferently as if they were under protection. The lateeners' answers to the protests and inquiry of those who find them regularly in the act of illegal fishing, would imply that they are in no fear of the law officers.

The boldness of their operations and air of confidence with which they catch small and illegal sized bass with illegally sized nets and on Saturdays and Sundays contrary to the statute occasioned much comment among those familiar with the situation.

A solution of this puzzle may be in the information received from one of the deputy commissioners "that the courts are clogged with their cases now and that it is all they can do to get a hearing when they begin a prosecution. The District Attorneys are so busy that it is hard work to get one of these cases on the calendar." Just think of it, hard to get a hearing in a criminal case and arrests are not made for fear of clogging the courts. By what right do the Fish Commissioners arrogate to themselves the interpretation of a direct and mandatory statute, that instead of not fishing for striped bass with small meshed nets on Saturdays and Sundays that the fishermen may do so within a certain zone contiguous to this city?

Further, hy what self constituted authority does the Commission refuse to make arrests or prosecute cases for violation of particular statutes on the pretense that the courts will be choked with their business and that hearings will be impossible?

Washington is a Sportsman's Paradise.

With an equable climate, a summer of sunshine seven months long, and woods stocked with large and small furred game and also numerous varieties of wild fowl, waters teeming with myriad finny tribes, Washington offers peculiar attraction to the hunter, the angler and the pleasure-seeker and the tourist as well.

In Europe men travel the length and breadth of an empire after sport that cannot compare with that which hundreds of settlers find every morning at their very doors in Washington. The city man with a taste for angling or hunting takes a ride out the length of the street car lines, walks a mile into the woods, and enjoys sport which is only secured in the preserves of the nobility in the old countries. Fifty miles distant from any of the large cities, he will find sport that men cross and recross continents and oceans to find. Elk, deer, wild goats and wild sheep and bear abound in Washington. But of all the large game animals around the Sound, elk are the largest. They are found in vast herds in the Olympic Mountains and in the Coast region west of them. They are quite numerous around Hood Canal, and are occasionally seen in the Cascade Mountains.

The elks of Washington are much smaller than those of California, but they are often four and one-half feet in height at the shoulders. They are in color from a gray to a dark brown, in the various seasons of the year.

Although elk are occasionally killed in the Cascade mountains, they are hunted almost together in the Olympics. To find good elk hunting grounds, one can go by steamer to one of the towns on Hood Canal or to Port Angeles, Dungeness, Clallam Bay, Neah Bay the Quillay Country. From any of these points one does not need to go far to find good hunting. The main thing is to get into a country where browse and grass are plentiful, and where elk trails are well-beaten and numerous.

Excellent hunting grounds are found around Lake Sutherland, south of Port Crescent, in Clallam county; Oset Lake, near the ocean coast of the same country, and Lake Cushman in Mason county. Elks are also found in Hood Canal.

The deer of Washington are thought by some to be a smaller species. However that may be, bucks have been killed weighing 200 to 250 pounds, but the does are uncommonly small. Deer are found around Puget Sound, where the country is not too thickly settled, and it is not necessary to go far from settlements in any direction to find them; but they are most numerous on Whidby Island. Around Oak Harbor is a popular hunting resort, and Lake Washington has long been a favorite locality. Their general color is a brownish gray, and they are among the most remarkably graceful of the deer tribe. "Still hunting" is the method most commonly followed.

In the vicinity of Lakes Whatcom, Samish and Padden there are still to be found a considerable number of deer and some wildcat, cougar and bear. Black bear abound chiefly in this region, and are peaceably inclined when not hard pressed. They are usually hunted with trained bear dogs. The forests are so dense that it is only a step from the confines of a settlement, or even a city, to the haunts of the finest game.

The mountain goat found in Washington has many qualities in common with the highborn sheep. Like them he is spry, active and all-seeing. He differs from them in having white hair and short, sharp horns, varying in color from grayish brown to black; and although he, too, is long-legged, his limbs are well concealed by long, white hair. The hides and horns of the goats are more frequently brought to the market than those of the highborn sheep. The earlier prospectors of the Monte Carlo and Silver Creek districts lived largely on mountain sheep and goat flesh.

These animals are numerous all along the Cascade range, and on some of the uninhabited islands of the Sound. One of the most acceptable places to hunt them is Mount Index one of the grandest and most broken peaks of the Cascade range. It is only a few hours' ride from the Sound, on the Great Northern railroad. One should go in the month of August and be prepared to camp out. Most hunters begin the ascent of the mountain early in the day, so as to get above the goats and sheep, and hunt them from above — on the theory that these animals watch everything below them. There are many hunters who question this theory, holding that these mountain animals are very acute and the only way to approach them is to keep on the windward. Trout are very abundant in every stream emptying into the Sound.

Pony Racing

Under the Auspices of the
California
Polo and Pony Racing Association

To be held at
Tanforan Race Track
Sat., Mar. 12, Mon., Mar. 14

By the courtesy of the New California Jockey Club, the above races will be held at Tanforan. There are no entry fees and the events are open to all ponies three years old and over and not exceeding 14h 2 in. in height. The rules of Racing as adopted by the California Polo and Pony Racing Association govern all races. The Association reserves the right to reject any entry. For stabling accommodations, track facilities and further information, apply to ROBERT LEIGHTON, Racing Secretary, C. P. & P. R. A., Room 21, 421 Market St., San Francisco, California.

1 Trotting Stallion.

T. A. NUFER,
P. O. Box 133, Petaluma, Cal.

FOR SALE.

Stallion JUSTINIAN

Sire **ELECTOR 2170** by Electioneer
Dam **LILY LANGTRY** (Dam of Ed B. Young 2:11 1/4 and Dudley 2:14) by Nephew.

A magnificent individual, standing a trifle over 17 hands and weighing 1300 lbs. A rich seal brown; perfect trotting action; a model of symmetry, beautifully proportioned; gentle and perfectly sound. Was the property of a man of means and never given a record, although at an early age he showed extraordinary speed. For a horseman wishing to breed for profitable looks as well as possible speed, this horse cannot be equaled. As the owner is disposing of his country property he wishes to sell.

Inquire at this office or of J. H. KING, 1029 Sixth Avenue, East Oakland, Cal.

Substitutions Wanted

Pacific Breeders Futurity Stakes No. 3
FOR FOALS OF 1903.

Nominators whose mares proved barren, had a dead foal or twins, or whose mare or foal has died, and who made the \$5 payment on Oct. 1, 1903, in the above stake, have the right of transferring such nomination or of substituting another foal regardless of ownership.

Parties having nominations for sale under the substitution clause will please notify

F. W. KELLEY,
Secretary P. C. T. H. B. A.,
36 Geary St., San Francisco.

Jackson's Napa Soda is sold in every city, town and hamlet in the State.

Fifty years of success.
The simplest and best remedy for Coughs and Throat Troubles.

Sold in Boxes only. Avoid Imitations.

PERCHERON AND BELGIAN STALLIONS

The Farmer's Supply of the Middle West. Cedar Rapids (Iowa) Jack Farm

Three importations this season of prize-winning Percherons, Belgians and German Coachers and Catalán Spanish and Majorca Jacks. I have the largest Draft and Coach Horses in America, and will sell more quality for the money than you can find anywhere.

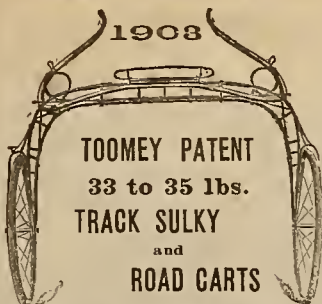

Remember, the largest sale of Imported and High-Bred Jacks ever held in America will take place at the Cedar Rapids Jack Farm some time during the first half of April, 1904. Watch for date.

In the sale of Jacks and Stallions to go to the Pacific Coast I arrange with all my customers to make shipment about the first of each month and to group together the purchases and ship them in one car by freight. I now have three head of Jacks in my barns which I have just sold to go to Washington and Oregon, and would like very much to receive orders from California points immediately so that I can send the stock at a carload rate. I will probably sell 8 or 10 head more to go in this car, so the transportation will not exceed \$25 to \$35 per head. All parties who want to buy Jacks and Stallions please write me immediately, or come and see me at once. By this arrangement I can save you enough express on Jacks and freight on Stallions to pay your fare here and return to California. Do not wait to write me, but come at once.

W. L. De CLOW, Cedar Rapids, Iowa.

EXPORT NOTICE.

At a recent meeting of the New Zealand Trotting Association the following notice was adopted: "Horses imported from America to New Zealand must in future be accompanied by certificates of either of the above Associations (referring to the National Trotting Association and the American Trotting Association). The disqualifications of these bodies will be enforced by New Zealand Trotting Association and the latter's disqualifications, penalties, etc., will be recognized in the United States and Canada. The American Trotting Association does not issue export certificates. The National Trotting Association will issue export certificates from the port of San Francisco and the undersigned has been appointed export certificate agent for said port and will notify those interested of what will be required before exporting horses to New Zealand and furnish export certificates for that and other foreign countries.

F. W. KELLEY,

Capital Paid in, \$2,000,000.

ADDRESS..... **International Stock Food Co.,**
Minneapolis, Minn., U. S. A.

Fourth Payment \$10 EACH

Due and Must Be Paid by
FRIDAY, APRIL 1, 1904.
ON YEARLINGS.

Pacific Breeders Futurity Stakes No. 3, \$6000,

Guaranteed by the Pacific Coast Trotting Horse Breeders Association.

For foals of mares covered in 1902. To trot or pace at two and three years old. Entries closed December 1, 1902. **NOTHING MORE TO PAY BEFORE 1905**, when your foal can start in the Two-Year-Old division. Stakes divided as follows: \$3250 for Trotting Foals, \$1750 for Pacing Foals, \$800 to Nominators of Dams of Winners and \$200 for Owners of Stallions.

Substitutions. A few of the original nominators of Pacific Breeders Futurity Stakes for foals of 1903 have advised us that, because of barrenness of the mare or death of the foal, they wish to dispose of their entries. If you own one or more whose dams you neglected to name when entries closed, send \$23, with Color, Sex and Breeding of the Foal, on or before April 1st next, which covers payments to April 1, 1903, and the few substitutions to be disposed of will be awarded in the order in which remittances are received. Prompt attention will secure for you this rich engagement.

E. P. HEALD, President.

F. W. KELLEY, Sec'y, 36 Geary St., S. F.

Absolutely Cures
QUINN'S OINTMENT
REMOVES

Take It In Time

If you have the remedy on hand, and are ready to act promptly, you will find that there is nothing in the form of Spavins, Splints, Curbs, Windpuffs and Bunches which will not yield promptly and permanently to

Quinn's Ointment

It has saved thousands of good horses from the peddler's cart and the broken-down horse market. Mr. C. B. Dickens, of Minneapolis, Minn., who conducts one of the largest livery stables in the Northwest, writes as follows: "I have been using Quinn's Ointment for some time and with the greatest success. I take pleasure in recommending it to my friends. No horseman should be without it in his stable. For curbs, splints, spavins, windpuffs and all bunches it has no equal." Price \$1.00 per bottle. Sold by all druggists or sent by mail. Write us for circulars, testimonials, etc. Sent free for the asking.

W. B. Eddy & Co., Whitehall, N. Y.

CAMPBELL'S EMOLLIO IODOFORM GALL CURE

For GALL BACKS and SHOULDERS, CRUPPER SORES and SADDLE GALLS there is none superior. The horse CAN BE WORKED AS USUAL. For BARBED WIRE CUTS, CALKS, SCRATCHES, BLOOD POISONED SORES and ABRASIONS OF THE SKIN it has no equal.

It is very adhesive and easily applied to a watery as well as a dry sore.

Its use will absolutely prevent BLOOD POISONING. In this respect there is no Gall Cure offered which can justly even claim to be a competitor. We placed it on the market relying wholly on its merit for success, and notwithstanding the fact that comparatively little has been done in the way of advertising the sales of 1903 were 100 per cent greater than the aggregate sales of Gall Cure preceding that year. This increase was entirely due to its MERITS, and from it we feel justified in saying that it is THE GALL CURE OF THE 20TH CENTURY. It is a quick and sure cure for those troublesome skin cracks under the feet which often injure and often lay up race horses.

All Trainers Should Have It In Their Stables

PRICE:—3 OZ. BOX, 25c.; 1 LB. BOX, \$1.00.

Read our "ad." on Campbell's Horse Foot Remedy in next issue of this paper.

The above Stallions will make the Season of 1904, ending July 1st. Pasture \$2.50 per month. No responsibility assumed for accidents or escapes.

For further particulars inquire of or correspond with

A. C. DIETZ, Prop., Santa Paula, Cal.

THE STANDARD BRED TROTTER STALLION

CASSIAN

(Bay Colt foaled 1901)

By Mendocino 22607 (3) 2:19 1/4

(Sire of Monte Carlo 2:07 1/4, Idolita 2:09 1/4, etc.); dam CRESSID A (3) 2:18 1/4 by Palo Alto 2:08 1/4; second dam Clarabel (dam of 3 in 2:30) by Abdallah Star; third dam Fairy (dam of 2 in 2:30 list) by Hambletonian 10.

CASSIAN is a high-class young stallion in every particular and one of the best bred ones ever foaled at the famous Palo Alto Farm. He has produced blood on both sides, and every one of his ancestors for four generations are producers. He is a beautiful bay in color, a splendid individual, a fast natural trotter and has every qualification for a sire of extremes and early speed, being good gaited, level headed and game.

Season of 1904 AT AGRICULTURAL PARK, SAN JOSE.

Fee \$50 FOR THE SEASON, with usual return privilege. Excellent pasturage and the best of care taken of mares in any manner that owners may desire, at reasonable rates.

For further particulars address

J. G. CUCELLO, San Jose, Cal.

Or JAMES COFFIN, 132 Market Street, San Francisco.

SILVER BEE 2:27 3-4

By SILVER BOW 2:16

(Sires 2 in 2:15, 8 in 2:30)

1st dam BELLE Mc (dam of Worthwood (1) 2:30 and Silver Bee (2) 2:27 3/4) by Eusign Goldust Jr.

2d dam LITTLE BELLE (grand-dam of 2 in list) by Belmont (sire of Nutwood 2:18 1/4 and 58 more in 2:30).

3d dam Thoroughbred Mars by Imp. Trustee.

(RECORD MADE AT TWO YEARS OLD)

Season of 1904 at

VORDEN, SACRAMENTO CO.

FEE: \$30 FOR THE SEASON.

SILVER BEE is a handsome, well developed horse, stands 16 hands high and weighs about 1200 pounds. He is a model of symmetry, fine head and neck, short back, legs and feet like iron, perfect disposition and has great intelligence. No more perfectly gaited trotter stands for service and his record is no measure of his speed, as he can show a 2:30 gait at any time. In his blood lines he represents the most fashionable strains. His grandsire Robert McGregor sired that wonderful horse Crescens 1:59 1/4, and on his dam's side he carries the blood of the Goldust family, the most beautiful of all trotting tribes, besides that of the sire of Nutwood, the greatest of sires. His only foal to be trained is Glide, one of the handsomest young horses in Sacramento county, that has trotted in trial in 2:22. Good pasturage at \$3 per month. Every care taken to prevent accidents or escapes but no liability assumed. All bills to be settled before mares are removed. Address communications to McKINNON & GREEN, Vorden, Sacramento Co., Cal. or to W. O. (JOE) BOWERS, Capital Hotel, Sacramento.

PETIGRU 2:10 1/2

Son of Kingward by Onward (sire of 11 in 2:10) and Lemonade (dam of Bessie Wilton 2:09 1/4, Petigru 2:10 1/4, Lady Wilton 2:11 1/4 and Lemonee 2:13 1/4). PETIGRU'S record was made in a winning race of six heats. His dams for three generations are in the great broodmare list. For individuality and racehorse qualities he cannot be surpassed. FEE \$50.

CORONADA 2:18 1/4

By the great McKinney 2:11 1/4 (sire of 8 in 2:10 and 27 in 2:15); dam Johanna Trent (three-year-old trial 2:17) by Thos Rysdyk; second dam by Venture, sire of dams of Directum 2:05 1/4 and Sidney Dillon (sire of Lou Dillon 1:58 1/4, world's champion trotter). CORONADO is one of the handiest of the sons of McKinney. He won five races out of seven starts. FEE \$40.

SILVER COIN 2:11 1/4

(Record made as a three-year-old in a winning race of six heats against aged horses. Sired by the great Steinway (sire of 4 in 2:10); dam, the fast race mare Jenny Mac 2:09 by McKinney 2:11 1/4. SILVER COIN has every qualification for a great sire of speed. He has extreme speed, great gameness, and endurance, and is a magnificent individual. FEE \$40.

— Send for card containing tabulated pedigrees and full particulars of above Stallions. Address
W. G. DURFEE,
Box 96, University P. O., Los Angeles, Cal.

MONTESOL

(TRIAL 2:24)

Full Brother to Lady Grannard 2:23 (trial 2:13)

MONTESOL, 6 years old, stands 15 1/2 hands, weighs about 1135 pounds: is the best bred young McKinney stallion, combining as he does the blood of Electioneer and Nutwood with that of the greatest son of the great Alcione. He is in every respect a splendid individual and should be seen by every owner of a good mare in this State before looking elsewhere.

\$40 for the Season, with return privilege.

POLE STAR

The above Stallions will stand at Alameda, Danville, Concord and Pinole.
For further information address P. FOLEY, Race Track, Alameda.

SEYMOUR WILKES

REG. NO. 0232.
Race Record 2:08 1-2

The Fastest Son of Guy Wilkes

And Sire of the Sensational Trotter Monroe 2:12 1/4 and Joe Kraston (3) 2:22

Will make the Season of 1904 at

Lakeville, Sonoma County, Cal.

SEYMOUR WILKES earned his record in a hard fought race and was a game racehorse. No horse in California can show a greater proportion of large, handsome, strongly built and well-honed colts. They all look alike, and in nearly every instance are square trotters.

SEYMOUR WILKES is by Guy Wilkes, his dam Early Bird by Playmail; second dam by Odd Fellow, third dam by a son of Williamson's Belmont, fourth dam by Blackhawk 7:37. He weighs 1300 pounds, stands 16 hands high and is one of the most symmetrical horses in California. Several of his get are in San Francisco and will be shown to prospective breeders with pleasure.

Terms for the Season \$30. \$50 TO INSURE. Mares can be shipped direct to ranch via steamer Gold. Pasturage \$3 per month. For further particulars apply to THOS. ROCHE, Lakeville, Sonoma Co., or J. W. GREGORY, St. George Stables, 408 Bush street San Francisco.

Alta Vela 22449

SON OF THE GREAT ELECTIONEER 125

(Sire of Arlo (4) 2:07 1/4, Sunol 2:08 1/4, Palo Alto 2:08 1/4, Alta Vela 2:11 1/4, and 9 more in the 2:15 list, etc.). Dam LORITA 2:18 1/4 by Piedmont 9:04; second dam Lady Lowell (dam of Ladywell 2:16 1/4, Lorida 2:18 1/4, and dams of 6 in 2:30 list) by St. Clair; third dam Laura, dam of the sire of Occident 2:16 1/4.

Will Make the Season, 1904---Fee \$50---Race Track, San Jose.

ALTA VELA is the Best Son of Electioneer on this Coast. Best of care taken, but no responsibility assumed for accidents or escapes. Usual return privileges. Bills payable at time of service and must be settled before removal of mare. Address

HANS FRELLSON,
Race Track, San Jose, Cal.

NUSHAGAK 25939

Sire of Aristo (3) 2:17 1/4, winner of Occident and Stanford Stakes of 1902 (trial 2:11 nt 4 years); Black Jack 2:28 1/4 (trial 2:23); The Boquet (4 y. o. trial 2:17 1/4); Majella 2:29 (4 y. o. trial 2:13 1/4). Sired by Sahie Wilkes 2:18, sire of 38 in 2:30. Dam, Fidella (dam of Fidette 2:28 1/4, dam of Mary Celeste 2:17 1/4) by Director 2:17; second dam by Reavis Blackbird 2:23; third dam by Lancet, son of McCracken's Blackhawk. FEE \$50 for the Season, limited to 40 outside mares.

PRINCE ANSEL 2:20 1-2

Sired by Dexter Prince (sire of Eleata 2:08 1/4, James L. 2:09 1/4, Edith 2:10, etc.); dam Woodflower (dam of Seylex 2:15 1/4) by Ansel 2:20, son of Electioneer; second dam Mayflower 2:30 1/4 (dam of Manzanita 2:16, Wildflower (3) 2:21 and 8 producing daughters) by St. Clair 1:57 1/2. Prince Ansel's oldest colts are now 3 years old. He has only 3 at that age, and the only one that has ever had a shoe on in training at Pleasanton and can beat 2:30 easily. FEE \$30 for the Season.

The above horses will make the Season at WALNUT GROVE STOCK FARM. Good pasturage at \$3 per month. The best of care taken of mares, but no responsibility assumed for accidents or escapes.

WINCHESTER

REPEATING SHOT GUNS

A CHANCE FOR A DOUBLE

A QUESTION often asked about Repeating Shotguns is, "How quick can a second shot be fired with them?" Shooters that have used Repeaters answer with one accord: "Doubles" are just as easy to make with a WINCHESTER REPEATING SHOTGUN as they are with a double barreled gun. The third shot that a Winchester Repeater gives often hags a badly crippled bird which otherwise would get away. Winchester Repeating Shotguns are made in "Take Down" styles in 12 and 16 gauge.

CAMPBELL'S HORSE FOOT REMEDY IS THE BEST REMEDY

EVER USED ON HORSES' FEET.
IT PENETRATES and DRIES in quickly and DOES NOT GUM and FILL UP THE PORES like tar and oil compounds. It is the GREATEST REMEDY ever used to remove SORENESS and FEVER from the foot, and makes it possible to get good services out of a horse working on hard and hot pavements.
It gives natural nourishment to the foot and incites a rapid, healthy growth—ALL DRYNESS AND BRITTLENESS quickly disappears.
QUARTER CRACKS and SAND CRACKS are rapidly grown out when directions given in our booklet are followed.
It is a SURE CURE for CORNS, CONTRACTED FEET and NAIL WOUNDS if directions are followed.
IT PREVENTS SOUND FEET FROM BECOMING UNSOUND and GROWS a TOUGH, STRONG, ELASTIC WALL and HEALTHY FROG—a FOOT WHICH WILL STAND WORK on racecourses.
Many of the best owners and trainers state that for track work nothing equals it. In many cases horses have reduced their records several seconds, due to its use.
It is a CURE for THRUSH and SCRATCHES.
We Guarantee That It Will Do What We Claim and Will Refund Money if It Fails.
PRICES:—Quarts, \$1.00; Half-Gallon, 1.75; Gallon, \$3.00; 2½-Gallon, \$5.50; Five-Gallon, \$10.00.

Books giving full directions for its use and much valuable information as to shoeing are supplied free.
Don't fail to read "ad." giving information concerning Campbell's Iodoform Gull Cure in next issue of this paper. It is the best and because of its merits is rapidly displacing all others.

JAS. B. CAMPBELL & CO., Manufacturers, 412 W. Madison St., CHICAGO, ILL.
Sold by all Dealers in Harness and Turf Goods. If not in stock ask them to write any Jobber for it.

Speed, Breeding and Individuality FOR SALE.

RITA H. 2:11 1-4

Pacing Mare by McKinney 2:11 1-4

ELECTRO MCKINNEY

Brown Colt, Four-Year-Old Trotter by McKinney 2:11 1-4

RITA H. is a dark brown mare who stands nearly 16 hands high, and will weigh in racing trim about 1050 lbs. This mare has had this year a very remarkable record. She started in the North-western Circuit in the States of Oregon and Washington, and out of eight starts won her first seven races and only lost four heats during the entire circuit, and has a pacing record of 2:14. The mare is five years old and is excellent on the road. She does not pull or lug, and a lady can drive her anywhere. Last spring she trotted a workout mile in 2:18½ and repeated in 2:16½, after only seven weeks' work. Her owner has driven her in 2:12½ in the Los Angeles Driving Club races, she having won all of them in which she started. This mare can step two heats below 2:10.

ELECTRO MCKINNEY is a brown stallion foaled in 1900, and stands 15 hands 1 inch in height. He trotted a full mile as a two-year-old in 2:31¼, last quarter in 33 seconds, and when a three-year-old a full mile in 2:21¼, last quarter in 32 seconds. He is perfectly gaited and a grand individual in every respect. Weighs about 950 lbs. ELECTRO MCKINNEY is bred in the purple, and is one of the best sons of McKinney alive to-day. McKinney is undoubtedly the greatest sire for his age, living or dead. ELECTRO MCKINNEY was not raced last year, being only a three-year-old and not entered in any stakes it was decided to hold him over.

These horses are all right and there is not a thing the matter with them, but my business demands are such that I cannot afford to devote any time to racing them. For prices and further particulars address

BYRON ERKENBRECHER,

301 CURRIER BUILDING, LOS ANGELES, CAL.

Or inquire at Office of BREEDER AND SPORTSMAN

PALACE HOTEL, SAN FRANCISCO, CALIFORNIA.

TOURISTS and TRAVELERS will, now, with difficulty recognize the famous COURT into which for twenty-five years carriages have driven. This space of over a quarter of an acre has recently, by the addition of very handsome furniture, rugs, chandeliers and tropical plants, been converted into a lounging room—the FINEST IN THE WORLD.

The EMPIRE PARLOR—the PALM ROOM, furnished in Cerise, with Billiard and Pool tables for the ladies—the LOUIS XV PARLOR the LADIES WRITING ROOM and numerous other modern improvements, together with the unexcelled Cuisine and the Most Convenient Location in the City—all add much to the ever increasing popularity of this most famous HOTEL.

Fourth Payment \$10 EACH

Due and Must Be Paid by
FRIDAY, APRIL 1, 1904.
ON YEARLINGS.

Pacific Breeders Futurity Stakes No. 3, \$6000,
Guaranteed by the Pacific Coast Trotting Horse Breeders Association.

For foals of mares covered in 1902. To trot or pace at two and three years old. Entries closed December 1, 1902. NOTHING MORE TO PAY BEFORE 1905, when your foal can start in the Two-Year-Old division. Stakes divided as follows: \$3500 for Trotting Foals, \$1750 for Pacing Foals, \$800 to Nominees of Dams of Winners and \$200 for Owners of Stallions.
Substitutions. A few of the original nominators of Pacific Breeders Futurity Stakes for foals of 1903 have advised us that, because of barrenness of the mare or death of the foal, they wish to dispose of their entries. If you own one or more whose dams you neglected to name when entries closed, send \$23, with Color, Sex and Breeding of the Foal, on or before April 1st next, which covers payments to April 1, 1905, and the few substitutions to be disposed of will be awarded in the order in which remittances are received. Prompt attention will secure for you this rich engagement.

GREAT CLEARANCE SALE

Tuesday, April 5, 1904

CEDAR RAPIDS JACK FARM

Imported Catalan Spanish, Majorca and Mammoth Home-Bred Jacks
and Belgian and Percheron Stallions.

I am striving to make this, my annual sale, the largest one of the kind ever held. I received the following cablegram, which signifies that the new importation of Jacks is in good condition, and in point of merit I know they cannot be equaled:

GRANOLLERS, SPAIN, Feb. 18, 1904.

Dr CLOW,
Jack Farm, Cedar Rapids, Iowa.

On road. Three cars Catalan and Majorcas. Best lot
ever shipped to America.
ROCKWELL.

My Mammoth Home-Bred Jacks are of the highest quality. I am conducting this sale different than any other. No animal will be offered in this sale except those of extra quality and ABSOLUTELY SURE BREEDERS and POSITIVELY QUICK PERFORMERS, and all black with white points and FIRST-CLASS IN EVERY PARTICULAR. By selling a large amount of stock in one day I can afford to sell it much cheaper than to single individuals.

My new importation of Jacks and Belgian Stallions, which are being imported especially for this sale, left Antwerp, Belgium, on February 20, 1904, on the steamer British Empire and will reach the bars March 8th.

My two first importations of Percheron and Belgian Stallions will be offered in this sale. Appreciating the task of securing a foothold in the Draft Stallion business against older importers, I do not expect to make my first importations profitable, and in offering them in this sale I only expect them to bring from \$1000 to \$1500 each—for AS GOOD ONES AS CAN BE FOUND ANYWHERE. See them and judge for yourself!

It is an old custom in advertising a public sale to advertise that "the stock will be sold regardless of price," and that "the stock will be placed absolutely in the hands of the bidders," etc., which is always a rank falsehood and I prefer to tell you the truth. I leave for Europe April 12th, for my new importations, so as to return by June 20th in time for the St. Louis Fair, and I want to close this stock all out and shall sell it at actual cost if it will not bring more. I am making this an opportunity for that class of men who want to buy a good, honest, straight, sound, money-making animal of the best quality at a living price, to come and select such as best suits his needs and buy him at actual cost or a slight advance. I will give one and two years time to responsible purchasers at 8%. I believe the superiority of the Belgian Horse will soon be recognized by the American Horse growers, and that they will soon occupy the front rank on the American farm and markets; therefore I shall make a specialty of importing and selling the Belgian Horse and carry on this business in connection with my large Jack business. Any man who is needing a Jack or a Stallion cannot afford to miss this sale. You can buy honest values at a living price in a clean, honest business way. I expect these imported Spanish Jacks to bring from \$800 to \$1200, and my home-bred Jacks to bring from \$300 to \$800 each, for I cannot sell this class of stock at a loss. Write for catalogue

THE P. C. T. H. B. A. Directors met on Tuesday of this week and declared filled every race advertised for the summer meeting, a complete list of the entries for which will be found on another page. The place and date of holding the meeting were not fixed, as indefinite propositions were made by both the San Jose and the Santa Rosa people who desire the meeting held at the tracks in their respective cities. On motion, President Heald appointed committees to visit both places and secure definite propositions, the committees to report next week. The big list of entries received were a source of great satisfaction to the directors who are all confident that the meeting will be the best held in the State for years. The three year olds in the Breeders \$6000 Futurity No. 1 will compete this year at this meeting, as will also the two year olds in Futurity No. 2. There is every probability that the fields will be large in both the three year old events and it is almost certain that the three year old race records of the State will be lowered. It need surprise no one if a field of twelve or more three year old trotters faces the flag in this stake, and as they will come from all sections of the State there is certain to be much interest in the outcome of the event. The \$2000 stake for trotters of the 2:24 class is another race that is doing much to create a deep interest in trotters and a splendid field of horses has been named for it, there being nineteen nominations. George G., the winner of this event last year, set a record of 2:12½ for the race, trotting the third and fourth heats in that time. It is not thought that this record will be equalled this year, but the heats should be close around 2:15 and a big field will start. Never has the Breeders Association had as good prospects for a high class meeting.

MR. C. K. G. BILLINGS, owner of the champion trotter of the world the California mare Lou Dillon 1:58½, reached San Francisco last Saturday accompanied by his wife and took apartments at the Palace Hotel intending to stay at least ten days in California, during which time they were to visit the Santa Rosa and Oakwood Park Stock Farms, and to

be the guests of Col. and Mrs. J. C. Kirkpatrick for several days at their new bungalow at Pleasanton. However on the day following his arrival at the Palace Mr. Billings received dispatches stating that business affairs demanded his return and he left on the Limited for his home on Monday. Mr. Billings is the leading amateur horseman of America, maintaining large private stables at Chicago, New York, Cleveland and Memphis, and owns some sixty or seventy trotters and pacers. He has recently entered upon the breeding of horses in a small way having mated some of his fastest record mares to such horses as John A. McKerron 2:04½ and others. Mr. Billings is a very wealthy gentleman who has taken to amateur harness racing purely for the love of outdoor sport and recreation. He was recently elected a member of the Board of Review of the National Trotting Association of which body he will make a valuable member. It is to be regretted that he could not have stayed in California as long as he intended.

THE REPORT OF THE PORTLAND SALE which appears in another part of this week's issue of the BREEDER AND SPORTSMAN, gives only the principal sales of the first two days. The third day's sales did not reach us in time for insertion in this issue. The top price of the sale was reached on the last day when the young pacing stallion Adlace by Lovelace, dam by Altao 2:09½ was offered. In looks and conformation this horse is said to be the picture of Dan Patch and were he a little larger he would be a dead ringer for the pacing champion. Bidding was very spirited on him, the first bid being \$500 by J. E. Reeves, Cornelius, Ore. G. A. Westgate, George E. Perringer, and Mr. Reeves each took a turn at the bidding until \$800 was reached, at which figure Messrs. Westgate and Reeves dropped out. H. H. Hellman then joined issue with Mr. Perringer and got the horse on a bid of \$900. It is said E. B. Tongue, of Hillsboro, Oregon, will be interested with Mr. Hellman in Adlace. The horse was entered through the California circuit and will probably be taken to Pleasanton to train. He has paced a mile in 2:16, the last quarter in 30 seconds and good judges look for him to pace in 2:08 or better the coming season.

JAMES BUTLER, the millionaire grocer of New York City, who owns over one hundred retail grocery stores located in New York and Brooklyn and who is one of the most prominent trotting horse breeders in the country at the present time, reached California this week with his family for a visit of about a month. Mr. Butler is the proprietor of East View Stock Farm, the home of the California bred stallion Direct 2:05½ and has one of the largest racing strings or the Grand Circuit. About thirty of his horses are now at Pleasanton in charge of Monroe Salisbury, and Mr. Butler will spend the most of his time while in California at that famous track watching these horses taking their work. A few years ago Mr. Butler seriously contemplated buying the Pleasanton track but the death of Thos. Keating, who would have been put in charge of it, caused Mr. Butler to change his plans. There is no more enthusiastic lover of the trotting and pacing horse than Mr. Butler and he has expended many thousands of dollars in the breeding and racing of them. He is president of the Empire City Trotting Park Company, and a member of the Board of Review of the National Trotting Association.

A HALF MILE TRACK in San Francisco's beautiful Golden Gate Park will soon be built if the horsemen and athletes of this city respond with subscriptions in the manner in which their enthusiasm portends. At a meeting of the Park Commissioners held last week the committees from the driving and athletic associations were cordially received and the Commission agreed to expend \$25,000 on the proposed track and athletic grounds provided a like sum was subscribed by citizens and others interested. The Commissions stated that a lack of funds prevented more than \$25,000 being appropriated and it was estimated that twice that sum would be needed to properly build and equip the grounds. Commissioner A. B. Spreckels with his accustomed liberality in all public matters, subscribed \$1000 to head the citizens list and it is very likely that the amount required will be raised.

NO EXCUSE EXISTS for any one to patronize cheap, poorly bred stallions this year in California. There are plenty of good stallions standing for public service, and fees are not high. Anyone who will look over the list of horses advertised in this paper should be able to find a stallion to suit him, and if not he could not be pleased in any country.

Jackson's Napa Soda does not tangle the feet

FIFTY HEAD OF SHORTHORN CATTLE from the well known herd of Sam J. Maddox, proprietor of the Walnut Grove Herd of Brookfield, Missouri, will be sold at Fred H. Chase & Co.'s salesyard, 1732 Market street, this city, at 11 a. m. on Tuesday, April 5th. There are 24 young bulls, coming two year olds, and 26 heifers, two and three year olds. The heifers have been bred to that grand imported bull, Master Walton 159,856. The demand for good cattle of the beef breeds has made a strong demand in this State for the Shorthorns, and this sale offers an opportunity to get good ones at your own price. Send to Mr. Chase for catalogues.

Village Farm Horses in Training.

Early in the spring Ben White will take a large stable of Village Farm youngsters to Syracuse, where he will train them on the State Fair track during the summer. Visitors to the Jewett covered track this winter assert that the lot of youngsters White has been working this winter includes more high-class racing prospects than have ever been seen in a stable of Village Farm horses before. There is the usual number of promising youngsters by Chimes, but great attention is being attracted by the youngsters sired by Direct Hal 2:04½. Almost everything by this son of Direct that has broken can show speed at either the trot or the pace. He seems to cross equally well with either Mambrino King or Chimes mares, and unless indications are wrong he will have some fast record-holders to his credit before the close of 1904. The colt Lord Direct by Direct Hal, out of Lady of the Manor 2:04½, is regarded as a phenomenon, but he will probably not appear in public until 1905, as he will be used lightly in the stud this year.—*Sports of the Times.*

Bouncer 2:09, the fast daughter of Hummer, owned at Empire City Stud, Cuba, N. Y., failed to get in foal last season and she is now being jugged preparatory to being sent to W. J. Andrews, who will get her ready to reduce her record. Cherry Lass 2:24½ by Bobby McGregor out of the dam of King Direct 2:09½, that has been timed in 2:06½ in a race, will also be placed in Andrews' stable, as will Double Z. 2:19½, a sure 2:10 prospect, by Hummer. There are a number of green prospects at Empire City Farm and some of them will doubtless be sent to Andrews in the spring.

J. C. Bray, the well known Montana horseman, who visits California every winter and buys two or three carloads of good road and track horses for shipment to customers in Montana, Utah and Idaho, is contemplating holding a combination auction sale at Pleasanton about the 2d of April. He informs us that he has about fifty horses engaged for this sale provided he concludes to hold it.

Denmark trotting interests are to be strengthened by the addition of the good stallion Refero 2:24½. Mr. W. R. Janvier has sold this horse to A. E. Bockman of New York, who will send the horse to the land of the Danes. Refero is by Guy Wilkes out of Directress, dam of five with records from 2:10½ to 2:30. He is the sire of Bell Moor 2:18, and Day Book 2:20. The price paid was not announced.

One of the neatest and most complete catalogues ever printed has just been issued by S. G. Danforth & Son, proprietors of the Melbourne Stud, Washington, Ill., who will please accept our thanks for a copy. It contains the pedigrees of 92 horses and mares on the farm. The stallions in service are Sphinx, Red Heart, Klatawah, The Earl and Cuyler-coast.

The new officers of the Oregon State Fair Commission are: Geo. Chandler, Baker City, Oregon, president; Wylie A. Morris, Salem, secretary; Geo. Gammie of Portland, was appointed superintendent of the stock department; Frank Lee, poultry department; Prof. F. L. Kent, Corvallis, dairy; G. A. Westgate, Albany, racing department.

Laurel 2:13½ by Nephew, dam by Electioneer, dropped a very fine filly by Stam B. 2:11½ this week at her owners, F. J. Yandel's, place at Santa Rosa. The filly is large and strong and will be either a dark bay or brown, with a star. What a mare she should make to breed to a good Wilkes stallion.

Wm. Bond of Irvington, has a black Percheron colt three-years-old which now weighs 1850 pounds, and from present appearances will make a grand stock horse. Mr. Bond has given him the appropriate name of Drayman.

James Sutherland of Pleasanton came to the city this week and purchased from the W. J. Kenney Manufacturing Co., at 531 Valencia street, a white enameled McMurray sulky and a No. 30 McMurray cart.

JOTTINGS.

THE BIG LISTS OF ENTRIES received by the Breeders and Pleasanton associations portend a most successful season of harness racing in California this summer. These two meetings are only a starter, as the generous manner in which the horsemen have responded to the invitations of these organizations will surely lead to announcements being made by others. The State Fair Directors are certain to arrange a splendid program of harness events, Vallejo will offer some good stakes, while Woodland, Salinas, Hollister, Tulare and other points have all intimated strongly that they will also be in line. California has a prosperous season ahead for the farmers, fruit growers and business men. 'Tis true that the floods in the Sacramento and San Joaquin valleys have done great damage to farmers on the low lands, some of them probably being ruined, but to the State generally the heavy rains of the past month have been a great blessing and the harvest will be most bountiful in all but the overflowed sections. When the people are generally prosperous they always find time to attend the summer and fall harness races, and the outlook is therefore most excellent for big gate receipts at all the meetings to be held in California this year.

There was considerable talk just before entries closed for the Breeders meeting over the change made in the program whereby a 2:13 class trot was substituted for the 2:14 class trot first announced. The 2:14 limit barred several horses from entering in this race among them Liege 2:12½, Dr. Hammond 2:12½ and Mack Mack 2:13. It was thought by the speed committee that a race with these horses in would not keep any horse of the 2:13 class from entering and that it would be a much more interesting race and a better drawing card if these three started, so the 2:14 class as originally advertised was changed to a 2:13 class. There was strong objection raised in certain quarters as soon as the change was announced, some claiming, without reason, that the change was made to permit Dr. Hammond to be entered and that the race would be a gift to him. A report was circulated that a half dozen owners who originally intended to enter in the race had changed their minds and that by keeping their entries out the race would not fill and the Breeders would be compelled to reopen the purse for the 2:14 class. "The best laid plans o' mice and men gang oft agley" and the kickers seemed to have reckoned without their host. The 2:13 trot received eight entries and was declared filled. Dr. Hammond was not named after all, neither was the Los Angeles mare Sweet Marie, and the fellows that stayed out now wish they had come in. The result shows how unwise it is for horsemen to pass a good thing in sight for something better that is expected to be offered in the future. The only way to race horses is to take things as they come and make the best of them. Trainers and owners who are always looking for a "soft snap" generally find that the contest they decline is the very race they could have won.

The *North Pacific Rural Spirit* shows a very bad temper when it says in reference to the W. G. Durfee case, "It was expected that a California board of appeals would justify any crime committed by a California driver on this (the North Pacific) circuit." The Board of Appeals needs no defense at our hands—it is composed of men whose standing is above question. Mr. Durfee's appeal for reinstatement on the ground that the punishment inflicted on him at Salem last year was excessive was given a very careful and searching hearing. Every witness that testified in the case except Mr. Durfee and Mr. Hughes, the driver of Dr. Hammond, were residents of either Oregon or Washington, and all agreed as to the most important points in the testimony. Mr. Durfee was expelled by the Salem judges for insubordination, and the Board of Appeals after hearing the testimony of the presiding judge and several eye witnesses simply came to the conclusion that expulsion was excessive punishment under the circumstances. It also concluded that Mr. Durfee had been punished sufficiently, and unanimously voted for his reinstatement. There could have been no other verdict according to the testimony.

According to the records in the Judge's Book, Mr. Durfee was not expelled for laying up a heat, but for insubordination in refusing to permit another to drive his mare. He acknowledged the charge of insubordination and claimed the punishment excessive. Had he been fined heavily instead of being expelled, it is very probable that no appeal would have been taken and would have been denied in case it had. The Board considered, however, that expulsion was

excessive and said so, and every person who heard the testimony believes its ruling was correct.

Lou Crellin, who in addition to the many duties required of him in attending his large farm and vineyard properties, finds time to breed a few good colts every year and to lend his good offices to aid every progressive movement in the thriving town of Pleasanton, was at the Livermore Horse Show last Saturday and carried a smile on his face that was quite noticeable. He had a right to look that way as during the week four colts had made their appearance on his farm, all by Searchlight 2:03½ and out of first class mares. Four colts in one week, and all bred well enough to be kept entire for stallion purposes, are enough to make anyone wear a broad grin, and the president of the Pleasanton Racing Association is to be congratulated. One of the colts is from Bertha, that great broodmare by Alcantara, dam of Don Derby 2:04½, Diablo 2:09½, etc., etc. I don't know where one would go to find a better bred one than this youngster and he should grow into a grand stallion. Searchlight is a superb horse and Bertha a grand large mare whose sons and daughters have all been endowed with a generous share of good looks. The dams of the other three colts are La Moscovita by Guy Wilkes 2:15½, Ruth C. by Guy 2:16, and Anna by Director, dam by James Lick. Another cause of Mr. Crellin's smile was the big entry list that the Pleasanton Association has received for its race meeting this year. It is the best and largest list received for early closing stakes by any association in California for several years past and is a guarantee that the meeting will be a big success.

Pony Pacing at Tanforan.

The California Polo and Pony Racing Association will give a two days' pony racing meeting at Tanforan to-day, March 12th, and Monday, March 14th. This will be the association's initial meeting before a city audience. The first meeting of the association, recently held at Del Monte, was a great success and emboldened by the success there attained in place of a one day's meeting as originally scheduled, the directors decided upon holding two days, and also to largely increase the number of cups and amount of purses to be there competed for. Thanks to the courtesy of the New California Jockey Club, who, through its president, Mr. Thomas H. Williams, tendered the association the use of Tanforan for the meeting, the racing requirements are most amply provided for, and with the adequate transportation service arranged for their patrons, a large and fashionable attendance will grace the meeting with their presence on both days. A large number of entries have been received and with several new gentlemen riders appearing in the saddle for the first time this season, the winners of the various events will require too much acumen for us to endeavor to forecast. Amongst the popular favorites who will carry silk are the well-known trio, Silver Dick, Becky and Fusillade, the latter may hardly prove to be in his best racing form having recently been retarded in his training through having bruised his foot. Mr. Carolan is too good a sportsman to disappoint the public and his handsome son of St. Leger will doubtless be seen carrying the popular blue and white in all the long distance events.

Silver Dick has a speed reputation extending over three countries and with a trio of victories to his credit at Del Monte, he will no doubt carry a large amount of the public's money in each of his efforts. Rumors say that his owner, Walter Hohart, will again be in the saddle, his late pilot, Mr. Lawrence McCreery, being unfortunately debarred through indisposition from again accepting the mount. With Becky, Mr. Rudolph Spreckels hopes to lower all previous existing quarter mile pony records and with his favorite recently showing marked improvement in her training trial, the cerise and fleur de lis will certainly be in front on more than one occasion.

Amongst the other ponies who have won their way into public favor, may be mentioned Mr. W. E. Pedley's Carlotta, Mr. McCreery's Lucy Glitters, Mr. Spreckels' Maud H., Mr. Carolan's Floradora. A numerous list of debutantes will also carry silk at the meeting for the first time.

Mr. Thomas H. Williams who has evinced great interest in the association from its inception, has consented to act as presiding judge. Mr. Thomas A. Driscoll, whose recent accident still debars him from active participation in racing and polo, will fill the position of clerk of the course, and woe betide any jockey who occasions any delay. Chas. D. Jeffries of Spokane will act as starter and he is willing to pledge his reputation, that should Miss Miller face the flag, he will get her away without trouble or delay. Mr. W. D. Randall will act as official time keeper and the stewards of the meeting are the same gentlemen who

so ably officiated in like capacity at Del Monte, viz. Messrs. Chas. Raoul Duval, F. J. Mackey and Chas. Butters. Robert Leighton will be clerk of the scales and handicapper. Special train will leave the Southern Pacific depot, Third and Townsend Sts. to-day and Monday at 1:30 P. M. returning immediately after the last race. Special electric cars will leave Fifth and Market Sts. every 15 minutes after 11:30 A. M. in addition to the regular service. To-morrow the polo game for the championship of the Pacific Coast will be played at Burlingame. The handicap tournament will be continued on Tuesday after which the visiting team of English Poloists will probably turn their faces homeward, heartily pleased with their visit to California and the hospitable treatment and exceedingly sportsmanlike spirit which they have received at the hands of the members of the association.

Answers to Correspondents.

GEO. R. DITTUS, Sacramento—Please state the breeding of the gelding Rockwood 2:25½, and also give the breeding of Comet and his record. He was the property of the late Harry B. Fish.

Answer—Rockwood, bay gelding, foaled 1886, by Treewood 18514, (son of Nutwood 600 and Flora by Chieftain 721) first dam Lady Hustler by Ben Franklin, second dam Nelly by Telegraph Morgan. Rockwood was bred by James Wetherhead, San Jose, Cal., and made his record of 2:25½ at San Jose Sept. 25, 1894. Treewood was also called Woodnut but must not be confounded with Woodnut 5334.

Comet, owned by Ben Fisher, was by Young Blackhawk, (son of Vermont Blackhawk), dam by Morgan Tallyho, grandam by Andrew Johnson. He was owned in Santa Clara county in the early '60's.

C. S., St. Helena—Will you in your valuable paper please give the breeding and performances of the stallion Lucky B.? Also, has he any in the list?

Answer—Lucky B. 24505 is a brown stallion, foaled 1889, by Prompter 2305, dam Josie N. by Bedouin, son of Sultan 1513; grandam Black Jetty, pedigree not traced. His record is 2:20½, made at Woodland, September 1, 1894. He started four times that year, getting second money twice and third money once. His record was made against time.

J. H. SANDERS, Smartsville—Will you please look up the breeding of Argyle hy Monday and also Hardwood, he hy Woodhurn?

Answer—Argyle bay horse foaled 1884, hy Monday, dam Cuba hy imp. Australian, second dam Bettie Ward hy Lexington, third dam Mary Cass hy Whalebone, fourth dam hy imp. Hedgeford, fifth dam hy Plato. Hardwood, bay mare foaled 1870, hy Woodhurn, dam Moss Rose hy imp. Knight of St. George, second dam imp. Melrose hy Melbourne, third dam Clarkia hy Muley Moloch, fourth dam hy Palmerin, fifth dam hy Cerehus.

MONTE WHITE, Stockton—Will you please give the breeding of thoroughbred mare Panchita hy Alta?

Answer—Panchita, also known as Pandora, is a chestnut mare foaled 1890, hy Alta, dam Constellation hy St. George, second dam Planette hy Planet, third dam Maggie Bruce hy Lexington, fourth dam Anna Farris hy Altorf, fifth dam Phoebe hy Prince Richard.

Value Received.

SAN FRANCISCO, March 8, 1904.

EDITOR BREEDER AND SPORTSMAN: Through our advertising three three-year-old Shire stallions for sale in your Xmas Edition we have sold two of them, and we recognize the value of your paper as an advertising medium.

Our two year-old Shire stallions are doing splendidly and developing into great colts, and we shall have something fine for next season's service.

Yours truly,

Estate of WM. H. HOWARD, Deceased.

By FRED M. PICKERING.

At a meeting of the Pacific Jockey Club held last Monday Harry Stover was granted a license to hold a thirteen days' running meeting at Petaluma, commencing May 14. The Seattle association was allotted dates from June 11th to August 6th, inclusive, and the Portland track was assigned from August 8th to August 27th, inclusive, with the privilege of continuing two weeks longer. The Los Angeles Jockey Club was granted permission to race from December to May. Racing will end at Oakland May 7th.

Mr. Geo. H. Kingsbury, proprietor of the Lick House in this city, has been appointed a Director of the California State Agricultural Society, to succeed Grove L. Johnson, term expired. Mr. Kingsbury will make an excellent official as he is an energetic and tireless worker in everything he undertakes and is enthusiastic in every movement that tends to the progress of California. He is a live stock breeder and viticulturist and takes great interest in agricultural affairs.

EVERY RACE FILLED.

Program for Breeders Summer Meeting Receives Big Entry List.

Every race advertised for the Breeders meeting to be held in August was declared filled at a meeting of the Directors held on Tuesday of this week. There were eight stakes which closed on March 1st, which, together with the two three-year-old divisions of the Breeders Futurity No. 1, and the two two-year-old divisions of the Breeders Futurity No. 2, will make a great program for the four days' meeting. As the stakes for the Pleasanton meeting also attracted large entry lists, other associations can now announce programs with every assurance that the entries will be numerous enough to make a successful meeting. We expect to announce Valjejo's stakes next week and Woodland and the State Fair should have their programs out this month. The entries for the stakes of the Breeders meeting as here given show that all the best horses in the State in these classes are entered. The meeting is bound to be a big success.

No. 1. Green Class Trotting Stakes (horses without records), \$800.

W G Durfee's br s Electro Mc by McKinney, dam El Mae by Electricity.

F R Garney's b m Alcacita by Red Cloak, dam Alcazette by Alcazar.

Ed Ellis' b m Ellis by Alcona Jr, Jam Luce by Gen Washington.

E D Dudley's br m Lorna Doone by Bayswater Wilkes, dam by Sterling.

E A Servis' ch g Edwin S by Dr Hicks, dam La Harp.

W Mastin's b g Penrose by Falrose, dam Miss Mooney Filly by Brigadier.

S A Eddy's b g Cuckoo by Strathway, dam Editb M by Milton R.

H W Goodall's b g Uncle John by Chas Derby, dam Nauvalaka by Balkan.

H H Helman's b s by Lovelace, dam Walleen by Altao.

Silva & Wright's b m Polka Dot by Mendocino, dam Maud Merrill.

H H Dunlap's b h King Cadenza by Steinway, dam Empress by Flaxtail.

S S Bailey's b m Oma A by Dictatus; ch s Tidal Wave by Nutwood Wilkes, dam by McKinney.

Pleasanton Entries.

The four stakes advertised by the Pleasanton Racing Association filled with a big list of entries and foreshadow one of the best meetings ever held in California. The complete list is as follows:

CITIZEN'S STAKE—2:20 PACE—\$1000.

B. Croner's Hattie Croner, Wofutt & Sbadbott's Mildred O., Geo. A. Davis's San Lucas Maid, F. C. Hauck's Maud W., Bonner & Bemis' Olivette, H. H. Dunlap's Harold D. and Explosion, Chas. Whitehead's The Mrs., Nutwood Stock Farm's Miss Georgie, S. K. Trefry's Tom Carneal, H. W. Goodall's Uncle John and Rajah, S. A. Eddy's Tammany, Mrs. L. J. Hasting's Sky Pointer Jr. and Hall Pointer, J. G. Cuicello's Welladay, E. A. Servis' Doctor J., F. R. Garney's Sunny Jim, Thos. Charlton's Rose Thorn, Joseph Long's Nellie R., W. G. Durfee's Cavalier and Unnamed, H. H. Hellman's unnamed—23 entries.

RONAN STAKE—2:13 PACE—\$500.

E. A. Servis' Edwin S., H. H. Dunlap's King Cadenza, Chas. Whitehead's The Mrs and Delphi, Chas. Galindo's Rey del Diablo, S. S. Bailey's Oma A. and Tidal Wave, Silva & Wright's Margaretta, H. W. Goodall's Uncle John and Rajah, S. A. Eddy's Cuckoo, Mabry McMahan's I. Direct, E. D. Dudley's Lorna Doon—14 entries.

PLEASANTON STAKE—THREE-YEAR-OLD TROTTERS.

Geo. L. Warlow's Allesandro, William Morgan's Eva, C. A. Durfee's Almaden, T. W. Barstow's True Heart, Walnut Grove Stock Farm's Unnamed, J. E. Berryman's Silver Moon, J. D. Kaler's Maggie Glynn, Geo. A. Kelly's Birdman, E. D. Dudley's Paprika, M. J. Ream's Mamie R., F. R. Garney's Murry M., L. G. Richard's Giggler, L. G. Richard's Ruby H., W. G. Durfee's Mark Anthony and Unnamed brs, H. S. Hellman's Lovely Dell—16 entries.

LIVERMORE STAKE, 2:24 TROT—\$1000.

William Morgan's Tuak, H. C. Ahler's Telephone, B. Croner's Larkin W., Walnut Grove Farm's The Bouquet, H. A. Bell's H. D. B., T. W. Barstow's Sadie Thompson, Geo. W. Kingsbury's D. E. Knight, Bob Burgess' Golden Gate, W. W. Mendenhall's Pathway, Chas. Galindo's Major Cook, Nutwood Stock Farm's T. C., Dan Lawrence's Husky, A. L. McDonald's Col. Hickman, Silva & Wright's Royal Dame, S. K. Dougherty's Sonoma Girl, J. De La Montanya's Bain, F. R. Garney's Alcacita, John A. Cole's Jupiter B., S. H. Hoy's Little Babe, W. G. Durfee's Reta H. and Electro Mc, C. A. Winship's Abe Miller—22 entries.

Walling by Waldstein.

BREEDER AND SPORTSMAN:—In your "Answer to Correspondents" Mr. Mastin of Sacramento asks about a horse he calls Judge Walling. I think I can give him some information. He is mistaken in the name of the horse. It is "Walling" not "Judge Walling." He was sired by Waldstein, dam Blue Bells by Pasha 2:27 by Prompter. Walling has a record of 2:30 made at Hollister, and a reputed trial of 2:17. Pasha is by Echo, dam Fashion filly by Williamson's Belmont. Walling, as well as his dam, was bred by the well known turf patron Mr. Geo. F. Jacobs of Nevada City, who will undoubtedly furnish Mr. Mastin further facts if he desires them.

Yours sincerely, P. C. BYRNE.

A report from New York states that the collection of a high-class stable of heavy harness show horses has been begun by Reginald Vanderbilt, one of the younger scions of the great railroad house. The intention is said to be the invasion of all the leading tan-bark arenas in the East the coming summer, fall and winter.

Strike!—if they don't give you Jackson's Napa Soda when you ask for it.

Horse Show at Livermore.

While the weather last Saturday, when the Livermore Horse Show was held, was a little more propitious than on the previous Saturday when the Haywards Show came off, it was not ideal, as heavy clouds obscured the sun during the greater part of the day and an occasional shower kept the crowds under cover.

The show was a successful one, however, and the parade worth seeing. One of the pleasant incidents of the day was the presentation of a very handsome gold watch fob to Announcer William McDonald by the citizens of Livermore, County Treasurer A. W. Feidler making the presentation speech. Mr. McDonald is the wheel horse in the Livermore Show business, and that his efforts are appreciated by his friends and neighbors is shown by this handsome gift which is in the form of a heavy locket shaped like a horseshoe, beautifully set with onyx. Mr. McDonald has acted as announcer at the Livermore shows for years. He has the pedigree of nearly every horse in the Livermore Valley at his tongue's end and is one of the best judges of a good horse in this State.

Following were the officers of the day:

H. M. Christensen, president; Theodore Gerner, secretary; Chris Schmidt, treasurer; William McDonald, announcer; Frank Fennon, grand marshal; D. F. Bernal, chief aid; A. W. Feidler, William Martin, Pleasanton, M. Mulqueeny, Midway, John Geary, Haywards, division aids.

After the parade through the principal streets, the following awards were made:

Roadsters—Chahoya's Buff and Boegy; Tom Green's Electrical and A. W. Feidler's Guard.

Carriage horses—N. D. Dutcher's Warren, Jr.

Shires, Belgians, Clydes, Percherons and Normans—Oscar Harris' gray stallion Burgeon.

Graded Normans, Percherons, Shires—A. Rose's Rock.

The judges were D. C. McNally, Albert Glass, Robert Bonner, Charles Gould, A. F. Sweer and William Day.

In the parade which was fully a half mile in length were the following:

TROTting STALLIONS.

H. W. Meek's William Harold 2:13½ by Sidney, dam Cricket 2:10 by Steinway.

A. G. Roberts' Alike hy Charles Derby, dam Lily by Ripton.

Wm. Lewis' Abdul hy Grand Moor, dam Vishti hy American Union.

T. H. Green's Electrical by Richards' Elector, dam Stemwinder by Venture.

Ed. Donahue's Ed. D. hy Diahlo, dam Puss by Decorator.

J. H. Dutcher's Diablo Jr. by Diablo, dam Dolly by Plowboy.

A. W. Feidler's Guard by Guide, dam Lady King by Hambletonian King.

A. Wilder's Skylark by Comet Wilkes, dam Bay Flora by Stonewall Jackson.

Wm. Halford's Donnybrook by Don L., dam Clara White by Echo.

N. W. Livermore's Jack Nelson Jr. hy Jack Nelson, dam Lottie F. hy Newland's Hambletonian.

N. Rice's Rob Roy by Ben Harrison, dam Kitty by Spread Eagle.

Chester Young's Grant hy O'Hara's Granger, dam Miss Swift hy Direct.

Frank Davina's Black Prince hy Grey George; dam Daisy D. hy Delwin.

B. F. Brannin's Tenbroek by McClanahan, dam hy Red S.

DOUBLE TEAMS.

Ben Chahoya's Buff and Doagy, one by Steinway, the other by Monroe S.

B. F. Brannin's Oregon Beauty and Nancy, untraced.

SINGLE DRIVERS.

N. D. Dutcher's Prince D. Jr. by Prince D., dam a Patchen mare.

S. Sorensen's Dexter hy Welcome, dam Flora.

Lee Wells' Major by Steinway, dam hy Anterolo.

D. McDonald's Swanhilda hy Dorsey's Nephew, dam Lady Woodbine.

H. R. Madsen's Little Daisy by Guard, dam Minnre. John Mohr's Dexter hy Warren, dam Grey Nellie.

TROTting MARES.

D. McDonald's Merrill F. by Guard, dam Lady Woodbine.

A. W. Feidler's Ada by Guard, dam Braw Mary by Flying Morgan.

A. W. Feidler's May by Guard, dam Alice Derby by Charles Derby.

CARRIAGE HORSE CLASS.

N. D. Dutcher's Warren hy Walker, dam Clara by Buccaneer.

N. D. Dutcher's Warren Jr. hy Warren, dam May by Pumblefoot.

DeWitt Dutcher's Warren D. hy Warren Jr., dam Fern hy Wormwood.

PONY CLASS.

C. L. Powell's Santa Rita Lassie by imp. Orkney, dam imp. Sea Queen.

YEARLINGS.

Cris Anderson's Las Positas Beauty II by Alike, dam Las Positas Beauty by Ledard.

John Sweeney's Livermore Queen hy Electrical, dam Young Nancy hy Starboul.

John Sweeney's Nancy H. hy Electrical, dam Nancy G. by Monroe Lion.

F. R. Fassett's Metacomet hy Electrical, dam Belmont Belle hy Pratt's Alexander.

M. G. Callaghan's Gypsy Queen by Electrical, dam Nellie C. by Pratt's Alexander.

DRAFT STALLIONS.

Oscar Hans' White Stake Burgeon, Ulema and Bijou Berni; N. D. Dutcher's British Oak Jr. and Grover D.; J. H. Martin's Oregon and Star; John O'Hara's Bogwood; Dan Moy's Bogwood Jr.; Sylvan Bordes' Berge; John Collins' Emperor; Henry Colleweth's Moulke; H. M. Christensen's Le David; Bernard Mouteret's Sultan and Duke; J. Kruze's Belfast; Antone Rose's Rock.

Pleasanton Pick Ups.

[From Our Special Correspondent]

Judge Green 2:10½ trotted a half one day last week in 1:03.

Ed Mills has bought of Geo. J. Morgan of Los Angeles the six year old trotting gelding Don M. hy Neernut 2:12½ first dam hy Mambrino Wilkes; second dam hy Black Walnut son of Administrator, third dam by Enfield, fourth dam hy Idol, etc. This fellow is a grand individual of fine size, perfect disposition, with the best of feet and legs, beautifully gaited and extremely fast. He worked an easy mile last fall in 2:15 which was no where near his limit. He goes light and wears but two pairs of boots and no other rigging of any kind. He has been handled and developed by Robert Thompson, familiarly known to the boys as "Dusty Bob," and his physical condition and manners are proof that he has been well and carefully trained. Just before leaving Los Angeles he worked a quarter in 0:31. Since arriving in Pleasanton he has received no fast work, but as soon as the weather becomes more settled will be asked to step along a little. Mr. Thompson believes Don M. will make a reliable and high class race horse capable of racing this season in 2:10 and better, and as "Bob" has had years of experience with trotters and good ones at that, his judgment is worth something. He has a three year old full sister to Don M. at the Los Angeles track that is large and handsome and very promising. She is in the Occident and Stanford stakes.

Mr. Mills has also recently purchased of E. D. Dudley of Dixon the green pacer Allandale. This is a handsome stylish bay gelding, six years old, sired by Falrose 2:19, dam Bee 2:24 dam of Monroe B. 2:15½ by Sterling, second dam Flash dam of Javelin 2:08½ and three others in the list by Egmont. Allandale is a level headed, good gaited pacer with quite a turn of speed, has been a mile in 2:12 and don't wear anything but the harness, is sound as a dollar, easy to drive, and would make a fine gentleman's driver and matinee horse.

George G. 2:12½ worked a slow mile last Saturday and stepped the last eighth in 0:14½.

Johnny Reis, a five year old chestnut stallion hy Chas. Derby, dam by Memphis, owned by E. E. Smith and being trained by Carl Walker formerly of Hartford, Conn., is one of the best mannered and best gaited, as well as one of the fastest green pacers at the track. He has all the symptoms of a genuine race horse.

A very promising three year old trotting filly by McKinney 2:11½ out of the dam of Janice 2:08½, owned by H. W. Meek, and in Barney Simpson's stable, died last week after a short illness. She was entered in the Occident and Stanford stakes. Death was due to a stoppage in the intestines. Dr. Masoero was called but to no avail as veterinary skill could not save her.

Two green trotters in the Salisbury stable worked together a mile in 2:15½ last Saturday, one is hy Hawthorne, the other hy Direct.

James Thompson has a very promising three year old trotting filly by Nazote 2:28, dam Lucyner three years 2:27 hy Electioneer, second dam the famous old pacing mare Lucy 2:14, dam of Chris. Smith 2:14½. This filly recently stepped a quarter in 33 seconds. She is entered in all the big Eastern stakes and will be taken over there this year by Mr. Thompson.

Last spring C. L. Crellin bred six mares to Searchlight 2:08½. Five got in foal with one service each,

and four of them foaled last week as follows: March 1st—Anna by Director 2:17, dam by James Lick, hay colt; Ruth C. hy Guide 2:16½, dam hy Bell Alta, hay colt; March 3rd—La Moscovita hy Guy Wilkes 2:15½, dam Moscova (3) 2:28 by Belmont 64, hay colt; March 5th—Bertha, dam of Don Derby 2:04½, Diahlo 2:09½, etc., hy Alcantara 2:23, brown colt. Mr. Crellin has refused an offer of \$1000 for Bertha's colt.

The Saddle Horse.

The following article on the treatment, training and handling of the saddle horse was written for and appeared last week in that excellent new journal, the *Kentucky Farmer and Breeder*. The author is Mr. Chas. L. Railey, a recognized authority on the saddle horse:

"A saddle horse is one that can be ridden with a light hand on either the curb or snaffle, or both. He should guide by the neck, be responsive to heel and hand, so that he can be readily collected and made to go in form. A well trained horse goes without pulling or yawing his head, and can walk well and fast, trot handily, flexing both knees and hocks at equal height, this giving ease in posting and not tiring the hack. The horse should set off on a quiet, easy canter when asked—any horse can gallop—and lead with either foot at the will of the rider. If these characteristics can be found in connection with a finished conformation, one might say that he owned a typical saddle horse. The layman has but a small conception of the time, trouble, patience, perseverance and skill required to educate a saddle horse.

Horses are like people, some learn more readily than others, but no horse can be properly mouthed and thoroughly trained in less than a year, some requiring even longer.

When a horse comes into my school his lessons begin with a plain snaffle bit, regardless of any previous experience the horse may have had. With this bit his jaws are thoroughly flexed and suppled, so that he responds and yields to the slightest pressure on bit and rein. He is taught to back (not forced) and to stand while being mounted. In six weeks the hit and bridoon, properly the double bridle, is put on, and the same lessons are given over again. After the horse has been accustomed to the double bridle, his lessons in walk, trot and canter begin. What is meant by flexing and suppling of the neck and jaw of a horse can not be defined on paper. It might be comprehended by illustration, but much more clearly by actual observation of the work when being done by skilled and competent hands. Anyhow, this system is separate from anything and everything like force, and is directly opposite to that of Kentucky trainers which they term "setting the head," by pulling his nose in with the curb and forcing him against it with the spurs, which results in the horse carrying himself in bad instead of good form. A horse thus taught is fighting the bit more or less, which unbalances his action, and detracts from his comfort to the rider.

A woman's saddle horse is the most difficult to obtain, however great a price one may be willing to pay, because the horse must closely approximate perfection. For owing to the side seat and her comparative lack of strength, a woman has but little control over a horse, this rendering it imperative that her horse should be of even temper, with great courage and perfect manners, a light mouth, true and level trot, so that she can post easily or sit close, as she may select.

Another stamp of horse very rare is what is termed the weight carrier. And it is a mistaken idea that beef and bone are the sole essentials of a weight-carrying horse. More depends on how the animal is put together. The leg should be wide and thin, the sinews of whipcord texture, shoulders oblique, with great depth of girth and short back. A horse so conformed should cleverly carry 19 percent of his weight.

A well-bred, a well-trained saddle horse is not only your servant, but becomes your companion and is first of all physicians."

All colts are not foaled with straight legs, but failure to regulate the length and bearing the hoof may make a straight leg crooked and a crooked leg worse, says Veterinary Doctor John W. Adams in *Farm Stock Journal*. If breeders were more generally cognizant of the power of overgrown and unbalanced hoofs to divert the lower bones of the young legs from their proper direction, and, therefore, to cause them to be moved improperly, with loss of speed and often with injury to the limbs, we might hope to see fewer knock-kneed, bow-legged, "play-footed," "pigeon-toed," cow-hocked, interfering and paddling horses.

The early closing purses of the Oregon State Fair are as follows: \$2000 for a 2:15 pace, \$2000 for a 2:17 trot, \$1000 for 2:12 trot, \$1000 for 2:11 pace, \$500 for three-year-old pace, \$500 for three-year-old trot, \$300 added purse for two-year-old trot. The closing date of entry for these stakes is May 10th. The fair will be held Sept 12th to 17th.

Notes and News.

Over 120 horses are being jogged at the Jewettville covered track.

The fee of Cresceus 1:59½ has been reduced from \$300 to \$200 this year.

Major Dalmar weighs 1080 pounds at present and no horse in the world looks finer.

Sam C. Freeman has assumed charge of the trotting department of *Rider and Driver* and *Outdoor Sports*.

E. R. Clarke bought the Diablo pacer Imp 2:19½ at the McCarthy sale in Portland last week, paying \$270 for him.

August Uiblein of Milwaukee recently purchased the mare Sola 2:14½ by McKinney and will race her this season.

Bob Lou Dillon 1:58½ and Dan Patch 1:56½ will be on exhibition at the St. Louis exposition some time during September.

The 2:13 class pacers should make a very lively and close contest when they meet at the Pleasanton track this year. There are fourteen of them entered in this stake.

Ben Walker is mentioned as a possible trainer for William Gerst of Nashville, if that gentleman decides to send a stable down the Grand Circuit this coming season.

The only work which the trotting queen Lou Dillon is getting at Memphis is long walks under saddle, her faithful caretaker, Tommy Waugh, having the mount.

Monroe S. 2:13½, the erratic pacer that J. W. Zihle raced last year went through the Portland sale last week and brought \$400. J. H. Beckley of Eugene purchased him.

J. B. Iverson has put his promising two year old colt North Star by Nutwood Wilkes-Ivoneer, in Charles Whitehead's charge, at the Salinas race-track, to be trained.

Jim Thompson's old favorite Goshen Jim 2:08½ is still cutting some ice. At Minneapolis a week ago last Saturday he set a new pacing record for a half mile on the ice, doing it in 1:00½.

The Jewettville rail birds think Tommy Britton 2:06½, will be himself again in the hands of Billy Andrews. The son of Liberty Bell can make all of the 2:07 trotters step when on his good behavior.

Bonnie Doone, son of Blue Bull 75, owned for many years by Perry Barr, Muncie, Ind., died February 16th, at the ripe old age of 28 years. Bonnie Doon is the sire of Cuba, 2:25½, and many high class road horses.

Sonoma Girl by Linwood Wilkes 2:20 is one of the best prospects for the 2:24 class trot this year. She is in Ed Mills' string at Pleasanton and is a clean nice stepper that looks as if 2:10 would not stop her in another year.

Chico 2:14, the bay gelding by Monroe Chief, that James Sullivan raced through the California circuit years ago, was sold at the Portland sale for \$260 and purchased by A. Westgate of Albany, Oregon. Chico is 13 years old.

Ed Mills has an eye for a good horse and has picked up many good ones in his time. He lately purchased from Mr. E. D. Dudley of Dixon the very handsome bay pacing gelding Allendale by Falrose and has begun working him at Pleasanton track.

Sam Gamble is finding time to work a three year old son of Stam B. 2:11½ at Pleasanton and the youngster is showing considerable speed. The get of Stam B. are all showing up well and he will receive several additions to his 2:30 list this year.

W. G. Durfee has entered the McKinney mare Reta H. in the 2:24 trot at Pleasanton. This mare took a pacing record of 2:13½ last season and won seven races up north. She has shown a mile in 2:16½ at the trot and goes very smoothly at the diagonal gait.

Tony Bernal's mare Irene by Diablo, that won the special race for local horses at the Golden Gate Fair held at Pleasanton in 1902, taking the race in straight heats and getting a mark of 2:25, has been leased to Ed Jones, who will put her in training at Pleasanton.

According to press dispatches Vinco trotted a mile on the ice a few days ago on Lake George near Glens Falls, N. Y., in 2:14½ and a quarter, cutting three-quarters of a second from the world's best mark established last winter by Cresceus in Canada against time.

Here's a well bred one: The *American Sportsman* says that J. L. Tarlton of Lexington, Ky., recently purchased of Col. John E. Thayer, Maplehurst Farm, Lancaster, Mass., the yearling colt Baron Hugo by Baron Wilkes 2:18, dam Nuby by Kentucky Wilkes 2:21½; second dam Nubletta (dam of Deputy 2:25½) by Nutwood; third dam Bonnie Wilkes 2:29½ (dam of Bon Bon 2:26, Bonnie Nutwood 2:29½, Bonnie Bon 2:29½, Bonnie June 2:30 and the grandam of Bonnie Direct 2:05½ and Bonsilene 2:14½), by George Wilkes.

"Dad" Trefry of Pleasanton expects to have peaches and cream on his bill of fare this summer. With "The Peach" horse as he calls him, he anticipates getting some of the cream of the big purses hung up to race for this year, and we hope he will succeed.

A couple of trotters by Neernut 2:12½ have reached Pleasanton and are in training. One is in the string of Al McDonald and the other has been recently purchased by Ed Mills, owner of Searchlight 2:03½. The latter is a very handsome trotter and looks like the real goods.

Charles Galindo, of Pleasanton, has begun training Diablito 2:08½ and a three year old filly by Direct belonging to Mr. Juan Gallegos of Mission San Jose. The Diablo horse will be a starter if there are any free for all classes this year in California, and if not he may go East again.

The trotter and pacer will not keep company on the Concord, N. H., speedway in the future. Pacers have the right of way on Tuesdays, while trotters are in control Fridays. The New Hampshire horsemen have evidently found a distinction with a difference in harness horses.

Warren Lewis, a Michigan horse auctioneer, has sold over \$46,000 worth of South Dakota horses in the State of Michigan alone since last August. They are of a much better type than previously shipped east and have sold for from about \$60 to \$95 each, and occasionally one at over \$100.

Detroit may have three consecutive weeks of harness racing this year, instead of the customary two—Windsor and Grosse Pointe. Recreation Park, backed by W. C. Clark, will probably give a meeting immediately preceding that at Windsor, with purses ranging in value from \$400 to \$1000.

Among the entries in the 2:24 trotting stakes this year is T. C. 2:30, the handsome chestnut son of Nutwood Wilkes owned by Nutwood Stock Farm. T. C. took his record as a three-year-old, but worked a mile in 2:20 last year and as he is a big strong trotter, must be reckoned with his class this season.

Dan Lawrence has a big gelding by James Madison entered in the 2:24 trot for the Pleasanton meeting that he calls "Husky." The gelding has a way of going that makes him look like a money winner before the year is out and as the Madisons are dead game there is no telling but Husky may be at the wire first in the big stake.

Blessing Bros., of Hollister, have purchased a draft stallion of Singmaster & Sons for which they paid \$2000. The horse was selected from those in the firm's branch barn at San Jose, which is under the management of Mr. C. O. Stanton. The firm has a number of high class draft stallions at San Jose for sale to which they invite inspection.

Fred Chadbourne has last year's unbeaten pacer Ben F. 2:10 in his string once more at Pleasanton, and the gelding looks to be in fine fettle. He has been running out most of the time this winter at his owner's farm at Walnut Creek. A mark below his present record will have to be taken by the horse that beats him this year if no accident happens him.

When George Spears' car left New York for Louisville, Ky., a few days ago it carried the following horses: Lord Derby 2:05½, Billy Buch 2:07½, Wentworth 2:08, Ida Highwood 2:09½, Queen Wilkes 2:10½, Sadie Mac, 3, 2:11½, Hilgar 2:15½, Kent 2:12½, Spbix S. 2:07, John M. 2:09, Jolly Bachelor, the stable's M. and M. candidate, Ladie Babbie, Aurelio, Del Prodigal and Iratio.

E. H. Harriman has leased the historic half-mile track at Goshen, N. Y., and will endeavor to improve the interest in harness racing in that ancient center. The track was formerly leased by Senator McCarthy, but ill health has forced the latter to resign the business of racing and he will in future confine his attention to breeding a few horses each year on his farm at the head of which stands Joe Patchen 2:01½.

This is from the *Western Horseman*: "Dan W. Brennehan, of Decatur, Ill., is enthusiastic over both Gazote and Hal Direct as future race horses. Few breeders have had a wider experience than Mr. Brennehan, and his judgment would go a long way with us if we were looking for a coming race horse and sire to which to breed a favorite mare." Gazote is the son of Nazote that Millard Sanders took east and sold last year.

A bill is now before the British Parliament providing for the setting aside of a goodly sum of money to encourage the breeding of horses suited for the use of mounted infantry. It is stated that if the bill is passed the effort will be begun by the mating of pony mares with small thoroughbreds, the intention being to produce a wiry little horse from 14 to 15 hands high, one which can get over a lot of ground in a day and do it on whatever food he finds to eat and perhaps not much of anything.

When John Splan got an order a short time ago for a trotter to beat all the free-for-alls in Europe he looked around for all the horses with records of 2:05 or better that were for sale. Of course a good many were out of the question as their owners would not sell, but Dolly Dillon 2:06½ was in the market and it did not take long for him to close the deal. Splan thinks she ought to do across the pond, as the same afternoon she pulled a wagon in 2:06½ she was bitted to a sulky and trotted six furlongs in 1:33. James Brown of Vienna will have the mare in his stable.

The three-year-old trotting stake of \$600 opened by the Pleasanton Association received sixteen entries, showing that there is a larger number of three-year-olds out this season than for several years past. The Breeders Futurity and the Occident and Stanford Stakes are the cause of this revival in the training of three-year olds. It will be one of the most interesting classes of the whole circuit and some high class colts will be developed.

Too many breed horses to suit their own fancy, losing sight of the fact that the horse to produce is the one demanded by those in a position to obtain just what they want, says "Columbus." The man who is breeding horses to please himself must be possessed of abundant means. Those who expect to realize a profit on their breeding ventures must not indulge in "fads" to any great extent. Produce what the market demands is a safe rule to follow.

A meeting of the stockholders of the Contra Costa Driving Association was held last week and it was decided to assess each share of stock the sum of \$2 to clear the indebtedness, which is \$1368.47, there being 721 shares of stock issued. This does not take into account the \$3000 mortgage on the property consisting of a mile track and fair grounds at Concord. The election of new directors resulted in the following: E. J. Randall, H. H. Elworthy, A. W. Maltby, H. J. Curry and Mr. Wallace of Byron. During the course of the meeting remarks were made by E. J. Randall, A. W. Maltby, Ira Kilgore, Wm. Wells and Judge Burke.

John J. Scannell has decided to erect a handsome monument over the grave of The Abbot 2:03½, his great horse which died recently at his farm at Fish-kill. Mr. Scannell had the former champion insured for \$10,000 in an English company. Despite the fact that the horse's racing days were over, he was still in demand, and so good a judge as E. E. Smathers had made an offer of \$20,000 recently for him. It may be remarked here that the day Bingen beat The Abbot two straight heats, and all the plungers began backing Bingen, Smathers bet thousands on The Abbot, who simply trotted rings around the Forbes horse the next three heats.

Mr. J. N. McKay of Marion county has purchased of Mr. E. B. Williams his well known broodmare Ada Rock and intends to continue to use her for breeding purposes upon his farm in Marion county, where he is establishing a breeding farm for high class trotting horses. Ada Rock is by Adirondack 719. First dam Minnie M. (dam of Trumont 2:21½) by Rockwood 1467; second dam Sally M. (dam of Altai 2:09½, Pathmont 2:09½) by Oregon Pathfinder; third dam Sally Come Up by Paul Jones, sire of the dam of Jane L. 2:19½, Hannibal Jr. 2:26½. Ada Rock is the dam of Atlas 2:15½ and many other very promising colts undeveloped.—*Rural Spirit*.

Bad luck struck the Meek Estate last week. The three year old filly by McKinney 2:11½, out of the dam of Janice 2:08½, died at Pleasanton of strangulation of the bowels, and a bay gelding by Welcome that was one of the best all-around horses in California died at the Meek Farm at Haywards. The McKinney filly had been in Barney Simpson's string but one month, and had shown such promise that she was considered a better one even than Janice, as she had shown more speed at the same age. The Welcome gelding was the favorite saddle horse of Mr. H. W. Meek's daughter, and a better one is seldom seen. Besides he was an excellent driving horse and few horses were better at the pole.

Trotting meetings are to be held at Brighton Beach and Empire City Park, New York this year, both under the same management. James Butler, who controls the Empire track, has entered into an agreement with W. A. Engeman, owner of the Brighton race course, whereby Butler is to finance and control the Grand Circuit meeting at the seashore. Under this management there will be two weeks of continuous trotting in Greater New York next summer, with the first meeting at the Empire track beginning on Monday, August 8th, and the second at the Coney Island course, beginning one week later. For each meeting six stake races, worth \$24,000, are to be opened, entries closing on April 4th.

A deal of more than ordinary importance in the light harness world was consummated last month when W. L. Snow, of Hornellsville, N. Y., sold the famous pacing mare, Fanny Dillard 2:03½, to George Ketcham, of Toledo, owner of Cresceus, at a reported price of \$4000. The speedy mare, together with The Hangman, a full brother of Cresceus, and the champion stallion's famous pacemaker, Mike the Tramp, have been shipped to the English turfman, Louis Winans. The Hangman and Mike the Tramp will be used for exhibition purposes while the fast daughter of Hal Dillard, which holds the world's race record for pacing mares, will be used for breeding purposes.

The oldest living jockey has been discovered, and he is going to have a birthday next Fourth of July, when he will be 116 years old, unless the "dope" in the family Bible is wrong. His name is Alston Gibson. He lives at Calera, Ala., and he expects turfmen to contribute to a fund to make him comfortable in his declining years. His chief claim to fame, aside from the fact that he is the oldest jockey, is that he rode Andrew Jackson's horse Truxton, in the match race against Irving Plowboy way back in the teens of the 19th century, which race was the cause of the duel between Jackson and Dickinson, in which Dickinson was killed, and which duel brought about the bloody encounter between Jackson and Thos. H. Benton, which resulted in Jackson receiving wounds that ultimately caused his death.

Gen. Sheridan's Horse "Winchester."

Among the horses that have become historic none occupy a higher place or will live longer in history than the charger who bore General Phil. Sheridan from Winchester town to Cedar Creek that gray October morning, and turned route into victory and inflicting such punishment upon the Confederates that they never regained foothold in the valley of the Shenandoah.

Winchester was a Michigan horse and was trained to war in the ranks of the old Second Michigan Cavalry, every member of which has a personal pride in the achievements of the horse and his famous rider. He was coal black in color, stood about sixteen and a half hands high, with muscles like whip cords and bones as of the finest steel. His history, so far as known, can be briefly told.

In the summer of 1861, Archibald P. Campbell of Port Huron, Mich., recruited a company of soldiers for the Second Michigan Cavalry (Co. K.) and commissioned his friend, Ed. J. Inslee, to procure for him a suitable mount. After the company had gone into camp with the regiment at Grand Rapids, Mich., Inslee came there with a black colt, three years old, and more immature than colts generally are of that age. He was not well broken, and was put in charge of the company farrier for care and education. Captain Campbell was a man of large frame and of more than average weight. He was not then as much at home in the saddle as he afterwards became, and he did not use the colt very much. In the spring of 1862 the regiment was engaged in the campaign in Northern Mississippi, which culminated in the capture of Corinth. While in camp at Farington, Capt. Phillip H. Sheridan was appointed Colonel of the regiment, to succeed Colonel Gordon Granger, who had been made a brigadier-general and at once took command of the regiment. Sheridan and Captain Campbell at once became intimate friends, and upon the suggestion of Captain Campbell, John Ashley, Co. K's farrier, was detailed to take care of Sheridan's horse. He took the black colt with him. He had developed much and had become a fine looking horse. Sheridan rode him occasionally and liked him, and the horse liked Sheridan. In July, 1862, Sheridan was promoted to Brigadier-General and assigned to the command of a brigade of infantry. Before leaving the old Second Cavalry he recommended the promotion of Captain Campbell to be Colonel of the regiment, and the recommendation was approved by Governor Austin Blair, of Michigan, and the appointment was made. When Sheridan took leave of the regiment, Campbell gave him the black stallion, and he took him and the farrier with him.

Of the breeding of Winchester nothing definite is known. I have spent some time and pains in the effort to ascertain it definitely, but have failed. All that is known is that a black mare in foal was brought into St. Clair county, Mich., from Canada, and in due time produced a lank, rangy black colt. This sire was said to be a "full-blooded English fox hunter," and his dam to be a "three-fourths fox hunter." This would indicate that the colt was nearly thoroughbred, and his appearance when developed bore out this view. It is a matter of history that in that ride from Winchester town not one of Sheridan's staff or orderlies could keep pace with the black horse, but faltered and fell out by the way.

If we stop to reflect "what might have been" had the horse lagged or fallen by the wayside, who shall say that this country does not owe that horse a debt of gratitude? Who knows what would have happened at Cedar Creek had not Sheridan and Winchester arrived on time to save the day.

Gen. Sheridan called the horse Rienzi, I presume from the fact that the regiment was encamped at Rienzi, Miss., when he was promoted and Col. Campbell presented him the horse. And he was known as Rienzi until after the famous twenty-mile ride had been immortalized by Thos. Buchanan Read's wonderful dramatic poem, when his name and fame went into history as "Winchester."

After the campaign in Northern Mississippi was over and Corinth and the railroads centering there were in our possession the Second Michigan Cavalry served on the outpost and scouting duty until September, 1862, when it was ordered to Kentucky to take part in the Buel-Bragg campaign. Its headquarters were at Rienzi, the greater part of the time, and it was at Rienzi that Capt. Campbell presented the horse to Gen. Sheridan. From this fact Sheridan called the horse "Rienzi" and he was so known until after the Cedar Creek battle and the ride from Winchester town.

Sheridan rode "Rienzi" during the battle of Perryville October 8, 1862, and when his old regiment saw "Little Phil" lead his brigade up the steep slope of Campbell Hill and beat back an assault of the enemy they felt nearly or quite as much pride in the achieve-

ment as they would have done if they had been in that charge themselves. Later "Rienzi" took part in the fight at Stone River, the campaign to Chattanooga and in the terrible battle of Chickamauga.

After the war "Winchester" lived a life of ease, as well he should. He was sent to a farm in Ohio where he was kindly cared for until his death, which occurred some years before his illustrious master answered the last roll call. His bones were preserved, the skeleton mounted and placed in the U. S. Museum on Governor's Island in New York harbor, where all who so desire can see what remains of the gallant steed who bore Sheridan "from Winchester, twenty miles away."—*American Sportsman*.

Death of an Old Time Stage Driver.

Henry C. Ward, a famous pioneer stage driver, died at Agnews, Santa Clara county, on Friday. He is credited with being the first driver of a stage over the old road between San Francisco and San Jose in a line established in 1849. There was really no road between these two points, but trails and open country. Wagons were the coaches and mustangs and mules the motive power. At that time a stage driver drew the salary of \$300 a month, but when all other things are considered, he was by no means munificently paid. The *San Francisco Bulletin* says:

"The start of the first coach from the plaza in September, 1849, was an event of much moment, and the entire population of San Francisco turned out to cheer its departure. The distance to San Jose was covered in nine hours, which became the schedule time, and the fare was two ounces of gold dust, or \$52. The driver carried letters and packages for any price the sender cared to pay, as there was no mail or express in those days."

Later Ward drove coaches between Sacramento and Marysville, and still later he took the first coach into Portland, Or., from Yreka, in this State, thus marking out the route from Sacramento to Portland via Marysville.

The *Bulletin* adds: "Ward also drove on Hill Beachy's famous line from Boise, Idaho, through Oregon and Nevada, connecting with the overland mail stage in that State. This was a dangerous country in early days, and the stage was frequently attacked by Indians, while hold-ups were almost daily affairs."

For forty years Ward was a valued and trusted employe of Wells, Fargo & Co., making a fine record for bravery as their shotgun messenger on different stage lines. He never surrendered in his battles with highwaymen, although three times he was shot and seriously wounded.

"His dog Pony was almost as well known as Ward in early days, accompanying him for twelve years on all his trips between Sacramento and Portland."

"The experiences of the old stage driver, who was as well known in his day as the famous Hank Monk, would make interesting reading in these times of railroads and twentieth century civilization. For the past few years Ward has been a pensioner of Wells, Fargo & Co. Several months ago his health failed, and last week he was removed to Agnews, where he suffered a stroke of paralysis Friday that caused his death. He was 76 years old, a native of Connecticut. He leaves no relatives in this State."

Ward's funeral was held in San Francisco last Sunday and conducted under the auspices of the the Society of California Pioneers from their hall.

Disliked the Road Devils.

Senator Hanna had a hobby for horses. He preferred a gray and black team. He was greatly prejudiced against automobiles.

Once on a train getting into Cleveland, Myron T. Herrick turned to the senator and said: "Senator, I've telegraphed my wife to meet us at the station with my auto. I wish you'd come out and eat breakfast with us."

"I'll accept your invitation to eat breakfast with you," answered the senator, "but I won't ride in your auto. I don't like them. I like to see something alive in front of me when I go riding. Especially, I like horses. Give a horse fair treatment and he will never go back on you. By the way, Myron, speaking about autos, how is your sprained ankle?"

Senator Hanna finally consented to ride to Herrick house in "the Green Angel," but he filed a final protest as he clambered into the machine.

"Remember, Myron," he said, "I am only doing this to oblige you. It's against my principles."—*Chicago Tribune*.

A fine surrey, one of the best made, and handsomely finished is for sale at about half its value by the Kenney Manufacturing Company, 531 Valencia street, San Francisco.

Types of Army Horses.

Now that Russia and Japan are at war the matter of the best type of cavalry horse comes up for discussion in a fresh and potent form, for the reason that it is possible, from the magnitude of the interests involved and affected directly and indirectly, that much of the Eastern world may be set by the ears. It is known that Japan has few horses. It is not so long ago that there were only a few thousands in that collection of islands. Russia, on the other hand, owns an enormous number of horses, not many of them large, but most of them well suited to the uses of the soldiers who ride them. Indeed it has been said that the much-dreaded Cossack troops of Russia have been made by their mounts, not their mounts by their riders. The Cossacks are known as among the most mobile troops in the world. This is a point which should be remembered in this discussion. Here is another hearing along much the same line.

When Oom Paul made up his mind that some day or other he would send an ultimatum to the British suzerain he wisely set about the preliminary mobilization of his troops. From Australia and elsewhere small thoroughbred stallions were procured in large numbers. These were mated with the Basuto and other native pony mares and the resulting remounts surprised the world with the rapidity with which they transported their rather heavy riders from point to point. It cost the British nation blood and treasure to learn the lesson, and the result is well worth noting. On demand of Lord Roberts some 40,000 horses were purchased for British troops in South Africa. These were not heavy horses. They were wanted strong-backed, short-legged, wiry, compactly built and standing between 14.1 and 15 hands. Many such animals were found in Hungary, Russia and the United States. Of course many larger horses were also bought, but the main demand was for these small animals.

The reasons advanced were that small horses of wiry nature can get over as much ground as larger ones and do it on less food and with less trouble. As military evolutions must now be performed it is hard to keep the forage trains up with the forward line of march. The foot soldier, not being well accustomed to the saddle, gets on and off a small horse more easily than a tall one. Other reasons for the preference of such small horses might be named, but these are sufficient to show why the change has overtaken the demand for army horses and why the aims of governments have also been transferred from the production of the large to the small.

The most recent effort toward the breeding of these horses is reported from the United Kingdom, where it has been announced that the best possible way in which to produce the required sort is believed to be mating thoroughbred stallions with pony mares, that is mares really belonging to the pony breed, the Welsh, Exmoor and the like. It is announced that by such unions a small wiry animal will be bred that in the field will get over all the ground required, that will do it on little carried food, find a living for itself almost wherever placed and be easy to mount and dismount from, standing much hardship and preserving a great degree of health at all times.

To breed such animals from the native ponies of South Africa operations have already been begun. Inquiries have already been ordered renewed in the Canadian Northwest. Hundreds of the Texas, Montana, Wyoming and Colorado ponies bought during the Boer rebellion are still in use in the Transvaal and Orange River colonies. They seem to have survived unscathed where heavier and softer-bred animals died by the score. Britain evidently means to breed some of the same sort for itself.

What effect is all this going to have on the production of the army horses in the United States? For some years we have heard much about the necessity of some effort being made toward the systematic breeding of cavalry horses here and an attempt has been made to secure Governmental aid and control of the venture. But if an effort is to be made, along what lines shall it be directed? Does it not seem that the traditional cavalry horse is more or less a myth now? The big upstanding, bulky, troop animal seems to be at considerable discount just at present. Even the artillery horses are wanted much lighter than ever before. It is well known that, owing to the peculiar nature of the work required of them, the American troop horses have so far been lighter than those of the European governments, with the possible exception of Russia, and now it seems that even a lighter, better bred animal is the most wanted. War alone can teach its lessons. They can be learned in no other school. It may be that each nation must eventually breed its own remounts to suit its own exigencies. It is obvious that this cavalry horse matter is very far from a general solution just at present.—*Breeders Gazette*.

PACIFIC BREEDERS FUTURITY No. 4.

Second Payment Made on Just Three-Fourths of the Original Nominations.

There were 404 original entries in the \$6000 Breeders Futurity for foals of mares bred in 1903, and on March 1st, when second payment of \$5 each was due, 301 second payments were made. This is a splendid showing, and is proof that the interest in breeding and racing colts has not fallen off any on the Pacific Coast. The list of those making second payments in this stake is as follows:

Nominator.	Breeding of Foal.
Akey, J. V.	Zombro-Graywood by Silkwood
Angel, Bennett.	Prince Nutwood-Flora Fuller by Dorsey's Nephew
Arnett, John.	Sidney Arnett-Nelly by Boxwood

The Portland Horse Sale.

Bad weather kept the attendance down somewhat at the sale of trotting horses held by J. L. McCarthy & Son, at Irvington Park, Portland, March 1st and 2d, but the sale went off in good shape although prices were not high. According to the *Rural Spirit* fifty-six head were sold on the first day for \$8435, an average of \$150 per head. On the second day fifty-seven head passed the auctioneer at an average of \$171 per head. The demand was for good sized driving horses ready for use, and small well bred horses were not sought for. The horses that brought \$200 or over are given below with the name of buyer:

Harry Marvin 2:22½, br g, 8, by Don Marvin; A. C. Reese, Portland, \$250.
Pricelist, blk g, 3, by Pricemont-Miss Mann; Jack Rugg, Portland, \$275.
School Girl, gr m, 5, by Alexis-Mattie Whipple; J. J. Bottger, Vancouver, B. C., \$310.
Pricemark, b g, 3, by Pricemont-Molly Vaughn; Wm. Frazier, \$290.
Hallie Hinges 2:18½, 4, hy Pricemont-Molly Vaughn; N. K. West, La Grande, Ore., \$600.
Fred Wallace, ch g, 3, by Coloma-Lena T.; J. W. Smook, Salmon, Ida., \$200.
Wallace L, ch g, 4, hy Coloma-Juneau; Wm. Frazier, \$235.
Citizen Bird, h s, 3, by Cyr Falcon-Coqueta; A. Kimberly, Everett, Wash., \$250.
Chico 2:14, b g, 13, by Monroe Chief; G. A. Westgate, Albany, Ore., \$260.
The Belle 2:28, ch m, 4, by Bonner N. B.-Belle; E. H. Sterling, The Dalles, Ore., \$205.
McBriar 2:14, b g, 12, hy McKinney-Briar Bell; F. C. Sharkey, Portland, \$200.
Kamont, b g, 9, by Altamont-Kitty Rockwood; W. E. Allison, \$210.
Crystal Jones, br f, 3, hy Capt. Jones-Flora; J. A. Jones, \$200.
San Toy, ch m, 4, by Lovelace-Marigold; V. P. Hart, Seattle, \$325.
Special Telegram, h s, 11, by Rad Wilkes-Avoca; L. L. Hines, Wasco, Ore., \$215.
Brown mare, 5, hy Del Norte; W. C. Eaton, \$200.
Black gelding, 5, by Multnomah; L. S. Hines, \$205.
Charles Newman, g g, 6, hy McKinney; George Misner, \$295.
Fitzsimmons, b g, 5, hy Seymour Wilkes; J. Mann, \$250.
Dicknomah, bs, 5, by Multnomah-Babe Flaherty; D. L. Hedges, Independence, Ore., \$370.
Little Mac, h g, 8, by Alopath; V. P. Hart, \$210.
Kinney Mc, h s, 6, by McKinney-Midday Bell; George Peringer, Pendleton, \$600.
Idanha, h c, 3, by Lovelace-Alatiel; J. J. Bottger, \$330.
Maid of Del Norte, br m, 5, by Del Norte-Little Maid; P. A. Barnhart, \$240.
Rocklace, h g, 5, by Lovelace-Roxy; L. A. Porter, \$380.
Tai Ann, b f, 2, by Lovelace-Marigold; J. J. Bottger, \$230.
Prince T., b g, 7, by Pelleiter-Maydee; A. R. Shreve, Cathlamet, Wash., \$230.
Monroe S. 2:13½, s g, 7, by Dictator Wilkes; J. H. Beckley, Eugene, Ore., \$400.
Alta Norte 2:16½, hr m, 10, hy Del Norte; J. A. Jones, \$300.
Milwaukee, b s, 10, by Free Knight-Fautus; E. J. Cameron, Victoria, B. C., \$205.
Imp. 2:19½, ch g, 9, by Diahlo-Admira; E. R. Clarke, \$270.
William C. 2:29½, b g, 5, by Bonner N. B.; E. R. Clarke, \$285.
Silverlight, ch g, 9, hy Wallace Drew-Nellie; E. J. Cameron, \$240.
Lou K., ch m, 4, by Silverlight-Sadie C., and Rosa K., ch m, 5, by Silverlight-Sadie C.; L. S. Hines, \$325.
Flossie, b m, 4, by Silverlight, and Marie, h m, 4, by Coeur d'Alene-Nettie; O. Weidner, North Yamhill, \$325.

Nothing But Good Results.

Belmont Park, Mont., Jan. 14, 1904.
Tbo Lawrence-Williams Co., Cleveland, O.
After using Gombault's Caustic Balm for more than twenty years, I believe it to be the best blister I have ever tried. I have used it in hundreds of cases with nothing but good results. It is perfectly safe for the most inexperienced person to use. This is the largest breeding establishment of trotting-bred horses in the world, and you may know we have occasion to use your blister quite often. I have recommended your blister to many horsemen.
W. H. RAYMOND,
Proprietor Belmont Park Stock Farm.

ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

S. F. K. C. Premium List.

The brisk demand for the local premium list, which was issued this week argues a good entry. The regular prizes will be a new designed and elegant club medal for first, the club medals used at previous shows for second and third. The classification embraces 310 classes.

The list of specials and specialty club prizes is a lengthy and valuable one—few of these trophies are valued at less than \$20. This list will be enhanced by other specials that will be published in the catalogue.

These specials are to be competed for and awarded to dogs owned on the Pacific Coast.

The list in brief embraces the following:

Herman Oelrichs' trophy for best owned by lady.
George S. Thomas' trophy for best in the show.
St. Bernards—Livingston Jenks' trophy for best;
Lester K. Wells' trophy for best of opposite sex.

Great Danes—A. & G. Gump's trophy for best; Lick House trophy for best of opposite sex; W. F. Williamson's trophy for best pair, dog and bitch, owned by one exhibitor; C. Newman's trophy for best bred on Coast in puppy class.

Greyhounds—S. F. K. C.'s trophy for best.

American Foxhounds—Clabrough, Gulcher & Co.'s trophy for best; S. F. K. C.'s trophy for best bitch.

Pointers—P. J. Weniger's trophy for best; a friend's trophy for best of opposite sex; Shreve & Co.'s trophy for best brace owned by one exhibitor.

Setters—Charles K. Harley offers the President's trophy for the best Setter of any variety.

English Setters—S. F. Britten trophy for best dog; John E. de Ruyter trophy for best bitch; Irving C. Ackerman trophy for best puppy.

Irish Setters—E. Courtney Ford trophy for best.

Gordon Setters—John Butler trophy for best.

Field Trial Class—Wm. S. Tevis trophy for best English Setter in field trial class; Walter McGee trophy for best Pointer in field trial class.

Irish Water Spaniels—William S. Kittle trophy for best.

Cocker Spaniels—Shreve & Co. offer the Breeders cup for the best Pacific Coast bred Cocker Spaniel whelped the year previous to competition (1903) and to be won three times by the same breeder before becoming his or her absolute property; Mrs. Andrew P. Welch trophy for best; J. L. Cunningham trophy for best of opposite sex; Arthur W. Spear trophy for best in novice class; S. F. K. C. trophy for best in puppy class.

California Cocker Club offers the following prizes for non-members: Silver medal for best dog; Silver medal for best bitch.

Special prizes offered by the California Cocker Club for members only.

Black—Silver medals for best puppy dog, best novice dog, best limit dog, best open dog, best puppy bitch, best novice bitch, best limit bitch, best open bitch.

Any solid color other than black—Silver medals for best puppy dog, best novice dog, best limit dog, best open dog, best puppy bitch, best novice bitch, best limit bitch, best open bitch.

Parti-Color—Silver medals for best puppy dog, best novice dog, best limit dog, best open dog, best puppy bitch, best novice bitch, best limit bitch, best open bitch.

Collies—Palace Hotel trophy for best; J. A. McKorron trophy for best of opposite sex; Oriental Cafe trophy for best in novice class; J. P. Glynn trophy for best in puppy class.

Special prizes offered by the California Collie Club for members only—Silver medals for best dog, best bitch. Bronze medals for best California bred dog, best California bred bitch, best California bred puppy dog, best California bred puppy bitch.

Bulldogs—Walter S. Moore trophy for best, S. F. K. C. trophy for best of opposite sex.

Bull Terriers—Dr. H. L. Tevis offers the Breeders' Cup for best Pacific Coast bred whelped in the year previous to competition (1903), and to be won three times by the same breeder before becoming his or her absolute property; W. C. Ralston trophy for best; Grain Brokers' trophy for best of opposite sex; Chas. Bliss trophy for best in novice class; T. & H. Quigg trophy for best in puppy class.

Boston Terriers—Yellowstone trophy for best bitch owned in San Francisco county; Henry Kahn trophy for best bred on Pacific Coast; Mrs. J. P. Norman offers the Montez trophy for best brace of California-bred puppies; Russian Bazaar trophy for best.

Dachshunds—Dr. A. T. Leonard trophy for best.

Fox Terriers (wire or smooth)—E. Courtney Ford offers the Breeders' Cup for the best smooth coated Fox Terrier bitch to be judged by two or more of her get to be won three times by the same breeder before becoming his or her absolute property; New California Jockey Club's trophy for best; H. C. Tilden's trophy for best of opposite sex; W. W. Moore's trophy for best Coast bred smooth puppy dog; Charles Woolsey Johnson's trophy for best Coast bred bitch; F. H. Farwell's, Sabine Kennels, Orange, Texas, trophy for best brace of American bred, wire or smooth.

Special prizes offered by the Pacific Fox Terrier Club to members only: Charles K. Harley's President's trophy for best, donor not to compete; Irving C. Ackerman's Humberstone trophy for the best of opposite sex, donor not to compete.

Pacific Fox Terrier Stakes, 1904, First and Second Division: \$5 each for the best dog in puppy class, novice class, limit class, open class; \$5 each for the best bitch in puppy class, novice class, limit class, smooths or wires.

Irish Terriers—S. F. K. C.'s trophy for best.

Yorkshire Terriers—S. F. K. C.'s trophy for best. San Francisco Kennel Club offers \$5 cash for best kennel in every breed. Handlers' prize—\$20 first prize; \$10 second prize.

San Francisco Show Rating.

In last week's issue the ratings published in the December number of the A. K. C. Gazette gave the local show five points.

The Gazette for February has the following correction:

The minimum rating given to the San Francisco show has been changed by the A. K. C. to three points for the year 1904. The change has been made on account of the dropping of numbers through the catalogue of that show, which made it appear that over 400 dogs were benched, whereas only 334 were actually present.

DOINGS IN DOGDOM.

Crufts show which was held three weeks ago in Agricultural Hall, Islington, England was a great success and is said to be quite the best ever organized.

The entry list of 3500 was the record one and the quality of dogs compared most favorably with any of Crufts' previous exhibitions.

Mr. George Thomas has brought suit in a Texas court for \$1800 damages, for the death of Ch. Ivel Rustic in an express car last year. It will be remembered that Rustic was smothered to death in his crate whilst the train was passing through Texas. The weather was extremely hot at the time and the dog was in rather fat condition. Thomas claims negligence on the part of the express company.

We acknowledge receipt from Col. F. H. Farwell of a very handsomely illustrated catalogue of the Sabine Kennels, Orange, Texas. The booklet is full of interesting information, pedigrees, etc., of some crack smooth Fox Terriers.

The kennels are offering for sale a desirable lot of dogs—imported ones and good winners as well as young dogs by sires and dams of renown. The sale list in the catalogue offers an interesting lot of terriers.

James Watson of New York will judge all breeds at the Seattle show.

Mr. Watson judged Collies at the recent Boston show and had a record entry of 95 dogs in the Collie classes.

He will be remembered as having brought out here some fifteen years or so ago the black Pointers, Black Joe and Black Bess, the progeny of which good pair of Pointers are thought highly of to-day by the sportsmen owning them.

American dog shows are deprived of one of its greatest Bulldog competitors and the fancy has sustained the loss of one of our best specimens as Champion Glen Monarch, owned by Thomas W. Lawson, died on the way from New York to the Dreamworld Kennels, situated at Scituate.

He was purchased by Mr. Lawson for the sum of \$2500 from the breeder, Mr. W. C. Codman of Providence, R. I., on March 4, 1902. Since that time he has captured every event in which he entered. He was one of the most famous American-bred English Bulldogs, and had been shipped from New York on Sunday, February 14th, in perfect condition, but on the arrival of the train at Dreamworld Kennels he was found dead in his box. Monarch was whelped Aug. 27, 1897, was a dark brindle by Ch. Ivel Rustic out of Glenwood Queen.

A law suit may develop over the cause of the dog's death. While en route one of Mr. Lawson's employees endeavored to look after the dog, but was refused admission to the car.

At the annual meeting of the Great Dane Club held in New York on February 10th at 8 p. m. there were present: Messrs. J. Blackburn Miller, Charles D. Bernheimer, G. Muss-Arnolt, J. O. Dutton, Frank Rappolt, Max Figman, John H. Arfman, O. H. Albanusius, R. Nicholson, Howe Totten, John Hartmetz, William Smith, Rud. Vohl, R. T. Harrison, Elias L. Sanger, G. F. Eggert, Aug. F. Miche, Charles E. Strassburger and C. H. Mantler.

It was decided to offer at the bench show of the Chicago Kennel Club, to be held March 10-12, a club silver medal for best dog, and a club silver medal for best bitch. Open to members only.

It was resolved that the club should open a produce stake, and Messrs. John Hartmetz, G. Muss-Arnolt and O. H. Albanusius were appointed a committee to lay this matter before the next meeting.

It was decided to offer at the coming World's Fair bench show certain special prizes, provided one of the following judges, Messrs. J. Blackburn Miller, G. Muss-Arnolt, C. H. Mantler, James Mortimer, is appointed to pass on Great Danes (Deutsche Doggen).

The following officers were elected for the ensuing year: Mr. J. Blackburn Miller, President; Mr. G.

Muss-Arnolt, First Vice-President and Delegate to A. K. C.; Mr. John Hartmetz, Second Vice-President; Mr. C. H. Mantler, Secretary-Treasurer.

Mr. Emil de Fabry was elected a member of the club.

Al M. Cumming seems to have very hard luck with his dogs, having lost no less than seven broken dogs in three years by theft, poison or mysterious disappearance.

His latest misfortune was the loss of Sport, a dog owned by Dr. A. T. Derhy, a cross bred dog, but well broken for duck shooting.

A short time following, the poisoning of Sport's predecessor, Cumming's house was burglarized during his absence.

In the Fruitvale district, where Mr. Cumming resides, a number of dogs have been recently poisoned and also stolen.

The harlequin Great Dane Rex we noted last week has been purchased by Herman Oelrichs, Esq., the price paid is said to run to four figures.

On the 9th Rex served J. L. Cunningham's black and white bitch Carlotta (Duke-Juanita). This bitch was first winners, limit and open at the last spring show here.

At the last meeting of A. K. C. the matter of the P. K. L. communication was again taken up and transferred to the Coast Advisory Board, as will be seen from the following taken from the minutes of the meeting:

"Mr. Vredenhurgh—The Committee of the Whole begs leave to report that the communication from the Pacific Kennel League was considered, and that the Secretary of the American Kennel Club was directed to notify the Pacific Kennel League that the matter had been referred to the Pacific Advisory Committee of the American Kennel Club for its consideration, and to report its recommendations to the American Kennel Club.

It was moved and seconded that the recommendations of the Committee of the Whole be adopted.

Carried."

E. Courtney Ford's Pointer Boston served F. H. Bolter's bitch Bess (DuPont-Fay) this week. Boston is a dog brought here by James Cole last December. He is not only a good show dog but is a remarkably intelligent and well broken field dog.

Bess is a granddaughter of the old Champion Rip Rap on the dam's side, DuPont is a grandson of another great dog, Champion Glenbeigh.

We heard a statement this week made by a well known local sportsman to the effect that Marchand's Hydrozone was a sure cure for canker in a dog's ear. We know of the preparation and about some of its uses, for instance its antiseptic qualities, but its application for canker is a new one. Can any of our readers furnish some information on this point.

Hints to Dog Owners.

The very earliest question that the prospective dog breeder should put to himself is to ascertain definitely whether he proposes to try and make his kennel pay its way, or to merely keep his dogs as a hobby. If the latter is the case there is not much better advice for him than to engage the services of a competent and reliable man, and to place himself under his tutelage. This may not exactly be sport, but it will be expensive, which possibly may please a rich man equally well. Moreover, if he happens to be ambitious of seeing his name appearing prominently in print, and of being accepted as an authority upon a breed in record time, he cannot do better. His conscience may tell him that he really possesses no knowledge of the breed in which he has become famous; or there will be plenty of more or less disinterested friends to assure him to the contrary; so if his man is a clever one he is certain to be accepted as a judge within a few months of entering upon the pleasures of dog keeping.

It is not, however, this class of breeder that the writer is addressing. His object is to endeavor to assist the genuine dog lover on his entry upon the more or less thorny paths of the fancy. So many people, who would undoubtedly have developed into successful breeders and ornaments of the kennel world, fall out of the fight after a short experience of dog breeding and exhibiting, not because they are not good sportsmen, but simply for the reason that they made a bad start, that the above object is excusable, and an effort will be made to show how dogs can be made both pleasurable and profitable companions.

Having decided upon the course he intends to pursue, the huddling fancier will have to make up his mind seriously as to what variety he will bestow his attention upon. A common, very common, mistake is to undertake too much at first, and, therefore, if the beginner knows nothing or very little of dogs he should content himself with one-breed at first. Indeed, it is not very often that the amateur breeder succeeds in getting to the top of the tree in two or three breeds at the same time. Some people have achieved this feat, but they are usually experienced in the mysteries of the dog world, and in addition to possessing plenty of time to devote to their kennels, they not infrequently have been favored by good fortune.

There are one or two other points that will require much serious consideration on the part of the beginner. Conspicuous amongst these comes the question of the accommodation which can be provided for the dogs when they come. Some breeds must obviously require a great deal more room than others, and some varieties are extremely difficult to keep in ken-

nels which would be admirably adapted for the reception of a different breed. Then, too, there is the all-important matter of time to be gone into, for if the prospective exhibitor intends to attend to his dogs himself, or, at all events, supervise and take the direction of affairs into his hands, he must have some leisure to attend to his kennel. This is more particularly the case where an experienced kennelman is not engaged, as dogs which are not properly cared for cannot be expected to thrive, still less become either a credit or a profit to their owners.
